According to information provided by NAMSA, following are the annual totals of Turkish participation in NAMSA FMS cases for calendar years 1972-1976: 1972—$.1 million; 1973—$.4 million; 1974—$.5 million; 1975—$2.6 million; and 1976—$28.6 million. ("Participation" means the degree to which a specific FMS case has been or is intended to be used by NAMSA to fill a country requisition for brokerage requirements or anticipated stockage requirements based on empirical experience.) Of these annual totals, the following amounts were related to partnerships programs: 1972—$.1 million; 1973—$.1 million; 1974—$.4 million; 1975—$.6 million; and 1976—$1.2 million. NAMSA has advised that information on Turkish participation in NAMSA FMS cases for 1977 will not be available until early next year, when full 1977 country participation is known. We will provide you with this upon receipt.

In our view, unlike FMS transactions between the US and Turkey, FMS transactions between the US and NAMSA are technically not subject to the relevant provisions of PL 94-329, even though Turkey may purchase from NAMSA materiel or services included in these cases. From a legal standpoint, since NAMSA reserves the sole right to determine its sources of procurement, a NAMSA decision to procure through FMS cannot be equated with a Turkish decision to procure through FMS, and thus Turkish purchases from NAMSA of materiel or services of FMS origin should not be applicable to statutory FMS ceilings on Turkey. Also, to the best of our knowledge, and according to NAMSA, neither the US nor any other NATO country has ever placed any restrictions on purchases from NAMSA by NAMSO member nations.

In spite of the foregoing, we do see where FMS cases with NAMSA where Turkey purchases supplies or services not covered by a formal partnership agreement with other members could be construed as being inconsistent with the spirit of the statutory ceilings. Therefore, until such time as statutory provisions related to FMS transactions with Turkey are lifted, or otherwise revised, we are applying the following policy: (1) future FMS cases with NAMSA for Turkey which are not in support of existing partnerships under the NAMSO charter will be deducted from the FMS statutory ceilings in PL 94-329 and PL 95-92; and (2) the amount of Turkish participation in FMS cases in support of existing partnerships under the NAMSO charter will not be counted against the statutory ceiling. The anticipated significant effect that this policy will have on future Turkish purchases of FMS-origin materiel or services from NAMSA can be seen by comparing the annual totals of Turkish participation with the amounts related to partnership programs. At the same time, this policy avoids an adverse impact on NAMSA partnership programs, the core of the NAMSA efforts to help promote the readiness of NATO. For us to take any steps which might force a country out of a partnership would require the remaining partners to renegotiate the arrangement, leading to the possible dissolution of effective cooperative logistics efforts serving common goals. This would be contrary to our longstanding support of NAMSO, an organization which we inspired in 1958.

As a means to implement this new policy, we have asked NAMSA to identify the intended recipient of materiel or services in future requests for FMS cases. The US member on the NAMSO Board of Directors has also been instructed to scrutinize proposals for new partnerships, ensure that they meet the criteria normally applied, and to inform us if there is any question on that point.

Sincerely,

JAMES V. SIENA,
DASD, European NATO Affairs (ISA).

In addition to the above, the following users are supported for their specific requirements:
Major NATO commands for NATO Integrated Communication System.
COMIBERLANT (Commander Iberian Atlantic area) communication centre.
Northag (Northern Army Group) communication center.
NATO Programing Center.
CEOA (Central European Operating Agency), limited stockage of 8-in pipeline materiel.
NAMFI (NATO Missile Firing Installation), NAMFI instrumentation equipment.
USAF, specific overhaul/Iran.
NATO countries and/or organizations for all their brokerage requirements.

FOUR CASES UNDERWAY AGAINST ALLEGED NAZI WAR CRIMINALS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 25, 1977

Mr. EILBERG. Mr. Speaker, one of my major concerns as chairman of the House Judiciary Subcommittee on Immigration, Citizenship and International Law has been to find out why, for the past 30 years, our Government has built such a pathetic record in locating and bringing to justice Nazi war criminals who live in the United States.

Just recently, the U.S. Immigration and Naturalization Service scheduled deportation and denaturalization hearings against four alleged war criminals. I am hopeful that at long last, we are seeing the beginning of a real effort to root out these persons who have left such a terrible scar on mankind with their crimes against humanity.

Further, Mr. Speaker, I believe that actions against alleged Nazi war criminals should be carried out in full view of the American people. It was the Nazis, and it has been other totalitarian regimes, which operated behind closed doors. One of the hallmarks of our American system of government is that we operate out in the open, so that the whole world can see the way in which justice is administered fairly and fully.

In one of the current cases, in New York City, Federal District Judge Richard Owen summed it up quite eloquently in a ruling he made to open one case to the general public.

"The public," Judge Owen said, "should be able to see for itself that justice is being done."

I commend to the attention of my colleagues the following November 9, 1977 article from the New York Times, which describes Judge Owens' ruling:

BAN ON SPECTATORS AT ALLEGED NAZI'S HEARING UPSET

(By Arnold H. Lubasch)

An immigration judge's decision to bar the public from a deportation hearing for an alleged Nazi war criminal was overturned in Manhattan yesterday by Judge Richard Owen of Federal District Court.

"The public," Judge Owen said, "should be able to see for itself that justice is being done."

In a decision last month, Immigration Judge Francis J. Lyons excluded the public from the deportation hearing for Boleslavs Maikovskis, a 73-year-old Long Island man accused of having selected Jews for execution in Nazi-occupied Latvia in World War II.

The judge permitted the press to attend the hearing, but he barred the public to protect Mr. Maikovskis from possible "terrorists" or other dangers that he said might arise from the heated emotions generated by the case.

TWO CHALLENGE RULING

The exclusion of the public was challenged successfully in a suit filed by Bonnie Pechter and Larraine Schumsky, two Jewish Defense League members, who were represented by David Rudenstine of the New York Civil Liberties Union.

The deportation hearing, which remained in recess to await a "ruling on the public's exclusion, is expected to resume soon in a hearing room of the Immigration and Naturalization Service at 26 Federal Plaza in Foley Square.

"In this case," Judge Owen said in his 13-page decision, "Judge Lyons has taken the position that the public's right to know is adequately protected if the press is free to enter.

"However, in the ordinary case, just as the general public should not be required to rely upon the representations of the Government that a trial was fully and fairly prosecuted, so, too, it should not have to rely upon the representations of the press."

Judge Owen said that a move to exclude members of the public even for a valid reason, required a judge to take "only the most limited action necessary."

PROPER SECURITY POSSIBLE

Although Mr. Maikovskis may be in some danger, Judge Owen said, it is possible to assure "appropriate security" in the hearing room to provide adequate protection for him "without sacrificing the openness that is so fundamental to our system."

Judge Owen added that the Immigration Service, which did not support the immigration judge's decision to exclude the public, had assured him that it could guard the deportation hearing room with the same protective measures that used to prevent violence in Federal courtrooms.

Therefore, he concluded, Judge Lyons "abused his discretion" in barring the public from the hearing room in this case.

SWEDISH SICKNESS

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 25, 1977

Mr. BROWN of Ohio. Mr. Speaker, the country most often held up as a model by those who extol the virtues of the social welfare state is Sweden. There is now increasing evidence that social welfare brings "social malaise" and declining economic health. An excellent exposition on this theme is provided by columnist Leonard Silk in the following article from the New York Times, which I include here for the benefit of my colleagues:

[From the New York Times, Nov. 10, 1977]

THE "SWEDISH SICKNESS": GLOOMY ECONOMIC PICTURE

STOCKHOLM.—A prophecy that troubled economists and political leaders here three decades ago has finally come to pass. The warning was that the national goals of full employment, improved social programs, more equality in the distribution of income and rising living standards would all be undermined unless Swedish industry remained competitive in world markets.

At the end of World War II, the authors of a postwar program for Swedish labor were afraid that the prices of Swedish exports might go so high in relation to those of foreign competitors as to threaten unemployment in export industries and in import-competing industries as well. Similar developments in domestic versus foreign prices had caused Sweden's depressions in the early 1920's and in the early 1930's.

If that took place again, Sweden's postwar planners decided, it would be better to devalue the krona, rather than try to depress prices to world-market levels and depress employment in the process.

Curiously enough, the reverse situation proved to be the case after the war. Sweden's prices remained relatively stable, while prices in most other countries jumped. Consequently, Sweden did alter its exchange rate on July 5, 1946, but in the opposite direction, cutting the value of the dollar, the pound and most other foreign currencies by 14 percent.

The appreciation of the krona helped to keep Swedish inflation in check. And in the following years, with the strong growth of productivity, Sweden did not lose ground in foreign markets, vital to a country dependent on business abroad for about one-third of its national income.

But the vigorous productivity growth on which Sweden's price competitiveness rested has gradually eroded. Meanwhile wages and prices have marched upward inexorably, and the country's growth has halted.

An outstanding Swedish economist, Prof. Assar Lindbeck of the University of Stockholm, who is a Social Democrat in politics, believes that the root causes of the "Swedish sickness" are those against which Prof. Friedrich Hayek had warned during the Depression: that the welfare state, with its burgeoning social benefits and high taxation, would in the end arrest the dynamism of the economic system. But he does not think the threat is to democracy, as did Prof. Hayek, but to the "pluralism" of the society on which an effective economic performance rests.

Professor Lindbeck sees Swedish companies losing their innovativeness, and he believes that the United States, whose Government controls are less pervasive, and centralization is much less advanced, remains a more "adaptive" society.

Sweden's high rates of taxation are seen here—and not only by industrialists—as a major cause of the loss of initiative both on the part of business and individual workers as well. Marginal rates of taxation for typical workers with incomes of about $12,000 a year, exceed 70 percent. The nominal marginal tax

rate at that level of pay is 62 percent, but in addition workers who use above that level lose housing subsidies and extra allowances for their children's schooling, bringing the effective marginal tax rate above 70 percent.

The strong Swedish blue-collar and white-collar labor unions, to stay ahead of inflation and also to get a larger share of national income, obtained huge wage increases from employers in 1975 and 1976. The cumulative rise in wages in those two years came to 42 percent. This put intense cost pressure under Swedish prices and hurt their competitiveness in world markets.

To prevent businesses from failing, and unemployment from rising, the Swedish Government provided subsidies to many companies, in steel, mining, shipbuilding and textiles. And this week the Government announced plans to merge the country's biggest steel producers into one company in which the Government would have a half interest.

Granting subsidies to failing industries is not a guaranteed route to industrial verve. Nor does production without buyers constitute an unemployment solution that can last very long.

Officially, Sweden's unemployment remains less than 2 percent, but some economists figure that the true unemployment rate is more like 7 percent, if disguised unemployment, in the form of workers kept on private payrolls by Government subsidies, is taken into account.

Unemployment is particularly high in Sweden among the young and, as in Italy, is producing social malaise and resentment toward "the establishment," including the labor unions.

The new, relatively conservative Government headed by Prime Minister Thorbjörn Fälldin is no more willing than were the Social Democrats before him to let unemployment rise, as the price of bringing inflation under control.

Instead, it is following the old postwar Social Democrat prescription of devaluing the krona as a means of bringing down Sweden's export prices and improving the home market of Sweden's import-competitive industries. In two jumps this year, the Government has devalued the krona by 16 percent.

To counteract the effect on Swedish industry of higher import prices, Mr. Fälldin has announced abolition of the general payroll tax, with the first step cutting the tax from 4 to 2 percent, to be taken on Jan. 1, 1978. He also has announced plans to trim personal income taxes.

And to curb the inflationary impact of devaluation, prices were frozen until Oct. 31 of this year, but will be kept under "intensified surveillance from now on."

The Government, which in Sweden has hitherto stayed out of wage bargaining is now moving into the labor market.

Yet the rate of inflation remains high—about 13 percent.

Nor is there yet much evidence that Swedish economic growth is reviving. Sluggish world demand is helping to hold Sweden down. The country's real gross national product dropped 2 percent this year, and the National Institute of Economic Research forecasts that it will grow by a mere 1 percent in 1978—not enough to keep true unemployment from rising.

Sweden's balance of payments on current account is showing a deficit of $3.45 billion this year, and the Institute's forecast is that this deficit will rise about $300 million higher in 1978.

Swedish businessmen grow gloomy when they see their share of the world market shrinking. The reason, said the Prime Minister, is "not only higher labor costs per manhour but also a weak improvement in productivity." This, he added, "has to do with the fact that Sweden's technological lead in the world has been reduced; too few new enterprises have been established; and the technological renewal has not had the depth or the breadth it should have had."

When the salt has lost its savor, what will restore it? That's the problem worrying Swedes today, as they consider their lack of drive and their loss of innovation and industrial leadership.

SENATE—*Tuesday, November 29, 1977*

(Legislative day of Tuesday, November 1, 1977)

The Senate met at 1 p.m. and was called to order by Hon. PATRICK J. LEAHY, a Senator from the State of Vermont.

PRAYER

The Reverend Dr. Richard Lyon Stinson, rector, St. James' Episcopal Church, Mount Vernon, Va., offered the following prayer:

Almighty Father, we pause to acknowledge Your gracious presence among us, and to thank You for the beginning of another day in the service of You and of our fellow men. We ask that by Your grace, these Your servants, the Senators of this Nation, may be equipped for continuing their work for the common good of the people of this land and of the world. May Your great Spirit inspire and enlighten their minds, warm and enlarge their hearts, and stir up and direct their wills. May their lives and their work reflect an ever-growing sense of Your sovereignty and love, and may the people of our Nation, and the Members of this Senate rejoice in the words of the Psalmist, "Behold, how good and joyful a thing it is, for brethren to dwell together in unity." Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., November 29, 1977.

To the Senate:

Under the provisions of rule I, section 3 of the Standing Rules of the Senate, I hereby appoint the Honorable PATRICK J. LEAHY, a Senator from the State of Vermont, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. LEAHY thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that any previously unapproved portions of the Journal of the proceedings be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I now yield such of my time that he deems necessary to the distinguished Senator from Arkansas (Mr. BUMPERS).

Mr. BUMPERS. Mr. President, I thank the distinguished majority leader.

DEATH OF SENATOR JOHN L. McCLELLAN, OF ARKANSAS

Mr. BUMPERS. Mr. President, it is my sad duty to inform the Senate that Senator JOHN L. MCCLELLAN passed away Sunday night at his home in Little Rock, Ark. The Nation and the people of Arkansas have lost a distinguished statesman.

I suppose that the friendships which normally develop between members of any State delegation to Congress are special ones. It is easy to respect a man of Senator MCCLELLAN'S commitment and leadership. It becomes even easier when that man is as helpful and kind as JOHN MCCLELLAN was to me. When I came to the Senate in January 1975, Senator MCCLELLAN and his entire staff were extremely accommodating. Senator MCCLELLAN also was most helpful to me in connection with committee assignments.

A listing of his major achievements would be a monumental task. Yet, as an Arkansan and a colleague, I would like to mention a few of his accomplishments.

As chairman of the Subcommittee on Criminal Laws and Procedures, Senator MCCLELLAN was the guiding force behind every major piece of law enforcement legislation in the past decade. Even today, the Senate is considering another of his landmark bills, one that will revise and codify the entire body of Federal criminal law, S. 1437. Such an ambitious undertaking, never successfully carried out in the past, bears witness to JOHN L. MCCLELLAN'S uncompromising commitment to a secure and free society.

Senator MCCLELLAN'S contributions to this country were by no means limited to the law enforcement field. He played a major part in the establishment of programs to revitalize the Nation's rural areas and was active in congressional efforts to reorganize and streamline the Federal Government.

I will probably best remember his contributions as chairman of the Senate Appropriations Committee. He worked to insure the proper funding of energy, public works, and defense budgets while maintaining a hard line against wasteful spending.

His actions in other areas helped bring prosperity to his home State. He was instrumental in securing $1.2 billion for development of the Arkansas River navigation system. That system, which now

bears his name, has been a boon to the south-central region of the country, and will accommodate nearly 9 million tons of cargo this year.

Mr. President, this cursory review of what JOHN L. MCCLELLAN did for his State and his country cannot do full justice to his record. But, then, how can one properly summarize the contributions of a man who helped mold the Nation's policies for more than 35 years? Many men strive for eminence; JOHN L. MCCLELLAN achieved it. I am fortunate to have served with him.

I know all Senators and their wives join Mrs. Bumpers and me in expressing our profound sorrow to Mrs. McClellan and the other members of the Senator's family.

Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The legislative clerk read as follows:

S. RES. 328

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of the Honorable John L. McClellan late a Senator from the State of Arkansas.

Resolved, That the President of the Senate appoint a committee of which he shall be a member, to attend the funeral of the deceased Senator.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That when the Senate stands adjourned or in recess today, it do so as a further mark of respect to the memory of the deceased.

The ACTING PRESIDENT pro tempore. Without objection, the resolution is considered and unanimously agreed to.

Under the provisions of Senate Resolution 328, the Chair, on behalf of the Vice President, appoints the entire membership of the Senate as the committee on the part of the Senate to attend the funeral of the late Senator JOHN L. MCCLELLAN, of Arkansas.

Mr. BUMPERS. Mr. President, I send an additional resolution to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The assistant legislative clerk read as follows:

S. RES. 329

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay from the contingent fund of the Senate the actual and necessary expenses incurred by the Committee appointed to arrange for and attend the funeral of the Honorable John L. McClellan, late a Senator from the State of Arkansas, on vouchers to be approved by the chairman of the Committee on Rules and Administration.

The ACTING PRESIDENT pro tempore. Without objection, the resolution is considered and agreed to.

AN UNFORGETTABLE LIFE HAS ENDED

Mr. ROBERT C. BYRD. Mr. President, all the Members of the Senate and millions of Americans were saddened this week by the passing of the distinguished Senator from Arkansas, JOHN L. MCCLELLAN.

The Senate is an institution unique in human history. Among its membership over many generations have been numbered some of this Nation's greatest men. Each State has the opportunity to share with its sisters the best of its citizenry. In JOHN MCCLELLAN, Arkansas sent to this Chamber one of its indisputably finest sons.

Alfred Lord Tennyson, in eulogizing the Duke of Wellington, wrote that the path of duty was often the way to glory in the annals of English history. This is a recurring experience for all mankind, and Senator MCCLELLAN's example was a vivid confirmation of that truth.

JOHN MCCLELLAN spent more than half a century in public service to his community, State, and Nation. His sense of duty was innate. Throughout his career, the recognition, honor, and respect accorded him never diminished his commitment to the people of Arkansas, nor diverted him from the responsibilities that he had accepted in behalf of the citizens of the United States.

He never lost touch with his modest but honorable origins, nor betrayed the simple but noble code of values that had nourished his conscience and character as a youth. To know him was to have the privilege of a personal acquaintance with values that are foundational in American life. His integrity was legendary, and every man knew that his word was his bond. For him, right and wrong were objective realities, inherent and imbedded in the structure of life itself. Likewise, religious faith was a real and living matter that continually inspired and strengthened him.

Life was intensely personal for JOHN MCCLELLAN. Through his own joy and satisfaction, he understood the happiness of others; through his suffering and disquietude, he could also comprehend the pain and anxiety of his fellow man. This yielded in his heart a deep sense of compassion. He would have agreed with the poet Virgil, who said, "I have known sorrow and thereby have learned to aid the wretched." The tragedies that touched his life, through the loss of members of his own family, made him an even more valuable U.S. Senator and a deeply understanding friend.

His vision of America was basic and fundamental. Indeed, one might say that he was a keeper of the American dream and a guardian of our patriotic heritage, as he understood it. He believed that part of his responsibility was to enhance and preserve those standards that mark and promote decent and lawful relationships among people in civilized human society, and toward this end he worked tirelessly. For his investigations and exposures of crime and corruption in American life, every law-abiding citizen in this Nation owes JOHN MCCLELLAN a genuine debt of appreciation and gratitude.

JOHN MCCLELLAN was part of the life of each of us, and a vital part of the Senate. He has left a rich legacy by which to be remembered, which includes not only a treasury of accomplishments over the more than three decades that he served as a Senator, but the challenge of his character as well. We shall miss our friend and our colleague, and we shall never forget the contributions that he made to us as men and women and as Americans.

My wife, Erma, joins me in extending our deepest sympathy of Senator MCCLELLAN's gracious wife, Norma, and the members of their family in this time of sorrow.

Mr. President, I yield to the distinguished minority leader.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee.

TRIBUTES TO SENATOR JOHN L. MCCLELLAN

Mr. BAKER. Mr. President, the citizens of Tennessee and Arkansas share not only a common border on the Mississippi River, but also a number of similar traits and sentiments. Today, I know the most significant sentiment we share is our sense of loss and our abiding affection and deep respect for the late senior Senator from Arkansas, Senator JOHN MCCLELLAN.

Perhaps because he knew poverty, he strived more for success. And perhaps because he achieved success through sacrifice and diligence, he had more compassion than most for the efforts of others. But he knew no compassion at all for the efforts of organized crime or abuses within the labor movement. Throughout his congressional career, law and order was a top priority. His involvement in combating organized crime earned him the respect of the Nation and the reputation as the Senate's crime fighter.

JOHN MCCLELLAN spent over 40 years representing Arkansas in the House of Representatives and the Senate. His career was dedicated to representing his home State in the highest degree of public service and his constituents recognized his ability to represent them by voting his return to office for 6 terms. Only eight Members have ever served longer in the Senate.

Last week Senator MCCLELLAN announced his retirement, and it seems only fitting, therefore, that he was able to spend this one particular Thanksgiving at home in Little Rock receiving the accolades he had earned from the friends and constituents he had served for so many years. Somehow, I think Senator MCCLELLAN would have preferred to receive his final tributes in just that very manner.

Mr. President, we mourn his death in the Senate today, but rejoice in the prayerful hope that those penultimate days in Arkansas were among the most satisfying and justly rewarding of a long and devoted career.

Mr. THURMOND. Mr. President, will the distinguished Senator yield?

Mr. BAKER. Mr. President, I yield to the Senator from South Carolina.

The ACTING PRESIDENT pro tempore. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I shall not at this time attempt to pay tribute to our distinguished colleague who has just passed, the honorable JOHN

L. McCLELLAN, of Arkansas, except to say that the Senate has lost one of its ablest and most distinguished Members, a man of character, a man of courage, a man of capacity, and a man of compassion. He will be truly missed.

Our Nation is indebted to the great State of Arkansas for sending this able man here to represent that State and our country.

I extend my deepest sympathy to his beloved widow and to the members of the McClellan family.

JOHN L. M'CLELLAN—1896–1977

Mr. RIBICOFF. Mr. President, it was with deep sorrow that I learned of the death of JOHN L. McCLELLAN, the distinguished senior Senator from Arkansas. He was my colleague and friend and I will miss him very much. Mrs. Ribicoff and I extend our most heartfelt sympathies to Senator McCLELLAN's widow, Norma, and to other members of the family.

Senator McCLELLAN was a giant in the Senate. He was such a major voice in Congress, for so many years, that it is difficult to imagine the Senate without him.

Plagued by tragedy in his personal life, including the untimely deaths of his three sons, JOHN McCLELLAN was a complex, compassionate main, outspoken, unwavering and courageous in support of his own strongly held beliefs, yet fair, impartial and judicious in his desire to let every Senator have his say.

JOHN McCLELLAN was a legend for stamina, dedication, legislative genius, and intelligence. This body is diminished by his passing.

First elected to the Senate in 1942 after two terms in the House of Representatives, Senator McCLELLAN won national attention for his work in carrying out the legislative investigative oversight function.

Few Senators in American history shaped and exercised the congressional investigative process as effectively as did Senator McCLELLAN.

As chairman of the Senate Government Operations Committee and its Permanent Subcommittee on Investigations from 1955 to 1973 and as chairman of the Select Committee on Improper Activities in the labor or management field from 1957 to 1960, Senator McCLELLAN was a tenacious, energetic, and responsible investigator.

Because of the decisive role he played in the continuing inquiries of the Permanent Subcommittee on Investigations, the subcommittee came to be known simply as the McClellan committee, an unofficial but appropriate title reflective of the strong and effective leadership Chairman McCLELLAN provided.

When, in August of 1972, he became chairman of the Senate Appropriations Committee, Senator McCLELLAN brought to his new position the same qualities of dedication to duty and a high sense of responsibility.

JOHN McCLELLAN was a fine chairman of the Appropriations Committee, presiding over the Senate appropriations process in a very competent, even-handed and fair manner.

His service on the Senate Judiciary Committee was also outstanding. He was chairman of two of its subcommittees—the Subcommittee on Criminal Laws and Procedures and the Subcommittee on Patents, Trademarks, and Copyrights.

From his Subcommittee on Criminal Laws and Procedures, Senator McCLELLAN was working hard and effectively to revise and reform title 18 of the United States Code.

This effort to improve the Federal criminal justice system will be noted as one of JOHN McCLELLAN's most important contributions to the Nation.

Trying to reconcile the often sharply differing views of other Senators on how best to achieve reform of Federal criminal law, Senator McCLELLAN tirelessly pursued the goal of more coherent and comprehensive statutes and, one day, when reform is achieved it will be, in large measure, due to Senator McCLELLAN's leadership, his enthusiasm for attaining this much needed goal and his willingness to accommodate the wishes of Senators with dissimilar views.

As a leading advocate of improved law enforcement, Senator McCLELLAN played a preeminent role in winning congressional approval for many significant laws and programs.

These include the landmark Omnibus Crime Control and Safe Streets Act of 1968 and 1970; the Organized Crime Control Act of 1970; and a series of other laws relating to drug abuse and the rehabilitation of drug addicts.

In 1976, Congress enacted the first complete revision of the U.S. copyright laws since 1909, a measure which Senator McCLELLAN supported.

Always striving to improve Government efficiency and eliminate wasteful practices in Federal programs, Senator McCLELLAN was a member of the Hoover Commission and drafted many of its recommendations to reorganize the executive branch.

Accordingly, he sponsored the bill which created the General Services Administration and was the principal author of the Federal Property and Administrative Services Act of 1949, under which billions of dollars worth of surplus Federal property has been donated to the States for health and educational purposes.

It was in his role as the Senate's most assertive investigator that many millions of Americans will remember him most vividly.

Senator McCLELLAN's record in investigative work will probably never be rivaled. It has been estimated that from 1955, when he became chairman of the permanent Subcommittee on Investigations, he conducted 2,803 hours of hearings over 831 hearing-days and received testimony from 3.283 witnesses.

Under Senator McCLELLAN's leadership, some of the most significant investigations since World War II were conducted.

These included investigations into corruption and criminal activities in the labor-management field; organized crime; the TFX aircraft contract; the failure of a number of banks insured by the Federal Deposit Insurance Corporation; the theft of securities from brokerage houses, insurance companies, banks, and registered mails and the traffic in these securities; profiteering in defense contracts for missile procurement; and urban riots.

In 1969, 1970 and 1971, I worked closely with Senator McCLELLAN when he appointed me acting chairman of the Investigations Subcommittee in our examination of allegations of misuse of non-appropriated funds in military installations in the Republic of Vietnam and elsewhere in Southeast Asia and the black market in currency in Vietnam.

In the Vietnam inquiry, as well as other investigations I participated in as a member of the committee, Senator McCLELLAN was a good chairman, receptive to the views of other members and determined to see that each inquiry and hearing was conducted in a professional manner and according to the subcommittee's established rules of procedure.

Senator McCLELLAN insisted that all aspects of any investigation he chaired be conducted according to proper procedures. He knew instinctively that a fundamental principle of sound congressional inquiry is proper procedure and he would not tolerate procedural sloppiness.

A summary of the work of the permanent Subcommittee on Investigations under Senator McCLELLAN, including the labor-management inquiry, was prepared by the subcommittee staff shortly before the Senator gave up the chairmanship when he became Appropriations Committee chairman.

Mr. President, I ask unanimous consent that excerpts from this summary be printed in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

EXCERPTS

Senator McClellan has been Chairman of the Senate Permanent Subcommittee on Investigations since January of 1955, and was concurrently Chairman of the Senate Select Committee on Improper Activities in the Labor or Management Field during the period 1957–1960. During his years as Chairman, the Subcommittee has conducted 106 separate series of hearings in which 3,204 witnesses testified during 805 bearing days which encompassed 2,729 hours of hearings. Unofficial staff study indicates that no other chairman of a Congressional investigating committee in the history of the United States Congress has approached Senator McClellan's records for length of tenure, number of investigations, hours and days of hearings, number of witnesses heard, and other statistical factors.

This memorandum does not purport to summarize the 106 investigations. Rather, it compiles certain nationally significant and far-reaching results and accomplishments of Senator McClellan's chairmanship. Each item is limited to a sentence or two. Further, not all results and consequences are included, by any means. To prepare a comprehensive and accurate listing of all results of Subcommittee and Select Committee hearings would keep a qualified staff person busy for a month or two and the ensuing report might total 100 pages.

In certain Subcommittee investigations, results were achieved without the necessity for public or executive hearings. These are included in the following compilation.

RESULTS OF INVESTIGATIONS DURING SENATOR M'CLELLAN'S CHAIRMANSHIP

1955

After the investigation of the Army service of Irving Pereas, the U.S. Army took 19 cor-

rective measures on dealing with security cases.

After the investigation of the Domestic Grain Bin Program, the Department of Agriculture and the Naval Inspection Service undertook 21 corrective measures.

In the Military Textile Procurement fraud case, the Subcommittee's investigation led to Federal recovery of hundreds of thousands of dollars, the dismissals of two Army, one Navy and one Treasury employee, the resignation of an Air Force officer, the suspension of 12 persons and corporations from doing Government business, and the debarment of two corporations. New procurement procedures saved the Government large sums of money.

In the Pakistan Grain Elevator case, the Subcommittee's inquiry resulted in savings to the Government of about a million dollars.

In conflict of interest cases, Harold E. Talbott resigned as Secretary of the Air Force and Hugh W. Cross resigned as Chairman of the Interstate Commerce Commission.

1956

Further hearings on Military Textile Procurement resulted in tightened regulations by the Pentagon and the savings of many hundreds of thousands of dollars. Nine former Government employees and contractors were indicted for conspiracy to defraud the Government. Six were convicted in 1957.

The Subcommittee initiated a major study of the adequacy of existing law governing labor unions and their pension and welfare funds.

1957

The Subcommittee's investigation into a conflict of interest situation involving Robert Tripp Ross, Assistant Secretary of Defense for Legislative and Public Affairs, resulted in his resignation.

Hearings on supply excesses and waste in the Northeast Air Command resulted in Air Force corrections which saved large sums of Federal funds.

As a direct result of the Subcommittee's study of labor racketeering, the Senate established the Senate Select Committee on Improprieties in the Labor or Management Field (hereinafter called the Labor Rackets Committee.)

The Internal Revenue Service opened numerous tax cases to recover large sums of unpaid taxes from labor union leaders, including Dave Beck ($320,000) and Frank Brewster of the Teamsters. Dave Beck, former President of the Teamsters, was convicted of larceny by embezzlement, as a result of disclosures by the Subcommittee.

1958

An investigation of the Civil Air Patrol resulted in the recovery of money embezzled by one of its officers and new Air Force regulations were formulated to provide audits for the CAP.

A Subcommittee investigation resulted in strengthened security measures by the Air Force Technical Information Agency, after documents had been purloined by an employee.

Robert A. McDonald, Deputy Assistant Secretary of Defense, resigned as a result of a Subcommittee inquiry into a conflict of interest.

Four corrupt officials of the Butchers Union resigned as a result of Subcommittee disclosures. Four corrupt officials of the Hotel & Restaurant Workers Union resigned as a result of the Subcommittee's hearings.

Numerous tax cases were opened in 1958 against labor leaders who were subjects of hearings of the Labor Rackets Committee.

1959

The investigations of the Labor Rackets Committee were largely responsible for the enactment of the Labor Management Reporting and Disclosure Act of 1959.

The Chairman was the author of "A Bill of Rights for Labor," which is Title I of the Labor Management Reporting and Disclosure Act.

Other overall results of activities of the Labor Rackets Committee:

1. The Teamsters and other unions were expelled from the AFL–CIO.

2. The AFL–CIO adopted a "Code of Ethics for Labor."

3. IRS made recoveries of unpaid taxes from many labor leaders.

4. Corrupt labor leaders by the dozens resigned from their positions.

5. Corrupt labor leaders by the dozens were indicted, convicted and sent to prison following the Subcommittee's disclosures.

6. Organized crime's role in labor racketeering first came to national attention.

7. Reform movements led by honest members swept many unions free of corruption and criminal practices.

8. The effects of the Labor Rackets Committee's investigations carried through subsequent years.

In 1959, the Subcommittee on Investigations exposed waste, inefficiency and laxity of management in the Foreign Aid Program in Bolivia.

The Subcommittee's study of procurement of Naval Aviation spare parts in Philadelphia led directly to contract terminations which saved $2 million.

The National Stockpile Program security procedures were tightened as a result of a Subcommittee investigation.

The Subcommittee's disclosures of corruption resulted in further debarments from Government business in the textile field.

Subcommittee investigation of shipments abroad of household effects by the State Department resulted in a new system of competitive bidding and savings of at least $200,000 annually by the State Department.

1960

The National Lead Co. sold nickel products owned by the U.S. Government to foreign countries on behalf of the U.S. Government, contravening Federal policy. The sales stopped after the Subcommittee's inquiry.

The U.S. Army rescinded contract awards for water purification plants when the Subcommittee disclosed that the lowest responsible bidder had been denied the contracts.

The Welfare and Pension Plans Disclosure Act was enacted by the Congress, as a direct result of the hearings of the Labor Rackets Committee.

1961

The Subcommittee investigated charges of bribery and corruption relating to the Military Sea Transportation Service. These were the results: (1) the Navy revised its filing and contract procedures; (2) several Navy employees resigned and one was dismissed; (3) the Navy barred certain contractors from future business; (4) two IRS agents resigned; (5) IRS instituted several tax cases.

The Subcommittee's investigation of work stoppages at missile bases brought these results: (1) an immediate sharp decrease in man-days lost; (2) the formation of the Missile Sites Labor Commission; (3) revision of labor practices to eliminate waste and featherbedding.

The first important group of statutes dealing with organized crime were the direct result of the Subcommittee's hearings on organized crime and gambling in 1961. The new laws, sometimes known as the "interstate racketeering" statutes, provided: (1) prohibition of interstate transfer of wagering information; (2) prohibition of interstate transportation of gambling equipment; (3) prohibition of interstate and foreign travel or transportation in aid of racketeering enterprises. These laws have been used to convict many organized crime figures.

1962

A very important Subcommittee case was "Pyramiding of Profits and Costs in the Missile Procurement Program." Briefly, the investigation showed that companies acting as "weapons systems managers" were generating profits on costs incurred by all subcontractors, and that the sub-contractors were generating profits on their sub-contractors, so that Western Electric, for example, was taking profits on Douglas Aircraft work, while Douglas was taking profits on the work of its numerous sub-contractors. The Defense Department took these actions, among others, as results of this case: (1) early procurement of sub-systems by the Government directly; (2) effective and timely use of incentive contracts; (3) realistic bases for the establishment of fees and profits for work performed by the prime contractor.

In the Billy Sol Estes hearings, relating to cotton allotments, the Department of Agriculture was shown to be suffering from disorganization, indecision, inefficiency, and complacency in areas in which Estes conducted his business enterprises. Numerous reforms were instituted by the Department. Estes was indicted, tried, convicted, and served a prison term.

Evasion of income tax and social security laws, coercion, prostitution, and other crimes were shown to exist within the purview of the entertainment union, the American Guild of Variety Artists. Actions by the Immigration Service and the Internal Revenue Service followed the Subcommittee's hearings, and, as a result of the investigation, the union leadership was supplanted by a reform movement of high-principled persons in the entertainment business.

1963

The testimony of Joseph Valachi, in the "Valachi hearings," provided the nation with its first comprehensive picture of the inner workings of organized crime in the organization commonly known as the Mafia, called "Cosa Nostra" by Valachi. The results of the hearings are so numerous and intricate that they cannot be listed here at length, but in general terms, law enforcement agencies throughout the nation received extremely important information about practices, policies, structure and operations in organized crime. An important result of the Valachi hearings was the introduction by the Chairman of a number of bills aimed at organized crime and its operation. While these bills were not acted upon immediately by the Congress, it is significant to note that most of their provisions, as amended and improved, are integral parts of the Chairman's crime legislation in the late 1960's and in 1970, which is now the law of the land. For example, the immunity law and the wiretapping law first came to national public attention as legislative proposals in the Valachi hearings.

The TFX investigation was opened in 1963. It was one of the most important cases ever undertaken by the Subcommittee. Ultimate results will be summarized in this memorandum as they occurred in subsequent years.

1964

In a series of hearings related to the Valachi hearings of the previous year, the Subcommittee disclosed the international narcotics traffic, from the poppy fields of Turkey and Burma to the "pusher" on the streets of our cities. The Subcommittee's report was termed "the most significant document of its kind" by former Narcotics Commissioner Harry Analinger.

The Chairman announced that the total amount of tax loss to the Federal Government disclosed in hearings of the Subcommittee and the Labor Rackets Committee was more than $29 million. He stated that the money, according to IRS, has been recovered or was in the process of recovery. In the case of one labor leader (Dave Beck) the total recovery was $352,000. The total of $29 million was many times the total combined budgets of the Subcommittee and the Select Committee for the 10 years of the Chairman's

tenure at that time. Further, the Chairman announced that in the Military Sea Transportation Service case alone, the Government had recovered almost $4 million.

1965

In the hearings on Federally insured banks in 1965, the Subcommittee, by disclosing many questionable practices in the banking industry and in the Federal agencies governing banking, affected many changes of procedure and policy relating to the nation's banks and brought about immediate policy revisions by both the banks and the agencies. A considerable number of persons were convicted of crimes relating to banks following disclosure of their activities by the Subcommittee.

The Subcommittee's investigation of the activities of George Barasch and his cohorts in Teamsters Local 815 and the Allied Trades Council, in New York, brought the return to the welfare funds of the unions of approximately $4 million which Barasch had transferred to overseas "educational" foundations over which he had sole control.

The Subcommittee once again entered the matter of work stoppages at missile bases, which had once more started to increase sharply in the years since the first hearings on this matter. With further public hearings in the offing, the labor leaders involved took action within their unions, and the work stoppages again declined.

1966

The investigation of small business investment companies (Small Business Administration) showed that administration had been lax, abuses existed, and SBA could not tell how much it stood to lose in such investment loans. In one instance, the Subcommittee information enabled the SBA to recover $400,000 that it might otherwise have lost. As a result of the investigation, SBA policies and procedures were completely revised in the investment program, and other corrective actions were taken.

Labor racketeering in New York was a Subcommittee subject; strikes by captive unions were arranged by labor consultants and then the labor consultants stepped in to settle the strikes for a fee. Jack McCarthy, head of the two labor consultant firms involved, subsequently went to prison as a result of conviction for criminal activity first disclosed by the Subcommittee.

The Subcommittee was directly responsible for the recovery of $246,000 misused in a Federal housing project in New York.

As a result of the Subcommittee's banking hearings in 1966, the Congress enacted into law the Financial Institutions Supervisory Act of 1966, which embodied a number of the recommendations made by the Subcommittee's report of those hearings.

As a result of the Subcommittee's hearings on narcotics traffic in 1964, the Congress enacted the Narcotics Rehabilitation Act of 1966, which contained a number of provisions recommended by the Subcommittee's report of those hearings.

1967

In 1967, the Subcommittee staff made a comprehensive study of urban riots which is considered the most complete factual accounting of statistical data compiled before or since relating to the disorders.

In 1967, 1968, and 1969, the Subcommittee's hearings on riots and campus disorders furnished the most complete record that has been made of the turbulence and devastation that swept the country in the late 1960's.

On July 14, 1967, Senator McClellan chaired an Appropriations Committee hearing on the Navy version of the TFX—the F–1119. The Chairman and the Investigations Subcommittee staff worked for weeks to provide precise and thorough data on the technical deficiencies of the Navy plane. The documented record was a principal factor in the action of the Congress later in 1967 in denying the Navy's original request for $208.8 million for the F–1113, and in reducing it instead to $147.9 million with the stipulation that the carrier suitability of the aircraft had to be proved before the production program began. Since the Navy plane was cancelled the following year, the reduction, directly related to this Subcommittee's disclosures of the technical problems of the F–1113, represented a direct saving to the taxpayers of about $61 million.

Legislative proposals relating to small business investment companies which were first generated by the Subcommittee's hearings in that field in 1966, were enacted into law in 1967.

The Subcommittee's hearings on the Agency for International Development (AID) program in Vietnam led directly to the elimination of shipments of worthless and unnecessary products to Vietnam and to drastic revision of AID procedures for funding its commodity program.

About $250,000 was recovered by AID from American pharmaceutical firms as a result of the Subcommittee's investigation.

In 1967, a Subcommittee inquiry into the award of an Air Force contract for computers at a price of $114 million, resulted directly and immediately in the withdrawal of the award, new bidding, and another award totalling only $60 million for the same computers. Thus the Subcommittee saved the taxpayers $54 million.

In 1967, the Renegotiation Board ordered Western Electric Co. (Pyramiding of Profits investigation of 1962) to return $7.9 million in excessive profits as a result of the Subcommittee's disclosures.

1968

The Subcommittee discovered and disclosed evidence of fraud and forgery in the operation of an OEO grant of almost $1 million to two Chicago street gangs. As a result of the Subcommittee's hearings, the OEO announced that it would fund no more such programs. Subsequently, 23 members of the Blackstone Rangers, a Chicago street gang, were indicted for fraud and forgery.

During 1967 and 1968, the Subcommittee cooperated closely with other committees of the Senate and the House of Representatives on the F–111 program. When the Navy version of the plane was canceled in 1968, the contributions of the Subcommittee, derived from one of the most thorough and painstaking investigations ever conducted, were instrumental and helpful to the deliberations which led to the decision to cancel the Navy program. The cancellation saved about $2.5 billion and considerable time in the development of a new Navy plane. The Subcommittee's work was a primary instrumentality in the cancellation which effected those savings.

As a further consequence of the Subcommittee's hearings on AID programs in Vietnam, the agency made a considerable number of changes to its regulations and administrative policies. In the matter of recoupment of funds, AID estimated that it would seek to recover about $2 million from pharmaceutical firms.

Through Chairman McClellan's work over a period of years, the Omnibus Crime Control and Safe Streets Act of 1968 was enacted by the Congress. Certain of the provisions of this act were first recommended to the Congress in the Subcommittee's reports on Organized Crime and Narcotics Traffic, issued in 1965.

1969

As a result of the Subcomittee's Vietnam investigations, the Army's Criminal Investigation Division (CID) was completely reorganized for more adequate operation.

Major General Carl Turner, former Provost Marshal of the U.S. Army, resigned from his position as Chief Marshal of the United States when it became apparent that he had dealt illegally in certain firearms. He was indicted, convicted, and imprisoned as a result of information developed in the Subcommittee's investigation.

1970

In 1970, after 8 years, the TFX investigation came to its end in a series of important hearings. Senator McClellan had proved that the Subcommittee's inquiry into the program was not only justified but essential in view of the mistakes made by the Department of Defense. He was proved correct during the hearings of 1970.

A Subcommittee staff study, introduced in evidence in the 1970 hearings on bombings and terrorism, was the first comprehensive compilation of national data relating to the proliferation of bombings and attacks upon law enforcement officers during recent years.

1971

The Subcommittee's multi-year investigation of Military Club Fraud and Currency Manipulations, under the acting chairmanship of Senator Ribicoff by direction of the Chairman, was completed in 1971. A large number of results of this case already are apparent. There were so many direct results, as a matter of fact, that in its forthcoming report, the Subcommittee lists 60 of them, comprised principally of: administrative and regulatory actions by the armed forces; tax actions; criminal indictments and convictions; resignations and dismissals of military officials and civilian personnel; debarments from doing business with the Federal Government; banning of slot machines from military posts, and restructuring of certain activities of the armed forces, including centralization of procurement for nonappropriated fund activities. All of these results stem from the Subcommittee's investigation.

A few specific examples taken from the 60 detailed in the Subcommittee's report are:

1. An order for regular audits for clubs and messes.

2. A large number of criminal and civil tax investigations conducted by IRS of persons involved in the case.

3. The exchange rate for Vietnamese currency was revised to eliminate the black market in Military Payment Certificates.

4. The Army's CID was centralized in the Pentagon.

5. Slot machines were banned throughout the world by the Air Force, and from Vietnam by the Army.

6. Passage by the Congress of the Financial Recordkeeping and Currency and Foreign Transactions Reporting Act of 1970, deterring use of secret foreign bank accounts for illegal purposes.

7. Formation of a U.S. task force to help the Vietnamese fight the black market in currency.

The Subcommittee's investigation of organized crime's role in the stolen securities field has already resulted in the tightening of security at airports against thefts of registered mail; a Department of Justice study of appropriate legislative suggestions which would be designed to deter the traffic in stolen securities; suspension of a judge in New York; the first use of the new immunity statute in Congressional hearings.

Since Senator McClellan assumed chairmanship of the Subcommittee in 1955, a current total of 128 persons who were involved in investigations conducted by the Subcommittee have been convicted of crimes related to the matters investigated by the Subcommittee.

SENATOR JOHN M'CLELLAN

Mr. DOLE. Mr. President, the people of Arkansas and the Members of the U.S. Senate lost a valued friend and dedicated public servant when our colleague JOHN MCCLELLAN passed away.

For half a century, JOHN MCCLELLAN served his State and Nation as a World War I military officer, prosecuting attorney, Member of the U.S. House of

Representatives, and for the past 35 years, as U.S. Senator. JOHN MCCLELLAN was an articulate advocate for the people of his State and for the principles in which he believed. As chairman of the Permanent Investigations Subcommittee, he courageously sought out crime and corruption during the 1950's. And, as chairman of the Senate Committee on Appropriations, he has been a constant voice for fiscal responsibility.

A Member of this body since 1943, his achievements will not soon be forgotten. However his many years of service did not diminish his willingness to listen to the views of younger Members. Coming to this Chamber as a freshman Senator in 1969, I noticed very early in my own Senate career that he was always extremely courteous and solicitous of the views of everyone.

Courteous, hard working, dignified—a true legislative giant—Senator MCCLELLAN was the picture of what the Senate should be. His tolerance for the views of others, including newcomers, was only one example of his style and demeanor.

His industriousness, his dedication to principle, and his leadership will be sorely missed. I join all of my colleagues in the Congress in expressing condolences to his wife, Norma, and his entire family.

Mr. HATHAWAY. Mr. President, the death of a man makes us pause, remember, and then, mindful of the fleeting way of life, resolve to redouble our efforts so as to accomplish all that we may in the time allotted to us.

Our late colleague, JOHN MCCLELLAN, was one of the giants of the Senate, and the occasion of his passing is a profound moment for the Members of this body.

JOHN MCCLELLAN'S achievements are legion. Known especially well for his leadership in the investigation into organized crime, Senator MCCLELLAN'S contributions to the fight against all crime and for better laws have made the United States a safer place in which to live and work.

As chairman of the Senate Appropriations Committee, JOHN MCCLELLAN'S activities touched the lives and institutions of every American living today. And part of JOHN MCCLELLAN'S legacy to us is found there—with the American people.

It is also found in his contributions to the strength and stability of our Republic and its Senate.

Most remarkable, of course, is the fact that the laws and institutions of our country are even stronger than the men and women who run them, even when the void left by the death of a man of JOHN MCCLELLAN'S stature is as large as it is.

But that phenomenon of our country confers a unique opportunity on those who serve it in the U.S. Senate. Where the institution is sound, all one's efforts may be directed to its improvement and for the public good. And in his long term of service in the Senate, JOHN MCCLELLAN gave unstintingly of himself for the benefit of Arkansas and the Nation.

He leaves the Nation a better, stronger place; and we shall miss him.

Mr. TALMADGE. Mr. President, I deeply regret the untimely and tragic passing of JOHN MCCLELLAN, the distinguished senior Senator from Arkansas. I extend my heartfelt sympathy to Mrs. McClellan and all the family.

I will miss JOHN MCCLELLAN as a good friend. He will be missed in Congress as an outstanding U.S. Senator for more than three decades. He will be missed as a great American and a fine man.

Senator MCCLELLAN served his State and Nation in the House of Representatives as well as the Senate. He was a man of hard work and leadership which characterized his entire life. He had a distinguished career in law and was admitted to the Arkansas bar in 1913 at the age of 17, the youngest lawyer in the United States at that time. He served some 2 years in the U.S. Army and following his discharge in 1919 began pursuing a political career and served for 4 years as a district prosecuting attorney. He was first elected to the U.S. House of Representatives in 1935 and to the Senate in 1942. His Senate record is one of leadership and great accomplishment. He was chairman of the Committee on Government Operations for 22 years and currently served as chairman of the important Appropriations Committee.

As chairman of the Senate Permanent Subcommittee on Investigations for almost 20 years, Senator MCCLELLAN conducted some of the most important and significant investigations in the Nation's history. He was almost universally respected for his thoroughness and fairness.

The Senate and the Nation owe JOHN MCCLELLAN a debt of gratitude. As the history of the Senate and the United States is written, he will be accorded a place of prominence and his memory always will be honored.

I join the Senate in mourning his passing.

Mr. HANSEN. Mr. President, the United States of America has lost one of its truly dedicated and effective legislative leaders with the death of the distinguished Senator from Arkansas, Mr. MCCLELLAN.

His valued and valuable leadership will be deeply missed in the U.S. Senate. I will miss him as a valued friend who was a model of personal integrity and ethical behavior. His guidance will be difficult to replace.

There is a highly significant list of achievements surrounding JOHN MCCLELLAN'S 50 years of legislative activity, almost 40 of which were in the U.S. House of Representatives and the U.S. Senate.

Besides his outstanding performance as chairman of the Senate Appropriations Committee, his work on the permanent Subcommittee on Investigations of the Government Operations Committee in the late 1950's as it related to the probe of racketeering in organized labor meant a great deal to the citizens of our country.

As chairman of the Senate Judiciary Committee's Subcommittee on Criminal Laws and Procedures, Senator MCCLELLAN worked unceasingly on the revision of our statutes having to do with our criminal laws. The first enactment of this legislation, after so many years of effort, will stand as a fitting monument to JOHN MCCLELLAN'S legislative skills and powers of persuasion.

Yet, despite the tremendous breadth and scope of Senator MCCLELLAN'S accomplishments over his nearly 40 years in the U.S. Congress, perhaps the true measure of his greatness was his honesty, his integrity, his warmth, and his loyalty.

There is a story often told of the time in his youth when JOHN MCCLELLAN was playing for the Sheridan, Ark., baseball team. Leading 4–3 in the bottom of the ninth inning with two out, Senator MCCLELLAN'S team was in the field when a runner attempted to steal third. The umpire signaled that JOHN MCCLELLAN had tagged the runner out. Yet JOHN MCCLELLAN knew better. He told the umpire that he had missed, the runner was safe. The other team went on to win the game.

This is the man I knew as the senior Senator from Arkansas. His accomplishments loomed large in every area he touched. Yet his character was always larger still.

Mr. President, it was just 1 week ago that JOHN MCCLELLAN announced he would not be a candidate for reelection in 1978. Because his announcement, made in Little Rock, Ark., tells us so much about the man, because it evokes much of his inner strength and steadfastness of purpose, I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the announcement was ordered to be printed in the RECORD, as follows:

POLITICAL ANNOUNCEMENT OF SENATOR JOHN L. MCCLELLAN

(Monday, Nov. 21, 1977, Little Rock, Ark.)

We are told by Divine authority: "To every thing there is a season, and a time to every purpose under the heaven: . . ."

This all-inclusive pronouncement, when translated and made applicable to politics, means that there is a proper time to aspire, a time to achieve, and a time to retire.

Upon the expiration of my present term in the United States Senate, January 3, 1979, I will have served fifty years—half a century—in public office, including forty years in the Congress—thirty-six years in the Senate and four in the House of Representatives.

Thus, I have been privileged to serve longer in the Congress of the United States than anyone else from Arkansas. Out of some 1,700 Senators in the history of our Nation, when my term expires only four of them will have served longer than I have. In light of these achievements, and other prevailing factors, I have concluded that the "season" for my retirement from public office is at hand. I, therefore, shall not seek reelection.

To emphasize the full implication of this action I am taking, I should like to paraphrase from the refrain of one of Stephen Foster's popular sentimental folk songs of many years ago—a song entitled "Uncle Ned." By this formal announcement today, I hang up the fiddle and the bow of political ambition; and at the end of my present term in the Senate, I shall lay down the shovel and the hoe of all public responsibilities.

These many years of public service have been arduous, difficult, and challenging, but the opportunities they afforded me and the honors they conferred have indeed been abundantly rewarding and highly gratifying. All of my political ambitions have been fully achieved—they have been extended and satisfied far beyond my earliest aspirations and expectations.

So, to the people of Arkansas, to all of those who have so faithfully supported and reposed their confidence in me throughout the years, I am deeply grateful; and, all of my family join me in expressions of profound thanks and appreciation.

And, I gratefully acknowledge the devotion, the courage, and the wise counsel of my wife, Norma, who has constantly been to me a helpful, comforting, and sustaining influence in the pursuit of my political goals and in the performance of all my official duties.

And, to my staff of competent, dedicated, and loyal men and women who have so faithfully served and assisted me in my office and on committees during my Senate career, I am deeply indebted and grateful.

Politics is a rugged and exacting occupation. It is one of contest, contention, and controversy. In the course of political campaigns, verbal blows are sometimes struck and other actions taken that inflict emotional injuries which often fester and linger far too long after the campaign has ended.

But, notwithstanding the turbulence and sometimes harshness of political life, when I finally retire I expect to do so with malice in my heart towards no one; but with charity for all.

A TRIBUTE TO SENATOR JOHN M'CLELLAN

Mr. DECONCINI. Mr. President, it is with great sadness indeed that we mark the passage of a great man from our midst. Senator JOHN MCCLELLAN died in his sleep Monday night.

He had been seriously ill in recent months, but his influence on all of us—most notably in the codification of Federal criminal law—was as strong and as vigorous as ever. His qualities of mind and character which gave special distinction to his many years of service to the American people are all too rare. Our Nation—indeed, any nation—can ill-afford the loss of a statesman of his caliber. His leadership, his unflinching devotion to the public good, and his unstinting hard work have been an inspiration to every Member of this Congress.

Those of us who were privileged to know him as a colleague and a friend mourn not only the passing of a statesman, but the passing of a genuinely decent and fair-minded man. As a freshman Senator, I had the good fortune to serve on two committees with JOHN MCCLELLAN. I thus had an extraordinary opportunity to learn firsthand what effective legislative leadership demands. His performance as chairman of the Appropriations Committee and ranking member of the Judiciary and Governmental Affairs Committees set a standard of excellence and dedication that few will ever equal. He was always generous with advice and counsel, especially to a newer Member, and ready to lend a helping hand.

The people of Arizona owe Senator MCCLELLAN a special debt. His years of friendship with former Senators Hayden and McFarland enabled our State to receive the Federal assistance that has been so vital to our economic development, particularly in the area of water resource development. Senator MCCLELLAN extended the same hand of friendship to me, and continued his efforts on behalf of Arizonans to the very end.

Words are never sufficient to describe or do proper honor to a man whose contributions span many decades and touch so many areas of our national life. His impressive legislative achievements will stand as both monument and testimony to his indominatable will and outstanding character. The Senate and the American people have lost a friend and a leader.

TRIBUTE TO SENATOR M'CLELLAN

Mr. HATCH. Mr. President, I join my colleagues in expressing deep personal sorrow at the passing of our friend and colleague Senator JOHN L. MCCLELLAN.

While I did not know Senator MCCLELLAN as long or as well as many who have been here for a longer time, his passing is particularly painful for me. As a freshman Senator, I was privileged to serve with him on the Senate Judiciary Committee where he befriended me immediately and spent many of his valuable hours educating me in the ways of the Senate. He instilled in me an uncompromising sense of respect for the Senate as a public institution which he loved and held sacred for his 35 years of service to the Nation. Our relationship was in essence that of a mentor-student, where the wise and experienced professor takes a fledgling under his wing to provide direction and guidance. JOHN MCCLELLAN was in all ways a "professor emeritus" who represented, under all circumstances, the best and noblest traditions of the Senate.

I can think of no finer tribute that could be paid to him than to say that I for one will remember him and his work throughout my lifetime and view his achievements in this body as a benchmark of excellence which I will strive to emulate in my career in the Senate.

Mr. KENNEDY. Mr. President, it is with great sadness that I join my colleagues this afternoon in paying tribute to one of our finest friends and colleagues. The death of JOHN MCCLELLAN deprives the Senate, the Nation, and the people of Arkansas of a great and devoted public servant. He graced this Chamber for 35 years. He taught us all by his example, by his unsurpassed integrity, and by the skill and dedication with which he pursued the deep convictions he held and the causes he served.

He was a Senator of large achievements. For many years, as chairman of the Government Operations Committee and then of the Appropriations Committee, he held two of the most powerful positions in the Senate. His racketeering and organized crime investigations were historical milestones in the Senate and the Nation. As chairman of the Criminal Laws Subcommittee, he was responsible for all the landmark anticrime legislation of the past two decades. He was also a dedicated servant of the people of Arkansas, and the successful passage of the Arkansas River navigation project was a tribute to his legislative skill and to his concern for the State he loved.

I have known and respected JOHN MCCLELLAN as an outstanding colleague and leader since I was first elected to the Senate in 1962. For the past 15 years we have served together and worked closely together on the Senate Judiciary Committee. No person I have ever known had a greater love or respect for the law than JOHN MCCLELLAN.

Over the past 3 years, I have especially enjoyed the extremely close friendship that we developed in working together on the Criminal Laws Subcommittee on the legislation to reform the Federal Criminal Code. The result of that effort is now pending on the Senate Calendar as S. 1437. the newest measure on our calendar, and one of the most important pieces of legislation that our Judiciary Committee has ever sent to the Senate floor.

I had hoped JOHN would be here on the floor to guide this bill through the Senate debate, as he skillfully guided so many other measures during his long career. But he will be with us in spirit, and as Attorney General Bell noted yesterday, its passage will be a monument to his leadership in making possible this essential and long overdue reform of the Federal criminal laws.

In closing, I would add that my brothers, Jack and Bob, both had great affection and respect for Senator MCCLELLAN. Jack served with him on the Permanent Subcommittee on Investigations in the 1950's, when Senator MCCLELLAN, as chairman, rescued the subcommittee from the morass of the McCarthy years and turned it into a superb and now legendary investigating subcommittee.

My brother Bob was a staff counsel on the subcommittee under Senator MCCLELLAN. In the acknowledgments to Bob's book, "The Enemy Within," he paid tribute to the chairman in these words:

> To Senator McClellan, for whom I have worked for seven years and for whom I have the greatest affection and admiration, I am extremely grateful. For his courage, understanding, perseverance and patience, under the most trying circumstances, the people of this country owe him a great debt.

JOHN MCCLELLAN lived by those virtues all his life. Throughout the half century of his brilliant career in public service, he stood as a pillar of the finest American tradition of service to the people of his State and Nation. His name will always be linked with some of the most important legislative achievements of the past four decades. The memory of his integrity and commitment will remain in the minds of all of us who were privileged to know him and to serve here with him. He is one of the finest Senators Arkansas ever had, and I will miss him as a colleague and a friend.

Mr. MATHIAS. Mr. President, I know that every Member of the Senate is both shocked and saddened by the news of the death of Senator MCCLELLAN. He brought to the Senate an extraordinary and pragmatic ability. He was a practical man, a man of commonsense. In a way, he viewed his own situation with the same kinds of objectivity and pragmatism that he brough to judgment of public affairs.

Several months ago I met him in one of the corridors of the Capitol and asked him how he was feeling.

He said, "Well, to tell you the truth the old machine is just worn out."

Of course, I attempted to persuade him otherwise. He said, "No, that is the case."

Unhappily, time has proven that on that question, as on so many other questions, JOHN MCCLELLAN was right.

But it was that ability of his to look at facts, to look at events, which all of us could see, but to look at them in a way that he could make judgments and draw conclusions that not all of us have been able to do.

He had clarity of vision. That clarity of vision, I believe, brought him to a high degree of personal humility and modesty.

I served with him on both the Judiciary Committee and the Appropriations Committee. I had many occasions to consult with him about matters of committee business. He was often very urgent in his desire to have a committee reach a decision and conclude the necessary public business, but he had a clear sense of what his role was.

He would often say, "Well, I have no stake in this." In fact, sometimes, I suspect with undue modesty, he would disclaim expert knowledge of the subject. But he would insist that the committee's work be done, that the committee not be contentious, that the public welfare should not suffer because of unnecessary disputes within the committee, between members of the committee.

So, Mr. President, I know I join with every other Member of the Senate in expressing a deep sense of loss at the death JOHN MCCLELLAN, a sense of gratitude for the fact that, during his long service in the Senate, he contributed so much in such a unique way; and a sense of sympathy for his family, who, I know, feel even more keenly the sense of shock and loss that we all suffer today.

FUNERAL ARRANGEMENTS FOR WEDNESDAY AND EXPRESSION OF EULOGIES ON THURSDAY

Mr. ROBERT C. BYRD. Mr. President, the Senate, according to the schedule announced a few days ago, was going to be in tomorrow. Out of further respect to the memory of our late departed colleague, Mr. MCCLELLAN, when the Senate completes its work today, it will go over until Thursday.

Members and wives attending Senator MCCLELLAN'S funeral will leave the Capitol tomorrow at 10 a.m. and will leave Andrews Field at 10:45 a.m.

The funeral will be conducted at 2 p.m. in Little Rock, Ark., after which the Members will return to Washington and should arrive at Andrews at about 7:30 p.m.

The Senate on Thursday will conduct some business. Members may express eulogies on Thursday.

And for the information of the Senate at this time I announce that on Thursday there will be time set aside for eulogies, at the close of which eulogies I should seek unanimous consent that the RECORD be kept open for 10 days so that Senators who may not be here Thursday may be accorded the privilege of expressing eulogies and then that those eulogies will all be compiled together in a single bound volume and printed as a Senate document.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business to accommodate Senators who may wish to speak on various and sundry matters and that statements made during that period not exceed 5 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Is there morning business?

PEACE IN THE MIDDLE EAST

Mr. BAKER. Mr. President, I was pleased to learn that the administration intends to accept the invitation of President Sadat to participate in the discussions to be held in Cairo this weekend. It is altogether fitting and proper that the United States, which for so long has carefully nurtured the trust and respect of the states involved in the conflict, support without reservation the attempts of at least two of the parties to begin the process toward peace.

After nearly 30 years of rhetoric, formulas, preconceived ideas and nonnegotiable demands, the events of the past 2 weeks and the forthcoming discussions in Cairo offer an opportunity of historic proportions. We can have nothing but praise and admiration for President Sadat's bold initiatives and Prime Minister Begin's equally bold receptiveness. By simply deciding that the only way to begin was to begin, they have made a stunning contribution to the prospects for peace.

Mr. President, with the foreknowledge of our Department of State, I communicated to representatives of both the Governments of Egypt and Israel my admiration and enthusiasm for their leaders and for the brave and courageous efforts of their Governments.

I encourage the administration to provide every assistance to the Governments of Israel and Egypt in their attempt to negotiate in a meaningful and constructive fashion the beginnings of peace in the Middle East. I would hope that the United States is making every effort to encourage those who have refused President Sadat's invitation to Cairo to reconsider and to take advantage of the opportunity he has offered.

In any event, Mr. President, the discussions in Cairo offer a fascinating project; for even if Israel and Egypt are the only confrontation states who attend, whatever progress is made there will be ample demonstration of the futility of continuing the rhetoric of confrontation or further radicalization of the Arab world.

Mr. President, I commend President Carter, Secretary Vance, and all those involved for agreeing to attend the meeting in Cairo and offering this Government's support of those efforts of two brave and courageous countries to find peace in that troubled part of the world.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. I wish to associate myself with the remarks just made by the distinguished minority leader. I too want to commend the administration for its decision to have representation at the upcoming meeting in Cairo.

I also want to associate myself with the remarks of the distinguished minority leader in commending President Sadat and Prime Minister Begin on the courageous, bold developments that have occurred as a result of the actions of President Sadat in going to Israel, and Prime Minister Begin in receiving President Sadat so graciously.

I feel that President Sadat's visit was a historic one and, indeed, it may, and hopeful will, open up the way for further negotiations leading to a Geneva conference.

In the final analysis, the parties have to get together and talk to one another, and I think that is the credo which guided President Sadat and Prime Minister Begin in the meetings which were held in Israel.

Finally, I join with my friend from Tennessee in expressing the hope that the other Arab countries, especially those that have expressed opposition to the meeting in Cairo and to the previous meeting in Israel, will think again and will come to different conclusions and, in the final analysis, will throw their support behind this effort which is important not only to the Arab countries and to Israel but to the future peace of the world.

Mr. BAKER. Mr. President, I thank the majority leader for his additional remarks.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. BAKER. I would be happy to yield.

Mr. SCOTT. Mr. President, we have had the majority leader and the minority leader expressing their personal views with regard to the Middle East, but somehow I feel that when we have them speaking as they did today with regard to this specific question, even though the matter is not before the Senate, that they were speaking for the membership of the Senate because I believe all of us want to see a peace, a just peace, in the Middle East.

So I would commend our leadership for the statements they have just made.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

Mr. BAKER. I thank the distinguished Senator from Virginia for his generous remarks.

Mr. President, I have no further use of my time during the morning hour.

The ACTING PRESIDENT pro tempore. Is there further morning business? The Senator from Virginia.

SENATOR SCOTT'S TRIP TO SOUTHERN ASIA

Mr. SCOTT. Mr. President, a few days ago a comic strip, the "Wizard of Id," showed a reporter seeking an interview with the King of Id who told his knight to tell the reporter that he had gone fishing. The knight protested that the King could not just leave the reporter waiting, alleging that he would get angry, that he would make up all kinds of stories and insinuations; that he would castigate the King and would rip him apart. The King said, "So let him." But the knight fell to his knees, crying on behalf of his Sovereign and the King patted him on the head and said, "There, there, kid, freedom of the press is not a pretty thing."

Now Mr. President, this cartoon was

intended to be humorous but it does have a degree of truth; and that perhaps adds to the interest.

Only recently I returned from a trip to Southern Asia and learned of the denunciation and misrepresentation of the trip by some of the media. It would appear that because they did not know all of the facts, the worst possible assumptions were made. Some repeated untrue or distorted allegations from the past by young reporters attempting to gain recognition by sensational statements.

The trip was authorized by Senator EASTLAND, not in his capacity as chairman of the Judiciary Committee but as President pro tempore of the Senate. It related to investigating allegations that the Soviet Union might seek to realize its long held desire for a warm water port by fomenting trouble in the Pakistan/Afghanistan area to gain direct access to the Indian Ocean.

In my judgment, the visit was highly successful. Not only did I confer with the Defense Minister and Acting Secretary of Foreign Affairs in India but with the Presidents and principal Ministers and Secretaries in both Pakistan and Afghanistan. They were advised that my visit was factfinding only and that the information would be made available to the Armed Services Committee in closed session. Of course their confidence must be respected.

Mr. President, circumstances have dictated my traveling abroad more this year than usual. However, since election to Congress in 1966, I have made a total of 10 official trips abroad. These 10 visits in 11 years have sometimes been exaggerated by adding together all of the countries visited, and a serious trip made subject to ridicule, with the headline, "Senator Scott To Conquer Khyber Pass."

The facts are, Mr. President, that I had no intention of traveling through this pass when the visit was authorized; but one of our Ambassadors suggested the 200- to 300-mile trip by automobile rather than air, knowing it to be the most direct land route between the capitals of Pakistan and Afghanistan, where I met with officials and also believing it would add to my knowledge of the northern portions of the two countries.

Perhaps I should add, Mr. President, that most of the trip was on C–141 cargo planes, on regular schedules, loaded with freight, although seats were placed in the front portion of the plane for a number of individuals. The Department of the Army is to let me know the fare allocated for my wife, and I will, of course, forward a check for that amount when a statement is obtained. I have already paid her fare for the portion of the trip by commercial aircraft. No staff member or military escort accompanied me.

It appears that there is an abundance of criticism of congressional travel although we are called on to pass on a $400 billion annual budget while Cabinet officers and sub-Cabinet officials may travel with large staff contingents and even send an advance limousine to be available for their use at their destinations generally without adverse comment from the press.

Of course, Mr. President, under our system the press has a right to report facts and to make fair comment. But, in my judgment, it has no right to make and repeat untrue statements; or without knowledge of the facts to subject elected officials to contempt and ridicule. I agree with the King of Id—freedom of the press, as used by some segments, is not a pretty thing. Without infringing on first amendment rights, the media might do some self-examination to avoid excesses while continuing to inform.

The ACTING PRESIDENT pro tempore. Is there further morning business?

COMMITTEE MEETING

Mr. ROBERT C. BYRD. Mr. President, this request has already been cleared on the minority side. I ask unanimous consent that the Subcommittee on Improvements in Judicial Machinery of the Committee on the Judiciary be authorized to meet during the session of the Senate today, to conduct hearings on the bankruptcy reform bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar under "New Reports."

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will state the first nomination.

Mr. BAKER. Mr. President, before the clerk reports, if the majority leader will permit me, I might say that the items under "New Reports" for the judiciary and Department of Justice are cleared on this side, and we have no objection to their confirmation.

Mr. ROBERT C. BYRD. I thank the minority leader.

THE JUDICIARY

The assistant legislative clerk read the nomination of Monroe G. McKay, of Utah, to be a U.S. circuit judge for the 10th circuit.

THE JUDICIARY

Mr. HATCH. Mr. President, I am pleased to again express my unqualified support for the nomination of Prof. Monroe G. McKay, of Provo, Utah to be a judge on the U.S. 10th Circuit Court of Appeals to fill the vacancy created by the retirement of Chief Judge David T. Lewis.

I have been personally acquainted with Monroe McKay since the days when we both attended Brigham Young University as undergraduates. I am also familiar with his many noteworthy accomplishments which have distinguished him as a student, as a practicing attorney, and as a law professor. He has already rendered impressive service to his community, his country, and his church, and he is a devoted husband and father of seven children.

I am confident that Monroe McKay has the capacity to excel on the Federal bench just as he has in every area in which he has been involved. From law school days as managing editor of the University of Chicago Law Review, through a clerkship with the Arizona Supreme Court followed by private practice, through a stint as director of a Peace Corps contingent in Africa, to his present assignment as a law professor at Brigham Young University's J. Reuben Clark Law School, Monroe McKay has exhibited the highest personal and professional qualities. He brings to the bench a standard of ethics and morality that is above reproach. He has a reputation of being truly selfless; and, while he is certainly very able in his own right, he also has that ability to bring out the best in his associates. These fine qualities will be put to good use by Mr. McKay as a member of the Federal judiciary.

I enthusiastically support this nomination and commend this distinguished nominee to my colleagues. He will provide great strength to the already distinguished bench of the 10th judicial circuit in the tradition of the well-respected Chief Judge David T. Lewis who has so ably represented Utah on the court for more than 20 years.

Thank you, Mr. President.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEPARTMENT OF JUSTICE

The assistant legislative clerk read the nomination of Herman Sillas, Jr., of California, to be U.S. attorney for the eastern district of California.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT RECEIVED DURING RECESS

Under authority of the order of November 4, 1977, the Secretary of the Senate on November 22, 1977, received messages from the President of the United States submitting sundry nominations which were referred to the Committee on the Judiciary.

Under authority of the order of November 4, 1977, the Secretary of the Senate on November 23 and November 28, 1977, received messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(For nominations received on November 22, November 23, and November 28, 1977, see the end of the proceedings today.)

MESSAGES FROM THE HOUSE

At 2:40 a.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 8422) to amend titles XVIII and XIX of the Social Security Act to provide payment for rural health clinic services, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 417. A concurrent resolution commending Anwar el Sadat, the President of Egypt, and Menachem Begin, the Prime Minister of Israel;

H. Con. Res. 418. A concurrent resolution directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 8422; and

H. Con. Res. 419. A concurrent resolution directing the Clerk of the House of Representatives to make technical corrections in the enrollment of H.R. 7345.

At 3:30 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has agreed to Senate Concurrent Resolution 26, expressing the sense of Congress that action should be taken to focus national attention on the extent and consequences of and the need to find a cure for amyotrophic lateral sclerosis.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 8159) to establish uniform structural requirements for intermodal cargo containers, subject to the jurisdiction of the United States, designed to be transported interchangeably by sea and land carriers, and moving in, or designed to move in, international trade, and for other purposes.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 7) to authorize a career education program for elementary and secondary schools, and for other purposes.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H.R. 9418) to amend the Public Health Service Act to require increases in the enrollment of third-year medical students as a condition to medical schools receiving capitation grants under such act, and for other purposes; agree to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. STAGGERS, Mr. ROGERS, Mr. PREYER, Mr. SCHEUER, Mr. WAXMAN, Mr. CARTER, and Mr. BROYHILL were appointed managers of the conference on the part of the House.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following communications, which were referred as indicated:

EC-2321. A communication from the Chairman, Indian Claims Commission, transmitting, pursuant to law, a report in docket No. 226, Caddo Tribe of Oklahoma, et al., Plaintiff, v. The United States of America, Defendant (with an accompanying report); to the Committee on Appropriations.

EC-2322. A communication from the Administrator, Rural Electrification Administration, Department of Agriculture, reporting, pursuant to law, approval of an REA insured loan in the amount of $14,905,000 to Sunflower Electric Cooperative, Inc., of Hays, Kansas, for the financing of certain transmission facilities (with accompanying papers); to the Committee on Appropriations.

EC-2323. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), reporting, pursuant to law, on construction projects to be undertaken by the U.S. Army Reserve (with accompanying papers); to the Committee on Armed Services.

EC-2324. A communication from the Assistant Secretary of Defense, reporting, pursuant to law, contract award dates for the period November 15, 1977 to February 15, 1978 (with accompanying papers); to the Committee on Armed Services.

EC-2325. A communication from the Director, Defense Security Assistance Agency, and Deputy Assistant Secretary (ISA), Security Assistance, transmitting, pursuant to law, information concerning the Department of the Army's proposed letter of offer to Germany for defense articles estimated to cost in excess of $25 million (with accompanying papers); to the Committee on Armed Services.

EC-2326. A communication from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, a report on "Health Consequences of Smoking" (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC-2327. A communication from the Chief Commissioner, U.S. Court of Claims, transmitting, pursuant to law, a report concerning the allowance of attorney expense claims in proceedings conducted pursuant to the act in docket No. F-15, Davis, Wright, Todd, Riese & Jones (with an accompanying report); to the Committee on Energy and Natural Resources.

EC-2328. A communication from the Acting Assistant Secretary of the Interior and the Acting Deputy Assistant Secretary of Agriculture, relating to recommendations for livestock grazing fees on lands administered by the Forest Service and the Bureau of Land Management; to the Committee on Energy and Natural Resources.

EC-2329. A communication from the Secretary of Commerce, transmitting, pursuant to law, a report on "Ocean Dumping Research," January through December 1976 (with an accompanying report); to the Committee on Environment and Public Works.

EC-2330. A communication from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, agreements other than treaties entered into by the United States (with accompanying papers); to the Committee on Foreign Relations.

EC-2331. A communication from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, agreements other than treaties entered into by the United States (with accompanying papers); to the Committee on Foreign Relations.

EC-2332. A communication from the Chairman, Board of Foreign Scholarships, transmitting, pursuant to law, a report on exchanges (with an accompanying report); to the Committee on Foreign Relations.

EC-2333. A communication from the Acting Assistant Administrator for Legislative Affairs, Agency for International Development, Department of State, transmitting, pursuant to law, the second semiannual report (with an accompanying report); to the Committee on Foreign Relations.

EC-2334. A communication from the Administrator, General Services Administration, transmitting a draft of proposed legislation to establish the Federal Information Centers (with accompanying papers); to the Committee on Governmental Affairs.

EC-2335. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the five service academies, a followup report (with an accompanying report); to the Committee on Governmental Affairs.

EC-2336. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "Uranium Enrichment Policies and Operations: Status and Future Needs" (with an accompanying report); to the Committee on Governmental Affairs.

EC-2337. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "An Evaluation of the Use of the Transfer Income model—TRIM—To Analyze Welfare Programs" (with an accompanying report); to the Committee on Governmental Affairs.

EC-2338. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on Department of Defense consideration of West Germany's Leopard as the Army's new main battle tank (with an accompanying report); to the Committee on Governmental Affairs.

EC-2339. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "The Navy's Multimission Carrier Airwing—Can The Mission Be Accomplished With Fewer Resources?" (with an accompanying report); to the Committee on Governmental Affairs.

EC-2340. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "FBI Domestic Intelligence Operations: An Uncertain Future" (with an accompanying

report); to the Committee on Governmental Affairs.

EC–2341. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "Department of Defense Value Engineering Program Needs Top Management Support" (with an accompanying report); to the Committee on Governmental Affairs.

EC–2342. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "Sharing Cardiac Catherization Services: A Way to Improve Patient Care and Reduce Costs" (with an accompanying report); to the Committee on Governmental Affairs.

EC–2343. A communication from the Acting Director, Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a report on "Presidential Advisory Committee Recommendations," November 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2344. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a secret report on the threat of Soviet chemical attack, readiness of U.S. forces to defend themselves, and costs associated with an adequate defense (with an accompanying report); to the Committee on Governmental Affairs.

EC–2345. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "Air Force Maintenance Depots—The Need for More Responsiveness to Mobilization as Well as Peacetime Efficiency" (with an accompanying report); to the Committee on Governmental Affairs.

EC–2346. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "Cost-of-Living Adjustments for New Federal Retirees: More Rational and Less Costly Processes Are Needed" (with an accompanying report): to the Committee on Governmental Affairs.

EC–2347. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "Finding Out How Programs Are Working: Suggestions for Congressional Oversight" (with an accompanying report); to the Committee on Governmental Affairs.

EC–2348. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a list of reports of the General Accounting Office for the previous month (with an accompanying document); to the Committee on Governmental Affairs.

EC–2349. A communication from the Inspector General, Department of Health, Education, and Welfare, transmitting, pursuant to law, the second quarterly report, July 1, 1977–September 30, 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2350. A communication from the Administrator, National Aeronautics of Space Administration, reporting, pursuant to law, on the number of individuals in each General Schedule (GS) grade (including those in the GW category) employed on September 30, 1976, and September 30, 1977, by the National Aeronautics and Space Administration under chapter 51 and subchapter I'II, chapter 53 of 5 U.S. Code (formerly Classification Act of 1949, as amended); to the Committee on Governmental Affairs.

EC–2351. A communication from the Deputy Assistant Secretary of the Interior, transmitting, pursuant to law, a negative annual report on disposal of foreign excess property for the Department of the Interior for fiscal year ending September 30, 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2352. A communication from the Administrator, National Aeronautics and Space Administration, transmitting, pursuant to law, a report of positions established during the fiscal year ending September 30, 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2353. A communication from the Director, Hoover Institution on War, Revolution, and Peace, transmitting, pursuant to law, a report of expenditures from July 1, 1976, to September 30, 1977 (with an accompanying report); to the Committee on Human Resources.

EC–2354. A communication from the Acting Executive Secretary, Department of Health, Education, and Welfare, transmitting, pursuant to law, a report of final regulations for student consumer information services (title IV, part F, subpart 1 of the Higher Education Act of 1965, as added by Public Law 94–482) (with an accompanying report); to the Committee on Human Resources.

EC–2355. A communication from the Executive Secretary, Department of Health, Education, and Welfare, transmitting, pursuant to law, final regulation for career education and career development programs (Education Amendments of 1976, Public Law 94–482, title III, part C, sections 331–335) (with an accompanying document); to the Committee on Human Resources.

EC–2356. A communication from the Executive Secretary, Department of Health, Education, and Welfare, transmitting, pursuant to law, a report on "Program of Research Grants on Organizational Processes in Education, National Institute of Education—Final Regulations" (with an accompanying report); to the Committee on Human Resources.

EC–2357. A communication from the Executive Secretary, Department of Health, Education, and Welfare, transmitting, pursuant to law, a report on final regulation for training for higher education personnel, section 153 of the Education Amendments of 1976 (with an accompanying report); to the Committee on Human Resources.

EC–2358. A communication from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, a report on the "Supply and Distribution of and Requirements for Nurses" (with an accompanying report); to the Committee on Human Resources.

EC–2359. A communication from the Under Secretary of the Interior, transmiting, pursuant to law, a proposed plan for the use and distribution of Three Affiliated Tribes of Fort Berthold Reservation Judgment Funds in dockets 350–C and D before the Indian Claims Commission (with accompanying documents); to the Select Committee on Indian Affairs.

EC–2360. A communication from the Executive Secretary, National Music Council, transmitting, pursuant to law, an audit report for the National Music Council for the fiscal period ending April 30, 1977 (with an accompanying report); to the Committee on the Judiciary.

EC–2361. A communication from the Secretary of Commerce, transmitting proposed legislation to amend the fee provisions of the U.S. patent and trademark laws (with accompanying papers); to the Committee on the Judiciary.

EC–2362. A communication from the Chairman, Administrative Conference of the United States, transmitting, pursuant to law, Recommendation 77–1: Legislative Veto of Administrative Regulations (Adopted September 15–16, 1977) (with accompanying documents); to the Committee on the Judiciary.

EC–2363. A communication from the Chairman, Federal Election Commission, transmitting, pursuant to law, correspondence which it has sent to the Office of Management and Budget (with an accompanying document); to the Committee on Rules and Administration.

EC–2364. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on "Examination of Financial Statements, Government Printing Office, Fiscal Year 1976" (with an accompanying report); to the Committee on Rules and Administration.

EC–2365. A communication from the Under Secretary of Defense, Research and Engineering, transmitting, pursuant to law, the report of the Department of Defense Procurement from Small and Other Business Firms for October 1976–May 1977 (with an accompanying report); to the Select Committee on Small Business.

PETITIONS

The ACTING PRESIDENT pro tempore laid before the Senate the following petitions, which were referred as indicated:

POM–408. A resolution adopted by the City of Cleveland, Ohio, relating to Penn Central's offer of a settlement on accrued taxes due to the City of Cleveland and requesting the Federal Government to secure the bonds issued by the successor corporation to Penn Central; to the Committee on Banking, Housing, and Urban Affairs.

POM–409. A resolution adopted by the City of Cleveland, Ohio, relating to the regulatory, investigative, and enforcement actions under the Trade Act of 1974, and to preserve the domestic steel industry; to the Committee on Finance.

POM–410. A resolution adopted by the Eastgate Development and Transportation Agency, State of Ohio, urging a national steel policy; to the Committee on Finance.

POM–411. A concurrent resolution adopted by the Legislature of the State of Michigan; to the Committee on Human Resources:

"SENATE CONCURRENT RESOLUTION No. 239

"Whereas, Many of the citizens of Michigan are employees as defined by the National Labor Relations Act and, as such, are entitled to all the rights and protection spelled out in that Act as the public policy of the United States; and

"Whereas, That policy, adopted forty-two years ago, is to encourage "the practice and procedure of collective bargaining . . . by protecting the exercise by workers of full freedom of association, self-organization, and designation of representatives of their own choosing, for the purpose of negotiating the terms and conditions of their employment or other mutual aid or protection"; and

"Whereas, Fulfillment of that guarantee has become diluted by rulings, delays, and appeals so as to give limited value to legal rights of workers; and

"Whereas, The National Labor Relations Board which administers the labor law is confronted by a mounting backlog of unheard cases which limits its effectiveness; and

"Whereas, President Jimmy Carter has urged Congress to enact a series of labor law reforms that spell out a sound and sensible reorganization and streamlining that would restore the Wagner Act's promise and guarantee of prompt and predictable treatment under law; and

"Whereas, Legislation that embodies the President's labor law reform package is now before both houses of Congress, H.R. 8410 by Representative Frank Thompson, Jr., of New Jersey, and S. 1883 by Senator Harrison A. Williams of New Jersey and Senator Jacob K. Javits of New York; and

"Whereas, Prompt consideration and passage of President Carter's labor law reform package is in the interest of every citizen of this State; now, therefore, be it

"Resolved by the Senate (the House of Representatives concurring), That the Mich-

igan Legislature urgently requests that the Congress of the United States approve S. 1883 and H.R. 8410, President Carter's labor law reform; and be it further

"Resolved, That copies of this resolution be transmitted to the President and Vice-President of the United States, and to the President of the Senate, the Speaker of the House of Representatives, and to each member of the Michigan delegation to the Congress of the United States."

PETITIONS TO REPEAL THE WITHHOLDING TAX LAW

Mr. BAKER. Mr. President, I have received petitions requesting repeal of the Federal withholding tax from five of my constituents, Mr. Frank Gentry, Mr. Ed Moore, Dr. Joe Chambers, Mr. Jim McMackin and Mr. Kent Roller. These Tennesseans have requested that I present their petitions to the Senate, and I now submit them for appropriate referral.

The ACTING PRESIDENT pro tempore. The petitions will be received and appropriately referred.

POM-412. A petition seeking repeal of the withholding tax law; to the Committee on Finance.

POM-413. A petition seeking repeal of the withholding tax law; to the Committee on Finance.

POM-414. A petition seeking repeal of the withholding tax law; to the Committee on Finance.

POM-415. A petition seeking repeal of the withholding tax law; to the Committee on Finance.

POM-416. A petition seeking repeal of the withholding tax law; to the Committee on Finance.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. RIBICOFF, from the Committee on Governmental Affairs; unfavorably, without amendment:

S. Res. 293. A resolution disapproving Reorganization Plan Numbered 2 (together with additional views) (Rept. No. 95-606).

ENDANGERED SPECIES AUTHORIZATIONS—CONFERENCE REPORT (REPT. NO. 95-607)

Mr. CULVER, from the committee of conference, submitted a report on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973, which was ordered to be printed.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. BAKER (for Mr. HANSEN):

S. 2328. A bill to amend Private Law 95-21 to make a technical correction therein; considered and passed.

By Mr. HANSEN:

S. 2329. A bill to amend the Fort Laramie National Monument Act; to the Committee on Energy and Natural Resources.

By Mr. McGOVERN (for himself and Mr. ABOUREZK):

S. 2330. A bill to name a certain Federal building in Huron, South Dakota the "Hubert H. Humphrey Building"; to the Committee on Environment and Public Works.

By Mr. DOMENICI:

S. 2331. A bill to amend the Act entitled "An Act to promote the development of Indian arts and crafts and to create a board to assist therein, and for other purposes", approved August 27, 1935; to the Select Committee on Indian Affairs.

By Mr. STONE:

S. 2332. A bill to permit the Department of Transportation to proceed with a highway project in Lee County, Florida, without regard to section 106 of Public Law 89-665 or procedures developed under section 1(3) of Executive Order No. 11593; to the Committee on Energy and Natural Resources.

By Mr. BURDICK:

S. 2333. A bill for the relief of James Edward Slowey, Carole Anne Slowey, and Christopher James Slowey, Elaine Margaret Slowey, and Carole-Ann Slowey; to the Committee on the Judiciary.

By Mr. PROXMIRE:

S. 2334. A bill for the relief of Hessameddin and Tajolmolouk Ziaian; to the Committee on the Judiciary.

By Mr. DOLE:

S.J. Res. 100. A joint resolution to authorize and request the President to issue a proclamation designating December 1, 1977, as "National Quiet Day"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HANSEN:

S. 2329. A bill to amend the Fort Laramie National Monument Act; to the Committee on Energy and Natural Resources.

Mr. HANSEN. Mr. President, I introduce legislation today to revise the boundaries of Fort Laramie National Monument and also change its name.

Fort Laramie National Monument was established by Presidential proclamation on July 16, 1938. A later act of Congress revised the boundary and changed the name to Fort Laramie National Historic Site on April 29, 1960. The present boundary contains 571.36 acres. The Fort is located on the Laramie River near its confluence with the North Platte River in southeastern Wyoming.

The fort is situated on the flood plain of the Laramie River. Bluffs approximately a half mile to the north and south form the sides of the river valley. Grasslands surround the entire area and dominate the vistas. Most of the historic structures and ruins are situated on the first stream terrace from 10 to 16 feet above the present flood plain of the Laramie River. Several historical structures were placed on the upper margin of the flood plain. A number of historic structure sites lie on the present flood plain, but future upstream river control may largely eliminate flood danger.

There are many cultural resources at Fort Laramie, and they can be divided into four broad categories: First, remnants of prehistoric aboriginal occupation known to exist in the immediate Platte and Laramie River valleys; second, the material remains and contextual information associated with the premilitary ownership from 1834-39; third, the archival, contextural, and material remains of the military years, 1849-90; and, fourth, the historic data and physical remains of the post-military period, 1890-1938. Many of the cultural resources of the national historic site remain archeological in nature.

The migration west brought Fort Laramie into national prominence, as it is the best representative area of the pioneer trails (the Mormon, the California, and the Oregon Trails). This was the jumping off point for the winning of the West. The long, tough slog over the Continental Divide was made possible by the staging and supply functions that existed at Fort Laramie. It is interesting to note that today visitation to the fort is just a little more than passed through it on the way West over 100 years ago.

A need to adjust the boundaries at Fort Laramie has become apparent, and I quote from the draft environmental analysis dated September 1977, done by the National Park Service:

These alternatives are considered in relation to the question of a boundary change at Fort Laramie National Historic Site. At present, the Historic Site contains 571 acres and is roughly U-shaped. The boundary change would add the land within the open part of the "U" to the National Historic Site. The boundary expansion would include approximately 295 acres in four parcels. Parcel sizes and uses are: 220 acres, agricultural and unused commercial campground; 68 acres, agricultural and residence; 3 acres, unused; 4 acres, unused.

I recognize that the proposed expansion removes approximately 250 acres from agricultural production and there is possible loss of some land tax revenue to Goshen County. However, it enables the preservation of a historic scene on land surrounded on three sides by the National Historic Site. The loss of agricultural production cannot be mitigated. Loss of tax revenue will be partially offset by recent legislation which permits full payment in lieu of taxes for 5 years, thereafter reduced payments in lieu of taxes.

The gain to the national good is in the saving of the historic setting, including the possible site of the first Fort Laramie, and an unknown quantity and variety of historic artifacts that lie buried on the properties that would be included in the expansion. It is my understanding that the property owners are willing to have their properties assumed by the Park Service.

So it is with great pleasure, Mr. President, that I introduce this bill and urge that the Committee on Energy and Natural Resources give it speedy consideration.

I ask unanimous consent to have printed in the RECORD correspondence from the Legislative Counsel, Department of the Interior, concerning the bill and letters from the National Park Service concerning the proposed boundary changes.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF INTERIOR,
Washington, D.C., April 5, 1976.

Hon. CLIFFORD P. HANSEN,
U.S. Senate, Washington, D.C.

DEAR SENATOR HANSEN: Thank you for your letter of March 18 concerning the possible acquisition of land in connection with the Fort Laramie National Historic Site.

The 220-acre tract that Western Horizons,

Inc., has offered to sell the National Park Service is entirely outside the authorized boundary of the national historic site, and there is no recommendation for expansion of the site at this time.

Superintendent Richard H. Maeder has advised us that commercial development of this tract could adversely affect the fort. A boundary study is being initiated that will deal with this question. Should this study result in a recommendation for a boundary change, it would be sometime before authorization and funding would permit land acquisition. We will advise you of our progress in this matter.

We appreciate your continued interest in, and support of, the National Park Service and its programs.

Sincerely yours,

IRA WHITLOCK,
Acting Associate Director.

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., September 29, 1977.
In Reply Refer To: L58(170)
Hon. CLIFFORD P. HANSEN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HANSEN: Thank you for your letter of August 2 to the National Park Service about the acquisition of certain lands at Fort Laramie National Historic Site.

The study you mention, which assesses, among other things, the need for additional lands at Fort Laramie, will be released sometime in October. A copy of this document will be sent to your office as soon as it becomes available. Following its release, a period of public review and comment will be provided. As a result, we do not expect any recommendations to be forthcoming until the report is in final form, which will be about the middle of next year.

We reviewed the possibility of using Public Law 95-42 as the vehicle for authorizing land acquisition at Fort Laramie and concluded that it cannot be applied in this situation. Under this law boundary changes must occur within 10 years of the enactment of the legislation establishing the original boundary. Since the boundaries of Fort Laramie were last set in 1960, the site falls 7 years short of this requirement.

We are, consequently, enclosing draft legislation authorizing the acquisition of lands adjoining Fort Laramie, as requested in your letter. Since the draft has not been cleared by the Office of Management and Budget, you will understand, I am sure, that we can make no commitment at this time concerning the position of the Department on this measure.

Sincerely yours,

JOHN M. POWELL,
Legislative Counsel.

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., October 19, 1977.
Hon. CLIFFORD P. HANSEN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HANSEN: We are pleased to transmit for your consideration the Draft Environmental Analysis for Fort Laramie National Historic Site, Wyoming.

This document seeks to provide an assessment of feasible alternatives relating to the visitor center and administration building, along with associated developments and boundary adjustments recommended for Fort Laramie.

Comments on the draft environmental analysis will be accepted through December 5, 1977. Any comments that you or your constituents might wish to offer should be submitted to the Superintendent, Fort Laramie National Historic Site, Fort Laramie, Wyoming 82212.

Your interest and support for the National Park Service are appreciated.

Sincerely yours,

———— ————,
Acting Director.

By Mr. McGOVERN (for himself and Mr. ABOUREZK):

S. 2330. A bill to name a certain Federal building in Huron, S. Dak., the "Hubert H. Humphrey Building"; to the Committee on Environment and Public Works.

HUBERT H. HUMPHREY FEDERAL BUILDING IN HURON, S. DAK.

Mr. McGOVERN. Mr. President, today I am introducing, along with my colleague from South Dakota, Senator ABOUREZK, legislation to name the new Federal building in Huron, S. Dak., the Hubert H. Humphrey Building, in honor of my distinguished friend, Senator HUMPHREY, who lived and worked in the city of Huron for many years.

That city, as well as the entire State of South Dakota, has always been proud to acclaim HUBERT HUMPHREY as one of our most outstanding citizens. The beautiful, new Federal building in downtown Huron stands in the same area where the Humphrey Drug Store still serves the people of the city and the surrounding countryside. The drug store stands as a witness to the endurance of the Humphrey family during the years of the Depression, and the Federal building would be a tribute to the man who accomplished so much, served so many, and fought so hard for this country in the years after he left Huron.

Senator HUMPHREY has been honored many times over the years and in the past few weeks. These honors have been well earned. Political differences have been set aside, as they should be, and, as HUBERT said in a recent interview:

I've also learned from life to be tolerant, forgiving, understanding. You cannot go around and keep score . . . Because if you remember everything that's happened to you, you generally remember that which is the most unfortunate.

Through my years of friendship with HUBERT, I know that he applies this philosophy liberally. His constant advocacy of civil rights reform, full employment, health, nutrition, and education programs; his political career itself—from mayor to Senator to Vice President and Presidential nominee—made opposition and conflict a part of his life. Yet, he has continued to do what he felt had to be done and made the country better because of it.

I know that his compassion is a part of his memories of the hard times he experienced in Huron as a young man. In his autobiography, "The Education of a Public Man," HUBERT recounts those depressing years when dust storms crushed the economies of rural States. His memories, though, have been tempered by time, and he has returned many times to speak to and with his old friends in Huron, Doland, and in his birthplace, Wallace. South Dakotans recognize his visits to the State as a distinct honor. He has worked for them and with them—for the young, the old, the disadvantaged, the farmers, the business people—and he became a great political leader who reflected their needs and fought long and hard to fulfill those needs.

I recently dedicated the Federal building in Huron, and the response to my announcement of the coming introduction of this legislation to name the building for Senator HUMPHREY was overwhelmingly supportive. The people of Huron agree, the people of South Dakota agree, that immediate and positive action should be taken to make the Hubert H. Humphrey Building, in Huron, S.D., official. Congressman JAMES ABDNOR of South Dakota, who was with me during the dedication ceremony, not only shared in securing the Federal Building for Huron but has enthusiastically agreed to lend his support to the naming of the building in honor of Senator HUMPHREY.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2330

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal Office Building, located at 200 Fourth Southwest, in Huron, South Dakota, shall hereinafter be known as, and is hereby designated as, the "Hubert H. Humphrey Building". Any reference in any law, regulation, document, record, map, or other paper of the United States to such building shall be considered to be a reference to the Hubert H. Humphrey Building.

By Mr. DOMENICI:

S. 2331. A bill to amend the act entitled "An Act to promote the development of Indian arts and crafts and to create a board to assist therein, and for other purposes", approved August 27, 1935; to the Select Committee on Indian Affairs.

Mr. DOMENICI. Mr. President, this amendment to the Indian Arts and Craft Act which I submit is intended to extend the scope of the original act to provide for loans and grant funds to aid designated associated Indian museums. Such associated museums are Indian owned and dedicated to the preservation of Indian culture and Indian arts and crafts.

In New Mexico we have such a center. The Indian Pueblo Cultural Center was established by 19 Pueblos for the purpose of preserving Pueblo culture and Pueblo arts and crafts training.

It also serves as a base to assist contemporary Indians in acquiring the skill and experience of managing business enterprises on their own reservations.

The cultural center has become one of the most popular public facilities in Albuquerque attracting tourists, school groups and the local public.

This museum and others like it are affirmative and positive statements of the relationship between the Native American and our present cultures. Such centers need to be promoted and assisted to insure the retention of the Native American contribution to our national heritage.

By Mr. STONE:

S. 2332. A bill to permit the Department of Transportation to proceed with a highway project in Lee County, Fla., without regard to section 106 of Public Law 89-665 or procedures developed under section 1(3) of Executive Order No 11593; to the Committee on Energy and Natural Resources.

Mr. STONE. Mr. President, today I am introducing legislation to permit U.S. 41 in Estero, Fla., to be widened along the existing right-of-way, by exempting this

highway project from the Historic Preservation Act. U.S. 41 in the present alignment runs through the Koreshan Settlement Historic Site, and it has been determined that the act prohibits the four-laning of the highway through this area. However, the directors of the Koreshan Unity organization never intended that the historic site designation interfere with the widening of the highway along the present corridor and, in fact, had received payment from the State of Florida for the right-of-way to four-lane U.S. 41, 21 years ago.

The directors are concerned that the necessity of widening U.S. 41 might force the relocation of the highway from its present route. They rightly contend that the two proposed alternatives to the west and east would have a greater adverse effect on the historical significance of the Koreshan community than if the highway was widened along the present right-of-way. In addition, relocating the highway along either alternate route would add at least $1 million to the cost of the project, while possibly delaying its completion by 2 years. It should be pointed out that this highway in its present condition has claimed many lives. Therefore, I am hopeful that early action can be taken on this bill, so the widening of this highway can be completed without unnecessary delay.

Mr. President, I ask unanimous consent that a resolution by Koreshan Unity, Inc. on this subject be printed at this point in the RECORD, followed by the bill.

There being no objection, the resolution and bill were ordered to be printed in the RECORD, as follows:

RESOLUTION OF KORESHAN UNITY, INC., REGARDING FOUR LANING OF U.S. HIGHWAY 41

Whereas, it was the desire of the Koreshan Unity, Inc. to perpetuate the history of its work by deeding three hundred five (305) acres of Koreshan property to the State of Florida as a State Park and Historical Botanical Monument; and

Whereas, the Koreshan Unity, Inc. retained its land east of U.S. Highway 41 and its land west of the highway contiguous to the State Park for its own educational, business and industrial purposes and uses; and

Whereas, the most important historic buildings would rarely be seen by the general public if the highway were relocated and any relocation of U.S. Highway 41 would result in diminishing the historic significance of the Koreshan Unity, rather than increasing public awareness thereof; and

Whereas, in all of its dealings with the State of Florida regarding the historic settlement, the four laning of U.S. Highway 41 and the State Park, the Koreshan Unity, Inc. has been assured that its property rights will not be violated; and

Whereas, relocations of the U.S. Highway 41 corridor west of the present alignment would result in further taking of lands now owned by the Koreshan Unity and in splitting the Koreshan Cemetery and all its historic significance from the remainder of the Koreshan Unity Community; and

Whereas, relocation of the U.S. Highway 41 corridor east of the present alignment would result in major revisions in Koreshan Unity's plans to construct an historic library on their own lands; and

Whereas, the Koreshan Unity received payment from the State of Florida for the right-of-way to four lane U.S. Highway 41 twenty-one (21) years ago; and

Whereas, notwithstanding their kindest of intentions the dilemma regarding rerouting U.S. Highway 41 was brought about by actions of persons or organizations not a part of the Koreshan Unity; and

Whereas, it was never the intention of the Koreshan Unity, Inc. that governmental historic designation interfere in any way with the four lane construction of U.S. Highway 41 through Estero, and it has never received legal documents or maps showing the proposed boundaries of the Historic District or information regarding adverse effects of Federal/State historic designation on the U.S. Highway 41 four laning efforts; and

Whereas, we, the Directors of the Koreshan Unity, Inc., as citizens and tax payers, object to the expenditure of an additional two million dollars ($2,000,000.00) and a delay of an additional eighteen (18) months in the long awaited four laning program; now, therefore,

Be it resolved that we, the Directors of the Koreshan Unity, Inc.,

(1) Are in favor of the four laning of U.S. Highway 41 through Estero on the existing alignment; and

(2) Urge the President of the United States and the United States Department of the Interior, and any other officials, executives or agencies of the United States government or private enterprise to take whatever steps may be necessary to facilitate the four laning of U.S. Highway 41 on the existing corridor through the Estero community, in Lee County, Florida.

Be it. further resolved that the Directors of the Koreshan Unity, Inc. will be available as consultants to see that the boundaries for any historic designation of the Koreshan Unity property authentically represents the background of the Unity movement.

S. 2332

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 106 of an Act entitled "an Act to establish a program for the preservation of additional historic properties throughout the Nation, and for other purposes," approved October 15, 1966 (Public Law 89-665, 16 U.S.C. 470f), and any procedures developed by the Department of Transportation under section 1(3) of Executive Order No. 11593, issued May 13, 1971, shall not apply to Federal Aid Project No. F-301-2(8), a project to widen U.S. Route 41 in Lee County, Florida.

ADDITIONAL COSPONSORS

S. 642

At the request of Mr. NELSON, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 642, a bill to amend the Federal Food, Drug, and Cosmetic Act, as amended, to prohibit the use of any name in connection with any prescription drug other than the official name designated for such drug by the Secretary of Health, Education, and Welfare.

S. 1437

At the request of Mr. THURMOND, his name was added as a cosponsor of S. 1437, a bill to codify, revise, and reform title 18 of the United States Code, and for other purposes.

S. 1974

At the request of Mr. NELSON, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 1974, the Regulatory Flexibility Act, and amendment No. 849, intended to be proposed to S. 1974.

S. 2066

At the request of Mr. MATHIAS, the Senator from Georgia (Mr. NUNN) was added as a cosponsor of S. 2066, a bill to complete and protect the Appalachian Trail.

S. 2197

At the request of Mr. STONE, the Senator from Utah (Mr. GARN), the Senator from South Carolina (Mr. THURMOND), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of S. 2197, a bill to amend title 38 of the United States Code in order to provide mortgage protection life insurance to certain veterans unable to acquire commercial life insurance because of service-connected disabilities.

S. 2227

At the request of Mr. DOLE, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 2227, a bill to postpone the effective date of the carryover basis provisions of the Internal Revenue Code.

S. 2236

At the request of Mr. RIBICOFF, the Senator from Maryland (Mr. MATHIAS), the Senator from Utah (Mr. GARN), the Senator from New Hampshire (Mr. McINTYRE), the Senator from New Mexico (Mr. SCHMITT), the Senator from Ohio (Mr. METZENBAUM), and the Senator from South Dakota (Mr. McGOVERN) were added as cosponsors of S. 2236, the Omnibus Anti-Terrorism Act of 1977.

S. 2304

At the request of Mr. HELMS, the Senator from Oklahoma (Mr. BARTLETT), the Senator from Nebraska (Mr. CURTIS), and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of S. 2304, a bill to require that the Hungarian Crown of Saint Stephen and other relics of the Hungarian royalty remain in the custody of the U.S. Government and that they not be transported out of the United States, unless the Congress provides otherwise by legislation.

S. 2317

At the request of Mr. BAKER (for Mr. HEINZ), the Senator from Indiana (Mr. LUGAR) and the Senator from Colorado (Mr. HASKELL) were added as cosponsors of S. 2317, the Trade Procedures Reform Act.

ADDITIONAL STATEMENTS

A VIEW OF NEWS BROADCASTING

Mr. HARRY F. BYRD, JR. Mr. President, after 20 years with CBS News and all-news broadcasting in Washington as owner of radio station WAVA, Arthur W. Arundel is moving into new fields of journalism and public affairs. Mr. Arundel pioneered "all-news broadcasting" in January of 1962, nearly 16 years ago.

As he leaves the radio field Mr. Arundel delivered a final commentary over WAVA, which he captioned "A View of News Broadcasting."

Mr. Arundel's views are most interesting and informative. I ask unanimous consent to have his commentary printed in the RECORD.

There being no objection, the commentary was ordered to be printed in the RECORD, as follows:

A VIEW OF NEWS BROADCASTING

(By Arthur W. Arundel)

To people in Washington over the years it has probably always seemed that their own times were the worst, the pressures on leadership and the burdens of power never greater. We journalists here, along with government leaders, have not always been immune from exaggerated notions of our self-importance to the national destiny.

Mr. Arundel, who pioneered all news broadcasting in the United States, has recently sold WAVA on which this final commentary was heard.

But stone age man probably also thought that he bore in his hands the fate of all living things when he invented the hatchet, as did Martin Luther when in another time he declared that with gunpowder man finally developed the ultimate weapon. And less than a century ago, leaders in Britain, then the world's leading power, were appalled at the burden of human survival they carried when Lord Kitchener first used the machine gun to mow down the Hordes of the Mad Madullah in the Sudan.

SINCE VIETNAM

It has been different in Washington since Vietnam, perhaps our last ground war, and Watergate. In the quieter, laid back early months of President Jimmy Carter visible and newsmaking military combat seems all the more on the way to being replaced by the weapons of nuclear warfare. In nuclear energy man is equally capable of either limitless good or of quickly flattening civilization to a pile of dust and rubble.

So perhaps people in Washington today are indeed not just another generation consumed with indulging their own self-importance. We all, politicians and journalists alike, possess human frailties. But our generation also possesses this capacity by the mere pressing of a button to change all of human destiny. There is something less in this than Armageddon, but there is also more than chicken little seeing the sky falling.

After some 20 years here with CBS news and all news broadcasting in Washington, I am now selling all news WAVA to move on into new fields of journalism and public affairs. But from the experience I have a few thoughts on the shape of broadcasting and broadcast journalism.

THE VAST WASTELAND

Many will remember FCC Chairman Newton Minow's much publicized reference to television 15 years ago as a "vast wasteland". He was right about that then and, while we can be proud of the occasional rays of brilliance in broadcast news and specials, he would be right about that today. Television programing continues to sink toward the lower denominators of the public taste.

And even as television has replaced radio as the nation's principal live entertainment medium, radio has made a shotgun marriage to become essentially the promotional loudspeaker of the record industry. Going across the radio dial today, from classical to rock music stations—modern radio can be measured as little better than a glorified jukebox, spitting out just so much news and public service material as will keep Federal Broadcast regulators off its back. There are brilliant exceptions, WMAL radio here and three all-news stations among them in Washington.

RATINGS TYRANNY

The most frustrating part of my own 20 years experience in both television and radio has been to see this industry sinking measurably deeper into lockstep with the audience ratings numbers. It is not that TV has not changed, it is that new and imaginative programing is strangled in its birth by the tyranny of the ratings. Over these years of putting WAVA all news on its feet, I have awakened at night feeling much like those people in the recent book and film about broadcasting, "Network", who one evening thru open their windows to shout, "I'm mad as hell, and I'm not going to take it any more".

We have an extraordinary thing in this country with private broadcast station ownership. In most of the rest of the world, radio and television is owned and programmed by the government. Yet out of our very stupid failure to do better with private ownership, we are inviting our own government to move into the gap with its now growing support of Public Broadcasting networks and educational television and radio stations. It may be heresy to think such thoughts, but if private ownership does not get off its tail and do better by the native intelligence of the American people then the government is going to do it for us. And that would be worse.

ALL NEWS RADIO

WAVA made its break from the cacophony of radio music to begin something we then called "all news" broadcasting in this Washington area in January 1962. It seemed to me then a simple enough idea, with some 40 radio stations here doing news on the hour, that there ought to be one place on the dial where you could just push a button and get the news anytime. Advertisers laughed at the idea. It was a long gamble of us, for me as the young new owner with all the family eggs in one basket—told then that no one would listen to continuous news. But we made it. And, with success, the concept gradually spread to other stations across the nation. The imitation was flattering.

Then six years later, the Washington Post announced that it would change its WTOP to all news. We didn't need that much flattery, the Post company possessing the huge combined network news, audience promotion and financial resources of the area's largest daily newspaper, Washington's CBS television station, Newsweek magazine, as well as Washington's most powerful 50,000 watt radio station.

Yet WAVA and WTOP together survived six years of all news competition. Then two years ago WRC radio entered all news here backed by the added resources of NBC television and radio. These two corporate network giants became good tough competition for independent WAVA. It made all of us work harder.

LAID BACK TIMES

But looking at our success in all news radio now, I have realized one very special thing which both helped make all news radio succeed and which challenges it today. It is that all news was born here in the high exhilaration of the early 1960's with John F. Kennedy and grew in years of nearly continuous national anguish with the Cuban missile crisis, assassinations, Vietnam, Lyndon Johnson's withdrawal, more Vietnam, Nixon, China and Watergate. If Jimmy Carter means quieter times he also means people are recovering from a prolonged state of something like national war nerves. It is better for the country, if slower for the news daybook.

Reports of the death of all news are premature. It simply presents a sharp new challenge to all news broadcasters to adapt all news radio to quieter times. It can be done.

NEW IDEAS

We find, and I found at WAVA, that everything has not yet been discovered. The horizon, we have learned, is not the boundary of the world. Somebody is always finding out that it isn't and being very successful by doing what he believes in.

The star I have tried to follow in this game, Edward R. Murrow, once said that "the trouble with broadcasting in this country is that it underestimates the native intelligence of the American people". But I have found that broadcasting in fact still lives more by the advice of the late H. L. Mencken who said that "nobody ever went broke underestimating the taste of the American people". There are innovators and there are cowards in this industry, and they may be identified largely by which advice they follow. If you reach for the stars at least you won't get a handful of mud.

Perhaps if WAVA's success says anything, it is that opportunity for new things is still out there and that you don't have to drop to the next lowest common denominator of the public taste to prove it. If there is pride, even arrogance in that, there is also truth.

Once in a while in this industry we have got to put a principle before a buck, to reach for our dreams as journalists and play to the higher grounds of the native intelligence of the American people. Each man owes something more than a paycheck to the upbringing of his own profession.

JOHN DELLENBACK TO HEAD CHRISTIAN COLLEGE CONSORTIUM

Mr. HATFIELD. Mr. President, I wish to take note of a new development in the career of a gentleman known and highly regarded by many of my colleagues.

John R. Dellenback, a fellow Oregonian and close friend with whom I worked closely during his four terms in the House of Representatives and his recent tenure as Director of the Peace Corps, has been elected president of the Christian College Consortium and of the Christian College Coalition. Those familiar with Mr. Dellenback's capacities, interest in education, and Christian commitment will applaud these two distinguished, affiliated groups for their auspicious choice.

The following article from the Houghton College Star in Houghton, N.Y., outlines Mr. Dellenback's new responsibilities. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Houghton Star, Oct. 21, 1977]

FORMER DIRECTOR OF PEACE CORPS ASSUMES PRESIDENCY OF CONSORTIUM

WASHINGTON, D.C.—John R. Dellenback, immediate past director of the Peace Corps, has been elected president of the Christian College Consortium here by the presidents of the 14 evangelical colleges comprising the consortium.

He also was elected president of the Christian College Coalition, which includes the 14 consortium schools and 21 other evangelical colleges around the country. In both posts, he succeeds Dr. Gordon R. Werkema who has been named executive vice president of Seattle Pacific University. The change for both men becomes effective Nov. 1.

Commencing on his election to head the two groups, Mr. Dellenback said: "The Christian college has from the beginning of our country's history made important contributions to the development of the nation and its people. At a time like today, it is more essential than ever that tomorrow's leaders have available to them colleges where Christian faith and learning are integrated.

"Raw knowledge without a solid base of faith and values," he said, "will produce ineffective policies and leaders incapable of dealing with today's and tomorrow's terribly complex challenges in times of crisis. The colleges of the consortium and the coalition have a challenge from Christ to use their talents and their opportunities wisely and effectively."

Mr. Dellenback, who served four terms as a congressman from Oregon prior to becoming director of the Peace Corps in 1975 and is an attorney by profession, has also been an active Presbyterian layman.

He was a moderator of the Oregon Synod of the United Presbyterian Church, chairman of the National Prayer Breakfast, Washington, in 1975 and was also chairman, vice chairman and secretary at various times of the House of Representatives Prayer Breakfast Group during his years in Congress (1967–74).

While in Congress, he served on a number of House committees and subcommittees, including the Education and Labor Committee, Special Subcommittee on Higher Education and General Subcommittee on Education. He was chairman of the House Republican Research Committee's Task Force on Education and Training. Prior to his service in Congress, Mr. Dellenback served three terms in the Oregon House of Representatives (1961–66), and he practiced law in his hometown of Medford, OR, from 1951–66. He was an instructor and assistant professor of business law at Oregon State University from 1949–51.

Currently, he is a member of the boards of trustees of Howard University, Washington, and Lewis and Clark College, Portland, OR.

A Phi Beta Kappa graduate of Yale University (bachelor of science in applied economic science), Mr. Dellenback also holds a juris doctor degree (Order of the Coif) from the University of Michigan Law School.

He has honorary doctor of laws degrees from Biola College, La Mirada, CA, and New Haven (CT) University, and a doctor of humane letters degree from Warner Pacific College, Portland, OR.

Serving four years' active duty in the Navy during World War II, he was discharged as a lieutenant commander. He has since traveled to scores of countries, especially during his directorship of the Peace Corps (March 1975 to May 15, 1977).

Married, he and his wife, the former Mary Jane Benedict, have three adult children, Richard, David and Barbara. Mr. and Mrs. Dellenback live in Northwest Washington.

SENATOR HELMS SPEAKS ON THE GOLD CLAUSE FREEDOM LEGISLATION

Mr. STONE. Mr. President, recently my good friend, the distinguished Senator from North Carolina, spoke to the annual meeting of the National Committee for Monetary Reform, in New Orleans, La.

The occasion of his meeting was opportune, because his speech on November 12 came just 15 days after President Carter signed into law a bill that included S. 79, which Senator HELMS authored and I cosponsored. This law states that from the date of enactment, October 28, 1977, Americans may once again enter into financial obligations calling for payment in gold or in dollars measured in a certain amount of gold. The bill also has the effect of removing the prohibition against obligations denominated in an amount of foreign currency.

The importance of this measure is that it will make available to individual Americans and American businesses another important means of avoiding the destructive effects of inflation. If people can enter into arrangements which allow business transactions in a noninflationary medium, it makes business more honest. Some have speculated that it will make capital formation easier, and thus help solve our Nation's capital shortage.

Senator HELMS addresses these issues in his speech, and he acknowledges organizations such as the Institute on Money and Inflation which provided much valuable research on this important topic. He deserves a lot of credit for this piece of legislation, and I am proud to have been a cosponsor.

Mr. President, I ask unanimous consent that Senator HELMS' remarks to the National Committee for Monetary Reform be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR HELMS TO THE NATIONAL COMMITTEE FOR MONETARY REFORM, NOVEMBER 12, 1977

I do want you to know that I deeply appreciate the privilege of being with you tonight.

It's not idle flattery for me to suggest that this group, more than any other with whom I've met, understands not only the economic malady that is epidemic in America, but the only real cure for the disease as well.

Certainly, the Congress of the United States seldom, if ever, shows any signs of understanding.

It often occurs to me that the most appalling economic ignorance in America is to be found in Washington, D.C.

The mentality there reminds me, so often, of a character in one of Disraeli's books—a character described by Disraeli as being "distinguished for his ignorance, because in all of his life, he had but one idea—and that one was wrong."

I could wander all over the lot on the subject of ignorance in Washington, D.C.

And my purpose in coming here is somewhat more precise than that. Sam Ervin likes to tell the story about the town drunk in his home town of Morganton, who woke up one morning behind bars.

He could remember nothing about the night before.

So, he asked the jailer: "What am I in here for?"

The jailer stared at him for a moment, then replied: "For drinking, that's what you're in here for."

"Great," said the poor fellow, "let's get started."

So, let's get started:

Back in 1974, Jack F. Bennett, then Deputy Under Secretary of the Treasury, proclaimed that legalizing gold ownership would be "a major catastrophe, of the same magnitude as a Martian invasion or a nuclear attack."

Well, Mr. Bennett notwithstanding, the "War of the Worlds" did not take place on January 1, 1975.

Then, when I introduced a bill in 1976 to legalize gold clause contracts by repealing the old 1933 Joint Resolution, I got a letter from the Treasury Department warning that gold clause contracts might "call into question the strength of the dollar, and undermine our efforts to control inflation and maintain confidence in our currency."

I should also add that the Treasury Department feared that somehow gold clause contracts could mean that gold might "again assume a monetary role through widespread use in private transactions."

I don't know how widespread use of gold clause contracts will become. I do know, however, that the Treasury again is wrong. Gold clauses will not undermine efforts to control inflation. Gold clauses will not undermine confidence in the currency. The politicians have cornered the market in that sort of activity.

What the gold clause freedom enables Americans to do is basically what international bankers and multi-national corporations have been able to do for years—try to outguess American money managers. (Perhaps I should say, the Federal debt managers; for it is how the massive Federal debt is handled that dictates the rate at which the U.S. dollar inflates.)

With the gold clause freedom, Americans will be able to say to one another, "let us put our financial agreement in a medium we both trust more than dollars."

It is an act of patriotism for Americans to exercise this "economic vote." By doing so, those who denominate their contracts in gold, in dollars measured in gold, or in a foreign currency or its equivalent, are saying to the Senate, to The House of Representatives, to the President, "Give us back a money system worthy of the name."

Money that does not serve the functions of money needs to be reformed.

Money that inflates and does not serve as a valid standard-of-value, or store-of-value, should be reformed.

Money that irregularly but relentlessly depreciates is not a good medium of exchange, it is a stealthy medium of deceitful taxation.

The tax of inflation destroys the stability of the economy. It damages the relationship between employer and worker, buyer and seller, debtor and creditor.

Inflation hurts people. It only helps politicians. For it hides the real cost of big government and it taxes Peter to pay Paul—with the big-spending politicians claiming great compassion for the people by being liberal with everybody's money except their own.

Gold clauses, as a possible means of avoiding the effects of inflation, can indeed frustrate those politicians whose intent it is to use the monetary system as a political tool. Gold clause freedom can also cause some problems for the agents of Congress whose job it is to implement the policies of the inflationists.

I may be too optimistic. There is always the possibility that the regulators may attempt to thwart the intent of this legislation. It is a federal fact of life that the bureaucrats will attempt to do things as they have always done them.

They interpret legislation in their own ways, and the massive Federal Register is daily proof of the exercise of regulatory power. We must be watchful of what actions are taken by the Federal Reserve Board, by the Comptroller of the Currency, by the IRS, by the SEC, and others who have a hand in saying how our nation's economic system is run.

I will, of course, take every step I properly can to fight any attempt at regulatory "repeal" of this legislation.

Then again, if gold clauses are widely used, it may be possible for government to disrupt gold markets by dumping gold, and thus effectively discourage further use of gold clause contracts. These are possibilities to watch.

Finally, if we come to the sad situation where Government again imposes foreign exchange controls, it may be impossible for Americans to utilize the new freedom of multi-currency contracts to advantage.

Some of the newspaper articles on my bill raise the important question about the remonetization of gold. Some reporters have come to the conclusion that the gold clause freedom is a "De Facto return to the gold standard."

I believe that a sound dollar, disciplined by gold, would have a tremendous healthy impact on our nation. But, my bill doesn't accomplish that goal yet. The gold clause freedom is a way-station between paper-backed money and real money.

In a recent issue of the "Bulletin" of the Institute on Money and Inflation, an orga-

nization that provided great assistance to me in preparing the background material on the gold clause issue, Dr. Donald Kemmerer was quoted as saying, "Repeal of the Joint Resolution of June 5, 1933, means that individuals can link their personal financial agreements to gold. It doesn't mean that government has adopted that standard—however desirable that might be."

Dr. Kemmerer is right.

The dollar is a government-endorsed and government-issued means of exchange. Unless and until government accepts the responsibility to establish a firm and unchanging relationship between gold and dollars, we will not have a gold standard. If two or more individuals enter into a financial agreement, in which gold is used as the measure of value received and given, then one might say that a personal gold "standard" has been established.

As I mentioned, I have also heard that, in view of the fact that the dollar has fallen on international markets, the gold clause freedom is a bad omen. I submit that the bad omen is not the new freedom. The bad omen is the rate of expansion in our money supply. The bad omen is the $60 billion deficit for fiscal year 1978. The bad omen is the hobbling of the U.S. economy by new energy taxes, social security taxes, and business taxes.

To say that gold clause contracts could hurt the value of the dollar is a little like blaming the thermometer for the fever.

I will never understand the psychological aberrations of international money speculatos. If they sell dollars when the Secretary of the Treasury says one thing about the exchange rate, and then buy dollars when he says another, it is a measurement of the volatility of the market—not the real value of the dollar.

Now, if the Secretary of the Treasury should announce that he would push with all his might to balance the budget and cut taxes, then we all would understand that speculators would buy dollars.

But gold clause contracts? No, they might be an indicator, and I am convinced that widespread use of gold clause contracts will bolster the position of those in Congress that want to strengthen the dollar.

Gold clause financial obligations may make more people interested in avoiding the effects of inflation. The more people try to avoid it, the more people may realize that inflation is not inevitable. When people realize that, those who believe that the dollar should be restored to stability, are not far from victory.

I have a final word of caution on what we may expect. The Treasury Department commented, in its letter on my gold clause bill, that use of gold as a measure of value by people in private transactions would have "undesirable monetary effects."

If the widespread use of gold clause contracts awakens more people to the economic damage and basic error of inflation, and gets them to do something about inflation, that is not "undesirable."

As a result, I think we should stand ready to fight efforts by the Treasury, or others, to curb the new freedoms.

I know you have heard many good speakers talk on this subject. They can tell you in more detail what the economic effects will be.

But I would like to conclude with a few comments on an area in which I have a little more expertise—politics.

I feel at home here because you know what I mean when I talk about gold clauses. When someone mentions "real" money around here, they do not mean paper with green ink.

In Washington that is not the case.

My lesson is this: Just because the political arena is not filled with people who share all our beliefs, it does not mean that we cannot win, and it certainly doesn't mean that we should not fight.

The principles—the moral principles of sound and honest money—are absolutely essential to honest politics. The success we have had with restoring gold ownership, and now with restoring gold clause freedom, proves that we can win.

We can win if we will unite to do the needed backup work: When organizations like the National Committee for Monetary Reform, the Committee for Monetary Research and Education, the Institute on Money and Inflation and others work to spread the word.

For the purpose of illustration, let me review how politics came into play on the gold clause freedom bill.

In the course of Congressional consideration on the International Monetary Fund bill—a $2 billion giveaway slush fund for overpaid international bureaucrats—I saw an outside chance to repeat what was done in 1974 when gold ownership was won. That is, put a good conservative piece of legislation on a liberal bill which was going to be signed into law.

Well, toward the end of the 94th Congress, it became very clear that there was not enough time to have a very long debate on the Senate floor over the IMF bill. In other words, if some Senators wanted to talk about the bill for a few days, it simply would not be passed before adjournment. It was, however, clear that if the bill were brought up again in January, the advocates had the votes to cut off debate and pass the bill.

The Treasury Department wanted the bill very badly, however, and after a small amount of explanation, they came to understand that the gold clause freedom bill should go on the bill.

On the very last day of the session, we found out that if the Senate changed the bill at all, the House would not be able to clear it and send it to the President before adjournment. As a result, the Senate had to pass the bill as approved by the House and send it to the White House.

Treasury Secretary Bill Simon was in Manila, and he called from the IMF meeting there. We were in somewhat of a difficult situation, so we talked things over and obtained a promise from the Senate leadership that assistance would be given in the 95th Congress to pass this bill. As a result, the IMF bill was allowed to pass without the gold clause freedom bill.

When, on October 11 of this year, the Senate took up H.R. 5675, I walked over to Senator William Proxmire who was managing the bill. I reminded him of our agreement of last year about the gold clause bill. In a few minutes, the Senate approved my amendment, and then passed the bill.

My able associate, Howard Segermark, then contacted the staff of the members of the House of Representatives and notified them of the action. It was agreed that the House leadership would attempt to take up the bill under a unanimous consent agreement, pass it, and send it to the President. On Friday, October 14, that is exactly what happened.

So, what lies ahead? The first priority in achieving for sound money is to see to it that gold clause contracts are treated fairly. From there, I believe we should work legislatively to see to it that the gold reserves of the United States are not used in a way that will undermine the use of gold clause contracts, or the stability of gold markets.

For other initiatives, I hope you will give me your advice.

Getting from where we are to where we should be can be accomplished in small increments.

We will never win if we try to get rid of 40 years of Keynesian economics overnight. Frankly, the effectiveness of conservatism, in my judgment, lies in unrelenting opposition to radical change. I favor evolutionary change to do what must be done.

And we must make some changes away from the direction our nation is heading. The present course will lead to economic stagnation and collapse; and, I fear, the loss of the moral and spiritual values we share.

My message is this—that we can achieve successes; that we can get others to see the truth if we keep pointing out that the naked emperor has no clothes.

With the help that you and others have given me and other advocates of sound money, we can win more battles.

Get active in this next year's political campaigns. Write your Congressmen and Senators. And support and keep in touch with the organizations that are fighting the good fight.

I am very proud of you, and I am grateful for your dedication to the Miracle of America.

God bless all of you.

ADDRESS OF DR. KISSINGER

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from New York (Mr. JAVITS), and the material attached thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR JAVITS

On November 13 Dr. Henry Kissinger addressed the American Jewish Congress at the presentation of the Stephen S. Wise Award to Golda Meir. Dr. Kissinger spoke on the subject of peace in the Middle East, and his remarks provide a most insightful analysis of some general principles in the debate over this issue. I think my colleagues will find the extracts of Dr. Kissinger's statement to be valuable, and I would commend this to their attention.

EXTRACTS FROM REMARKS DELIVERED BY HENRY A. KISSINGER

We meet in the midst of another debate about peace in the Middle East. Given my own involvement in the conduct of foreign policy over eight years, I have thought it inappropriate since January to participate in a discussion of day-to-day tactics. But I would like to use this occasion to articulate a few general principles.

First, the desirability of peace can never be at issue. No people has suffered more from the absence of peace than the people of Israel, every square mile of whose country is drenched with the blood of its pioneers and whose existence has never been recognized by any of its neighbors. No people can be more aware of how fragile, and how precious, are the restraints that make men and nations civilized.

No people knows more vividly that mortality must be more than a theory—it must be a constant in human conduct. And no group of men and women understands more acutely that peace depends ultimately not on political arrangements but on the conscience of mankind. History is often cruel, and rarely logical and yet the wisest of realists are those who recognize that fate can indeed be shaped by human faith and courage. These qualities are what brought the state of Israel into being. This spirit and pride must be nurtured by all friends of Israel for they are the ultimate guarantee of Israel's future.

But faith and courage are not enough. The people of Israel have seen too much of the transitoriness of human intentions to entrust the destiny of their nation entirely to professions and reassurances however sincere and honestly intended. A peace to be lasting must be founded on the self-interest of all the parties and for peace to be secure it must leave Israel strong enough to protect its future by its own efforts.

Second, the intentions or purposes of the government of the United States cannot be at issue. No President would knowingly risk the future of Israel. Nor would he make a deal to undermine Israel's future for some global considerations. My own acquaintance with President Carter, Secretary Vance and their senior advisors convinces me that this Administration would not deliberately put Israel's security at risk. But there is always the danger that actions undertaken in good faith may inadvertently produce unforeseen consequences. If such a miscalculation took place either Israel would become totally isolated or diplomacy would become abruptly deadlocked. The art of diplomacy is to move events carefully and shape them toward achievable ends so that neither the United States nor Israel ever face such a stark, impossible choice. A coordination of policies between Israel and the United States is therefore imperative.

Third, the perspective of a superpower and those of a small country may occasionally differ. The United States has enormous strength; Israel has a much narrower margin of safety. The United States can survive trial-and-error diplomacy, because we can always rectify mistakes by redoubling our efforts. But Israeli leaders cannot experiment; they have only one try. If they guess wrong they risk the survival of the nation. We therefore owe the people of Israel an understanding of its special circumstances—all of the more so as the country has known only war or the threat of war since its founding. At the same time, Israelis must understand the importance of Middle East peace to the global concerns of the United States and the Western world, which are indeed the essential underpinning of Israel's own security.

Fourth, an over-all solution is of course the ultimate prize. But realism forces us to recognize that to achieve it involves issues of enormous complexity and parties with an equal commitment to peace. It also requires a process that is bound to be protracted. Thus while striving for an overall settlement, we must take care not to foreclose other opportunities that may arise to ease tensions and to enable the peoples of the area to build confidence. We must not give a veto to the most intransigent elements within the area. We must not permit outside powers to emerge as the advocates for a point of view that penalizes moderation.

Fifth, some structures develop their own momentum that cannot be judged by formal declarations or abstract blueprints. A Palestinian state on the West Bank is bound to be an element of instability both for Jordan and for Israel; it will compound the crisis not solve it. Such a state—whatever the professions or guarantees—must have objectives that cannot be compatible with the tranquility of the Middle East. It cannot be an accident that no attempt to create such a state was ever made during the twenty years of Arab rule in that territory.

Sixth, any peace settlement must of necessity involve guarantees. But they must be worked out with great care and with a sense for their limits. History should teach us that guarantees by themselves are not a substitute for security. No nation should be asked to abdicate its judgment of the requirements of its survival. Care must be taken that guarantees do not provide a pretext for an outside power to intervene constantly in the affairs of the area. With respect to bilateral U.S.-Israeli treaty arrangements there is the danger that the ratification process may produce a debate that paradoxically hazards the friendship and close cooperation which has served so well for a generation. In short, guarantees require the most careful reflection and study; at best they reinforce, they can not bring about security.

Seventh, whatever the views about the desirability of beginning the process of negotiations with a Geneva conference, so much effort has been invested in it that it has become the touchstone of the prospects of peace. All parties therefore have a stake in bringing such a conference into being. At the same time we must recognize that when it is finally assembled Geneva will be an important achievement, but its primary significance will be procedural. Ahead of us will be complex negotiations about frontiers, commitments to peace, security arrangements, and other issues which will test the wisdom and commitment of the parties.

These issues cannot be left to the pressures of a conference; it is not too soon to explore them actively with the parties. We cannot wait for Geneva to resolve all the complexities that range from the relations of sub-groups to the main conference to the concrete outlines of a definition of peace. Especially as far as Israel is concerned it is incompatible with our historic relationship to deal with issues of such gravity in an atmosphere of self-imposed deadlines. And it does not help those Arab leaders who have had the wisdom and the courage to begin the journey towards peace to raise expectations that canont be fulfilled.

Geneva will be successful to the extent that Israel and the United States end the cycle of fear and reassurance, of outraged protest and soothing generalities and turn to the elaboration of a common concrete approach. This requires a willingness on one side to give the benefit of the doubt and a readiness on the other to understand the anguish of a people whose historic suffering precludes the abdication of its own judgment, but whose martyrs guarantee that the search for peace, while painful, will be dedicated and committed.

I am convinced that the problems that form the headlines of the day are soluble. In all my efforts in the Middle East, whatever the temporary disagreements, we never failed to develop a common position with our friends in Israel. It was during Golda's term as Prime Minister and that of her distinguished successor, that the steps were taken that give us hope for even greater progress now. I have every confidence that the present Israeli government will do no less. And in my experience, at the end of the day. Israel has never rejected a chance to make progress towards a settlement, or to run risks for peace. I have no doubt that we will find a willing—if complicated—partner in a dialog that emphasizes substance not procedure and in a guest that defines specific objectives, not theoretical blueprints. The Jewish people has not survived through the millenia by being found wanting of vision in its hours of need. And the American people have not been the hope of mankind through their history by subordinating moral values to tactical expedience.

WELFARE REFORM—TALMADGE WIN PROGRAM

Mr. TALMADGE. Mr. President, we have had a lot of talk about welfare reform. President Carter has sent the Congress a proposal which is the result of much thought and hard work.

Recipients of welfare want welfare reform. Every Member of Congress wants welfare reform. Taxpayers especially want reform. However, it is obvious that few are talking about the same "welfare reform." Nonetheless, I think everyone would like to see such proposals taken out of the conference room and put into action.

The only real welfare reform I have seen since coming to the Senate is the Talmadge work incentive program (WIN). It helps welfare recipients find jobs, and keep them. It encourages businessmen, through tax credits, to hire welfare recipients. For every dollar invested in WIN, over $2 are saved in taxpayers' money. In Georgia alone, nearly $6 million in welfare payments will be saved this year. Nationwide, the total savings amount to hundreds of millions of dollars.

But WIN will not solve the welfare mess by itself. If we continue to provide free gimmicks, if we give people who do not work greater income maintenance than people who do work, that is not welfare reform. That is welfare expansion.

When we have countless millions of people who find it attractive not to work, something is fundamentally wrong in America. When half the citizens of this country work and pay taxes to support the other half who do not work and do not pay taxes, something is going haywire. And when a city such as New York is virtually devastated by its own citizens when the lights go out, we suffer from some kind of national sickness.

If we are to survive as a great nation, a land of opportunity and a place where our children and grandchildren can grow and prosper, we must get back to some of the old-fashioned American virtues. One such value is that able-bodied people ought to work for a living.

The Carter administration and Congress must toughen their resolve. The time has come for welfare reform that will make it more attractive to work in America than it is to loaf.

The WIN program does just this and I think it is essential that WIN concepts, if not the actual WIN program, be included in any welfare reform proposal on which the Congress acts.

Specifically, Mr. President, the work incentive program is a mechanism designed by the Congress to help AFDC recipients find and keep jobs. The program provides manpower training, employment services, and opportunities and supportive services, including child care for WIN families.

The WIN program was originally enacted by the Congress in 1967 for the purpose of reducing welfare dependency through the provision of manpower training and job replacement services.

In 1971, the Congress adopted amendments and proposals aimed at strengthening the administrative framework of the program and placing greater emphasis on immediate employment instead of institutional training, thus specifically directing the program to assist individuals in the transition from welfare to work.

In the same year, Congress also provided for a tax credit for employers who hire WIN participants, equal to 20 percent of the wages paid for a maximum of 12 months employment. Adult members of AFDC families who were capable of employment, with certain exceptions such as mothers caring for preschool age children, are required to register for participation in the work incentive program, established under title IV(c) and to accept training for employment offered through that program.

Federal funding for the WIN program, including the cost of necessary supportive services, is provided at 90 percent maximum rate. This program is subject to annual appropriations, and is presently funded at a level of $365 million.

Legislation enacted early this year, Public Law 95–30 authorized additional appropriations up to $435 million for fiscal years 1978 and 1979 to be used without any non-Federal matching requirement. No funding under that provision has yet been appropriated.

I believe that it is important to keep in mind the important role that employment and earnings have in the lives of welfare recipients. We hear all too often that welfare recipients are unemployable, that moving them into the labor force is an unreasonable and unattainable goal.

I disagree with that assessment. I believe that there is strong evidence to back up my views.

First of all I would like to point out that many AFDC mothers, fathers, and youths who are working and earning incomes to support their families, they find jobs, either through their own initiative or through the work incentive program. The last survey of AFDC recipients show that in the month of March 1975, about 16 percent of AFDC mothers were employed either full or part-time.

The experts estimate that in the course of a year, as many as 40 or 50 percent of the mothers on AFDC have earnings. In my judgment, many of our present recipients could improve their employability and raise family income even more than they are currently doing if we provide the proper kind of incentive.

Despite the economic recession, the WIN program has been working effectively, particularly in the service sector of the economy. Recent economic dislocations have hit manufacturing, construction, and related industries the hardest, resulting in high unemployment rates in those sectors. However, the service sector has expanded and created jobs for those in a position to take advantage of them.

WIN participants have been getting those jobs. Statistics have suggested WIN successes.

In fiscal years 1973 through 1975, 297,000 WIN registrants entered employment. Of these 139,000 and their families were taken off welfare rolls and 158,000 remained on welfare but received smaller grants as a result of WIN-found employment. Also, welfare spending, both Federal and State for those fiscal years, was reduced by nearly $400 million.

In addition, in fiscal year 1976 and the following transitional quarter, another 237,000 WIN registrants entered employment. Of these 105,000 individuals, plus the children of these individuals, went off welfare completely.

Statistics for the first quarter of the fiscal year 1977 indicate that the success is continuing. In that brief period, 59,000 AFDC recipients entered employment, and 30,000 of them finally left welfare as a result of sufficiently high earnings.

Mr. President, at this time I want to point out President Carter's statement dated May 2, 1977, on welfare reform. It cites as one of his objectives that "incentives should always encourage full-time and part-time private sector employment." I believe this gives WIN-type programs the go-ahead if not an endorsement.

Mr. President, an article in U.S. News & World Report of July 18, 1977, discusses in detail welfare programs by States for welfare recipients and the effects of a steady step-up of the Federal Government's work incentive program and its role of finding jobs for welfare recipients.

For example, WIN placed more than 230,000 individuals in jobs last year. This is more than twice the number it placed in the entire first 4 years of its life, from 1968 through 1971.

I ask unanimous consent that this article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From U.S. News & World Report, July 18, 1977]

LABOR: WHEN STATES TELL PEOPLE THEY MUST WORK FOR WELFARE

Utah's "workfare" program has blazed a new trail. Now many other States are testing plans aimed at the same goal: putting people on relief to work.

The idea that able-bodied people should be required to work for their welfare money is spreading rapidly across the U.S.

One such "workfare" program attracting nationwide attention is operating smoothly in Utah.

So successful is the Utah plan in moving people off relief rolls that half a dozen other States are taking a look at it as a possible model for programs of their own. Some believe it might even be useful to the Carter Administration in its search for national welfare reforms.

Besides Utah, at least 16 States have stiffened their work requirements or added new work incentives in the last two years. A number of other States and many cities have some kind of program aimed at putting relief recipients to work. And the Federal Government's Work Incentive Program—known as WIN—is steadily stepping up its pace in finding jobs for welfare recipients.

ON THE JOB, ON THE DOLE

The Utah plan is unique in several respects. It is sterner and goes further than most other programs. It is mandatory. And it doesn't just train people for future jobs. It actually puts them to work while they are still drawing welfare payments.

In most places, such work requirements apply only to people on programs financed by State or local funds, such as "general assistance" or "direct relief."

Utah's plan applies to those who receive Aid to Families with Dependent Children (AFDC), a huge, nationwide program that draws heavily upon federal funds. Utah officials say theirs was the first work requirement approved by the Department of Health, Education, and Welfare for application to AFDC.

"Utah is the first State where people earn their welfare grants," claims the program's co-ordinator, Usher T. West.

Officially, Utah's method is called a work-experience and training program. But its training is not the usual type done in classrooms. Trainees learn to work by actually working. If private employment cannot be found for them, they are put to work for public agencies, doing jobs that are needed by State or local governments. They serve as teachers' aides in their neighborhood schools or plant trees in public parks, for example. They work three days a week but remain on the welfare rolls until they find regular jobs.

Only ill, aged or disabled persons or mothers with children under 6 years of age are exempted. All others are told to take one of the jobs offered to them or lose all or at least a part of their welfare payments.

Those who participate in the program are helped by the State to find jobs in private industry. Many are doing so.

In one six-month period, from July through December of last year, 782 people were assigned to the work program. Of that total, 311 were removed because they did not perform as required. But 11 people were hired by the sponsors who gave them their training jobs, and 218 found other kinds of employment. In addition, 109 mothers found enough work to reduce the amount of welfare funds needed to support their families.

"FEELING GREAT"

A 32-year-old mother of two children was hired recently as a full-time office worker in Salt Lake City's assistance-payments administration, the same office that handed her welfare checks for 13 years before she took job training for two years. During the instruction period, she says, "even though I was getting welfare I felt I was working for it." And now, she adds, "With my new job I am barely making ends meet. But I feel great because I am making it on my own."

Utah officials point out that communities as well as individuals benefit from the program. Some agencies, such as private nonprofit organizations that are constantly short of funds, report that the services of welfare recruits have been invaluable.

One self-help agency in Salt Lake City, for instance, had the funds to buy insulation for the homes of elderly poor people, but lacked money to hire workers to install it. Welfare trainees have been assigned to the job. Another self-help group put trainees to work repairing the homes of elderly Salt Lake City residents.

A QUESTION OF LEGALITY

Some cities charge that Utah's job-training effort is nothing more than a thinly disguised public-works program that uses under-paid welfare recipients in place of regular employees.

Legal-services lawyer Lucy Billings says she is considering filing a court suit against the program on the ground that it violates federal regulations that people cannot be required to work for their welfare payments.

It took Utah three years to get its program approved by the U.S. Department of Health, Education, and Welfare. For 18 months, HEW withheld federal contributions to Utah's program for Aid to Families with Dependent Children. It cost the State almost a million dollars to make the AFDC payments entirely from State funds. But many Utah people feel that it was well worth the cost.

Utah officials concede that their program might not work so well in other parts of the country, especially in big cities where population is denser and welfare rolls are much larger. Of Utah's nearly 1.2 million residents, only 39,000 are getting money grants of aid. Also, it is suggested, labor unions in more-industralized States might oppose welfare people being given jobs that might be sought by union members.

But in view of Robert W. Hatch, a field director for the Utah assistance-payments administration, public acceptance of the idea that welfare recipients should work for their money is spreading throughout the nation. Says Hatch: "I think that in time, putting welfare clients to work will become a common practice."

In fact, a trend in that direction is already apparent.

Oklahoma has a 2-year-old work-experience program that was passed by the legislature at the urging of Governor David Boren.

It requires that anyone 18 or older in a family receiving Aid to Families with Dependent Children must visit the local employment office and sign up for a job that's available.

In 1975, there were 2,300 persons participating in the Oklahoma program. Many worked in State institutions, hospitals or in county offices for $5 a day to offset expenses, plus their regular AFDC checks.

"They are usually placed in jobs where they can early be trained and hopefully be picked up by the business community," says a State spokesman. Last year, more than 700 persons were placed in permanent positions outside the government.

THE RISK OF REJECTING WORK

The Texas legislature recently passed legislation to supplement the Federal Government's Work Incentive Program. Welfare recipients must register for work, and if they reject a job without a good reason, their benefits may be cut off after an administrative review.

North Carolina's legislature this year passed a law requiring welfare recipients to register for work.

As the law's sponsor, State Senator E. Lawrence Davis of Winston-Salem, explains it: A family head who fails to register is taken off the rolls. But aid to his or her children will continue as "protective payments" made through some other person or perhaps an agency, such as a church. Since the law did not take effect until July 1, it's too soon to tell how effective it will be.

A PART-TIME WORK FORCE

In the State of New York, all employable persons receiving general welfare-assistance payments have, since May 1, been required to work three days a week in a local-government agency if jobs are available.

There are about 60,000 such persons, and State Social Services Commissioner Philip Toia says: "We're hoping to develop jobs within local-government agencies for at least 30,000 of those employables within the next three months. We're hoping that, when faced with working three days a week, many will go out and get a full-time job."

One problem is that four fifths of the employables covered by the program are in New York City, where in the last two years thousands of public employes have been laid off in the city's effort to cope with a financial crisis. "I anticipate some complaints from the municipal workers' unions," says Assistant Welfare Commissioner Irwin Brooks. However, acording to a *New York Daily News* poll published May 23, about 87 percent of residents in the New York metropolitan area approve of the new workfare program.

Work-for-welfare bills similar to New York's are pending in several States, including Connecticut and New Jersey.

Massachusetts is one of the States studying the Utah plan of mandatory work for heads of AFDC families. Since 1975, Massachusetts has barred all employable persons from direct relief or general-assistance rolls. The State of Rhode Island followed suit last September, cutting its relief case load by more than 20 percent.

MILLION-DOLLAR SAVINGS

Bridgeport, Conn., started last year a plan requiring employable people receiving welfare to work one or two days a week, depending on the amount of their aid. About 300 persons out of a case load of 1,300 are now working. If they fail to work for a period of two weeks, their benefits are automatically terminated.

Result: Bridgeport's case load has been cut 45 percent in a year's time, with a million-dollar reduction in the city's welfare budget.

Milwaukee County, Wis., has a locally run pay-for-work program requiring all able-bodied welfare recipients to take specially created jobs in municipal or county departments. They are paid $2 an hour for a 32-hour workweek.

One experiment being watched closely is a "supported work" program run by the Manpower Demonstration Research Corporation, a nonprofit, tax-exempt organization set up with the support of the Ford Foundation and five Federal Government agencies—principally the Department of Labor.

It has 15 projects in 13 States that provide jobs, monthly with public or nonprofit agencies, for more than 2,000 marginally employable people, including AFDC mothers. Instead of welfare checks, they get paychecks at minimum-wage rates.

A mixture of welfare funds and grants is used to finance the program. The workers will be helped to find permanent jobs in private industry once they have developed the necessary skills.

Many towns and some States have found that the administration of work-for-aid programs is too costly to justify the small numbers put to work. But the search for practicable systems goes on—and widens.

In the words of Fritz Kramer, a manpower specialist with the Labor Department: "A number of States are exploring ways to provide jobs in either the public or the private sector to get people off the welfare rolls."

Mr. TALMADGE. Finally, Mr. President, there is a very informative article from the November 8 Wall Street Journal entitled "Off the Dole: Efforts To Switch Poor From Welfare to Jobs Make Some Headway," that I ask unanimous consent to be printed in the RECORD. I trust that my colleagues in Congress will take careful note of my comments today and the facts backing them up before acting on welfare reform legislation.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OFF THE DOLE: EFFORTS TO SWITCH POOR FROM WELFARE TO JOBS MAKE SOME HEADWAY

(By Jonathan Spivak)

NORTH BILLERICA, MASS.—Last December, 36-year-old John Michaud lost his plumbing job and went on welfare to support his family on $173 a month. But now, after retraining, he is holding down a $305-a-week job as a railroad-car repairman here at Boston & Maine Corp.'s freight yard, and he's delighted: "I'd much rather be working here; the money is good."

Mr. Michaud is the beneficiary of a little-noticed federal program, known as WIN, that seeks to move people from the welfare rolls to private payrolls. Thus it's a forerunner of President Carter's proposed welfare overhaul, which emphasizes the same goal. After a sluggish start, WIN (it's short for Work Incentive Program) is gaining some victories that raise hopes for success of the Carter idea.

Last year, WIN projects placed 230,000 welfare recipients in jobs paying an average of $3.10 an hour, well above the federal minimum wage of $2.30. Two-thirds of the workers stayed on the job long enough to escape welfare entirely or at least to have their grants reduced. "In two years, we've increased private-sector employment (of WIN beneficiaries) by 50%," boasts Merwin Hans, the U.S. Labor Department official who runs the show.

The 10-year-old, $300 million-a-year WIN program, which gives employers federal subsidies to train and hire welfare recipients, is currently the main channel for the welfare-to-work switch. But lesser efforts in Massachusetts and some other states are also offering glimmers of hope.

PROJECTS IN MASSACHUSETTS

In Cambridge, Mass., a federal project known as the Job Factory requires relief recipients and other unemployed to spend 40 hours a week looking for work. They are taught how to conduct a job search, including writing of resumes; the need for promptness and good grooming is emphasized. Of an initial group of 107, some 60% landed jobs, and earn an average of $3.80 an hour.

In Boston, the nonprofit Transitional Employment Enterprises Inc. relies on another approach: converting a welfare recipient's grant into a paycheck while he or she learns a job. A carefully calculated system of incentives, regarding attitude, appearance and other self-improvement efforts, permits participants to earn an extra $40 a month. Among other skills, they learn typing, printing, light construction and welfare casework. So far six mothers taking part have graduated to regular jobs in the Boston welfare department. This venture "gives people a chance that never had a chance," rejoices one 25-year-old woman participant.

As these projects demonstrate, some welfare recipients can be coaxed off the relief rolls. And many of them, particularly mothers with dependent children, are eager to work. "I don't want to make a career out of welfare," vows a 29-year-old typist at Transitional Enterprises. (A prominently displayed note from her nine-year-old son helps illustrate the psychic awards. It reads: "Mother's got a job. She gets paid and she got a good job and there are nice people at her job.")

CARTER'S AMBITIOUS PLAN

The promise of these work projects has encouraged Carter administration planners to propose an ambitious $8.1 billion jobs and training program as the leading edge of their proposed welfare overhaul. Besides providing cash supplements for the working poor, the program would roughly double the number of public-service jobs to 1.4 million and would seek to install relief recipients in those jobs. Washington would also underwrite education and training intended to turn these government dependents into taxpaying workers The long-range goal: to assure every family head a job that would keep him or her out of poverty and off welfare.

As many as half of the nation's welfare recipients might move into jobs with this sort of help, some experts calculate. Carter administration officials offer a more precise prediction: that 43% of the mothers getting aid to families with dependent children would seek jobs, since they would make more money by working than by staying on welfare. Those mothers make up most of the adult welfare population.

But other analysts, including union and big-city officials, are skeptical of such forecasts. They say the administration may be overoptimistic in assuming the availability of adequate day-care services and of part-time work for women with young children. Besides, it may be difficult to generate all the additional public-service jobs planned and to fill the total number with welfare recipients. The plan assumes that current holders of public jobs can be moved onto private payrolls—a shaky assumption with unemployment at 7%.

EARLIER DISAPPOINTMENTS

Moreover, manpower experts recall disappointments in some past efforts to put welfare recipients to work. Employers have found that many, with low skills and poor work attitudes, have failed to stick at jobs after training.

But Labor Secretary Ray Marshall, who designed the welfare work provision, is confidently pushing ahead. He has strong backing, not only in Washington but around the country, for putting welfare recipients to work. It's partly a matter of philosophy, partly icy practicality.

"Every man and woman who is willing and able to work is entitled to a job," declares Gov. Michael Dukakis of Massachusetts. Notes Joan Willis, a jobs expert at the National Governors Association, "There's strong work-ethic feeling."

That feeling runs especially high among conservatives in Congress. Though they bitterly assail the $31 billion-a-year price tag on the Carter welfare plan, they are enthusiastic about planned employment efforts. So, too, are state and local officials; they see a chance to cut the welfare costs burdening their budgets.

And while union chiefs worry about low-wage competition for their members, some employers see the able-bodied adults on welfare as a potential pool of labor. Experiences with WIN have encouraged them.

Recently the B&M rail yard here, short of workers to unload some new autos, called the nearby office of the WIN program and within hours had 11 qualified candidates to choose from. "It's given us the ability to do things we otherwise wouldn't have been able to do," Alan G. Dustin, B&M president, says.

STATE PROGRAMS

So, with diverse support it's getting, the Carter proposal for putting welfare recipients to work is likely to command serious congressional consideration even if other parts of the welfare plan languish.

Whatever happens in Washington, some state governments are moving ahead on their own. In 1974, Utah started a mandatory work program for able-bodied welfare recipients. They work three days a week in such public jobs as highway maintenance and spend two days looking for permanent private employment. State officials figure that in two years the plan has reduced the welfare rolls by 16 percent and saved $341,000.

In New Hampshire, a unique program known as Women for Higher Education is enabling 208 welfare mothers to earn college degrees and a chance to enter the working world. More than half who graduate leave the welfare rolls, taking jobs as nurses, social workers, teachers and secretaries. New Hampshire will save a modest $107,000 this year in welfare costs, but the real winners are the women who manage to escape the so-called cycle of dependency, in which families are stuck on welfare for generation after generation. "We want to break the cycle, provide people lifelong options," explains Susan O'Brien, project coordinator.

Among other states, Massachusetts, Connecticut, Florida and California are examining the potential of programs that require welfare recipients to work at public or private nonprofit jobs. Recently, officials of the Labor and Health, Education and Welfare departments in Washington gave tentative approval to a request from Massachusetts Gov. Dukakis to begin a pilot "workfare" program for 2,000 unemployed fathers currently on welfare; the federal officials promised to pay up to $2 million of the cost. The plan requires special approval because of Washington's concern that work requirements might violate the concept of giving welfare benefits without any strings.

The 2,000 Massachusetts fathers would go to work three days a week at public agencies or private nonprofit institutions such as day-care centers. On the other two days, they would get counseling and job-referral aid. The plan is being presented as a way to determine which relief recipients are employable and which aren't. It also symbolizes a tough-minded approach toward welfare that appeals to taxpayers.

LIBERAL OPPOSITION

But the opposition from liberals is running strong. "Impressed labor," snorts Paula George, coordinator of the Massachusetts Coalition Against Welfare. The jobs would be "demeaning," argues Frank Gullini, head of a job training center in Springfield; he contends the recipients would be "further entrapped in welfare." State Rep. Barney Frank demands: "How are you going to check to see that sponsors aren't exploiting these people?" The critics say similar "workfare" experiments in the past have been costly and unrewarding.

The WIN program is another matter, however. Massachusetts, with welfare outlays of more than $500 million a year squeezing the state budget, has mounted probably the most determined effort to make WIN work in cutting welfare costs. In the past year, about 5,400 jobless fathers, more than half the number on the welfare rolls, have been placed in private and public jobs, saving the state an estimated $10.5 million annually. Gov. Dukakis credits this achievement to better administration, though the stronger economy certainly helped.

For a closer look at one of WIN's successes, see what United Technologies Corp.'s Pratt & Whitney Aircraft group is doing at its huge 20,000-employee jet-engine plant in East Hartford, Conn. The plant hires 5 percent to 10 percent of its new employees through WIN; in return, the company gets some $200,000 a year in tax credits. Pratt & Whitney executives say the local WIN office does a better job of selecting workers than does the regular federal-state Employment Service. The welfare graduates start work at $4.50 to $4.73 an hour and 70 percent of them stay on the job, a rate equaling or exceeding that for other employes. Their motivation is strong. "Most of them like to forget there was a time they needed to be on welfare," William Gilson, personnel manager says.

BELGRADE CONFERENCE

Mr. DOLE. Mr. President, as a member of the Commission on Security and Cooperation in Europe, I participated last week in the Conference now underway in Belgrade, Yugoslavia, together with my fellow Commissioners, Senator PELL and Congresswoman FENWICK.

For the past few months, the delegates have been systematically and thoroughly reviewing all the provisions of the Helsinki Final Act and have now moved into the next stage, that of examining and tabling new proposals and language.

In addition to attending the meetings of the working groups or baskets, as they are called, during the week, it was my privilege to address the plenary session of the Conference on Friday, November 25, 1977, and I ask unanimous consent to have the full text of my remarks printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR DOLE AT THE PLENARY SESSION

Mr. Chairman, I wish to extend my gratitude to the government of Yugoslavia for the excellent job they have done in hosting this historic meeting. Although my duties in the Senate of the United States have prevented me from spending as much time here in Belgrade as I would have liked, I, along with my colleagues in the Congress, have followed these proceedings very closely and with great interest. The Chairman of my delegation, Ambassador Goldberg, has articulated the views of our government and our people on many occasions during this meeting in a frank and forthright manner. He has expressed the particular concerns of our country that the human rights provisions of the Helsinki Final Act be implemented and observed. In doing so, he speaks for all Americans.

My delegation, however, is not only concerned with the human rights provision of the Final Act. We are dedicated to the fulfillment of all its provisions. Quite frankly, great doubts were expressed by many Americans about the Final Act at the time it was signed in August of 1975. It was not all some Americans wanted and more than others cared for. President Ford was criticized for his participation at Helsinki and the Final Act was a matter of some contention in last year's Presidential election.

To his credit, President Carter not only continued, but personally strengthened America's commitment to implement the Final Act. Just last week, Vice President Mondale reaffirmed this resolve. American commitment to the implementation of the Final Act is across the Board, it is strong, it is bipartisan.

Mr. Chairman, I am sure that whatever is accomplished here will be the result of compromise and cooperation. It is significant, however, to note that whatever the end results, there has been a review of the Final Act and there is a consensus for additional meetings. This, in itself, is progress—painfully slow as it may be.

POLITICS OF HUMAN RIGHTS

Without a doubt, it is popular politically speaking, to pursue the quest for human rights. In most cases, it is also highly appropriate. Some, of course, would have you believe they discovered the dignity of man, while others are quick to condemn but slow to self-examine.

Ambassador Goldberg and other United States delegates have been specific and to the point. They have properly stated our case. Therefore, it is not my purpose to confront, or posture, or pound anyone over the head. Specific "human rights" cases which have been called to my attention have been passed on to appropriate officials. I shall hope for expeditious handling and favorable disposition. My delegation does not seek to confront but to cooperate and we do not seek to confuse but to clarify and not to weaken but to strengthen.

A NATION OF IMMIGRANTS

We are a nation of immigrants, people who have come from all over the world to participate in the promise of America. Most of our population come from European backgrounds. They have cultural and ethnic identity with most of the participating states in this meeting. They actively maintain their interest in their heritage and in their former homelands.

They express their interest through associations and organizations throughout America. For example, I have met with representatives of organizations such as the National Confederation of American Ethnic Groups, the Czechoslovak National Council of America, the Congress of Russian Americans, the Polish American Congress, the Hungarian Organization in North America, the Ukrainian National Association and the Joint Baltic American National Committee—and many others. They have expressed their concern not only about the human rights provisions of Basket II and Principle VII, but also about the right of self-determination of all peoples.

It is a fact that the United States has never recognized the Soviet incorporation of Lithuania, Latvia, and Estonia and U.S. official policy of non-recognition was not affected by the results of the European Security Conference. This long-standing principle is the policy of the United States and is supported by the Congress of the United States.

I cite these groups and their concerns not to be provocative or confrontational. I merely wish to clarify and explain the reasons for the strong concerns of my delegation and my government in the field of human rights. There is—in my opinion—a direct connection between the public perceptions of the integrity of the Helsinki Process and the ability of governments in the West to carry on the process

of detente. Public trials of political dissidents, for example, could have a profound impact on pending or subsequent bilateral and multilateral agreements. Most members of the Congress of the United States believe, in my opinion, that human rights cannot be subordinated to development, cooperation, and security.

Our basic goal is to promote genuine understanding and relaxation of tensions between the participating states, greater respect for human rights, freedom of religion of self-determination of all peoples. We view CSCE as an important step toward achieving these objectives. We also understand that ours is not a perfect system—that we too have our own problems and failings—but we are making efforts to do better, and we will continue our work toward full implementation of all the provisions of the Final Act in our own country.

AMERICAN PROPOSAL

Finally, it is in this spirit that the American delegation, with the support of other delegations, will put forward a proposal which will, among other things, recognize the importance of the CSCE process and its continuation. The proposal will resolve to implement unilaterally the relevant provisions of the Final Act relating to human rights and fundamental freedoms and to ensure their implementation bilaterally and within the context of the CSCE and other multilateral fora.

December 10 is Human Rights Day, Anniversary of the U.N. General Assembly's adoption of the Universal Declaration of Human Rights in 1948. May it serve to remind all nations of how far we have come and the distance yet to travel as we strive for future cooperation and security in Europe.

KAISER ALUMINUM AND WBOY–TV, ON THEIR 20TH ANNIVERSARIES, PROVIDE POSITIVE PROOF OF WEST VIRGINIA'S PROGRESS

Mr. RANDOLPH. Mr. President, on November 17, 1957, the first aluminum was produced at Kaiser Aluminum's giant Ravenswood reduction plant. This metal was the very first trickle of what now totals 6 billion pounds of aluminum produced at Ravenswood. It marked the first time that aluminum had been poured in the Ohio Valley and in West Virginia.

Twenty years later, on November 17, it was my privilege to return to the Jackson County site—once a barren cornfield along the Ohio—and tour the huge plant which has 110 acres of production area under roof. It is the largest manufacturing plant in West Virginia.

Ravenswood works manager L. J. McAdams and Warren Cooper, manager of Midwestern regional public affairs for Kaiser Aluminum in Charleston, recounted to me the spectacular growth of the plant as we visited the production areas.

Coincidentally, on that same date another West Virginia industry marked its 20th anniversary. At Clarksburg, Harrison County, I participated in a special birthday program marking the two decades of operation of WBOY–TV, channel 12.

Both the aluminum and television industries are relative newcomers to this modern age of technological development. So 20 years of operation is a record worthy of note.

WBOY–TV was founded on November 17, 1957, as a sister station to WSTV, channel 9, Steubenville, as part of the Friendly Group. The station started with modest studio facilities, but today it is housed in a modern facility. The station has 129,000 watts of power on a 600-foot antenna—highest in central West Virginia. It covers 10,000 square miles of viewing area, and serves four States through a CATV system. Its maximum potential coverage ages is an estimated 750,000 individual viewers.

Principal owner of WBOY–TV is Birney Imes, a highly successful businessman and publisher of Columbus, Miss. The management and production staff includes Skip Sims, general manager; Bob Toothman, operations manager; Joe Wright, chief engineer; Bob Phillips, news director; Frank Gregg, sales manager; and John Pratt, public affairs director.

WBOY and its staff have received a number of awards for public service over the years, including on several occasions around-the-clock broadcasting in natural disasters.

In recognition of the two anniversaries I have described, I ask unanimous consent that a news article which appeared in November 20 edition of the Ravenswood News be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Ravenswood News]

SENATOR RANDOLPH TOURS KAISER'S RAVENSWOOD WORKS

Senator Jennings Randolph reviewed the growth of Kaiser's Ravenswood Works at the plant Thursday and said, "I have reason to believe there will be further expansions in the future."

Randolph toured the giant aluminum-producing facility—one of 40 such operations in the world—on the 20th anniversary of the start of production there.

"Twenty years ago," he observed, "Kaiser Aluminum gave a tremendous boost to the West Virginia economy in start production with 1,300 workers. Today, there are 3,800 workers at the plant—an increase of 2,500 industrial jobs since 1957."

Randolph toured the 110 acres of production area, met with employees during a shift change, and commented:

"Everyone I meet, the managers and employees, tell me this is the best aluminum plant in the world."

The West Virginia senator recalled that he had introduced the late industrialist, Henry J. Kaiser, when he was toastmaster at a community banquet in Ravenswood on May 30, 1955. "He said then that the plant would be located in West Virginia because of the spirit of its people. Henry Kaiser had a philosophy that it was more important to build people than plants, and that has paid off handsomely for Jackson County and for West Virginia."

It is that spirit, Randolph added, which has created a "bright new chapter in our state's industrial history." He noted that within the past half-dozen years Jackson County has grown in population by six percent.

"This is a story of tremendous opportunity and growth, of progress and prosperity," Randolph concluded. "It is a story that you, the employees of Ravenswood Works, are continuing to write today. I congratulate the employees of Kaiser Aluminum, and the people of Jackson County."

Earlier Thursday, Randolph participated in another 20th anniversary celebration, at WBOY–TV in Clarksburg. During an interview, he recalled that his son, Jay, now a nationally known sports broadcaster, got his start in television with the Clarksburg station.

CTX AIRCRAFT PROCUREMENT

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from Arizona (Mr. GOLDWATER), and the material attached thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR GOLDWATER

On November 3, I wrote to the Secretary of Defense about Navy's decision to procure the CTX aircraft on a sole source basis without benefit of open competition. I asked the Secretary of Defense to look into this matter and to give me his views as to whether this type of procurement, that is sole source, is to be the standard for the Department of Defense in future procurements. I have also asked that after he reviews this intended procurement, he advise the Navy that it should proceed with an open competition for the CTX aircraft.

I have not yet received a reply from Secretary Brown but I hope he will see fit to direct Navy to procure the CTX only through open competition.

On November 18 I responded to the Secretary of the Navy's letter of October 31 in which he advised me that he had decided against acquiring the CTX through open competition. I had placed Secretary Claytor's letter of October 31 in the Record of November 1, 1977. The essence of my most recent letter to Secretary Claytor is that I do not accept his decision as being final and that I intend to pursue this matter as long as I can to do everything that I can to get Navy to acquire the CTX through competitive procedures.

COMMITTEE ON ARMED SERVICES,
Washington, D.C., November 3, 1977.

Hon. HAROLD BROWN,
Secretary of Defense,
The Pentagon,
Washington, D.C.

DEAR MR. SECRETARY: On November 1, I received a letter from the Honorable W. Graham Claytor, Jr., Secretary of the Navy, advising me that the Navy was going to acquire its CTX aircraft without benefit of open competition. I am enclosing a copy of Secretary Claytor's letter, along with three extracts from the Congressional Record, which outlines quite clearly my interest in this particular matter.

I am most disturbed that the Department of Defense would allow the purchase of this aircraft without competition, since I have always felt this is the best way to get both price and quality. I wanted to bring this matter to your attention to have your views on whether this type of procurement is the standard for the Department of Defense. I hope after you review the material relating to this case, you will see fit to advise the Navy to proceed with an open competition.

Sincerely,

BARRY GOLDWATER.

COMMITTEE ON ARMED SERVICES,
Washington, D.C., November 18, 1977.

Hon. W. GRAHAM CLAYTOR, Jr.,
Secretary of the Navy,
The Pentagon,
Washington, D.C.

DEAR MR. SECRETARY: This is in response to your letter of 31 October in which you advised that you had decided against acquiring the CTX through open competition.

As I stated on the floor of the Senate on 2 November, I am deeply disappointed that you have decided to proceed in this manner.

To me, your decision to go against the principle of open competition in the acquisition of this aircraft is just not understandable and I fail to see how you can believe, as you stated in your letter, that it is in the best interest of the Navy to acquire this aircraft through other than open competitive procedures. Frankly, I do not accept your decision as being final and I do not intend to let up on my insistence that this should be a competitive procurement.

As I said in my floor statement of 2 November, I am exploring the possibility of asking the General Accounting Office to examine whether or not this procurement falls within the guidelines of the ASPR. In addition, in the near future I will be requesting the Department of the Navy to provide me with a list of all contracts that were let sole source in fiscal years 1977 and 1978, along with an explanation of why such a sole source contract was necessary. When appropriate, I then intend to put this information in the Congressional Record.

I very much regret that you have elected to acquire the CTX through sole source procedures. However, as I said in my letter to Secretary Brown of 3 November (copy enclosed), I hope he will see fit to direct Navy to proceed with an open competition.

Sincerely,

BARRY GOLDWATER.

REDUCTION OF CUSTOMS DUTIES

Mr. TALMADGE. Mr. President, 3 weeks ago, my colleague from South Carolina introduced a resolution which would place the Senate on record opposing any reduction of customs duties on textile, apparel, or fiber products during the Tokyo round of multilateral trade negotiations in Geneva.

I wish to congratulate and commend the Senator for offering this resolution. It addresses a problem which confronts a great part of this Nation. The matter of textile and apparel imports, specifically the subject of textile tariffs, is important to my State, for many States in the Union and, in fact, for the entire Nation.

In introducing his resolution, Senator HOLLINGS placed before this Senate specific details of a situation that cannot be ignored. Each Member of this body, and each official of the executive branch who has responsibility in the area of international trade policy must take notice.

When the interests of the U.S. textile industry are threatened by imports and may be further jeopardized by international negotiations to which we, as a nation, are a party, it is time for us in the Senate to take stock of the situation.

Therefore, Mr. President, I would like to take a few minutes to respond to those who would propose to reduce textile and apparel tariffs during the Tokyo round exercise. For them, some pertinent points need review.

It has been 20 years since the textile industry of this country has enjoyed a favorable balance of trade. Last year the textile trade deficit represented $3 billion of our Nation's $9 billion total trade deficit. The situation has deteriorated even more in 1977. Based on the first 9 months of this year, the projected year-end textile trade deficit will be $3.2 billion. In equivalent terms, the 1976 deficit was $2.8 billion.

This fact, in itself, is sufficient reason for demanding no reductions in textile tariff rates. But the condition of our balance of trade in textiles has broader implications than a tally sheet shows.

The textile/apparel complex is the largest employer of manufacturing labor in the United States—large enough to include one out of every eight manufacturing jobs. Of this total work force, a great percentage are either women or members of minority groups—both very critical sectors of our economy. Both of whom make up a disproportionate share of our Nation's unemployment problems.

Present unemployment in textiles is 7 percent; 10 percent in the apparel sector. When you consider that many of these jobs are in central cities and rural towns where no realistic employment alternatives exist, these figures take on added importance.

As you probably know, the textile industry's impact on our economy is dramatic. It is a $40 billion a year business. Its effective Federal income tax rate alone is 40 percent. Only one other U.S. manufacturing industry has a higher rate.

Textiles is also a consumer of other American products, such as cotton, wool, and manmade fibers.

In terms of what it produces, who it employs, where they work, the U.S. textile industry is vital to the fundamental well-being of our Nation.

In terms of national defense, the industry also assumes great importance. In defense of our country, textiles has been rated second only to the steel industry.

Yet, this crucial industry today faces a real threat from high rates of imports. And, as we know so well, a high rate of foreign imports means a great loss of American jobs. And a great hardship on our people. A hardship they should not have to bear.

For those who would propose throwing textile tariffs on the bargaining table, consider that textile imports in the past 5 years translate into a loss of 400,000 American jobs.

Consider, too, that there have been two dozen closings of textile plants this year alone.

I do not believe we can continue to condone the exportation of American jobs, American dollars, American technology, so that other nations can profit at the expense of all Americans.

Mr. President, perhaps no other nation has so completely embraced the concept that a man who can build a better mouse trap deserves to sell that mouse trap in a fair and free market anywhere in the world. This has been an American goal since the dawn of history.

Unfortunately, the real world has proved far different than the world of the idealists. Free trade will never be, as long as we are willing to give away jobs and our industrial capacity to any country that comes along and wants it. Yes, the ideal would be a free-trade world. But to be free, trade must also be fair. The word "trade" itself implies reciprocity of action. In order to receive, we must be willing to give. By the same token, in order to afford to give, we must exact a reasonable return for our contribution. So far, the United States has been a loser on all counts.

It is not enough to simply open the American market to the world without inflicting the same restrictions on foreign producers that we inflict on our own companies and businesses.

When foreign governments subsidize their manufacturers, offer a variety of incentives and bonuses, which our own domestic manufacturers lack, then I question where the equity is.

Likewise, it is not fair to allow foreign producers to enjoy advantages in the American market that our own manufacturers do not have.

Take wages for instance. The average American textile worker earns $4.03 per hour. In some less-developed countries, the wage rate is 25 to 50 cents an hour. In many of these low-wage countries, children work in textile mills where working conditions would shock and disgust any American. And that brings about another point.

The U.S. textile industry today faces the probability of spending literally billions of dollars to improve safety and health conditions in their plants, already the most modern and efficient in the world. An expenditure that our foreign competitors do not bear. An expenditure that amounts to a reverse subsidy favoring foreign textile producers who would sell in the American marketplace.

If anyone thinks that is free trade, they are kidding themselves. It does, however, emphasize the fact that if we cannot have free trade, then orderly and regulated trade is the only compromise.

In the last decade, textile imports have grown at an average rate of 5.5 percent annually, or a total of 71 percent. The U.S. textile market, however, has grown only 2.5 percent per year, or 28 percent overall.

These figures do not point to orderly and equitable trade. They pinpoint the fact that the American textile industry is on a collision course with disaster.

Another figure adds to the concern. The GATT multifiber arrangement which is expected to be renewed at the end of this year will apparently include an annual, allowable import growth rate of 6 percent. This will permit textile imports to capture an even greater portion of the U.S. market which has been expanding at less than 3 percent per year. Certainly, more American jobs will be lost.

Yet, we hear reports about the possibility of deep cuts in U.S. tariffs on textiles and apparel. Even though current tariffs do not limit access into the U.S. market, we hear talk of cutting those tariffs somewhere between 44 and 60 percent.

Such action would serve only to compound an already complex situation. It would only serve as an open invitation, courtesy of the U.S. Government, for an unwarranted surge of foreign textiles into the U.S. market. A 6-percent decline in import prices, if domestic prices remained unchanged, could boost imports of fabric by an average 700 percent. A 50-percent cut in tariffs would result in a loss of 2.2 million American jobs by 1985,

approximately 600,000 jobs from the textile and apparel industry and 1.6 million jobs in other businesses and industries, due to a "ripple" effect.

Mr. President, I join the Senator from South Carolina in saying that the American textile industry cannot withstand the shock of that situation. Nor should it have to, given its importance to our economy.

For that reason, I urge each of my colleagues in the Senate to support resolution 324. There should be no reduction of U.S. tariff rates on textiles and apparel imports. Textile, apparel, and fiber products should be fully excluded from the Tokyo round of multilateral trade negotiations.

American's textile industry and its 2,300,000 employees deserve no less.

PITTSBURGH STEEL CONFERENCE

Mr. SCHWEIKER. Mr. President, during the November recess I had an opportunity to address the Pennsylvania Steel Conference in Pittsburgh. This important meeting of business, labor and government officials was called by Governor Shapp because of the critical and growing crisis in the domestic steel industry.

Because of the wide-ranging impact the steel industry has on the national economy, I ask unanimous consent that the text of Governor Shapp's significant keynote address to the conference be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

The present steel slump could trigger a major recession in the United States unless effective national and State programs are quickly developed to deal with the core problems.

The purpose of this conference—being held in the nation's steel capital—Pittsburgh—is to analyze the major causes of the present crisis and to develop programs of action to deal effectively with these problems.

This is a crisis which, although years in the making, suddenly has become the focus of national attention. The President has appointed a task force to recommend new policies; foreign trade experts are closely examining the steel imports issue; and more than 100 Congressmen and Senators have formed a steel caucus to coordinate legislative actions.

We in Pennsylvania, and in steel states and communities across the Nation, must also respond. We will be the ones most directly affected by policies that the President and Congress develop. We must also respond because there are many States and local programs and policies which have direct impact on the steel industry.

Thus I want to suggest three objectives for this conference and for the activities which will be taken to follow-up today's session:

First is fact-finding. I am hopeful that each of the task forces today will develop a statement of facts and issues which reflects the situation here in Pennsylvania and in States and communities across the Nation.

Second, I am hopeful that the conference and succeeding activities will yield a thorough review of State and local policies and program as they affect the steel industry. Six of my cabinet officers will participate in the task force sessions scheduled for today. Their purpose is to expedite recommendations for State action, which may range from retraining programs for laid-off steel workers to investment in public works to aid directly the industry.

Third, I think the conference must focus on national policies and programs. Rather than being the recipient of unforeseen impacts of policies conceived in Washington, we as Pennsylvanians should state our problems and recommend solutions that will benefit all citizens of the commonwealth and of the Nation.

Pennsylvania has much at stake. We are the leading steel-producing State in the Nation. Though the steel problem is national—in fact, international in scope—our State, the home base of the largest American steel companies, accounts for more than 20 percent of all American steel production, and thus, is the State that is hardest hit by the present crisis.

All kinds of reasons are being advanced as the causes of this current situation—foreign imports, obsolete American steel plants, the general slowdown in the American economy, less steel needed by automobile manufacturers, fall-off in highway, bridge, and housing construction projects; large capital outlays needed by steel manufacturers to meet environmental standards, high labor costs, and the low productivity of our steel plants, et cetera, et cetera, et cetera.

Each of these reasons has some validity, thus the solution for our steel manufacturing problems is not simple.

But effective programs must be developed or there is a grave danger this nation could slip into a depression period of major depth and length.

In Pennsylvania, 10,000 steel workers have been laid off in the past three months alone. Twice that number of jobs have been lost in the steel industry in our State in the past three years and five times that number in the last decade. The ripple effect is even more devastating on our economy.

For example, when Bethlehem laid off 3,500 employees in Johnstown after the flood in August, 1,800 coal miners in the area also lost their jobs. Another 5,000 jobs are being whittled away in wholesale and retail businesses, in transportation and other sectors of the economy. The costs of the Johnstown layoffs include annual income reduction of nearly $150,000,000 and loss in tax revenues to the State and local government of over $5,000,000 a year. These layoffs will also cost at least $18 million just in unemployment compensation.

These same losses have occurred across the Commonwealth in recent months: In Philadelphia where the curtailment or closing of the Alan Wood, Midvale, and Phoenix Steel Companies have cost 7,000 jobs . . . In Bethlehem where 1,500 have been laid off . . . in the Mon Valley where several large facilities are struggling to maintain viability . . . in New Castle, Sharon, and Farrell where the layoff of 5,000 workers from the nearby Youngstown, Ohio mill has boosted unemployment substantially . . . and in a score of smaller communities.

We are now paying, in the form of lost jobs, lost income, lost tax revenues, and inflated unemployment compensation and social costs, for the failures of past policies to maintain demand for steel and to stimulate, on a continuing basis, modernization investments in the steel industry. These same dollars which are now committed to the nonproductive support of the unemployed, and to the payment of trade adjustment assistance to industries could be targeted to programs to increase demand for steel and to modernize the productive capacity of the industry.

Many suggestions have been advanced to cure the ailing American steel industry—from imposing import quotas to granting investment credits to steel companies for modernization purposes.

In your panel meetings at this conference, undoubtedly you will be discussing these issues. But I would like to present for your consideration what I consider to be the key program for action to revive the steel industry in America—an issue that unfortunately, has not received as much attention as it deserves.

We should be developing major public sector investment programs in the United States that would directly stimulate significant new demand for steel products and, through such programs, also greatly increase demand for steel in the private sector.

For example, in 1974, I advocated that the Federal Government establish a rail trust fund similar in nature to that of the revolving highway trust fund. We all know the dilapidated condition of our American railroads. There is no way we can possibly fulfill President Carter's national energy objective to increase coal production to a billion tons a year without modern, high-speed rail service in the Appalachian, Midwest, mid-Atlantic and New England States.

The rebuilding of our railroads calls for an investment of approximately $20 to $22 billion. This investment could be repaid by adding a small surcharge on the rail freight bills. The concept is not new. The 4 cent per gallon Federal Gasoline Tax has already brought many billions more dollars back to the United States Treasury than the amount invested in building the Interstate Highway System.

To rebuild rail roadbeds throughout the nation will require more than five million tons of steel. New locomotives and freight cars and electrification of main lines in order to cut energy requirements by at least a third will demand many additional millions of tons of steel.

Congress adopted the principles of the rail trust fund program in the 1976 Rail Act, setting aside $1 billion for rail improvements, including electrification, with the money to be advanced to the railroads and repaid to the Federal Treasury over a period of years.

This is not nearly enough money to do the job, but to date neither the U.S. Transportation Department, nor the railroads has fully implemented even this program. I think it is time to re-examine this plan, for it attacks the triple problem of our energy shortage, deteriorating railroads and the steel crisis.

Mass transit construction is another area that could utilize tremendous quantities of steel simultaneously while reducing this Nation's reliance upon imported oil. The present funding available to urban areas is ridiculously low in view of the massive transportation plight of almost every major city in the Nation. Here again, enormous quantities of steel could be put into constructive use.

In another public works area, it is estimated that a staggering number of more than 100,000 bridges in the nation (3,000 in Pennsylvania alone) are unsafe and badly in need of major repair or replacement. The tonnage of structural steel needed to make our bridges safe in America could be a major additional source of demand. By undertaking a sincere effort to repair these bridges, we would not only be aiding the steel industry, but also helping protect the lives of countless motorists. Highway construction and maintenance is also in the doldrums in Pennsylvania and many other States because of lack of funds.

In Pennsylvania this problem is acute because of the dire fiscal condition of our State motor license fund which finances all highway construction and maintenance. Right now, new construction of State highways and bridges is at a standstill, and maintenance has been curtailed because inflation and more efficient automobiles have reduced to a critical point the funds available for highway and bridge programs.

If the Pennsylvania General Assembly accepts my recommendations for increasing the revenues to the motor license fund, and if this were coupled with essential new Federal programs to support maintenance of the interstate highways in Pennsylvania and the other States, this would stimulate demand for steel to make vitally needed highway improvements which in turn would help the national economy.

In another area, the slump in building construction has cut steel shipments in this sector by more than 40 percent over the past 3 years. Yet major cities continue to decay and millions of our people are ill-housed.

There are many programs needed to stimulate the construction industry, but one simple one would be to allow builders a fast tax write-off on new construction. For example, if a builder could recapture his investment through depreciation in 5 or 10 years, this would give great impetus to the construction and steel industries. Safeguards would have to be written into the law or regulations to prevent such depreciation from being used more than once, but this would not be difficult.

Such a tax program would be more effective to stimulate the steel industry than granting direct investment credits to the steel industry itself since at the present time, with demand for steel so weak, it is not likely that such tax credits would serve as leverage to attract capital for new construction investments.

In a number of other areas, targeted public investments could have the same effects. Water and sewer construction, reconstruction of dams, and construction of energy research facilities are just some examples of investment projects which not only would stimulate demand for steel, but also would yield large social benefits.

Stimulating demand is a far more positive solution than one that calls for the erection of trade barriers. I know that industry, labor and Members of our congressional delegation have called for stronger import restrictions on foreign steel. The 3-year import restriction on specialty steel seems to have revived this industry somewhat, and I can sympathize with current efforts to extend those restrictions.

I certainly agree that dumping—that is, the selling of foreign steel in this country below cost—is a practice that should and can be stopped by enforcement of our international trade agreements.

However, we are gravely mistaken if we believe that an end or even a major curtailment of dumping will completely solve the current steel crisis. Foreign steel has made inroads into our domestic market through production in modernized and more efficient plants.

American labor has been unfairly maligned as a costly factor in American steel production. But, steel workers in Japan and the major European steel-producing countries have steadily narrowed the percentage gap between what they and American workers earn. These nations have absorbed rising labor costs through increased production and sales. We can do the same.

On the other hand, we cannot expect industry to invest in new production capacity unless there is increased demand for steel. As I said, much of that demand can be created by targeting public funds for long-neglected public works programs.

There are those who complain that our national and State anti-pollution laws have siphoned-off much of the steel industry's investment capital. There is some validity to this claim. However, it is clear that if we fail to cleanse our air and water and to protect our land, the social costs to this Nation will far outweigh the minimum capital that might be freed for the industry.

Unfortunately, the Nation's pollution problems were ignored for too many years and recent efforts to control pollution have proven a sudden, heavy expense. Therefore, we should explore methods of financing pollution programs that do not severely penalize our manufacturers, particularly those with older facilities. This can be done through tax incentives including more rapid write-offs—perhaps even immediate write-offs—on investments for anti-pollution equipment.

In this statement, I have merely skimmed the surface of the range of problems facing our steel industry and outlined what I believe are some basic programs that offer the greatest hope of recovery.

You will delve into these problems in greater detail at your sessions today. As you do, I would remind you that time is running against America and that a comprehensive agenda for positive action is needed now.

We will make our recommendations to Washington. But there is much we can do at the State level too. You, the representatives of industry and labor, have direct access to me, to my cabinet and to other key officials in our State government. Let us work together on a swift and effective course of action, for none of us can afford to let the problems of our steel industry remain unresolved.

WOMEN IN HIGH-LEVEL POSITIONS

Mr. DURKIN. Mr. President, I rise to commend the administrator of the General Services Administration, Jay Solomon, for having taken seriously the campaign pledge of President Carter to open the processes of Government for women. It recently came to my attention that of the 11 top level positions that are immediately subordinate to him, he appointed three women. They are Ms. Janice K. Mendenhall, who started with GSA as a summer intern in the 1960's and is today the Director of Administration, a GS–17 position. Ms. Allie Latimer, an attorney who has been with GSA for 20 years and is the first black woman appointed general counsel of a major Federal agency. Mr. Solomon's appointment of Ms. Latimer puts her in charge of a staff of over 140 lawyers. Lastly, Jay Solomon appointed Rilla Moran Woods, Director of Public Affairs for this agency which employs over 35,000 citizens. Ms. Woods is one of the highest ranking women in Government public relations today.

In the next tier of top level positions with the agency are those of confidential or special assistant. Jay Solomon appointed 6 women out of 20 employees. In addition, I am informed on August 26, 1977, he issued a "plan to increase women in managerial and midlevel positions" to all of the GSA services and staff offices, reiterating his "interest and commitment to insure equal opportunity in all of our agencies to insure the equal treatment of women."

The Solomon plan calls for increasing the number of women at GS 12–15, the senior level of Government service, to 33 percent of the work force in the next 3 years. I was particularly struck by the statement attributed to Mr. Solomon in response to a question when he was addressing a group of employees in the Midwest as to whether he was really serious about his intentions. Mr. Solomon said:

I certainly am and I cannot emphasize too strongly my intention to see that women get an equal opportunity.

As you know, Mr. President, I have been publicly critical of Dr. Schlesinger's lack of commitment to the administration's pronouncement concerning equal opportunity for women and minorities. I think it might serve a very useful purpose if Dr. Schlesinger would put down his pipe and bird guide and follow the example of his other colleagues in the top echelon of Government such as Ray Marshall, the Secretary of Labor, and Jay Solomon, the Administrator of GSA. It would appear that we have an administration in which all the members are not necessarily pulling on the oars together. If the ship of state is to flow through the waters of domestic concern smoothly, then their equal degree of commitment is a prerequisite by the Members of the Cabinet. I do not know Mr. Solomon, but I am increasingly encouraged by what he is doing to improve the image of a rather moribund agency in the short period of time since he has been in Washington. But it is not image alone that impresses me, but, rather concrete results which are capable of being measured in a concrete way.

A SALUTE TO HUBERT H. HUMPHREY

Mr. CASE. Mr. President, I wish today to salute my comrade in arms, the distinguished Senator from Minnesota, HUBERT H. HUMPHREY.

Senator HUMPHREY and I have worked closely together for a number of years. Specifically, I think of our struggles in behalf of civil rights legislation, nutrition legislation, foreign aid, disarmament and of our time together as colleagues on the Foreign Relations Committee.

Senator HUMPHREY is a man who embodies the best in our country's long liberal tradition. He is a tireless worker, an enthusiastic spokesman and a great humanitarian.

I can think of no better tribute to him than the establishment of the HUBERT HUMPHREY Institute of Public Affairs at the University of Minnesota.

I wish this effort every success.

ECONOMIC EFFECTS OF STATEHOOD FOR PUERTO RICO

Mr. JOHNSTON. Mr. President, today I am releasing a Library of Congress study on the economic effects of statehood for Puerto Rico from the standpoint of Federal tax and expenditure programs. The study is an excellent one and provides the first in-depth data on this subject which I have seen. The conclusions are persuasive and well documented and all of the questions are answered definitively.

Perhaps the most important conclusion of the study is that tax exempt subsidiaries of U.S. corporations operated under section 936 of the Internal Revenue Code in Puerto Rico would sustain a net loss estimated at almost one-half billion dollars annually. Losses of this magnitude would inevitably result in a total reevaluation of investment opportunities in Puerto Rico. Although no one can ac-

curately predict how these businesses would react, there would be disastrous consequences for the Puerto Rican economy if ongoing investments (and employment) were substantially reduced. This possible reaction of business, and its effect upon jobs and the Puerto Rican economy, should be studied more carefully before any policy changes are made.

The study further shows that the government of Puerto Rico would receive about the same amount of revenues (including taxes, excise and duties) and transfer payments under full State treatment as it does under the commonwealth arrangement. This conclusion is of particular interest in view of the claims made by the participants of the Puerto Rican status debate. They have alleged, on the one hand, that statehood would cost the Government of Puerto Rico nearly $1 billion in lost revenues (due to higher Federal taxes) and, on the other hand, that statehood would add about $800 million annually to Puerto Rican revenues (due to increases in Federal transfer and grant programs).

According to the study, individuals in Puerto Rico as a whole would have about the same amount of "after tax income" under State treatment as they have now. However, under statehood, fiscal treatment would lead to a sizeable shift of income from higher to poorer income segments of the population. This shift would result from increases in Federal grants and transfer programs which benefit primarily the poor—for example, supplemental security income (SSI) and aid to families with dependent children (AFDC), and also because the Federal Government's superior tax collection system would eliminate tax evasion problems.

For the last 77 years, the political status of Puerto Rico (independence, commonwealth, or statehood) has been hotly debated. I have followed this issue closely since 1973 when I was appointed to the ad hoc advisory group on Puerto Rico. This group was established pursuant to the 1967 status plebiscite which reaffirmed the Puerto Rican people's overwhelming commitment to the existing commonwealth arrangement. During my tenure on the ad hoc group, the members sought to update our 25-year-old relationship, and in 1975 we transmitted to the President of the United States and to the Governor of Puerto Rico a draft for a new compact based on the free association model. The Senate Interior Committee held some preliminary hearings on our proposal, but no further action was taken on it during the 94th Congress.

The status question again came to the forefront as a result of President Ford's surprise January announcement supporting Puerto Rican statehood, followed shortly thereafter by Cuba's United Nations resolution on the subject. The growing dissatisfaction with our current arrangement has been well documented in the press.

The question of the status of Puerto Rico provokes intense and emotional debate. It is quite apparent, however, that the fiscal and economic effects of a change in status should be seriously studied and understood before such changes are urged upon either the Puerto Rican people or the Congress. This study represents a first big step in providing the information for this consideration and I ask unanimous consent that the analysis be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

TREATING PUERTO RICO AS A STATE UNDER FEDERAL TAX AND EXPENDITURE PROGRAMS: A PRELIMINARY ECONOMIC ANALYSIS

I. INTRODUCTION AND SUMMARY OF FINDINGS

Puerto Rico was ceded to the United States in 1898 in partial settlement of the Spanish-American War. Ever since, the political status of the island has been the subject of considerable interest and controversy. During the first two years of possession Puerto Rico was governed by a military administration. In 1900 the island was placed under a civilian government with the key officials appointed by the President. Puerto Ricans became United States citizens in 1917 and the same year chose their first elected legislature. In 1948 the office of Governor became an elected position. And in 1952 Puerto Rico was changed from a "territory" to a "commonwealth" with its own constitution.

Twenty-five years later the question of the political status of Puerto Rico is still at issue. In the last Puerto Rican election, in which one of the primary campaign issues was the positions of the political parties on the question of political status, the pro-statehood New Progressive Party defeated the incumbent pro-commonwealth Popular Democrats, who had governed the island for 36 years. On January 1, 1977, in the final days of his administration, President Ford proposed that Puerto Rico be granted statehood. President Carter has responded that he will support the desires of the Puerto Rican people, but the initiative must come from them. A number of bills on the subject have been introduced in the U.S. Congress, including H.J. Res. 54 (95th Congress) which would grant independence to Puerto Rico; H.R. 11200 (94th Congress) which would revise the commonwealth status of Puerto Rico (the Puerto Rican Compact); and H.R. 2201 (94th Congress), which would establish a procedure leading to Puerto Rican statehood. Most recently the issue of the political status of Puerto Rico has been debated before the Special Committee on Decolonization of the United Nations.[1]

Of course, this issue has many dimensions: political, cultural, social, and economic. One of the central economic questions which has been vigorously debated with regard to the status issue is whether the Puerto Rican economy would be viable under statehood status, or whether it requires the special economic relations with the United States which characterize the commonwealth arrangement. This paper provides a preliminary analysis of one of the key elements of this question, specifically: what would be the economic impact of treating Puerto Rico as a state under Federal tax and expenditure programs? Sections II and III summarize the present applicability of U.S. tax laws to Puerto Rico and the Puerto Rican tax structure. Section IV provides a brief analysis of the relevant economic conditions in Puerto Rico, and sections V, VI and VII analyze the impact of full state fiscal treatment of Puerto Rico.

At the outset it should be stated what this paper does not do. It does not provide an economic analysis of statehood. Full State fiscal treatment of Puerto Rico could occur independently of statehood;[2] it is this possibility which is examined in the present analysis so as to focus on the effects of the fiscal changes in isolation from other effects that might result from the political transformation to statehood. Secondly, this paper does not analyze the impact of full application to Puerto Rico of all U.S. laws which have economic impacts. For example, the U.S. minimum wage laws have limited and specialized applicability in Puerto Rico and the present analysis does not explore the impact of removing this special treatment.

Rather, this paper focuses on the economic impact of fully treating Puerto Rico as a State under Federal tax and expenditure programs, assuming no other political or economic changes. The analytical technique is to examine the year 1975 (the last year for which necessary data are available) and compare the actual situation with estimates of what would have occurred had full State fiscal treatment been in effect. This "comparative statics" approach does not take into account any potential reaction ("feedback effect") to an immediate transition from the present status to full State fiscal treatment, nor does it consider the possibility of a gradual or "phased-in" transition to full State fiscal treatment.[3] Such an analysis would require speculation regarding economic reactions and/or potential future political arrangements about which little or no information is presently available. Thus, the analysis herein is highly preliminary in nature.

Summary of findings

Even such a "first-run" examination, however, can provide valuable insight into the potential economic effects of a major policy change, thus enabling a sharper focus of subsequent research and discussion. For example, the present analysis reveals two major policy concerns which would result from full State fiscal treatment of Puerto Rico: (1) while the individual and government sectors of the Puerto Rican economy, on balance, would gain about as much from increased Federal transfers as they would lose from increased Federal taxes, the distribution of gains versus losses would cause a redistribution of personal income from upper-income to lower-income groups and may force a realignment of government expenditure programs, and (2) the most crucial issue to the viability of the Puerto Rican economy under full State fiscal treatment is the reaction of the business sector—most importantly, U.S. corporations operating under section 936 of the Internal Revenue Code—to the loss of full tax exemption on their Puerto Rican operations. These two policy areas require further study before the economic effects of full State fiscal treatment can be completely understood.

II. THE PRESENT APPLICATION OF U.S. TAX LAWS TO PUERTO RICO[4]

The U.S. Internal Revenue Code contains several special provisions which treat individuals and businesses in Puerto Rico differently than the treatment which applies in the States. For U.S. citizens who are bona fide residents of Puerto Rico during an entire tax year, Puerto Rican source income, except income earned as an employee of the U.S. Government, is exempt from the U.S. individual income tax. This exemption does not apply to income earned from sources outside Puerto Rico. Deductions which would be attributable to the exempt income (including deductions for subnational taxes) are disallowed in computing any individual income tax liability. If a U.S. citizen has been a bona fide resident of Puerto Rico for at least 2 years and moves from Puerto Rico, Puerto Rican source income attributable to

Footnotes at end of article.

the period before the move qualifies for the exemption.

The U.S. social security tax and unemployment insurance tax apply fully in Puerto Rico. The Federal estate and gift taxes apply to persons in Puerto Rico except those who acquired U.S. citizenship solely by virtue of being a Puerto Rican citizen or by birth or residence in Puerto Rico. U.S. customs duties apply to goods imported into Puerto Rico from foreign countries, and U.S. excise taxes apply to goods produced in Puerto Rico for sale in the States (goods produced in the States for sale in Puerto Rico are exempt from U.S. excises if they can be identified), however, both of these collections are paid from the U.S. to the Treasury of the Commonwealth of Puerto Rico.

The U.S. corporate income tax may be avoided on Puerto Rican income earned by qualifying corporations, which may be subsidiaries of U.S. corporations, under section 936 of the Internal Revenue Code. Corporations which elect to operate under this section are generally referred to as "possessions corporations" (or "section 936 corporations") because the tax provision applies to U.S. possessions (except the Virgin Islands) as well as Puerto Rico, which is a Commonwealth (section 936 of the tax code defines the word "possession" to include the Commonwealth of Puerto Rico for purposes of this section).

To qualify as a possessions corporation at least 80 percent of the corporation's gross income must be from sources within a possession for the three-year period preceding the end of the tax year (or the life of the corporation, if less), and at least 50 percent of the corporation's gross income must be from the active conduct of a trade or business within a possession. A Domestic International Sale Corporation (DISC) or former DISC, as well as corporations holding stock in DISCs or former DISCs, may not qualify as a possessions corporation. Once possessions corporation status is elected, the election must remain in effect for at least 10 years unless the Secretary of the Treasury consents to an early revocation, which is to occur only in cases of special hardship and where no tax avoidance results.

A possessions corporation receives a full tax credit for U.S. income taxes which would otherwise be due on possessions source income regardless of the amount of taxes, if any, paid to the possession. This credit is entirely separate from the normal foreign tax credit and is computed independently. The possessions corporation credit applies against only the income tax and not the minimum tax, the accumulated earnings tax, or the personal holding company tax. The possessions corporation credit does not shelter from taxation income earned within the United States or foreign source income. Additionally, if a possessions corporation pays foreign taxes on income which is counted as possessions source income, and for which the corporation receives a section 936 credit,[5] it is not allowed to claim the foreign tax credit with regard to this income. A possessions corporation may not join in the filing of a consolidated return, and, thus, possessions corporation losses may not be used to offset taxable income of affiliated corporations. However, dividends received by a domestic corporation from a possessions corporation qualify for the intercorporate dividend deduction.

III. THE PRESENT PUERTO RICAN TAX STRUCTURE

The present Puerto Rican tax structure in many ways resembles that of a nation rather than that of the States of the United States. The Puerto Rican individual income tax applies to the worldwide income of Puerto Rican residents, who include all U.S. citizens having resided in Puerto Rico for at least one year. Individuals who are not residents of Puerto Rico are taxed only on their Puerto Rican income. A credit is allowed against the Puerto Rican tax for taxes paid to the United States, U.S. possessions, and foreign countries.

The structure of the tax base for the Puerto Rican individual income tax is similar to that of the U.S. tax, but particular items differ. As examples: (1) winnings from the Puerto Rican lottery are not taxable income, (2) tenants may deduct 10 percent of their rent, up to $240, on their personal residence from their income in determining taxable income, and (3) the size of the standard deduction and personal exemptions are different from those in the U.S. tax code. The Puerto Rican tax rates are steeply graduated, ranging from 12.6 percent of taxable income below $2,000 to 82.95 percent of taxable income above $200,000, and are generally higher than the U.S. rates except for low levels of taxable income.[6]

The Puerto Rican estate and gift tax is similar in structure and application to the U.S. estate and gift tax prior to the Tax Reform Act of 1976. The tax applies fully to Puerto Rican citizens; for nonresident U.S. citizens, and resident U.S. citizens who acquired U.S. citizenship by reasons other than their Puerto Rican citizenship, birth, or residence, the Puerto Rican estate tax equals the maximum allowable foreign death tax credit under the U.S. tax code.

Puerto Rico also has a series of excise taxes on commodities and transactions. The excises apply to such items as alcoholic beverages, cigarettes, petroleum products, motor vehicles, matches, appliances jewelry, hotel accommodations, and admissions. The Puerto Rican excise tax rates are not uniformly higher or lower than rates imposed in the States. The Puerto Rican excise tax on automobiles has a graduated tax rate schedule, from 14 percent to 85 percent, depending on the horsepower and weight of the vehicle. However, most of the Puerto Rican excises are structured similarly to the U.S. State excise taxes. In 1975 Puerto Rico first imposed a "general excise tax", but the tax produced little revenue.[7] Puerto Rico does not impose a general retail sales tax.

The Puerto Rican corporate income tax is structured somewhat similarly to the U.S. tax except for the rates, depreciation system, and the allowance of special industrial incentive exemptions. The tax applies to the worldwide gross income, less allowable deductions, of Puerto Rican corporations; it applies to Puerto Rican income of foreign corporations. Allowable deductions are similar to those allowed under the U.S. tax code except that Puerto Rico allows use of a "flexible depreciation" system which permits, subject to certain limitations, complete flexibility in the amount of qualifying property which can be depreciated each year. Thus, under this system a taxpayer may deduct up to 100 percent of the cost of qualifying property in the first year, or may schedule depreciation charges in any way to meet the needs of the business. However, the total amount of depreciation claimed under this system in any year cannot exceed 50 percent of the net income of the business before depreciation.[8] An 85 percent dividends received deduction is allowed (there is no 100 percent deduction similar to the U.S. provision), and a foreign tax credit is allowed.

The Puerto Rican corporate income tax has a graduated rates schedule. The tax rate on the first $25,000 of taxable income is 22 percent, and the rate increases through seven income brackets to a rate of 45 percent which applies to taxable income above $300,000. In addition, there is presently a 5 percent income surtax which is scheduled to expire this year, and the announced policy is that it will be allowed to terminate.[9]

Beginning in the 1940's Puerto Rico adopted a series of economic development programs under the general heading of "Operation Bootstrap", which are designed to attract and promote businesses engaged in manufacturing, tourism, and exporting. Prominent among these programs is the Industrial Incentives Act which offers tax exemptions to qualifying businesses. Under this Act businesses can be granted total tax exemption for periods of 10, 15, 25, or 30 years, with the longer exemption periods being available in geographic areas which are more economically depressed. As an alternative, a qualifying business can choose to be partially tax exempt for a period twice as long as the allowable total tax exemption period. The tax exemption applies not only to the corporate income tax, but also to the property tax, municipal license taxes, excise taxes on materials and equipment used by an exempt business, and the individual income tax on dividends paid by an exempt corporation.[10] Puerto Rico also imposes a withholding tax on dividends paid from income exempt from the Puerto Rican income tax to foreign corportations, mainly U.S. parent corporations of Puerto Rican subsidiaries.

IV. THE ECONOMIC SETTING

Puerto Rico's economic history in this century is one of a poor agrarian economy which has undergone rapid industrialization and economic growth, but which remains relatively low-income.

Prior to 1940 the economy of Puerto Rico was based largely on agriculture; the little industrial development which occurred was devoted mostly to processing the agricultural products, primarily sugar, tobacco, and coffee. Beginning in the 1940's and accelerating in the 1950's Puerto Rico began a program of incentives [11] for industrial development under the general heading of "Operation Bootstrap." An important part of Operation Bootstrap has been the exemption from taxes for substantial periods of time for new enterprises, the exemption period depending on the location of the business on the island. The program also includes other incentives including government financing, availability of buildings under lease or purchase arrangements, and training for employees. The incentives program, together with other attractions for industry such as relatively low wage rates, has been successful in leading to substantial industrialization of the Puerto Rican economy and improvement in economic conditions. However, Puerto Rico still suffers from certain economic maladies and the industrial development program has been accompanied by several deficiencies.

One measure of the effects of industrialization is that in 1950 agriculture provided about 25 percent of national income and in 1975 provided only 5.5 percent. Manufacturing, mining, and construction, which in 1950 accounted for less than 20 percent of national income, in 1975 amounted to 37 percent. Table 1 provides some basic economic indicators for the Puerto Rican economy over the last 25 years. As is clear from the table the Puerto Rican economy experienced rapid real economic growth and improvement in personal income between 1950 and 1970. However, the recent recession has had a major impact on the island's economy, considerably reducing the growth in real GNP. Growth in real personal income per capita has been severely cut since the beginning of the decade due to slower economic growth compounded by abnormally high population growth (Puerto Rico usually experiences substantial in-migration from the U.S. mainland when the U.S. unemployment rate is high [12]).

TABLE 1. REAL GROSS NATIONAL PRODUCT AND PERSONAL INCOME FOR PUERTO RICO, 1950-75

[In constant 1975 dollars]

Year	Gross national product (millions)	Annual rate of change (percent)	Personal income (millions)	Population (thousands)	Personal income per capita	Annual rate of change (percent)
1950	$1,877		$1,743	2,218	$786	
		5.3				3.27
1960	3,145		2,661	2,360	1,127	
		6.8				6.3
1970	6,056		5,628	2,716	2,072	
		3.3				1.1
1975	7,117		6,797	3,113	2,183	

Note: GNP data are adjusted by the GNP deflator; personal income data are adjusted by the consumer price index. Price adjustments by author.

Source: Puerto Rico Planning Board, Socioeconomic Statistics of Puerto Rico; fiscal years 1940, 1950, 1960, and 1962 to 1975.

A major factor in Puerto Rico's rapid economic growth and industrialization has been the ability to offer virtually complete tax exemption to new businesses locating in Puerto Rico. The Economic Development Administration, called "Fomento", is the agency which oversees the tax exemption program. Over half of all the manufacturing plants in Puerto Rico are Fomento promoted, and these plants provide 81 percent of the jobs in manufacturing. Of the Fomento promoted plants, 64 percent are of U.S. ownership, and these provide 85 percent of the employment in promoted plants.[13] Among the U.S. corporations in Puerto Rico are over 400 plants owned by 120 of the Fortune 500 companies.[14]

However, despite rapid industrialization and economic growth severe economic problems remain. Industrialization has not solved the chronic unemployment problem and has brought with it an increased vulnerability to cyclical economic fluctuations. The vulnerability to economic cycles is also a function of extremely high reliance on foreign trade, an inevitable condition for an island economy with limited resources. In 1975 with a GNP of $7.1 billion Puerto Rico had imports of $4.95 billion, and exports of $3.14 billion. The vast majority of this trade—60 percent of imports and 85 percent of exports—is with the United States. This close interrelationship with the U.S. economy means that U.S. economic cycles have a magnified effect on the island. Unemployment, which normally averages 10 to 12 percent (despite "exportation" of approximately 50 percent of the island's potential unemployment to the U.S. mainland through migration [15]) reached levels above 20 percent during the 1975 recession and inflation reached 19 percent. Additionally, the island remains extremely poor; per capita personal income is still 64 percent below the U.S. average and 48 percent below the level in Mississippi, the poorest state.[16]

Puerto Rico's heavy reliance on industrialization for economic growth, combined with the fact that Puerto Ricans have been net dissavers for the past 30 years, has forced a heavy reliance on outside capital. As a result, a large portion of the capital assets of the Puerto Rican economy is owned by outside interests, primarily interests on the mainland United States. One recent estimate indicates that Puerto Rican residents own less than half of the island's capital assets.[17] In addition to the political ramifications of substantial outside ownership of the means of production, there are important economic implications. For example, over $1 billion per year in profits and interests is earned by mainland owners and creditors of Puerto Rican businesses,[18] not an inconsequential sum in an economy with a GNP of just over $7 billion.

The "typical" operating pattern of a U.S. Puerto Rican subsidiary, described well in the recent *Report to the Governor* of the Committee to Study Puerto Rico's Finances, is illustrative of the impact of foreign ownership.

"The new firm, today more likely to be in pharmaceuticals or electronics than textiles or apparel, begins with a physical investment provided by its Mainland parent. Since the operation has been established as much, or more, for the exemption from Federal and local taxes as for the low-cost labor or other advantages of Puerto Rico, there are large profits. The Mainland corporation has strong reason to locate in Puerto Rico those of its interdependent operations which are the most profitable. Federal tax regulations currently prevent profits from being returned at once to the Mainland parent. Therefore the subsidiary begins to accumulate financial assets. The income from these assets will also be exempt from Federal taxes if the investments are in U.S. territories, and this explains the popularity of high-interest certificates of deposit in banks in Guam. By the time its Puerto Rican tax-exemption period expires, the subsidiary holds substantial financial wealth as well as its depreciated operating capital in Puerto Rico. The assets are then sold, the subsidiary is liquidated, and the accumulated profit of the entire operation is absorbed into the Mainland parent, free throughout of both Puerto Rican and Federal taxes. The physical facilities are still in Puerto Rico, of course. They will be operated only if some firm, perhaps a new child of the old parent, finds them profitable, and this in turn may depend on whether or not a new tax exemption can be arranged." [19]

Some of the particulars of this example have been changed by the Tax Reform Act of 1976 and the Puerto Rican reaction to it. The Federal tax regulation which prevented profits from being returned at once to the mainland parent was the provision that dividends from a possessions corporation did not qualify for the dividends received deduction, and therefore were fully taxable. The 1976 Act, among other changes, made dividends from a possessions corporation eligible for the dividends received deduction and thus reduced the incentive to accumulate possessions corporation profits. However, to partially offset the potentially large outflow of capital which could result from this change in U.S. tax law, Puerto Rico adopted a 10 percent withholding tax on dividends paid from income exempt from Puerto Rican income tax to U.S. parent corporations.

Historically little of the profits earned by U.S. owners of Puerto Rican subsidiaries have been reinvested in the Puerto Rican economy. Typically as much as 80 percent of the assets of a mainland subsidiary on the island are held in financial form, e.g. bonds, securities, and certificates of deposit.[20] Prior to the Tax Reform Act of 1976 substantial portions of these financial assets were foreign investments because they qualified for U.S. tax exemption under the previous possessions corporation section. The Tax Reform Act of 1976 restricts possessions corporation treatment to investments in the possession and thus has been responsible for a substantial repatriation of earlier Puerto Rican earnings to Puerto Rico. This inflow of funds has already reached approximately $1.5 billion and may reach $4 billion in the near future.[21] However, the inflow is having a depressing influence on interest rates due to limited investment opportunities on the island. Eventually, an equilibrium will be reached between Puerto Rican investment returns and the 10 percent "tollgate tax" on dividends paid to the mainland. The equilibrium will probably leave Puerto Rico with a somewhat higher level of reinvested profits.[22]

Unfortunately, the nature of the private investment occurring in Puerto Rico is undergoing an important and adverse change. In the past, U.S. investment flowed to the island to take advantage of both tax exemption and low wage rates. Investments were predominantly in industries with low capital-output and low capital-labor ratios, such as textiles and apparels, and thus provided relatively high levels of economic growth and employment. However, more recently Puerto Rican wage rates have increased relatively faster than skill levels, thus making Puerto Rican labor less attractive to investors. The result is that recent Puerto Rican investment is concentrated more heavily in the high capital-output and high capital-labor ratio industries, such as chemicals and pharmaceuticals, and thus provides less economic growth and employment. Hence, tax exemption is increasingly the main reason for outside investment on the island, and the resulting investment is providing reduced benefits to the island. As a result of these trends the recent *Report to the Governor* of the Committee to Study Puerto Rico's Finances recommends some drastic policy revisions to restrain wage increases and restructure the tax exemption program toward a higher level of job-creating investment.[23]

Thus, the Puerto Rican economy is characterized by a recent history of rapid economic growth which has failed to overcome the severe poverty and unemployment on the island. Additionally, the contemporary Puerto Rican economy suffers from several important problems which heighten the sensitivity of the economy to external disturbances and point to an uncertain economic future. Given such a setting, the potential economic effects of possible changes in the special political and economic relationships which have existed between the United States and Puerto Rico are obviously of crucial importance.

V. THE IMPACT OF FULLY TREATING PUERTO RICO AS A STATE UNDER FEDERAL TAX LAWS

This section presents estimates of the fiscal impact of fully treating Puerto Rico as a State for purposes of Federal taxation. The estimates are based on the assumption that if confronted with full State tax treatment by the Federal government, Puerto Rico would adopt a tax system more similar to that of the states. The estimates are based primarily on information provided by the U.S. Department of Treasury,[24] with adjustments and additions as noted. The fiscal impact estimates are derived from a comparative statics analysis based on fiscal year 1975 data (the last year for which full data are available). In other words, the analysis assumes a change in the Federal and Puerto Rican tax structures, but does not take account of any economic changes which would be expected to result from the different tax treatment. A discussion of the economic changes which would be anticipated is contained in section VII. The estimates are also based on the assumption of immediate full imposition of all the tax changes, rather than phased-in state-like taxation.

The fiscal estimates of the impact of full State tax treatment of Puerto Rico are shown in Table 2. Puerto Rican receipts in 1975 amounted to $1,232 million, excluding Federal grants-in-aid. Of this total, $1,133 million was produced by taxes and customs duties, and $99 million was generated by

Footnotes at end of article.

licenses (alcoholic beverages, cigarettes, motor vehicles, gasoline etc.) and miscellaneous sources such as permits, fees, fines, and a lottery.

Of the revenue produced by taxes and duties the largest revenue source is the excise taxes, which produce a total of $493 million. Nearly one-fourth of the excise tax receipts, $112 million in 1975,[25] are Federal excise taxes on alcoholic beverages and tobacco products produced in Puerto Rico for sale in the United States; under the present arrangement these taxes are collected by the Federal Government and paid ("covered over") to the Treasury of the Commonwealth. The most productive excise taxes in Puerto Rico apply to gasoline and petroleum products ($103 million in 1975),[26] alcoholic beverages ($87 million), tobacco products ($63 million), and motor vehicles ($54 million).

The Puerto Rican individual income tax produced $324 million in 1975, despite an underreporting of taxable income which has been estimated at approximately 40 percent.[27] The income tax on nonresidents, which is collected via a withholding tax on payments to nonresidents, generated $23 million in 1975. The Puerto Rican corporate income tax, which applies only to corporate taxable income not exempt under the Industrial Incentives Act, yielded $163 million. The $73 million of property tax receipts shown in Table 2 reflects only collections by the Commonwealth from this source; the Puerto Rican local governments collected an additional $129 million from this tax. The receipts from customs duties reflect U.S. customs collected by the Federal Treasury on imports into Puerto Rico from foreign countries; these receipts are "covered over" to the Puerto Rican Treasury just as Federal excise tax collections are.

Footnotes at end of article.

TABLE 2.—ESTIMATES OF THE FISCAL IMPACT OF FULL STATE TAX TREATMENT OF PUERTO RICO, FISCAL YEAR 1975

[Millions]

Source	Commonwealth status			State status			Change	
	Puerto Rican receipts	U.S. Treasury receipts	Total	Puerto Rican receipts	U.S. Treasury receipts	Total	Puerto Rican receipts	U.S. Treasury receipts
Individual income tax	$324	$10	$334	$105	$460	$565	−$219	+$450
Corporate income tax	163	0	163	18	562	580	−145	+562

Total taxes and duties	1,133	47	1,180	754	1,340	2,094	−379	+1,293
Licenses and miscellaneous	99	0	99	99	0	99		
Total	1,232	47	1,279	853	1,340	2,193	−379	+1,293

[1] Includes Federal excise taxes "covered over" to the Commonwealth ($112,000,000) and Puerto Rican excise tax collections earmarked for highways and the port authority ($81,000,000).

Sources: U.S. Treasury estimates and CRS estimates as described in the text.

Present U.S. Treasury receipts from Puerto Rico are virtually negligible. The Federal Government in 1975 collected $10 million from the individual income tax applied to non-exempt Puerto Rican income, $30 million from excises on products produced in Puerto Rico for the U.S. market ($28 million of which was derived from excises on petroleum products), and $7 million from customs duties. The amount from customs represents the cost of Treasury collections and administration, and is deducted before "covering over" the net proceeds of the customs duties to the Commonwealth.

If Puerto Rico were fully treated as a State for purposes of Federal taxation and adopted a tax structure more comparable to that of the States, it is estimated that Puerto Rican receipts (other than grants-in-aid) would diminish by approximately $379 million, and Federal receipts would increase by about $1,293 million. Thus, in total, it is estimated that under full State tax treatment $914 million in additional taxes would be generated by the Puerto Rican economy.

The estimates indicate that excise taxes would retain their predominance in the Puerto Rican revenue structure, although at a reduced absolute level. The reduction results from the loss of Federal excise taxes on alcoholic beverages and tobacco products presently "covered over" to the Commonwealth, as well as reductions in Puerto Rican excises assumed to occur to prevent the combined level of Federal and Puerto Rican excise taxes from rising dramatically above levels in the States. Puerto Rican receipts from the individual and corporate income taxes are also estimated to diminish substantially under State tax treatment, due to Federal "preemption" of these revenue sources. On the other hand, the estimates show that if Puerto Rico adopted a tax structure more similar to that of the States it could derive increased revenue from the property tax and a retail sales tax.

The estimate of total general revenue of Puerto Rico under a "state-like" tax structure implies a per capita level of total "State and local" taxes for fiscal 1975 of $297.20, which is considerably below the level in any of the States—the lowest state figure for 1975 was $405.26 per capita for Arkansas—and far below the national average per capita State and local tax revenue of $663.77. On the other hand, the Puerto Rican collections under this "state-like" system would imply a relatively high tax effort compared to the level of personal income; the Puerto Rican total "State and local" taxes per $1,000 of personal income would equal $153.67, compared to a national average of $122.84. This pattern of ranking higher in tax effort compared to personal income than in tax effort on a per capita basis is typical for low-income States.

The estimates of Federal revenue from Puerto Rico under full State tax treatment indicate an increase of almost $1.3 billion in Treasury receipts. This new revenue would result primarily from ending the Puerto Rican exemption from the U.S. individual and corporate income taxes and secondarily from the full application of Federal excise taxes in Puerto Rico.

A brief indication of the assumptions underlying the estimate and the source of the estimate for each tax follows:

INDIVIDUAL INCOME TAX

Puerto Rican Receipts: The estimate assumes Puerto Rico would adopt a State income tax which would generate revenues equal to 2 percent of personal income excluding transfer payments. This effective tax rate would be higher than some of the poorest States, but lower than the average rate for the ten lowest income states and lower than the national average. The estimate also assumes full reporting of income on Puerto Rican tax returns (compliance would probably increase once Federal income taxes applied because most States use the Federal tax return computer tapes in their audit program).

Source of estimate: U.S. Treasury.

Federal Receipts: The estimate was derived by reprocessing Puerto Rican tax return data to show potential tax liability under the Federal individual income tax. It assumes a compliance level on par with experience in the states.

Source of estimate: U.S. Treasury.

CORPORATE INCOME TAX

Puerto Rican Receipts: The Treasury estimate of Puerto Rican corporate income tax collections under full State tax treatment is $115 million. However, this estimate assumes a 10 percent Puerto Rican corporate income tax, which would be higher than the rate in all but five States and substantially higher than the rates in the low-income States, and also assumes immediate termination of the Industrial Incentives Act tax exemption program. Given the state of the Puerto Rican economy and the heavy dependence on externally financed industrial investment, such a drastic reversal of policy seems implausible. Additionally, since the grant of tax exemption under the Industrial Incentives Act is a contractual agreement between the Commonwealth and each tax-exempt corporation, there is controversy over whether and under what circumstances the tax exemption may be terminated. For these reasons, the estimate in this study assumes a 5 percent Puerto Rican corporate income tax and continuation, at least in the short-run, of the Industrial Incentives Act Tax exemptions. Under these circumstances the total tax liability (Federal and Puerto Rican) on corporations which presently are not exempt would increase only slightly. The total tax liability for exempt corporations, of course, would substantially increase despite the continued Puerto Rican exemption because of the termination of section 936 treatment.

Source of estimate: Congressional Research Service adjustment of U.S. Treasury estimate.

Federal Receipts: The Treasury estimate of Federal corporate income tax collections in Puerto Rico under full State tax treatment is $515 million. This figure has been adjusted upward to reflect the lower deductions attributable to the CRS estimate of Puerto Rican corporate tax collections under State treatment (see discussion above). The Treasury estimate is based on an assumed effective corporate tax rate of 48 percent which may overstate the potential revenue somewhat because of the investment tax credit. However, because of the considerable uncertainly in the data base for this estimate

(taxable income of the exempt corporations is difficult to estimate) a high degree of precision is unattainable.

Source of estimate: Congressional Research Service adjustment of U.S. Treasury estimate.

NONRESIDENT INCOME TAX

Puerto Rican Receipts: The estimate assumes a reduction in income tax collected from nonresidents proportionate to the reduction in individual income tax collections from residents.

Source of estimate: Congressional Research Service.

Federal Receipts: None.

SALES TAX

Puerto Rican Receipts: The estimate assumes Puerto Rico would adopt a general retail sales tax if confronted with full State tax treatment by the Federal Government. The sales tax is the largest single source of revenue in the States. It is an especially productive and appropriate revenue source for States with substantial tourism. In fiscal year 1975 the ten lowest-income States derived sales tax revenues which averaged 3.06 percent of 1974 personal income. The estimate assumes a Puerto Rican sales tax would yield 3.0 percent of personal income.

Source of estimates: Congressional Research Service.

Federal Receipts: None.

EXCISE TAXES

Puerto Rican Receipts: The estimate assumes the Federal excise tax collections on Puerto Rican alcoholic beverages and tobacco products sold in the U.S. would no longer be "covered over" to the Commonwealth Treasury. The estimate is also based on assumptions about rates and levels for each excise tax. Basically, the estimate assumes that for those Puerto Rican excise taxes which are presently as high as or higher than the highest combined Federal State levels in the States, the Puerto Rican excise tax would be reduced to offset the newly applicable Federal tax. For those cases in which the imposition of the Federal excise would not increase the total Federal-Puerto Rican tax beyond the highest levels of combined taxes in the States, the Puerto Rican taxes are assumed to remain at their present levels.

Source of estimate: U.S. Treasury.

Federal Receipts: The estimate assumes the Federal excise tax collections on Puerto Rican alcoholic beverages and tobacco products would no longer be "covered over" to the Commonwealth Treasury, and that all other Federal excises would be fully applicable within Puerto Rico. The estimates for each excise tax are based on present Puerto Rican excise tax collection data where available.

Source of estimate: U.S. Treasury.

ESTATE AND GIFT TAXES

Puerto Rican Receipts: The estimate assumes that Puerto Rican estate tax collections under State tax treatment would equal 20 percent of Federal collections; this is slightly lower than the average ratio in the States. The estimate also assumes the present Puerto Rican gift tax would be retained.

Source of estimate: U.S. Treasury.

Federal Receipts: The estimate is based on present Puerto Rican estate and gift tax collections, and allows for a credit for Puerto Rican collections under a State-type system.

Source of estimate: U.S. Treasury.

PROPERTY TAX

Puerto Rican Receipts: There is evidence that Puerto Rico presently underutilizes the property tax,[28] however, estimating potential revenue from a more "typical" reliance on the property tax is fraught with ambiguities. Puerto Rico presently derives a higher ratio of revenue compared to personal income from the property tax than the average for the poorest States, but the Puerto Rican average is below the national average. On the other hand, on a per capita basis the Puerto Rican property tax collections appear extremely low. In fiscal 1975 the per capita Puerto Rican property tax revenue amounted to $65.76 whereas the average for the five lowest-income States was $126.91 (Alabama, the State with the lowest per capita amount, had a level of $52.95; Arkansas, the second lowest, was at $89.60), the average for the ten lowest-income States was $116.78 and the U.S. average was $241.60. Based on these observations, the estimate assumes, rather arbitrarily, that Puerto Rico could increase its property tax revenue to a level of $85 per capita. This would still leave Puerto Rico with a lower per capita level than any State but Alabama. The estimate shows the entire increase in property tax revenue in the column "Puerto Rican Receipts", even though most of the increase would probably go to the municipalities (which collected $129 million from the property tax in 1975). This is because the increased municipal property tax collections would substitute for "State"-local transfers, and thus benefit the Commonwealth by an equal amount.

Source of estimate: Congressional Research Service.

Federal Receipts: None.

CUSTOMS DUTIES

Puerto Rican Receipts: The estimate assumes Federal customs collections on foreign imports into Puerto Rico would no longer be "covered over" to the Commonwealth.

Source of estimate: U.S. Treasury.

Federal Receipts: The estimate assumes Federal customs collections on foreign imports into Puerto Rico would no longer be "covered over" to the Commonwealth.

Source of estimate: U.S. Treasury.

LICENSES AND MISCELLANEOUS

Puerto Rican Receipts: The estimate assumes there would be no change as a result of State tax treatment.

Federal Receipts: None.

VI. THE IMPACT OF FULLY TREATING PUERTO RICO AS A STATE UNDER FEDERAL GRANT AND REVENUE PROGRAMS

This section provides estimates of the increase in Federal funds which would flow to Puerto Rico if it were fully treated as a State for all Federal grant and revenue programs. Tables 3 and 4 show the present Federal grants and transfers to Puerto Rico in fiscal year 1975. Total Federal grants to Puerto Rico amounted to $464.5 million and net transfer receipts of Puerto Rican individuals totaled $606 million.

For purposes of most Federal grant programs Puerto Rico is already treated as a State. Of course, like the States, Puerto Rico does not presently receive all of its potential funding under every possible Federal grant program because some programs are less applicable to the needs of the area, some available Federal funds go unused because of a failure to file grant applications, and some Federal funds are not claimed due to insufficient local matching funds. However, there are some twenty-two significant Federal grant-in-aid programs, most of which flow through the Department of Health, Education and Welfare, which contain statutory restrictions on funding levels for Puerto Rico.[29]

U.S. Department of the Treasury, Federal Aid to States: Fiscal Year 1975.

Additionally, Puerto Rico does not receive Federal revenue sharing funds under present law. Table 5 presents estimates for 1975 of the increases in Federal funding levels which would result from fully treating Puetro Rico as a State under the most important Federal grant and revenue programs which are presently restricted or inapplicable. The estimates have been provided by the Department of Health, Education, and Welfare and the Department of the Treasury and are used here without evaluation.[30] The estimates indicate that under full State treatment, Puerto Rican governments could have received up to an additional $370.3 million in 1975, principally from revenue sharing, AFDC, and Title I of the Elementary and Secondary Education Act. Puerto Rican individuals could have received increased net transfers of $378.4 million, primarily from Supplemental Security Income. Receipt of these increased funding levels would not be entirely costless, however; Puerto Rican governments and individuals would have to increase matching funds and personal pay-

Footnotes at end of article.

ments by a total of $49.1 million to receive the full increased benefit levels. This implies the possibility of receiving less than the full funding amounts, if Puerto Rican matching and payment levels do not rise sufficiently, and also implies a possible shift in the mix of government programing under State fiscal treatment.

TABLE 5.—ESTIMATED INCREASES IN FEDERAL FUNDING LEVELS FROM FULLY TREATING PUERTO RICO AS A STATE UNDER FEDERAL GRANT AND REVENUE PROGRAMS IN 1975

[In millions of dollars]

Program	Increase in Federal funds	Puerto Rican matching requirement or payment
To governments:		
Revenue sharing	200.0	----
AFDC	76.3	21.6
Title XX of SSA	30.0	10.0
Title I of ESEA	64.0	----
Subtotal	370.3	31.6
To individuals:		
Medicaid	61.9	17.3
WIN	6.5	.2
SSI	300.0	----
Prouty amendments	10.0	----
Subtotal	378.4	17.5
Total	748.7	49.1

Other estimates: Author's adjustments to year 1975 of estimates provided by Office of the Secretary of the Department of Health, Education, and Welfare from, "Report of the Under Secretary's Advisory Group on Puerto Rico, Guam, and the Virgin Islands," October 1976, p. 26 (all estimates except title I of ESEA) and from the National Center for Education Statistics.

VII. A PRELIMINARY ANALYSIS OF THE ECONOMIC IMPACT OF FULLY TREATING PUERTO RICO AS A STATE UNDER FEDERAL TAX AND EXPENDITURE PROGRAMS

The previous two sections provide estimates of the potential fiscal impacts of fully treating Puerto Rico as a State for purposes of Federal taxation and expenditure programs. This section presents an indication of the potential implications of these estimates for the Puerto Rican economy.[31] The analysis is highly preliminary, and to some extent conjectural, because it is not based on econometric measures of the Puerto Rican economy, and ultimately rests on a question which requires further research.

Table 6 combines the data from the two previous sections to show the net flow-of-funds impact on the government, individuals, and corporations sectors in the Puerto Rican economy under full State fiscal treatment. The table indicates that under full State treatment the government sector in Puerto Rico would sustain a fiscal loss of approximately $8.7 million. However, the proper interpretation of this estimate is that State treatment would have a negligible impact on the revenues available to governments in Puerto Rico. This is because the estimates in Tables 2 and 5 are sufficiently imprecise that the $8.7 million figure in Table 6, which represents less than 1 percent of Puerto Rican-generated revenues in 1975, cannot actually be distinguished from a zero impact. Additionally, the estimates are based on a number of behavioral assumptions which may not be accurate, especially if fiscal balance could be achieved by relatively modest behavioral changes. For example, if indeed a small gap in available funds would develop under State treatment, Puerto Rican officials might increase matching funds for already available Federal matching grants, thus increasing Federal transfers to offset the shortfall.

Footnotes at end of article.

TABLE 6.—*Net impact of fully treating Puerto Rico as a State under Federal tax and expenditure programs in 1975*

[Amount in millions]

Governments:	
Loss: Reduced revenue receipts [1]	$379.0
Gain: Increased transfers from Federal Government [2]	370.3
Net impact	−8.7
Individuals:	
Loss:	
Individual income tax [1]	231.0
Sales tax [3]	143.2
Excise taxes [3]	35.2
Property tax [4]	29.5
Total loss	438.9
Gain: Increased transfers from Federal Government [2]	378.4
Net impact	−60.5
Corporations:	
Loss:	
Corporate income tax [1]	417.0
Sales tax [3]	35.8
Excise taxes [3]	8.8
Property tax [4]	29.5
Total loss	491.1
Gain: none.	

[1] Source: Table 2, p. 23.

[2] Source: Table 5, p. 35.

[3] Source: Table 2, p. 23. Assumes 20 percent of sales and excise taxes is paid by business.

[4] Source: Table 2, p. 23. Assumes 50 percent of property tax is paid by business. See: Significant Features of Fiscal Federalism, 1976–77 edition, vol. II—Revenue and Debt, Advisory Commission on Intergovernmental Relations, Table 70, p. 106.

However, while the aggregate revenue impact on governments in Puerto Rico of full State fiscal treatment may be negligible, the programmatic impact may be important. While some of the increased Federal revenue Puerto Rico would receive as a result of full State treatment would be general purpose revenue, such as revenue sharing, other revenue, such as AFDC and Title I funds, is earmarked for a specific purpose and may even require local matching funds to receive. Therefore, unless the revenue gain categories fit well into the present Puerto Rican expenditure pattern, a shift in the mixture of government programming or a change in the overall level of government services would result.

Table 6 reveals that under full State fiscal treatment Puerto Rican individuals would sustain an aggregate loss of slightly over $60 million, or less than 1 percent of personal income. This figure, like the estimated revenue loss for the government sector, is sufficiently small that the possibility that it may result from estimation error cannot be discounted. For example, the estimate of Federal individual income tax revenue which would be collected in Puerto Rico under full taxation (Table 2) is based on incomplete data and assumes a 40 percent underreporting of taxable income; considerable margin for error must be allowed in such an estimate. Additionally, changes in the Federal individual income tax since 1975, specifically the enlargement of the standard deduction and adoption of the general $35 per exemption credit and adoption of the earned income credit, may have reduced the relative fiscal impact of full Federal individual income taxation in Puerto Rico.[32]

Given the relatively small magnitude of the aggregate impact on individual income of full state fiscal treatment, a far more important effect is the income redistribution which would occur. The gains and losses experienced by individuals as a result of fully treating Puerto Rico as a State under Federal tax and expenditure programs would not be distributed evenly among the population. The increase in Federal transfer receipts would flow almost entirely to lower-income individuals whereas upper-income persons would bear a heavy portion of the increase in taxes, both through higher effective tax rates and improved collection procedures. Thus, full State fiscal treatment implies a sizeable redistribution of after-tax income from upper-income to lower-income individuals.

The increase in corporate taxes resulting full State tax treatment would not be offset by any increase in government transfers or grants. Thus, corporations in Puerto Rico would sustain a net loss of approximately $490 million per year under full State fiscal treatment. This potential loss and its consequences are probably the crucial issue surrounding State treatment.

The flow-of-funds analysis provided in Table 6 gives a comparative statics estimate of the "first-round" economic implications of full State fiscal treatment of Puerto Rico; it does not indicate the full potential economic effect of the changes once all economic reactions or "feedbacks" have occurred. While it has been observed above that the economic impact estimates in Table 6, with the exception of the corporate sector, are sufficiently imprecise that their magnitude is uncertain (and may, in fact, be negligible), it may nonetheless be instructive to explore the full potential economic impact of revenue losses of the magnitudes stated in Table 6.

The multiplier for macroeconomic changes in the Puerto Rican economy is probably rather low because of the extremely large foreign trade sector. The large volume of imports and exports dampens the domestic impact of demand-related economic changes (such as income or consumpton patterns) and magnifies the domestic impact of supply-related changes (such as wage or productivity levels). Thus, the economic multiplier for changes in personal income and government spending in Puerto Rico would be relatively low, perhaps in the neighborhood of 1.3 to 1.5. An additional factor which would moderate the multiplier effect of State treatment of Puerto Rico is that the change would involve a redistribution of income toward lower-income groups in addition to any changes in tht aggregate levels of income and government spending. Since individuals and families in the lower income brackets have a higher propensity to consume than higher-income people,[33] the reduction in aggregate economic activity would be smaller than if the loss of income were evenly distributed (of course, this implies a further reduction in the rate of savings in Puerto Rico, a consequence which worsens other problems. See section IV). Assuming a multiplier of 1.5 as reasonable for the Puerto Rican economy, the reduction in individual income and government spending indicated in Table 6 could eventually reduce Puerto Rican GNP by approximately $105 million below otherwise attainable levels, a reduction of approximately 1.5 percent. Thus, the estimates of revenue losses to the government and individuals sectors in Table 6, to the extent that they are accurate, imply a small, though not inconsequential, reduction in GNP.

Unfortunately, the impact on the Puerto Rican economy of the change in the taxation of corporations cannot be analyzed by simple multiplier techniques. On the one hand, the approximately $490 million reduction in after-tax profits that Puerto Rican corporations would sustain as a result of full State tax treatment does not equate to a withdrawal of that amount from the Puerto

Rican economy, because little of these profits is presently reinvested in Puerto Rico. On the other hand, the change in corporate taxation which would result from full State treatment of Puerto Rico—for most corporations a change from complete tax exemption to full taxation—has significance far beyond the reduction in funds available for immediate reinvestment in the Puerto Rican economy. Such a tax change would cause a total reevaluation of the investment climate in Puerto Rico by the business community and could cause fundamental changes in business activity.

To the extent that Puerto Rico's attractiveness to investors depends on tax exemption, full State tax treatment would have a serious negative impact on the economy;[34] not only would a reduction in ongoing investment occur, but an exodus of existing firms might also develop over a period of time. A loss of investment attractiveness to some types of firms, particularly those interested in Puerto Rico solely for the tax exemption and those which make little contribution to the Puerto Rican economy (see discussion in section IV), would not be disastrous. However, an across-the-board reduction in business investment and operation would have serious implications.

Detailed up-to-date information on the importance of tax exemption to investment in Puerto Rico and the consequences of reduced investment attractiveness does not exist. The last in-depth study of the issue was performed by the Commission on the Status of Puerto Rico in 1966.[35] That study which included economic and financial analysis of business locations in Puerto Rico along with interviews of U.S. and Puerto Rican manufacturers and industrial promotion officials, reported in part the following conclusions:

"(a) tax exemption has been of primary importance in attracting industrial investment to Puerto Rico in the past; (b) it will continue to be required in the immediate future because of the present state of development of the economy; but (c) this form of investment incentive will diminish with continued economic growth. It is not possible, however, to predict just how fast the present dependency on tax exemption will diminish, particularly in the case of highly capital-intensive industries. The loss of the ability to grant exemption from taxes of all kinds will, as a consequence, always entail some risk to the continued economic growth of Puerto Rico.[36]

"Between two-thirds and three-quarters of the pattern of past industrial growth which took place under Commonwealth would have been adversely affected, and perhaps would not have even occurred, in the absence of the minimum wage and tax exemptions.[37]

"Based on its analysis of the combined effects of wage and tax exemption, the program of economic studies concludes that some 25 years would have to elapse before a Puerto Rican economy without fiscal autonomy is likely to be able to achieve the same rates of growth in income and employment as the average State." [38]

To what extent these conclusions remain valid today is unknown. However, this question remains the central issue in understanding the potential economic impact of full state tax treatment of Puerto Rico. If full state treatment would substantially diminish the investment attractiveness of Puerto Rico to business enterprises—largely U.S. corporations operating under section 936 of the Internal Revenue Code—then state treatment could have disastrous consequences for the Puerto Rican economy. However, if state treatment would not seriously curtail investment in important business sectors in Puerto Rico, or if any potential negative impact could be delayed or offset by gradually phasing in full taxation or by development of more vigorous local investment, then state treatment could be accomplished without serious economic disruptions. Because of its crucial importance to the viability of the Puerto Rican economy, this issue should be carefully reviewed once again prior to any serious consideration of state fiscal treatment for Puerto Rico.

FOOTNOTES

[1] Puerto Rican Factions Hit Island Status, Washington Post, August 19, 1977. pp. A1, A16.

[2] For example, H.R. 588 (95th Congress) would appeal section 933 of the Internal Revenue Code, which provides the exclusion from taxable income for Puerto Rican source income received by residents of Puerto Rico.

[3] See the statement of the Honorable Baltasar Corrada, Congressional Record, July 25, 1977, pp. 24835–24837, for a suggestion of the form such a transition might assume.

[4] This section and the next draw heavily on two sources: 1) *What You Should Know About Taxes in Puerto Rico*, Office of Economic Research, Department of the Treasury, Commonwealth of Puerto Rico, 1976 Edition; and 2) *Business Operations in Puerto Rico*, Barry A. Woods, Tax Management Inc., 1977.

[5] Such income may arise if, for example, a possessions corporation manufacturers goods in the possession and markets the goods in a foreign country. The corporation may pay taxes on the foreign source income to the foreign country, but the income would also qualify for a section 936 credit because it results from the active conduct of a trade or business within the possession.

[6] The Puerto Rican marginal tax rates are higher than the U.S. rates for taxable income levels above $4000, however, as indicated above the definitions of taxable income are different.

[7] Apparently one of the reasons the tax produces little revenue is poor enforcement. See Andic, Fuat M. and Arthur J. Mann, Redesigning Puerto Rico's Tax System: An Overview, Bulletin For International Fiscal Documentation, May 1975. p. 188.

[8] The flexible depreciation system is optional. Taxpayers for which this limitation would be restrictive may use ordinary depreciation methods.

[9] The Christian Science Monitor, Thursday, April 21, 1977. p. 10.

[10] These provisions combined with the exemption of Puerto Rican corporations from Federal taxation under section 936 provide for virtually complete tax exemption.

[11] For an econometric analysis of these incentives see Woodward, Robert S., The Effectiveness of Intra-Island Industrial Incentives in Puerto Rico, National Tax Journal, Vol. XXVII, No. 2, June 1974, pp. 261–273.

[12] See Maldonado, Rita M., The Economic Costs and Benefits of Puerto Rico's Political Alternatives, Southern Economic Journal, October 1974. p. 275.

[18] Ibid., p. 15.

[19] Report to the Governor, op. cit. p. 43.

[20] Report to the Governor, op. cit. p. 44.

[21] The Christian Science Monitor, April 22, 1977. p. 14.

[22] The Governor of Puerto Rico has proposed to reduce the tollgate tax to 7 percent on 75 percent of current earnings if the remaining 25 percent of profits is invested in Puerto Rican government issues. See The Journal of Commerce, May 31, 1977, p. 1. This recommendation, along with other measures designed to increase reinvestment in the Puerto Rican economy, has passed the Puerto Rico legislature in H. 377. See Taxes, August 1977. p. 505.

[23] Report to the Governor, op. cit., see major recommendations 1, 5, 6, 7, and 8.

[24] The information is contained primarily in two documents: Sammons, Robert L., Potential New Federal Taxes in Puerto Rico, June 4, 1975, a paper prepared for the Treasury; and a series of four tables updating the Sammons estimates released on April 20, 1976 by the Office of International Tax Affairs, Office of the Secretary of the Treasury. The author also wishes to acknowledge the helpful comments and suggestions of James Nunns of the Office of International Tax Affairs.

[25] This figure represents actual Federal collections from this source, not Puerto Rican receipts. Puerto Rican receipts were slightly higher because a portion of prior year collections were "covered over" in FY 1975.

[26] This amount includes $81 million in collections which is earmarked for the Highways Authority and the Port Authority.

[27] Sammons. op. cit. p. 5. See also Andic and Mann. op. cit. p. 196.

[28] See for example, Report to the Governor, The Committee to Study Puerto Rico's Finances, December 11, 1975. Major Recommendation number 2.

[29] McManis Associates, Inc., Analysis of Utilization of Federal Funds in San Juan and Puerto Rico, July 1976. See especially p. II–5.

[30] A detailed study of increased funding levels under full state treatment of Puerto Rico is presently underway in the Congressional Research Service and will be available at a later date.

[31] The economic impact on the Federal Government is also of interest and is readily determinable from Tables 2 and 5. The estimates indicate that fully treating Puerto Rico as a State under Federal tax and expenditure programs would yield a net annual increase in Federal revenues of approximately $545 million. Of course, if full State treatment were phased in, or had a severe negative impact on the Puerto Rican economy, this figure would be reduced.

[32] This point is addressed in, McManis Associates, op. cit. pp. I–5 to I–7. However, the McManis estimates of the magnitude of this impact appear considerably overstated.

[33] For estimates of family savings rates at different income levels for Puerto Rico see *Report to the Governor*, op. cit. p. 29.

[34] Additionally, Federal minimum wage laws presently do not have full applicability in Puerto Rico. Full State treatment under the minimum wage laws would further reduce incentives to invest in Puerto Rico.

ADDRESS OF LEONARD STRELITZ, UJA GENERAL CHAIRMAN

Mr. SCHWEIKER. Mr. President, during the November recess I had the honor to address the Southwest Regional Inaugural of the United Jewish Appeal in Dallas, Tex. I was preceded in my remarks by Leonard Strelitz, UJA's general chairman.

In the belief that Mr. Strelitz' stirring words will be of interest to my colleagues,

I ask unanimous consent that the full text of his speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

"THE COST OF FREEDOM"

(By Leonard R. Strelitz)

Mr. Chairman, Leon Brachman, Senator Schweiker, Friends:

For the last four days we have been together, American Jewry assembled: to plan, to program and rally for the coming years.

Yesterday, after hearing Golda, and then listening to Simcha Dinitz, the 25 UJA college reps at this Conference caucused, for they understood that our giving is a test of our commitment . . . that only when you give of yourself can you feel like a Jew . . . and for those students, as it should be for all of us, that means doing more now.

They raised $3,800 . . . over $100 each. What an example for us here tonight!

Senator, one line by Golda Meir expresses the feelings all of us bring here tonight: she said yesterday at the CJF General Assembly, that for the Jewish people, Israel is more than just another little democracy. For Israel has given new meaning to being a Jew.

Indeed, without Israel, there would be no viable, thriving Jewish community . . . and without Israel, life on this planet would be different for all of mankind, especially the Jewish people.

So that is why we are here tonight. Because, as Americans and as Jews, we know and understand that freedom must be won and rewon in every generation . . . and that there are no easy victories.

Our rights cannot be inherited . . . or transmitted. They must be continually safeguarded and renewed. If we ever lost sight of this lesson, we shrink from principle, and this we will never do.

As an American Jewish community, the Senator should understand that our creed is very clear: it is shaped by 2,000 years of adversity . . . that if you believe in something, you fight for it . . . you live by your faith . . . you live up to your vision of yourself and your people . . . and you have the will to stand fast.

And for us, this principle begins with our inheritance: our obligations as Jews . . . especially today, when we are being tested . . . when our rights are again being challenged . . . when Israel is being pushed into a corner in a world where oil seems to be the new morality . . . in a world seeking peace at the price of freedom.

Senator, that little land that we all love, Israel, is approaching her 30th anniversary. How much these people have done. How much they have toiled. And how much they have sacrificed in the name of freedom.

They never ask us to sacrifice our blood, but our bond—our partnership—is something very special.

They live a life of constant tension . . . a burden which drains their wealth and saps their genius . . . a wasting of strength that defies all logic . . . yet they go on, and live and raise families and produce scientists and doctors, and their children paint scenes of peace in Jerusalem, while their youth stand watch in the Sinai and along the borders.

Yes, every weapon Israel produces, every plane launched, every rocket fired in the Golan . . . takes from some child, some immigrant family, a better home, a better school, a better future.

Each time Israel responds to a terrorist attack or prepares to defend her borders, she is spending the wealth of her people, wasting the promise of her youth, delaying opportunity for her lifeblood: the new immigrants.

Israel is grateful for American aid . . . it is indispensable. But a besieged people pay a high price for their vigilance: servicing an F–15 frustrates human expectations . . . patrolling along the Lebanese border defers progress in development towns . . . and yes, maintaining the state of readiness is one of the reasons we must admit, that after 30 years of partnership, we still cannot say that all children in a Jewish State receive a free and compulsory education through high school.

Yes, the cost of defending freedom in a Jewish State means that after one generation, those who escaped the violence of Arab lands still live in the shabby homes constructed in the early days of the State . . . and that their children, those youth needed to fly those F–15s, still are struggling to "make it" in a modern, Jewish nation.

Yes, the cost of freedom is prohibitive, but do we have any other choice? So the real cost comes down to what we can do, what our continued obligation will be.

Because, these are our people: and just freeing them from tyranny, from want, from persecution . . . and providing a haven in Israel is not enough.

After living in fear for decades, you just do not wipe away the scars by saying: okay, now you are free. Now you can do as you please.

It is not enough. Our people in Israel must have the ability to excel . . . to thrive . . . and to live as Jews and as free men while they are daily sacrificing and putting their lives on the line.

And that, my friends, means we must do much more. For the forces at work in the world today which oppose Jewish values, and Jewish life, and everything that Israel stands for, are smarter, better organized and better financed than ever before.

It's as simple as that. Since we live in the most bountiful, financially-secure Jewish community in the world, we have a very special obligation—a moral responsibility—for those trustees of our Jewish legacy living in Israel.

So let us meet the test with our commitments . . .

Let us give Senator Schweiker tonight a message that he can take back:

And then, nobody will be able to say, that here was a Jewish community which shirked its responsibility . . . that here was a Jewish community which doubted its right . . . that here was a Jewish community which could—but did not—meet the test.

But instead, the message will be much, much more affirmative: that here indeed, was a Jewish community . . . remembering, never forgetting, acting from strength . . . standing as one . . . for all Israel . . . themselves and their children's future . . . a Jewish community fiercely proud to be American and Jewish.

LOUIE ISRAEL MARTEL KNIGHTED INTO THE KNIGHTS OF THE HOLY SEPULCHER IN JERUSALEM

Mr. DURKIN. Mr. President, the elected representatives of the State of New Hampshire are blessed with so many outstanding citizens to whom we could pay tribute, that we could spend each and every day doing nothing else. That is why I am sometimes hesitant to call attention to any particular achievement, because each time I do so, I implicitly ignore so many others.

Nevertheless, Louie Israel Martel, one of my outstanding constituents and friends, has recently received an honor so notable that no other citizen of New Hampshire can be jealous having that award noted. In fact, all citizens of New Hampshire will be proud that Louie Martel, a tremendous credit to our State and this country, has recently been knighted into the Knights of the Holy Sepulcher in Jerusalem.

Louie's knighting on September 25 in Notre Dame Cathedral in Montreal, Canada, indicates a recognition at numerous levels of his tremendous contributions to the Catholic Church and his community. Louie was recommended for this honor after he served in his usual distinguished fashion as head of the French-speaking part of the 41st Eucharistic Congress held recently in Philadelphia. That position alone speaks volumes for Louie's talents, but his new mantle makes it clear that throughout his church and his community, Louie has earned tremendous respect.

The Knights of the Holy Sepulcher into which Louie has entered is a confraternity of persons bound together solely by the pious custom of receiving knighthood. The foundation of the Knight is attributed to Godfrey de Bouillon, one of the leaders of the first Crusade. Many consider the Knights of the Holy Sepulcher the oldest of the religious knighthoods.

I know Louie, a resident of Manchester, N.H., well enough to realize that this honor will be carried well. And I know that I and all of Louie's other friends will say with pride to him, "Welcome Knight Louie Martel."

AN EXAMPLE OF TRIUMPH OVER HANDICAPS

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from New York (Mr. JAVITS).

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR JAVITS

I call to the attention of my colleagues the following account that illustrates so well an example of triumphing over handicaps, of perseverance after many years of struggle to achieve a long-sought goal.

Here in the United States Senate, Mr. President, we so often deal with issues of great moment to this Nation, to the world. And while we debate, back home, in our States and communities, other great things are happening. The people whom we serve themselves are proving time after time that their spirit and fortitude is the real strength of our Nation.

I have an example of just that kind of fortitude and perseverance that I would like to share with my colleagues. It involves the Staten Island Club of the Deaf, which has won the Eastern Athletic Association of the Deaf softball championship. This team of young men has been trying for 24 years to reach this plateau, and never once quit trying.

As an aside, I am proud to say that the championship game, which was played at Bridgeport, Conn., was between two New York City teams. Staten Island proved victorious over a team from Brooklyn.

You would think, Mr. President, that after 24 years of frustration, the Staten Island team would be downhearted going into the last inning of the championship game losing 7 to 3. That, indeed, was the scenario for these young men on the day they finally won their championship.

Rather than cave in to the pressures, these men showed themselves as capable as any American, handicapped or not, to rise above adversity, to fight long odds and come out victorious.

Player after player in that last inning came to bat and struck blows for their team that carried it to an 8 to 7, comeback victory. It was a stirring moment to experience, a grand moment of exhilaration that proves anew that man's spirit cannot be dampened by physical handicap.

The Staten Island Club of the Deaf has reiterated an important lesson for our nation, one that I have frequently mentioned as I spoke about the handicapped. And that is that we too often are guilty of not taking advantage of the contributions to our society that can be made by those who are physically impaired one way or another. Our society would be richer if it more fully utilized the skills, the talents, the creativity of all our citizens.

We are today moving in the direction of a better life for our citizens who have some physical impairmen., a life with greater opportunities to earn a decent living, to contribute for the good of the community, but we have not achieved yet the goal of full partnership in society for all Americans with handicaps.

As we strive to reach this plateau, then, it is important to recount achievements such as that by the Staten Island Club of the Deaf. It is important to recognize the individual efforts of the men who brought that championship to Staten Island for in them we can see another example of the indomitable will that has made our nation strong. That's why at this time I would like to name the players and their manager and the others on this team that helped bring about this championship.

The manager is Charles Maucere. The players are Adam Milcznski, Bob Ferrance, John Krause, George Oraschin, John Werner, Bob Loeffler, Des Hitchman, Bill Nelson, Ray Sturm, Bob Marinaro, Bob Scarna, Bob Vallario, Steve Williamson, James Ginis, Tony DeVito, David Tropp, Steve Bioty. The coach is Vincent Dotti. Dominick Marinaro is general manager, Richard Hester the batboy, Bob Loeffler also is director of athletics and scorekeeper, Vito Mazzola and Sam Gino are patrons, and the publicity director for the team is Tom Cooney.

TAXING CAPITAL GAINS

Mr. TALMADGE. Mr. President, I would like to call to the attention of my colleagues an excellent article which recently appeared in the Wesleyan Christian Advocate.

The author, Bishop William R. Cannon, is bishop of the Atlanta area of the United Methodist Church, which includes the entire State of Georgia. He is an outstanding Georgian and a great American who has devoted his life and energies to the betterment of our society and the spiritual enrichment of our citizens.

It was my privilege to attend school at the University of Georgia with Bishop Cannon, and I know him to be a man who speaks his own mind, and who is a forceful and articulate advocate of responsible government in America.

His article provides a clear and concise appraisal of one of the most complex tax issues before our Nation. I commend Bishop Cannon on his thoughtful remarks, and ask unanimous consent that his article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE BISHOP'S CORNER

(By William R. Cannon)

Taxes affect the lives of all of us. At the same time, taxes affect the institutions we build in our society. Therefore, as the government considers a revision of the tax structure, we need as citizens to give careful attention to whatever is proposed. We would be wise to consider some of the issues now, well in advance of what Congress undertakes to do. What we think is bound to influence those who represent us, especially if we let them know our opinions.

One of the most important issues the nation will face in tax revision is the tax on capital gains. Say a person purchases a piece of property for $25,000 and then sells it for $50,000. He has realized a 100 percent return on his investment.

As the law reads now, he must pay in capital gains tax about 25 percent of his profits—one-fourth, more or less, of what he has made on his investment.

This amounts to about $6,200. This is an excessive amount of money.

The United States has already the highest return on capital gains of any other large nation in the free world. Many nations do not tax capital gains at all. Yet, there are some people who are recommending that it be taxed on the same basis as regular income. If this should happen, it would be very difficult for people to build up an estate or accumulate anything beyond insurance and social security for their old age.

The populace would be reduced to living on its income and the interest on small savings accounts put aside for a rainy day. Those who had estates from an earlier time would have to leave them intact. They would be hesitant to sell out and reinvest, for what they would have to reinvest would be only a pittance of their former wealth.

This, in turn, would stifle business transactions, greatly impair real-estate sales, and reduce the stock market to a standstill. There would not be sufficient money for business expansion, the improvement of plants and machinery, and American industry with its products would take a further step backward in relation to its competition on the world market.

More than that, what we take to be capital gains is not really capital gain at all in the inflationary environment in which we now live. A house or building that cost $45,000 about five years ago will cost $80,000 to $90,000 to purchase today. Then, after the government tax, as it now is, we will have less to buy the equivalent of what we now have when we sell a piece of property. If our sale is taxed on the basis of regular income, we would not have enough left to buy anything at all. Indeed, we will be forced to use that capital as if it were regular income.

The capital gains tax in any form is the most unfair and unjust tax there is. We have already paid tax on the money we earned when we made the investment. Then, we pay tax again on that same money when we change the investment to something else.

Philanthropy—public charity that supports our churches, hospitals, schools, colleges, and other Christian agencies—has been the glory of our society. Much, indeed most, of this has been done through financial benefits achieved through these investments. High taxes on capital gains would place much of this in jeopardy.

Therefore, when we revise the tax structure, I hope the government will abolish, or at least greatly reduce, taxes on capital gains.

TRANSPORTATION SUBSIDIES: THE BARGE COMPANIES HAVE RECEIVED MORE THAN OTHER MODES COMBINED

Mr. DOMENICI. Mr. President, earlier this year, the Congressional Research Service of the Library of Congress published a study entitled "Federal Aid to Domestic Transportation."

The Research Service examined the subsidies provided to four modes of transportation: Rail, air, highways, and inland waterways. A basic conclusion of the study:

Inland water navigation has received more net Federal aid than rail, buses, large trucks, and air carriers combined.

The study computed the level of total Federal aid, then subtracted such items as tax revenues or other direct benefits recovered by the Federal Government. For example, the Federal Government recovered user charges and transportation-related excise taxes from trucks, buses, and air carriers, and received nearly a century's worth of free and reduced-rate transportation from the land-grant railroads. The Federal taxpayer, however, received nothing back from the inland barge companies.

Says the CRS:

According to the data available to this study, in the low estimate, inland water navigation has received more net Federal aid than rail, buses, large trucks and air carriers combined. In the high estimate inland water navigation has received $640 million less than rail, buses, large trucks and air carriers combined when Federal aid to intercity rail passenger service is included as an aid to railroads and $360 million more than rail, buses, large trucks and air carriers combined when it is excluded.

This is just one of the recent analyses on the major subsidies to the big barge companies. The Congressional Budget Office earlier this year made its own study of the taxpayer subsidies to the barge industry, in comparison to other modes. CBO found that the barge subsidies were many times greater, as a percentage of revenues, than those provided to other modes. CBO's estimate of Federal subsidy as a percentage of revenues:

(In percent)

	F.Y. 1974	F.Y. 1975	F.Y. 1976
Air carriers	1	1	1
Highway transportation	--	--	--
Railroad freight	1	2	3
Inland barges	47	44	41

Mr. President, to add to the perspective of my colleagues on this issue, I ask unanimous consent that the CRS table be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Summary of Net Federal Aid to Railroads, Inland Water Navigation, and Commercial Highway and Air Carriers, 1835–1977 [1]

(Billions of dollars)

Description	Low estimate	High estimate
Intercity buses (1957–76)	$0.04	$0.04
Railroads (1835–1977)	[2] (.7)	[3] 2.2
Large trucks (1957–76)	2.5	2.5
Air carriers (1957–76)	.7	5.0
Inland water navigation 1957–76) [4]	9.0	9.0

[1] Net Federal aid refers to Federal aid reduced by land-grant transportation provided to the Government in the case of railroads; and the estimated underpayment in the case of buses, large trucks, air carriers and inland water navigation.

[2] The parenthesis indicates a net benefit to the Federal Government.

[3] This amount includes $1.1 billion Federal aid to intercity rail passenger service. As discussed in Chapter II, there is considerable discussion as to whether aid to intercity rail passenger service should properly be considered Federal aid to railroads.

[4] Since separate amounts for recreational users and commercial users has not been determined, the estimate includes benefits to both. The estimates include National Weather Service expenditures for the period 1972–76 only, Coast Guard expenditures for the period 1971–75 only, and Corps of Engineers expenditures for the period 1957–75.

JUDICIAL AWARD OF ATTORNEY FEES

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from Wyoming (Mr. WALLOP) together with the material attached thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR WALLOP

I ask that the testimony presented by Senator DOMENICI before the House Subcommittee on Courts, Civil Liberties and the Administration of Justice on November 16, 1977 be inserted into the RECORD. As a cosponsor of the amendment to the legal services corporation bill offered by the Senator from New Mexico which would provide equal access to the courts to individuals and small businesses, I would also like to associate myself with his statement at this time.

HOUSE JUDICIARY COMMITTEE SUBCOMMITTEE ON COURTS, CIVIL LIBERTIES, AND THE ADMINISTRATION OF JUSTICE

SUBJECT OF HEARING: JUDICIAL AWARD OF ATTORNEY FEES

Mr. DOMENICI. Mr. Chairman, I appear before this committee to express my concern that our judicial system is losing its capacity to act as a balancing factor against arbitrary and capricious Government action.

This observation is based on my personal experience as an attorney whose clients have endured the unfortunate experience of litigating against inexhaustible Government resources in both administrative and judicial proceedings. Also, as an elected representative of the people of New Mexico, the majority of my constituent correspondence is composed of letters from citizens who express a feeling of helplessness and frustration in dealing with an institution as large and complex as the United States Government.

Pollsters have indicated that American people consider the major domestic problem to be the size and unresponsiveness of the Federal bureaucracy. We have entered the age of federal regulation and there are few elements of life, commercial or otherwise, where the Federal Government does not have some role to play.

Mr. Chairman, I have viewed this problem not from the philosophical perspective of whether or not fees should be awarded successful litigants, but rather from the view that because of the cost of court litigation and agency proceedings, many issues of importance in defining the relative rights of government in a free society are not being tested. The reason is that in the usual case, a party has to weigh the high cost of litigation or agency proceeding against the value of the rights to be asserted. It is often only the most wealthy who can afford to challenge the government's regulations. Individuals and small businesses are in far too many cases forced to knuckle under to arbitrary interpretations and regulations of Federal functionaries because they cannot afford to take the matter to court. or challenge the administrative action. The result is denial of a notion that we hold so dear—namely, equal justice under the law.

There is testimony to the effect that the policy of the government has been to litigate "test cases" against small businesses and individuals in order to set a precedent. This precedent can then be applied to all similar cases and even expanded in corollary cases. The reason for this policy in disputing meritorious claims against small business and individuals is obvious. They do not have the resources that large groups or corporations possess and the Government can proceed in expectation of outlasting its adversary.

The government channels thousands of dollars and a vast number of attorney hours in the presentation of a case. Surely society has an interest in insuring that such a case be decided pursuant to a fair presentation of the issues to the Court or the administrative agency responsible for the interpretation of the law or regulation. But how can this be accomplished? We must combat the impact of escalating legal and related costs deterring Americans from defending and enforcing their legal rights against the federal bureaucracy. We must redress the balance between the government and the individual. The average American must be made to feel that he can stand up and fight arbitrary overregulation. Small business must not feel they have to "cave in" to the government because alternative proceedings, even though they have a direct and substantial impact on the economic interest of the business, are prohibitively expensive.

Mr. Chairman, I have sponsored an amendment to the Legal Services bill which has cleared the Senate. I'm certain the members of this Committee are aware of this legislation as they are the House Conferees who will decide whether or not the legislation becomes law. The purpose of my amendment is to provide that when a small business or individual with assets of less than one million dollars and income of less than one hundred thousand dollars for the preceding five consecutive years, prevails in civil litigation to which the United States is a party, they will be entitled to attorney fees and related costs.

The theory of justice that is implicit in our system is that litigation is an advisory process and that is the way we resolve disputes. I am firmly convinced that equal justice is not available when one cannot afford to fight.

The purpose of my amendment is to build a little enthusiasm in the average American. Today, his attitude toward protecting his rights from bureaucratic encroachment is if I win in court, I still lose because of the cost. And when they give in, the strength and vigor of arbitrariness grows larger and stronger.

My bill would stop that. It gives an individual the ability to fight the government regulations which affect him. If he feels these regulations are overbroad or arbitrary, he may turn to the courts for assistance. If he prevails, it would be at small financial expense.

Once again, the small businessman and individual would feel able to stand up and not be overwhelmed by his government: once again, the courts and the judicial system would be effective in checking the power of the administrative branch.

The time has come to examine the awarding of attorneys' fees and related costs of court litigation. It is my view that this is necessary in cases to which the United States is a party because of the advantage it has in relation to small businesses and individuals. However, I stress that to be awarded costs and fees, the litigant must prevail or partially prevail. This will prevent spurious suits and insure the contesting of meritorious disputes.

I must also stress, that while this amendment was intended to compensate the average American and the small businessman for legal costs in protecting his rights, it is also a bill which will put skids under arbitrary regulation and rule-making.

In fact, I was tempted to put another clause in to the amendment requiring that the agency of the government which lost the litigation pay the cost out of its budget. However, it was not inserted and the costs will come from general appropriations.

How much will those costs be? I am not terribly concerned if it ends costing millions of dollars. If that is the price to end frustration in dealing with the government and put a stop to over-regulation, it is money well spent. And, as agencies re-examine their policies and interpretations to be sure they are reasonable, the amount of litigation will be reduced every year. Only those disputes which are meritorious will be litigated and then from a more equitable posture.

Mr. Chairman, it has been a privilege to be with you today, and to share my views on this important issue. Thank you.

JOBS FOR WOMEN

Mr. DURKIN. Mr. President, during consideration of nominations for the Department of Energy, I pointed out the underrepresentation of women among the current DOE appointees. Mere token representation is a disappointment not only in view of promises by President Carter to seek greater equity, but also in terms of accomplishing necessary long-range goals. For the DOE to confront hard issues head-on, it will need the support of all citizens and adequate representation is necessary to this support.

The Boston Globe recently published an article noting that the administration's record on appointing women to high-level positions leaves much to be desired. People in this country expected a step forward, not backward, in efforts to include all groups in Government. I recognize that the President has not yet made all his appointments and I am hopeful that his future choices reflect his early commitment to fair representation.

I ask unanimous consent that the Boston Globe article of October 31, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Boston Globe, Oct. 31, 1977]

CARTER TRAILS FORD'S RECORD IN TOP-LEVEL JOBS FOR WOMEN

(By Stephen Hess)

For those who expected Jimmy Carter to bring a new deal in the appointment of women to high-level Federal offices, there is bad news today. His record is now worse than Gerald Ford's.

Of those top jobs—the type that usually require senatorial confirmation—the percentage held by women in the Carter Administration is 11; the percentage of women given similar jobs by Ford was 14. Women comprise about a third of the fulltime adult work force.

Most often the Carter Administration's women are lawyers. The second major pool of talent is the public-interest movement, such as Ralph Nader's empire. (Some of these women are lawyers, too.) They tend to be less experienced and younger, perhaps by 10 years, than the men who hold comparable positions. (The Carter women are often in their 30s.) They are highly motivated and in general, extremely bright.

Some of the appointments were made for the same reasons that Presidents always make appointments—to reward campaign supporters or to find places for out-of-work politicians. Thus at the State Department, Patt Derian, a former Democratic National Committeewoman from Mississippi, is now human rights coordinator, and former Rep. Patsy Mink of Hawaii has been given the assistant secretary's job with the longest title and the least power. She is Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs.

However, women who got their jobs primarily for these reasons are fairly rare in the Carter Administration. And some were hired because they are clearly outstanding experts. For example, Eileen Shanahan, a respected reporter in the Washington bureau of the New York Times, has been made the HEW Assistant Secretary for Public Affairs, a post that handles departmental contacts with the news media.

The most hopeful sign in the President's record to date is the appointment of so many women to general counsel jobs. Women are now the top lawyers in four Cabinet departments; Deanne Siemer, Defense (where she supervises 5,000 lawyers); Ruth Prokop, HUD; Linda Kamm, Transportation; and Carin Ann Clauss, Labor. Moreover, there are women general counsel at the Environmental Agency (Joan Z. Bernstein) and at the Department of the Army (Jill Wine Volner, the former Watergate assistant special prosecutor).

This is an important development for two reasons. The post of general counsel, because of its across-the-board involvement in all agency matters, can be the stepping stone to the Cabinet in two-term administrations. And the job is a perfect entry to lower Federal judgeships, where there are about to be a great many openings.

Strangely, if Carter has a good record in some areas where there has been a notable absence of women in the past, such as general counsel, his appointments have been unusually sparse in many places where there is considerable talent available. He has appointed a woman to direct the Children's Bureau and as HEW Assistant Secretary for Education, but there are no women yet as heads of the bureaus in the Office of Education, or in the top jobs at the National Endowments for the Arts and Humanities.

The Carter appointments have not drawn heavily on the women's movement. (Indeed there is massive hostility toward Carter from this quarter. Women activists used to say, "At least we have a friend in Betty." They do not feel this way about Rosalynn.) Rather, many of the women Carter has picked seem to be a Ladies' Auxiliary of the "Old Boy Netwook"—partners and associates in the great establishment law firms. When women are to get a post for the first time, there is no doubt that it is reassuring in Washington circles to appoint a lawyer, the traditional accrediting profession for political executives. Academics are far more suspect, and women corporate executives are harder to find.

Are women bosses more sensitive to the appointment of women? Interviews with people in a position to judge give mixed answers. Commerce Secretary Juanita M. Kreps gets consistently high marks. HUD Secretary Patricia Roberts Harris is placed in the middle. One high-level civil servant, a women, reports that her new agency director, a woman, bends over backwards to pick men as her deputies.

The one effort by women in the Administration to take joint action proved to be a total disaster if measured by impact on policy. This was a letter to the President in July protesting his stand on abortion. As a result, the President's inner circuit are now less convinced that the women are good "team players." But because of the letter there is also a feeling in the feminish movement that there are women in the Administration who will stand up for their concerns. For Midge Costanza, the assistant to the President who organized the abortion letter, this could be a dubious tradeoff.

Whether Carter will improve his record importantly relates to pressure politics. How uncomfortable will he be made to feel when his advisers assess his reelection chances? For others it is a matter of equity, which so far does not seem to be high on Carter's list of priorities.

ANALYST MAKES STUDY ABOUT WESTERN COAL

Mr. HANSEN. Mr. President, a number of persons are turning their attention to the question of developing coal in the West.

There are advantages and disadvantages to developing western coal and it is important that the Congress understand some of the underlying factors involved with this question. To that end, Duane A. Thompson, analyst, Environment and Natural Resources Policy Division, Congressional Research Service, the Library of Congress, has prepared a study, at my request, which deals with the question of development.

If I could sum up part of his findings it would be that the new outlook for coal development, while not as brisk as was predicted a year or two ago, will continue apace. But it is also clear that the prospect of producing as much coal as the administration said would be needed by 1985 seems absolutely unattainable.

I am pleased to submit the Library of Congress information on the advantages and disadvantages of developing western coal.

The once overwhelming advantages to the development of western coal are now being overshadowed by disadvantages resulting primarily from increased government regulation related to the opening of surface mines in the West.

Although the basic legislation for leasing coal on the public lands was set by the Minerals Leasing Act of 1920, there was no strong interest by the coal mining industry in the procurement of western coal reserves until about 1960. At that time mining companies began to accumulate large blocks of coal lease lands but, as permitted by lenient provisions in the 1920 Minerals Leasing Act, did not develop them. This permitted speculation by those prospective developers that were farsighted enough to realize the value of large reserves of low-sulfur coal. The number of coal leases on public lands during the 10-year period from 1961 to 1970, however, increased drastically to the point where the total number of leases during each of the 5-year periods of the 1960's was almost equal to the number of leases awarded from 1920 to 1960.

Despite the large number of leases awarded during the 1960's, the tonnage of coal being produced from the public lands during the same period was insignificant compared to total U.S. production. A contributing factor for the overall lack of production could have been the big push for environmental controls on the sulfur emissions from electric utilities by coal.

Statistics on the consumption of coal by the electric utility industry in 1975 illustrate this decline in the use of coal for electric power generation. According to the figures in the following table, the percentage of power generated by coal peaked at 70.8 percent of total power generated in 1956 and the figure has been falling continuously since that time with the exception of 1972 when there was a slight increase in the amount of electricity generated from coal. I ask unanimous consent that the table be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

GENERATION BY FUEL—TOTAL ELECTRIC UTILITY INDUSTRY,[1] BY YEARS AND KINDS OF FUEL

[Kilowatt-hours in millions]

Year	Total thermal generation [2]	Coal	Percent of total	Fuel oil	Percent of total	Gas	Percent of total	Nuclear	Percent total
1975 [3]	1,613,181	852,837	52.9	288,765	17.9	299,656	18.6	171,923	10.6
1974 [4]	1,562,806	829,842	53.1	299,306	19.1	319,931	20.5	113,727	7.3

Mr. HANSEN. Mr. President, the decrease between the years of 1969 and 1970 was particularly sharp because the actual increase in the number of kilowatt-hours generated by coal was only 101 billion kilowatt-hours or an actual increase of 0.014 percent. Because electricity generated by other fuels steadily increased between the 2 years, however, the relative percentage of power generated by coal decreased from 59 to 55 percent. It is therefore difficult to determine precisely coal companies' motivation for acquiring western reserves at that particular time.

The physical characteristics of the coal in the Northern Great Plains was particularly attractive to the coal development companies. The average thickness of coal beds in the Eastern and Midwestern United States is about 4 to 5 feet thick, but the beds in the west average about 30 to 40 feet in thickness with some in the Eastern Powder River Basin ranging up to 90 and 100 feet in thickness. Furthermore, the thickness of the overburden in the Nothern Great Plains is much less than that associated with the coal beds in the Eastern United States. Surface mine operators in the East currently have to remove approximately 100 feet of overburden before they can mine the coal beds, while those in the Northern Great Plains, in many instances, have to remove only 30 to 40 feet of overburden. When combined with the thickness of coal being removed, the difference between the two stripping ratios, the ratio of the volumetric units of the material being removed per volumetric unit of coal being mined, is tremendous. In the East, the ratio is averaging approximately 15 to 1 whereas in the West oftentimes the ratio is less than 1 to 1. This relatively large stripping ratio in the East has been largely responsible for the introduction of surface mining equipment of large proportions which permits the exposure of more coal at a lower cost.

In the West, however, mine operators can resort to the use of smaller and more versatile stripping equipment often consisting of smaller draglines, large haul trucks, bulldozers, and scrapers to expose the coal. Surface mining in the East, especially on mountain slopes in the Appalachians, requires much greater efforts on the part of mine operators when they are required to backfill contour mining cuts and restore the approximate original contours of the mined areas.

Unlike the mining in the East, variances for the restoration of the original contour could be obtained for coal mining operations in the West which are carried on at the same location for a long period of time, which expose very thick veins of coal, and which disturb a relatively small area for the amount of coal being removed, thick-seam mining. A consequence of high production rate in the western mines is the much lower production cost. The differences in these costs are partially reflected in mine-mouth values of coal for the different areas. Although consideration must be made for the heat value of the coal, along with its sulfur, ash, and moisture content, generally speaking, the mine-mouth value of the coal is a direct reflection of the cost of production.

Statistics show that the value of coal produced from Eastern underground mines is considerably higher than coal produced from either Eastern or Western surface mines, and that the value for Eastern surface-mined coal is generally higher than that of Western surface-mined coal.

In order to get a clearer picture of production costs, direct labor costs, as a function of productivity must also be taken into consideration. The average productivity in tons-per-man-day for different types of mining in various geographic locations in the United States is enlightening. In order to illustrate the difference between the productivity of an Eastern underground mine and that of a Western surface mine, the figures provided for Montana and West Virginia can be used. The average productivity in tons-per-man-day for an underground mine in West Virginia is 8.24 whereas the average productivity for Montana is 127.25 tons-per-man-day. Even the surface mines in the Eastern United States do not generally produce as much coal per-man-day as those in the West. For example, the productivity for eastern Kentucky for surface mines is 22.30 tons-per-man-day. Wyoming also is another example of high productivity for surface mining with an average of 67.74 tons-per-man-day. This much higher productivity for the Western States is reflected in lower production cost since labor cost is the primary component.

Some of the primary disadvantages of developing Western coal include the following:

First. Much greater distances over which the coal must be shipped in order to reach the Eastern markets.

Second. Intricacies of the permitting systems necessary for the opening of a Western mine.

Third. High severance taxes on the lower-Btu coal being produced in some of the Western mines.

Fourth. Recent Best Available Control Technology (BACT) for stack gas emissions currently being considered in Congress.

Fifth. Current administration coal leasing policy.

In spite of the fact that the United States does possess vast quantities of coal, much of which is low in sulfur content, a great percentage of this energy resource is located far from existing markets. In the case of lignite, which can be considered an extreme, resource utilization must be located close to the mining operation for a number of reasons including the high moisture content of the fuel, the low Btu content, and the fact that lignite can spontaneously combust when shipped in conventional rail cars. Therefore, powerplants or coal conversion facilities using lignite will have to be either directly at or near the mine-mouth.

Prior to the consideration of best available control technology concept of emission control, a good case could be made for the shipment of Eastern Powder River Basin Coal into the Midwest and some parts of the East in order to substitute for Eastern higher sulfur coal being used in conjunction with scrubbers. If the concept of a best available control technology is applied, and utilities are required to install scrubbers regardless of the sulfur content of the coal being burned, however, coal consumers may

find it cheaper to continue using Eastern higher sulfur coal and avoiding the higher shipping cost of bringing Western coal to the East. Scrubber installation costs could then be recovered by using coal of a higher Btu value as close to the mine as possible and applying any savings on freight to this additional cost.

A report prepared by the Congressional Research Service earlier in the year, Western against Eastern Coal, concluded that, in the absence of scrubbers, Eastern coal could not penetrate much farther than 300 miles beyond its point of origin, whereas Western coal, because of its desirable low-sulfur properties, could penetrate markets as far away as approximately 1,300 miles from its point of origin. This condition could very likely change with the requirement that utilities clean all stack gases, regardless of the sulfur content of the coal being burned.

In the June, 1977 issue of the Coal Observer, Joel Price, a vice president in the investment banking firm of Dean Witter and Co., Inc., stated that coal consumption patterns in the near term were not likely to change because power stations with proper approval could continue using compliance coal.

However, as we reached out into the mid-1980's, compliance coal would lose its meaning, the premium over high sulfur shrinking materially to represent only the additional costs of sludge removal. At that point no more incremental Western coal would be shipped East of the Mississippi; there would be a lift in Midwestern coal to be employed in conjunction with scrubbers, no significant change in the state of the art was envisioned for some years.

Another drawback in the development of Western coal is the extremely complicated permitting system and its attendant requirements which has resulted from increased regulation at the local, State, and Federal levels. Industry spokesmen claim that the time required for permit application, application review, hearings when necessary, review of the hearings, preparation of the baseline environmental impact statement, and review of these statements has increased the lead time for the development of Western coal mines to approximately 10 years. If the coal mine is to be located on Federal land, the lead time can stretch to 12 years depending on the complications that arise during the application and review process.

Although the time actually used in the permitting and review processes may not be this long, when these delays are coupled with the lead times necessary for the ordering of mining equipment and the design and construction of electric utility boilers, which are often customized for the type of coal that will be burned, the total time being reported by the industry appears to be accurate. In order to shorten this lead time, some mine operators have begun to risk defaults on equipment and coal supply contracts in hopes that their permit application and mining plans will be approved rather than wait until all of the regulatory requirements have been satisfied before ordering their equipment and signing contracts for delivery of coal to the prospective utility.

As complex as the process appears, it must be taken into consideration that the procedure which is outlined assumes that the coal company already owns or has a legal right to mine on the property in question.

If the coal deposits were located on Federal lands, the requirements of the company in qualifying for a Federal coal lease could lengthen the process considerably. Furthermore, industry representatives who attended the recent National Coal Association Symposium in Louisville, Ky., expressed concern that, according to the provisions of the recently enacted Surface Mining Control and Reclamation Act, if a State does not meet the qualifications for an approved regulatory program within its boundaries, the Office of Surface Mining created by the act would assume the regulation of surface mining in the State.

Because of this Federal involvement in the regulatory program, the Interior Department, with the assistance of the company, could be required to file a regional environmental impact statement under the provisions of the National Policy Act of 1969 even if the mining operation was to be located on private land.

This concern seems to be unfounded, however, since section 702(d) of the law says that,

> Approval of the State programs, pursuant to section 503(b), promulgation of Federal programs, pursuant to section 504, and implementation of the Federal lands programs, pursuant to section 523 of this Act, shall not constitute a major action within the meaning of section 102(2)(c) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332).

In addition, the majority of the Western coal-producing States have imposed a substantial severance tax on the resource.

In its 1976 report on coal severance taxes and the distribution of revenues, the Council of State Governments provided the following breakdown by State and the estimated average total production taxes per ton of coal.

ESTIMATED AVERAGE OF ALL PRODUCTION TAXES ON COAL PRODUCED IN 1975 IN STATES WITH A SEVERANCE TAX ON COAL*

State	*Estimated average total production taxes per ton*
Montana	$1.73
Kentucky	.68
North Dakota	.52
Wyoming(a)	.52
Tennessee	.20
Alabama	.135
New Mexico(b)	.08
Ohio	.04
Arkansas	.02
Colorado	.007

* Source: The Council of State Governments and state departments of revenue.

(a) Estimated on 1975 production and prices to be collected in 1976.

(b) New Mexico ad valorem process based on production is in its first year and estimates of tax per ton are not available.

The State with the highest combination of taxes on coal was Montana with a total average tax of $1.73 per on. According to the report, this amount was 250 percent higher than Kentucky's 68 cent per-ton average and 33 percent higher than North Dakota's 52 cents per-ton average. The State with the lowest tax on coal was Colorado with an average levy of $.007 per ton. While the majority of the States included in the study levy a single severance tax on coal per ton, the two Western States earmarked for the greatest increase in production, Montana and Wyoming, levy a combination of taxes on coal produced. In Montana, the production taxes are:

First the Coal Mines Severance Tax

Second the Resource Indemnity Trust Tax, and

Third the Cross Proceeds Tax.

In Wyoming, the taxes are as follows:

First a Severance Tax, and

Second an Impact Tax (Privilege Tax).

Consequently, these two States already have a more complex mechanism in place through which they can tax production and which could serve as a disincentive to location of mining operations there, given the other adverse conditions already discussed.

Finally, one of the most crucial elements in the consideration of Western coal development is the attitude of the administration toward the leasing of reserves on the public domain. The policy of an administration can stimulate the development of Federal reserves of coal or conversely, it can retard this development. The current administration has overtly expressed its desire to discourage the development of public coal reserves in the Western United States. The most recent expression of that policy was contained in remarks by Secretary of the Interior, Cecil Andrus to the National Coal Association Conference in Louisville, Ky., on October 18, 1977.

In his keynote address, Secretary Andrus stated that with few exceptions, the Government would not lease Federal coal, the surface rights of which are in the control of private landowners.

Exceptions to this policy would be in cases where a coal company already owned the surface of the land overlaying Federal coal.

According to the Secretary, all other leases would be awarded on land where the Federal Government was in control of both the coal and the surface. Prior to the Secretary's remarks at the conference, numerous other articles in trade publications suggested that the administration would pursue the development of Eastern underground mineral reserves instead of Western coal.

While this course of action by the administration would provide more jobs within the industry because of the higher labor intensity of the underground mining industry, it would also require mine operators to cope with the much lower productivity of underground mines.

RELATIONSHIPS BETWEEN UNITED STATES AND NATO MILITARY COMMAND STRUCTURES

Mr. DURKIN. Mr. President, the size of the U.S. military force in Western Europe and the coordination between that force and the forces of our North Atlantic Treaty Organization allies are two of the most crucial matters defense planners in our country are facing today. As the Soviet Union and other Warsaw Pact countries have substantially increased the size and competency of their conventional forces in Europe during the past years, we have come to realize in this country that our ability to deal effectively and swiftly with any threat from the East must not be allowed to deteriorate.

Many observers of NATO have expressed some concern during the past year about the adequacy of our conventional forces to meet such a massive threat or even attack. One basis of that concern is a perceived lack of effective coordination on all levels between U.S. forces and NATO forces. It is clear that though numbers of forces are important in war, just as important is their ability to work effectively with one another.

In this regard, a recent study completed by the General Accounting Office entitled "Relationships Between United States and NATO Military Command Structures—Need for Closer Integration" is of major interest and importance. This report, an unclassified version of which was released October 26, 1977, suggests numerous alternatives to provide closer integration between United States and NATO command structures in peacetime that will enhance coordination during wartime, God forbid that occasion should arise.

I commend this study to my colleagues and all those interested in our conventional defenses in Europe against possible Soviet attack. Its general conclusion about the need for closer integration has been endorsed by the Department of Defense.

The report is too lengthy to include in its entirety in the RECORD, but I ask unanimous consent that its digest, conclusions, alternatives, and recommendations, and the comments of the Department of Defense be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMPTROLLER GENERAL'S REPORT TO THE CONGRESS: RELATIONSHIPS BETWEEN U.S. AND NATO MILITARY COMMAND STRUCTURES—NEED FOR CLOSER INTEGRATION, DEPARTMENT OF DEFENSE

DIGEST

The United States participates in two commands in Europe—its own and NATO's Allied Command, Europe. The United States has a unified command; headquarters commands for the Army, Navy, and Air Force; and numerous subordinate command headquarters.

The U.S. and NATO command structures are similarly organized and have basically the same overall mission—to provide a combat-ready force to deter aggression from the Warsaw Pact nations. The close relationship of the two commands is best illustrated by (1) several U.S. commanders being also NATO commanders, (2) NATO assuming operational command of U.S. combat forces in a NATO war, and (3) NATO being heavily staffed with U.S. personnel in peacetime.

Over the years, the U.S. command structure has been studied and debated, both in the Congress and the executive branch; efforts have been made to identify, classify, reorganize, and streamline headquarters activities throughout the Department of Defense. These efforts were all intended to make more efficient use of resources by reducing the number, size, layering, and duplication of headquarters and by updating and streamlining command relationships. Prior efforts have resulted in reorganizations and consolidations of headquarters and headquarters functions. Several of these efforts and personnel cuts were initiated by the European commands. Therefore these commands themselves share the credit for the actions taken to date more fully integrating it with the NATO command structure.

There are at least two alternatives that should be considered in analyzing the U.S. command structure in Europe—alternatives that could improve U.S. participation in NATO and reduce the management layering that now exists. These alternatives are:

Integrate the U.S. unified command with NATO's Supreme Headquarters, Allied Powers, Europe.

Integrate component commands and the United States European Command.

GAO recommends that the Secretary of Defense reexamine the U.S. command structure in Europe and make changes as necessary to insure that the structure is optimally organized to perform its primary wartime mission. The examination should include evaluation of the potential benefits—both to U.S. staffing and a strengthened NATO—of taking the leadership in giving NATO greater authority and control over peacetime logistics support in order to facilitate the transition to and effectiveness of wartime activities.

GAO further recommends that the Secretary of Defense also take a leadership role in encouraging a multilateral study to identify ways in which closer integration of the command structures of all the NATO member forces with the NATO command structure can be achieved.

The Secretary of Defense was given an opportunity to comment on GAO's classified report. However, the classified report was issued without Defense's comments because they did not respond in time. Subsequently, however, Defense furnished GAO comments and supported GAO's general conclusion that closer integration between the U.S. and NATO command structures is needed.

CHAPTER 5. CONCLUSIONS, ALTERNATIVES, AND RECOMMENDATIONS

The increasing interdependence of the members of NATO underscores the need for a NATO command that can respond quickly in the event of an attack by Warsaw Pact forces, particularly an attack with little or no advance warning. Transition from a peacetime to a wartime structure should require minimal changes. The only practical way to accomplish this is through the close integration of the command structures of the member forces with the NATO command structure.

Integration of command is a key factor that must be achieved if NATO is to be capable of effective coalition warfare. An integrated command structure could be a first step in achieving greater NATO interoperability, standardization of weapons, improved communications facilities, and increased NATO responsibility for management of logistics support. A true partnership should start with the top management team that can function well in peacetime and wartime in achieving mutual goals.

Consequently, the United States should take a leadership role in encouraging a multilateral study to identify ways in which closer integration of the command structures of the NATO member forces with the NATO command structure can be achieved. Moreover, such a study should be initiated without delay to establish a sound basis for planning future outlays of funds. For example, plans have now been approved to [deleted]. Substantial funds will undoubtedly be necessary to accomplish this move. Without long-range plans that address the organizational structure necessary to accomplish the long-term objectives set forth in this report and the objectives for concerted multinational efforts emphasized by the Supreme Allied Commander, Europe, funds may be spent unwisely. This applies not only [deleted] but to other future facility and communications systems acquisitions.

There are also alternatives which the United States can initiate on its own, which not only would support the longer term objective of closer integration but also could strengthen the U.S. structure.

ALTERNATIVES AVAILABLE TO THE UNITED STATES

The foremost consideration in determining the optimum U.S. command structure in Europe is how best, and by whom, the following objectives can be accomplished.

Transition of U.S. forces to an operational role in the NATO command structure.

Management of logistics support for U.S. forces in peacetime and wartime.

Management of other U.S. unilateral responsibilities, actual or potential, in the event of a war in Europe.

The most practical and effective way to accomplish these objectives is to delegate responsibility for these functions to the lowest feasible level and to eliminate redundant planning for and monitoring of those functions by each higher level in the management hierarchy. Even if there is no precise duplication in the management activities at each level, a single manager with one principal overview level has been shown in past GAO reviews to be a better, more efficient, and less costly way of managing.

DOD has made progress in reducing headquarters levels in Europe. Most reductions have been across the board, on a horizontal basis. The horizontal approach does not analyze the need for the missions and functions themselves.

We believe that a functional analysis of the command structure, on a vertical basis, may offer potential for additional reductions, as well as assure that missions and functions are optimally located in the military chain of command. Responsibility for, and resources to perform a function should be placed in the most optimal location considering the U.S. wartime mission, as well as the ACE commands' roles and functions. At least two alternatives which come to mind should be considered in such an analysis—alternatives that could improve U.S. participation in the NATO structure and reduce the management layering that now exists in the U.S. command structure—without impairing the capability of the United States to meet its unilateral responsibilities.

Integrate USEUCOM with SHAPE

One way would be to integrate USEUCOM with SHAPE, both in peacetime and wartime, retaining a small nucleus of U.S. personnel to plan and manage those responsibilities that are peculiar to the United States, such as control over nuclear weapons. Such an alignment would be oriented more to the planning for and prosecution of a NATO war and would facilitate the transition of U.S. combat forces from U.S. command in peacetime to NATO command in wartime.

If European Command personnel were integrated into SHAPE as discussed on page 27, there would be a potential for reductions in the U.S. personnel now assigned solely to

SHAPE. For example, there would be no need to have separate groups of personnel doing war planning for both, as is now the case, because the function of war planning would be consolidated.

Under such an arrangement the service component commands would continue to have the responsibility they now have, both in peacetime and wartime, for logistics support of their troops.

The U.S. unified command would no longer monitor the logistics support activities of the components, leaving this task, resource allocation, and priority setting to the service departments and ACE. Crisis management could be handled by augmenting the small nucleus of U.S. personnel retained to manage U.S. unilateral responsibilities with personnel drawn from the service components to create a battle staff.

Integrate component commands and USEUCOM

Another way to organize the U.S. command structure in Europe would be to eliminate or reduce the service component command headquarters, with the Headquarters, USEUCOM, assuming primary responsibility for management of logistics support functions, in both peacetime and wartime. This seems particularly appropriate in the case of USAREUR since the two Army corps in Europe are essentially self-sufficient and capable of attending to their own needs.

In wartime most levels of the component commands go over to NATO control whereas the component command headquarters themselves do not. In peacetime most support activities are handled under a direct support system from the United States. Other peacetime activities pertaining primarily to wartime preparation, such as troop training and war planning, are also handled at lower levels and reviewed or monitored by Headquarters, USEUCOM; the service component commands; and NATO. Since responsibility for managing and performing these functions has been delegated to levels below the component command headquarters, it seems that one monitoring level could be established rather than the several levels that now exist. Such an arrangement would not preclude also integrating Headquarters, USEUCOM, with the service component commands, as discussed in the prior alternatives.

RECOMMENDATIONS

We recommend that the Secretary of Defense reexamine the U.S. command structure in Europe and make changes as necessary to insure that the structure is optimally organized to perform its primary wartime mission. The examination could include evaluation of the potential benefits—both to U.S. staffing and a strengthened NATO—of taking the leadership in giving NATO greater authority and control over peacetime logistics support, to facilitate the transition to and effectiveness of wartime activities.

We further recommend that the Secretary of Defense also take a leadership role in encouraging a multilateral study to identify ways in which closer integration of the command structures of the NATO member forces with the NATO command structure can be achieved.

AGENCY COMMENTS

The Secretary of Defense was given an opportunity to comment on our classified report. However, the classified report was issued without Department of Defense comments because they did not respond in time. Subsequently, however, the Department furnished us comments and supported our general conclusion that closer integration between the U.S. and NATO command structures is needed. An unclassified version of the Department's comments is included as appendix V.

APPENDIX V

ASSISTANT SECRETARY OF DEFENSE,
Washington, D.C., August 29, 1977.

Mr. FRED SHAFER,
Director, Logistics and Communications Division, U.S. General Accounting Office, Washington, D.C.

DEAR MR. SHAFER: As requested, we have reviewed your draft report, "US and NATO Military Command Structures—An Analysis of Alternatives." The study provides an adequate description of the current relationships between US and NATO command structures. (OSD Case No. 4613)

We support the report's general conclusion that greater integration of national and NATO headquarters could facilitate peacetime command and control while improving NATO's ability to convert to wartime operations. [Deleted.]

The Department has been studying additional ways to further integrate the US wartime and peacetime component command structure with appropriate NATO headquarters to insure that those who must work together in war are also working together in peacetime. [Deleted.]

An implicit assumption in the report is that headquarters integration alone will improve transition to war. I agree; however, there is also an underlying need for greater functional integration among NATO nations in such areas as logistics, intelligence, and communications. Increased peacetime planning and resource management in these functions is vital to NATO's ability to convert efficiently to wartime operations.

As a result of US initiatives at the May 1977 NATO Summit and Defense Planning Committee (DPC) Ministerial meetings, NATO is undertaking both long and short-term defense programs in areas where collective action is urgently required. These programs will require all NATO Allies to coordinate more effectively on programs such as logistics and communications. Both President Carter and Secretary Brown have made the success of these programs top national defense priorities.

Sincerely,

JOHN P. WHITE,
Assistant Secretary of Defense, Manpower Reserve Affairs and Logistics.

ENERGY: OUR INVISIBLE CRISIS

Mr. BAKER. Mr. President, as we begin the closing weeks of this 1st session of the 95th Congress, most of our attention will be focused on the completion of the pending energy legislation. To my knowledge, no one has put the importance of that task more in the proper perspective than has my good friend and distinguished colleague. the senior Senator from Maryland (Mr. MATHIAS), in a speech delivered on the 20th of September in College Park, Md. As we attempt to devise legislation to meet the most serious challenge facing the Nation today, the Senator's remarks are most timely. I commend the wisdom contained in those remarks to my colleagues and ask that they be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

ENERGY: OUR INVISIBLE CRISIS

(Remarks by Senator CHARLES MCC. MATHIAS, JR., to the Prince George's Jaycees, College Park, Md., September 20, 1977)

Tonight I want to talk with you about energy—the most critical and least understood problem on our national agenda.

For several weeks now, the Senate has been debating President Carter's energy bill. It has 113 separate provisions. Some are complex; many are controversial; all require careful examination.

In order to master this legislative colossus as quickly as possible, we've adopted a very unusual, in fact, an unprecedented procedure. We've broken the bill down into sections and we're debating them piecemeal. Just as soon as we complete a section, we send it back to the House. In this way, conference committees can begin to reconcile the Senate and House versions of some sections of the bill, while others are still being debated.

Exactly a week ago tonight, for example, the Senate stayed in session until 10:30 to finish the Conservation section. The week before, we adopted the proposals on coal conversion. Both of these sections now can go to conference, while the Senate lingers over more controversial proposals such as natural gas pricing.

This procedure saves a lot of time. So, I think it's safe to predict that Congerss will enact compresensive energy legislation before it adjourns.

But, don't get the idea that this legislative package will be some sort of panacea for our energy problems. It won't. There is no such thing. It will be nothing more than a tentative first step toward a solution. Still, since even the longest journey must begin with a single step, let's be glad at least that we're finally about to get off of dead center on energy.

What happens next, what kind of a journey this first hesitant step will take us on, will depend on the American people—on each one of us.

We have been talking about an energy crisis in this country ever since the 1973–74 Arab oil embargo. Millions of words have been spoken and written about it. Hundreds of studies have been published. Countless arguments have been had. But, if you'll excuse the expression, the whole debate has generated more heat than light.

Highly qualified experts differ strongly on the nature of our energy problem and on what should be done about it. The public, too, is divided and confused. Many people don't believe there is a problem. Others, who recognize that a problem does exist, simply aren't ready to face up to it.

Frankly, I'm sick and tired of all the cant and hypocrisy about energy. There's so much talk about energy conservation and so little action that it's no wonder people are confused.

For more than four years now, the national speed limit has been 55 miles-an-hour. That limit was set because you get four miles more to the gallon at 55 than you do at 70. If any of you here tonight observe that 55 mile speed limit, then all I can say is that we've never traveled the same road at the same time. I try to stick to that limit and I could count on the fingers of one hand the number of cars I've been able to keep up with recently. As for passing a car—that's just a dim memory for me.

By now I'm used to cars hurtling by me on the highway, but last weekend I got a new shock. A Greyhound bus roared past me on the beltway so fast that my car and I both shuddered. To add insult to injury, as the bus disappeared in the distance, I just had time to read these words on the placard displayed in its rear window:

"Thanks for taking the bus and saving energy—

JIMMY CARTER."

That's a pretty good example of the problem we've got on our hands. Everyone knows the things we can do to save energy, but practically no one wants to do them.

Many different factors contribute to this national inertia. To my mind, the most significant factor is that energy experts and policymakers alike have tended to cast the energy problem in terms of the future. This has been a terrible mistake.

British novelist Aldous Huxley once told a friend: "I have peered into the future, and it doesn't work".

We may yet prove the pessimistic Mr. Huxley right, unless we begin now to refocus the energy problem in terms of what we must do in 1977–78 to make the future possible. If we lull ourselves into believing that major energy initiatives can wait until tomorrow, then the future certainly won't work very well, if it works at all.

We must wake up to the fact that our energy problem is different from, say, our crime problem, or our unemployment problem, or the problems of our cities. The energy problem challenges our entire civilization and threatens its survival. This distinction is crucial to understanding our present danger and to finding the necessary responses to it.

Energy is not just an aspect of modern society; it is society's life-blood. Energy is to modern man what wildlife was to primitive man. It sustains life. Our economy—food, jobs, industry, income, homes, health, transportation, recreation—all of these and more depend on energy.

When you add to this the fact that in the bitter winter of 1977 our oil imports reached 50 percent of our oil consumption, then there is just no way you can place the energy crisis in the future. It is definitely here and now. Incredible as it seems, however, polls show that half of the American people don't even know that we import oil. But, not only do we import vast quantities of oil, we spend $36.4 billion dollars a year on it. That much money going out of the country is a very large factor in our unemployment picture. It means thousands of jobs lost.

Another thing most people don't know is that without those bloated oil imports, we could wipe out our balance of payments deficit. Just imagine what that would do for the economy. Right now our deficit runs at about $25 billion a year. Cancel those oil imports and we'd have a healthy surplus.

The economic implications of our growing dependence on foreign oil are alarming. Its implications for our national security are even more serious.

Former Secretary of State Henry Kissinger recently recalled the havoc wrought by the Arab oil embargo of 1973 in these terms:

"These events . . . caused an immediate economic crisis both in this country and around the world. A drop of only 10 percent of our imported oil, lasting less than half a year, cost Americans half a million jobs and over 10 billion dollars of national output.

"The massive price increases of 1973 added at least five percentage points to the price index, contributing to our worst inflation since World War II.

"It set the stage for a serious recession, in this country and worldwide, from which we are only now recovering."

Since the time Mr. Kissinger describes, we have drifted into even more dangerous waters. The Federal Energy Administration forecasts that a one-year Arab oil embargo now—in 1977—would shear between $78 billion and $112 billion from our gross national product and put more than two million people out of work. Such an embargo would make the disruptions of 1973–74 look like child's play.

It's not hard to imagine the chaos here on the East Coast that would follow a disruption in the arrival of these oil tankers. New England, for example, now imports 80 percent of its industrial oil. The risks to national security inherent in this situation are obvious. How can we hope to pursue an independent foreign policy while we are at the mercy of foreign countries for the oil that sustains our economy?

It would be a fatal mistake to discount the possibility of another disruption of our oil supply. We must not delude ourselves on that score.

Saudi Arabia, which produces about a quarter of OPEC oil and is the only country capable of stepping up output to keep pace with increasing world demand, has been a very good and loyal friend to the United States. But, less than two weeks ago a Saudi newspaper, Al Madina, reported Saudi Oil Minister Sheikh Ahmed Zaki Yamani had told a visiting Japanese delegation that Saudi Arabia "will impose a production ceiling of 8.5 million barrels a day and will not lift it until real progress is made toward a settlement between Israel and its Arab foes".

This disturbing report may turn out to be apocryphal. I hope so. But, true or not, it underscores the bottom line of our problem. The energy crisis is with us now. It doesn't lie in wait for us sometime 20 or 30 years from now when we run out of fossil fuels. It began 30 years ago when we first had to import oil. And it has become more and more serious each year in direct proportion to our mounting energy needs.

As Walter Cronkite warned on the CBS energy special, "Energy is the invisible crisis—by the time we see it, it could be too late".

The picture I've drawn so far is pretty grim. But there is one strong element of hope. It is this: more than half the energy America uses is wasted and much of it could be saved through conservation.

Worldwatch Institute reports that: "More than one-half the current U.S. energy budget is waste". The Institute believes that for the next quarter century the United States could meet all its new energy needs simply by improving the efficiency of existing uses.

This forecast assumes that Americans won't change their lifestyles in any significant way. Much more dramatic savings are possible, "if we consider functions instead of technologies—ways, for example to eliminate the need for a certain type of transportation instead of merely ways to make it more efficient".

There are many simple ways we all can save energy now. Observing the 55 miles an hour speed limit is one. Carpooling is another. Cars are our largest single user of petroleum products and, at any one time, 75 percent of them carry only the driver. That's just plain crazy in the energy crunch we've got.

In 1974, we proved we could save energy if we tried. We were goaded into it by the embargo, but we did slash motor fuel consumption by almost four percent—the first drop in consumption in 40 years!

Now let's take a look at what's happened since then. When the embargo was lifted, although our vulnerability remained exactly the same, Americans stopped believing in the energy crisis. Consumption began climbing and this summer the American motorist burned up gasoline at record rates.

This record consumption came on the heels of a winter when energy shortages threw 1.2 million Americans out of work, so you can't help wondering what it's going to take to sober up this nation.

At the federal level, we have a Winter Emergency Task Force working on energy planning. At the state level, in Maryland at least, the Energy Policy Office of the Department of Natural Resources is framing a massive energy conservation program. But meanwhile back at the ranch, the average American suspects the energy program is a "ripoff".

Convincing the American people that the energy crisis is real is our number one national priority. If the leaders of this nation can't get that idea across, no amount of legislation is going to save us.

Clearly, we have a tremendous educational job to do and the President will have to take the lead in it. He must renew his efforts to explain the nature of our problem. He must identify it as contemporary, not project it into the future. And he must not hide any unpleasant truths. In a word, President Carter has got to do some strenuous jaw-boning.

Once the American people stop getting conflicting and confusing signals about energy, I am sure they will rise to the challenges ahead.

One of the conflicting signals Americans have been getting was come from the artificially low energy costs we pay. We're not used to getting scarce commodities cheap. We know from experience that if something's scarce, it's also expensive. So one of the first things we have to do is to begin to pay the true cost of the energy we use. The American people should know these costs. When they do, I believe they will respond with determination and resolve. Indeed, facing the economic realities of the market could be the force that will bring us at last to a rational energy future.

Putting the public in touch with reality on energy costs is easily done. But coming to grips with other forces that work to distort American perceptions about energy will not be easy.

Over the past several decades we have become a vocal advocate society. If you look back 25 or 30 years, you'll see that Americans pretty much believed in their society, in themselves and in the way things were going. Today, we no longer have that kind of tacit consensus.

Instead, we often disagree or are uncertain about where we are going, where we should be going and how we get there. Those who believe they have answers to these questions advocate their points of view more and more stridently, which leaves those who are uncertain more uncertain than ever.

Energy is a life and death issue in any industrial society, so it is proper and healthy to debate every aspect of it thoroughly. But that debate must lead to resolution; not to stalemate. There must be good will and mutual respect among the debaters. And ultimately, confrontations must give way to compromise.

A *New Yorker* cartoon several months ago put the problem nicely. It showed three prosperous businessmen sitting in a plush boardroom overlooking the smokeless chimneys of an idle factory. The caption read: "I mean, you can have the cleanest air in the world, but if you can't manufacture anything what the hell good is it?"

Up to now the forces which oppose each other on the energy question have spent much of their time disparaging each other. Conservationists take on public utilities; consumers groups dispute oil companies; oil companies mistrust the federal government, so do state and local governments. Too little time has gone to sorting out the truth so that we can somehow reach a consensus about purpose. Yet each of these advocate groups recognizes the problem and has a sincere interest in developing a coherent energy policy.

If we are to meet the energy challenge then, we must begin to bind the disparate forces of our society into a coalition of common purpose. The time for advocacy is past. We must have a new dynamic in American life—a new partnership between government, business and the people.

To dispel once and for all the myths and illusions that cloud our search for an energy

policy and retard our pursuit of energy independence, the President must act vigorously and urgently. He must bring together business leaders, scientists, representatives of government and private organizations in the same way labor and management routinely come together. They must sit down together at a White House Conference on Energy and bargain in good faith. When labor and management sit down together, each wants to win concessions but neither wants to put the company out of business. In that same spirit, with Presidential leadership, we can lick our energy problems.

The President, of course, can't be expected to go it alone. He'll need the help and support of every one of us. He must take the lead in giving people the facts, but groups outside of government, like the Jaycees, must be mobilized to join in a consensus-forming process.

This summer I participated in a symposium on energy that brought together representatives of the various factions I have mentioned here tonight. Our experience with one another encourages me to believe we can forge a national consensus. Each of us at that conference came to recognize that the other side, whatever other side it was, was more convincing than we had though at first. We ended our meetings on an optimistic note. I would like to end on the same note.

America has not been fully mobilized in more than 30 years, and it is an awesome sight when this country rolls up its sleeves and 200 million Americans tackle a problem. It is automatically bi-partisan if it involves the entire country and its needs. Energy does.

The stakes are high: The peace and progress of the world depend on how soon and how widely we as a nation can make up our minds about whether there is an energy problem, about what it is, whose it is, and what we are going to do about it—and then roll up our sleeves and get on with the job.

CLAIRA PIROZZI MONIER NAMED ONE OF TEN OUTSTANDING YOUNG WOMEN OF AMERICA FOR 1977

Mr. DURKIN. Mr. President, this month marked the sixth annual presentation of the Ten Outstanding Young Women of America Awards. These awards honor the professional and civic achievements of young women—between the ages of 21 and 36.

One of the recipients this year is an outstanding young woman from New Hampshire. Claira Pirozzi Monier exemplifies the commitment of young women to public service. Her involvement has been in both academics and State and local government. Her present position as executive director of the New Hampshire Council on Aging enabled her to bring youthful energy and many talents to rectify the problems of our senior citizens.

I congratulate her and the other recipients and ask unanimous consent that the following statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

CLAIRA PIROZZI MONIER OF GOFFSTOWN, N.H.

The Executive Director of New Hampshire's Council on Aging, Claira Pirozzi Monier has been named as one of the Ten Outstanding Young Women of America of the Year for 1977. Mrs. Monier is the daughter of Vincent and Janina Pirozzi of Bedford, New Hampshire.

Prior to her present position, Mrs. Monier served the Governor's office as Special Assistant—Citizens Services, as Director of Constituent Services and in the Department of Employment Security. She has represented the Governor's office at state, regional and national levels.

When not working for the state, Mrs. Monier instructed and lectured in geography at New Hampshire College, St. Anselms, Mount Saint Mary's and Lowell State. During her active teaching career, Mrs. Monier coauthored eight papers concerning environment, the Merrimack River Basin Community, geography as taught in New Hampshire and education for non-English speaking ethnic groups. For the past six years, Mrs. Monier has worked with New Hampshire's Community Education Council, the State Mental Health Advisory Council, the New England Gerontology Advisory Council and the Piscatoquog Watershed Association. For her own town of Goffstown, Mrs. Monier has served as Vice Chairman of the Republican Town Committee, Board of Library Trustees, on the Board of Adjustments and as President of the Tennis Association. She has received two grants to conduct a study of the day-to-day interactions of ethnic groups to identify their specific problems and to initiate programs to assist these groups to overcome them. The University of Akron has asked Mrs. Monier to lecture to their Urban Studies Department.

For her contribution to her state and its people, Claira Pirozzi Monier has been selected as one of the Ten Outstanding Young Women of America for 1977.

ADDRESS BY HON. CHARLES H. SILVER TO THE ALFRED E. SMITH MEMORIAL FOUNDATION

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from New York (Mr. JAVITS) and the address attached thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR JAVITS

I would like to take this opportunity to share with my colleagues the fine views of Charles H. Silver. Mr. Silver delivered this address at the Alfred E. Smith Memorial Foundation Dinner on October 13, 1977 at New York's Waldorf-Astoria.

ADDRESS GIVEN BY HONORABLE CHARLES H. SILVER

Distinguished Guests. . . .
And all of you
Who have gathered to give life
To our beloved fellowship
And strength to the high principles of our Foundation

We have come together for this 32nd annual dinner in the presence of many makers of history and movers of world events . . . joining with some of the outstanding figures of our age . . . in a cause close to our hearts and to our beloved host . . .

His Eminence, Terence Cardinal Cooke

We gather in tribute to democracy's happy warrior . . . recalling once more the rate and splendid moral and spiritual values that shine forth when we "Look at the record" of his achievement.

We are met at a time when the world's great powers seem eager to join in a genuine pattern of lasting peace.

Despite unrest in most of the middle east and disturbing events in Ireland and Africa, no man or woman wearing the uniform of the United States is engaged in combat anywhere in the world.

Let's keep it that way!

The last best hope of banishing war lies in the classrooms of today.

That is where we can save mankind and fortify the next generation with ethical understanding, knowledge and humanity.

No one knows this better than our honored guest, that notable advocate of decent government . . . the able and courageous administrator of the greatest industrial, cultural and creative state in the union . . . The Governor of the State of New York . . . The Honorable Hugh Carey

A Nation . . . our great nation . . . that maps pathways to the distant stars . . . that performs miracles of progress for all mankind . . . We . . . of all people . . . can surely find the road to a lasting peace . . . to security and equality for all.

It is time to demand honest, inspired and farseeing leadership . . . to regain the moral fibre and self-respect that we so desperately need.

The healthy influence of ethical homes and excellent schools was never more vital than now. And, now, as never before, we must return to the House of God.

Let me quote the moving phrases of that inspired guardian of divine law and human welfare . . .

His Eminence Terence Cardinal Cooke.

These are the words of the Cardinal:

"By raising the confidence of the people, by helping to set the stage for the exercise of their abilities . . . in education, in opportunities for employment and in the very critical area of personal safety . . . all the elements of a community can be brought together in rewarding relationships.

The people can exercise control to stem decay and to provide an environment for truly human living, to serve courageously in faith and love, to the realization of their full potential."

The moving comments of Cardinal Cooke can spur us to a new crusade . . . to give fresh hope and trust to our troubled world . . . and to our troubled city.

For New York can look forward to a future as sound and firm as that of the nation. The fate of both are interlocked.

While there is a United States, there will be a New York City . . . and I am equally certain that as long as there is a New York City, there will be a United States.

Our city and our nation share the same rugged, brave human spirit that moved the pioneers and the patriots who won America's freedom. That spirit still lives in our land—and in our cities.

I know it lives in my heart, as it did in the man for whom this Foundation was named—and I am sure it lives in yours.

But federal neglect of New York in its most desperate hours could cripple the economy of every state in the union. It could deal a fatal blow to the union itself. The shock would quickly cross the seas and shake the furthest domains of human existence.

It is hard to imagine the immense impact and influence of New York as an industrial center and the focus of every world activity . . . not because it is the seat of the United Nations, but because it is the dynamo generating all phases of human energy and interest.

The collapse of New York is unthinkable and certainly not imminent.

The basically workable and fundamentally sound civic structure of the city will survive.

Future civic leaders must take inventory of the fine minds available in the city's great colleges and universities. Let them study and analyze municipal trends and events with scholarly, unselfish and caretaking eyes. A more dynamic community could surely result from the enormous intellectual, cultural and human vitality that abounds in New York.

The time has come for all good men to come, not to the aid of the party, but to the aid of our city . . . as constantly vigilant guardians of the New York we love . . . The New York we known as a place to live and to make a living.

Despite the crime in our streets, and the grime in our air, despite the grim happenings and glaring headlines, we can still save our cities.

We can banish poverty and despair.

We can build a brave new world of high moral principle and spiritual values . . . if we put our minds to it and our hearts, our strength and our faith.

We can do it . . . if we want to . . . and God knows we need to . . . but we had better begin right now.

You and I have come through the best of times and the worst of times. Not all our yesterdays can be recalled with pride . . . but there is always a tomorrow . . . and the hope and quality of that tomorrow rest in our hands.

GOVERNMENT SUPPORT AND FUNDING FOR THE ARTS

Mr. KENNEDY. Mr. President, while interest in the arts among the American people continues to grow, adequate financial support is still far from sufficient. In that respect, I urge my colleagues to take note of two interesting articles from the Washington Post of November 20 regarding Government support and funding for the arts.

William Glover's article outlines recommendations recently adopted by the American Assembly forum, an agency of Columbia University. At the meeting, representatives from all branches of the cultural community met to discuss such issues as the future of the Nation's arts resources and the role of the arts in education. Their recommendations, which in essence represent the beginning of an arts constitution, include a declaration that "the arts are an integral part of the life of every human being and should constitute an essential part of his education at all levels."

In addition, I call to the attention of my colleagues, an article by Jo Ann Lewis on the Canadian Art Bank, an exciting Canadian Government experiment aimed at providing government support for the arts. The article outlines the fascinating and imaginative Canadian approach, which could serve as a useful model for a similar effort in our country. I urge all those who are interested in the Nation's cultural institutions to take note of this important experiment.

I ask unanimous consent that the two articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

A CONSTITUTION ON THE ARTS

(By William Glover)

HARRIMAN, N.Y.—Just like the moon, the stars and the robins that sing, America's performing arts belong to everyone, according to a high-level panel of experts.

But unlike nature's delights, symphony, opera, dance and drama are rarely free.

That puzzlement—and how best to solve it—was one of many topics keenly debated at a recent American Assembly forum on the future of professional artistic enterprise.

The AA is a Columbia University agency that periodically poses broad public concerns for discussion. The university's hilltop campus in Harriman, N.Y., was the locale for this first-ever gathering of ranking representatives from all branches of the culture community.

Included were directors, managers, performers, trustees, critics, foundations and government officials.

A 20-point consensus declaration was thrashed out in four days of discussions, leavened with such occasional asides as biblical citations and references to the World Series prowess of Reggie Jackson.

"You could call this the beginning of an arts constitution," one participant said of the final conference statement.

With its recommendations "designed to protect and encourage the health of the performing arts and reassure the American people as to the future of these important resources," came a warning:

"At this period in American history and in the growth of public appetities, the economic stability of nonprofit groups is subject to disruption or even disarray."

Pinpointing one of the conference's touchiest, recurrent concerns—that the arts are a minority interest—the declaration said:

"The arts are an integral part of the life of every human being and should constitute an essential part of his education at all levels . . .

"While each of the performing arts may appeal to a particular segment of the citizenry, taken together they appeal to a broad spectrum of the populace."

The assembly could be regarded as having political significance since it was held while a national administration of grass-roots philosophy is still working out its attitude toward the arts.

Participants included Mary Ann Tighe, arts adviser in Vice President Mondale's office, and the two previous chairmen of the National Endowment for the Arts, Roger L. Stevens and Nancy Hanks.

Advice for President Carter—who plans a White House arts forum next year—was by inference only. The 60 panelists, however, criticized a bill introduced in Congress by Sen. Abraham Ribicoff (D-Conn.).

The measure would absorb the autonomous National Endowments for the Arts and the Humanities into the Department of Health, Education and Welfare or a new Department of Education.

In a plenary session address, Rep. Frank Thompson Jr. (D-N.J.), who in 1965 sponsored the act creating the Endowments, said he hoped the agencies eventually could be independent of "the umbrella under which they were put for very pragmatic political reasons."

Thompson also took exception to pejorative description of the arts as "elitist" rather than "populist."

"They are crude code words," he said. "Elitism is support for creative excellence and activity. Populism really means growing participation of Americans in the arts. When understood in this way, there is no conflict between the words."

In group discussions, several panelists sardonically noted that with three home runs in one game, Yankee slugger Jackson qualified as an elitist.

Genesis 2:19, wherein Adam named the Earth's animals, was cited by another member to demonstrate the arbitrary meaning of words.

The conference's summary declared "the most important mission of the artist and the performing arts institution is the creation and presentation of works of highly professional quality." Their wide dissemination and accessibility were rated of secondary priority.

A sharply critical attitude was taken about the quality of education in the arts and special programs for young people. "Funding of arts in education," the report stressed, "is primarily the responsibility of the field of education."

Another focal conclusion concerned management of performing groups, with chief authority assigned to the artistic director. His goals "should dominate and motivate" the board of trustees and the business manager.

To keep the arts dynamic, the conference urged "development and use of new materials and techniques . . . accompanied by recognition of the importance of contemporary infusions into the repertory of the performance arts.

"Young persons with evident artistic talent should be provided with categorical support from all appropriate funding sources."

W. McNeil Lowry, former director of the performing arts program of the Ford Foundation and director of the assembly, now has the task of preparing a summary volume, "Performing Arts in American Society."

CASHING IN ON THE ART BANK—COME UP TO THE OFFICE AND SEE OUR GOVERNMENT-SPONSORED ETCHINGS

(By Jo Ann Lewis)

Over the past decade, the U.S. government, as a sign of its cultural maturity, has set out to devise a complex support system to help its artists survive, chiefly through grants—direct grants, indirect grants, matching grants and occasional commissions. Though millions have been spent in this way to support artists, very little federal money has been spent simply buying what they make—which is their art.

The Canadian government five years ago, however, began a fascinating experiment in simplicity: buying $5 million worth of work by the best contemporary Canadian artists, putting it into an Art Bank, and, for a modest fee, leasing the work out to federal agencies in need of paintings, sculpture, prints, drawings and photographs to enhance office spaces.

To make the idea even more appealing, and to make the whole thing possible, the treasury issued a directive stating that henceforth fees paid for art rented from the Art Bank would be a legitimate item in the budget alongside chairs and paperclips.

The point of setting up the Art Bank was not to decorate government offices, but to help support Canadian artists by purchasing their work, instead of doling out more grants. In its five-year existence, Art Bank has purchased more than 7,000 works by 900 different artists for its permanent collection, well-established names as well as lesser-known, conservatives and way-outs.

The project has also had important spin-offs for artists, both in the form of a growing number of provincial and city art banks being set up throughout Canada, and through exhibitions which travel across the country and the ocean, thereby advancing reputations and affording precious new exposure.

Art Bank, the first such government effort in the world on this scale, was the brainchild of artist Suzanne Rivard Le Moyne, who saw the need and possibilities for such a project when she was Visual Arts Officer of the Canada Council—rough equivalent of our National Endowment for the Arts. In 1972 Le Moyne convinced the Canadian government to appropriate, through the Canada Council, $5 million dollars for five years to get the Art Bank started.

A large, high-security warehouse complex on the outskirts of Ottawa was designed and fitted out so that works could be matted, framed and mounted on the spot, and then stored in pleasant, open, easy-access storage spaces which potential leasees could visit to make their selections. The idea caught on not only in Canada, but throughout the world, and officials from Australia, India,

Germany and even the United States have been checking out the Canadian prototype with an eye to setting up similar programs. The project has just been funded for five more years at the same level, $1 million per year.

Though only government offices are currently using the Art Bank facilities, they are mandated to deal also with provincial government offices, hospitals, schools and, on a test basis, private corporations. Limitations of staff, however have made this expansion impossible thus far. Art Bank has only 17 employees, including secretaries and technicians, and only three liaison officers who go out and sell the program to various agencies and help choose and install the art.

"Our only criteria is quality," said Chief Liaison Officer Lise Cohen, who was in town last week to hang a small show of 20 varied and high-quality graphics from the Art Bank Collection at the Canadian Embassy's newly inaugurated Art Gallery at 1746 Massachusetts Ave. NW. "Our only requirement is that the artists be citizens or landed immigrants."

"The selection procedure is simple, and so far it has worked extremely well," says Cohen. "Any artist or dealer can send us slides which are submitted every six weeks to a jury of three art experts, critics, curators, etc.—the jury changes each time—and these juries decide which artists might merit a studio visit. Disgruntled artists can resubmit to a new jury every six weeks.

"When several artists from the same region have been selected, a trip is made to their studios by the Art Bank director who then assembles an ad hoc jury of three more people on the spot, including himself, one local and one non-local artist. They select the works for purchase. The only limitation is that not more than $23,000 can be spent on one artist in any year."

Does the Art Bank get a discount? "Absolutely not," says Mrs. Cohen, "they pay the going rate and deal both through dealers and with artists." The acquisitions budget is still close to 75 per cent of the $1 million allocated, which also has to be used for overhead and salaries. "We try very hard to keep costs down," she says, adding that because of the small staff new clients are now having to wait several weeks before a liaison officer can meet with them, see their space and help them draw up a budget and make a selection.

The fee structure is simple: Leasing costs are 12 per cent per year of the purchase price of the work of art. A painting valued at $3,000 would rent for $360 per year. Framed drawings and graphics valued at less than $1,000 rent for a flat $25 annual fee. "We cannot do installations of less than $200," says Lise Cohen, "we simply haven't got the time." The fee includes everything, installation, insurance and even transportation. CBC/Radio, the Department of Health and Welfare and Transport Canada are among the many regular borrowers. Canadian museums, hard pressed for acquisition funds, are also allowed to borrow long-term from Art Bank, but without a fee. They pay only transport costs.

Since the Art Bank charges leasing fees, can it ever be self-sustaining, or even profit-making? "It seems unlikely at this time," says Cohen, "chiefly because as the demand grows, the overhead costs increase, and we don't want to raise the fees. We are, after all, a service, not a business." Income is going up, however. During the first five years of the program, an average of $100,000 per year was returned to Art Bank in fees. Last year income was up to $170,000, which Art Bank gets to keep.

At the moment, the majority of works in the Art Bank, close to two thirds, is framed works on paper, including drawings and several commissioned graphics editions, which range from conservative to way out. Unblinkingly, there are several nudes. "There is no censorship of any kind, only quality," reiterates Lise Cohen.

There are also some very large and bold paintings, some of which were borrowed from the Art Bank for the Hirshhorn's Canadian show last season. The warehouse is also filled with large abstract and very contemporary sculptures for both indoor and outdoor use. Most new public buildings in Canada, however, as in the United States, have commissioned art integrated into the original architectural plan. In Canada up to one per cent is allocated for such art-in-architecture programs. The U.S. General Services Administration program provides one half of one per cent. Canada, not incidentally, is the third largest per capita art spender in the world, after Sweden and West Germany.

The perfection of the Art Bank idea suggests its inevitability everywhere in this culture-conscious civilization, and it seems only a matter of time until the U.S. government sets up a similar project. The General Services Administration already has the idea under scrutiny, according to Administrator Jay Solomon. "It's chiefly a matter of selling the idea to Congress," he says.

The larger question may be who should ideally administer such a program. Is GSA too politically sensitive to insulate the purchase of art from congressional interference? On the other hand, should the National Endowment for the Arts be given yet more arts power? Or, do we need a new set-up, independent of, but administered by NEA, or GSA, corresponding to the Canadian plan?

With luck these questions will be answered scon, at which time the United States can join its imaginative neighbor to the north in the best kind of artist support system yet devised by man—buying art.

FOREIGN MILITARY SALES MISMANAGEMENT

Mr. CULVER. Mr. President, for several years the Congress has endeavored to bring our burgeoning foreign military sales under closer legislative scrutiny and policy restraint. We have considered setting hard and fast ceilings, but have written into law only a "sense of the Congress" declaration in the Arms Export Control Act of 1976 that "the aggregate value of defense articles and defense services—in any fiscal year should not exceed current levels."

President Jimmy Carter deserves great credit for establishing a new arms sales policy which promises that the dollar volume of U.S. weapons sales in 1978 will be less than in 1977. The President and his administration are to be commended for setting these important policy objectives and for initiating talks on international cooperation with our Western European allies and with the Soviet Union. But the successful implementation of this policy depends upon the President, the Congress and the public having credible figures on foreign arms sales with which to work. And our own Government must properly implement the unilateral aspects of the President's policy if it is to have the support of the American people and serve as an exemplary basis for internationally agreed restraint.

It has always been difficult to get reliable and timely facts and figures on foreign military sales. As late as September 2 of this year, four days before the end of the fiscal year, my staff was provided information by the Director of the Defense Security Assistance Agency (DSAA) that the value of recorded FMS agreements so far in fiscal year 1977 was $6.3 billion. Nevertheless, officials continued to predict that the fiscal year 1977 figure would ultimately total $9.9 billion—an estimate unchanged from mid-July. There was stiff resistance to the demand that the $1.2 billion sale of AWACS aircraft to Iran be counted in fiscal year 1978, as the law and current regulations would otherwise have dictated. Reportedly, some elements in the bureaucracy did not want to be restrained by the much lower sales ceiling which would follow from counting AWACS in 1978.

Now, suddenly, the DSAA "discovers" that it had underestimated the fiscal year 1977 arms sales by $1.4 billion, thus raising the total to $11.3 billion.

The new estimate came as a result of a belated recalculation of sales figures under new accounting procedures for sales made as amendments to previously concluded agreements. Under the old system, such sales have been added to the totals for the year of the original agreement. Under the new policy, such additional sales will be included in totals for the years in which they actually are made.

This is an appropriate change in the foreign military sales accounting system, which should give us a more accurate picture of current sales, but it is also a change directed by President Ford on November 4, 1976.

Even though constructive changes in accounting procedures were ordered in 1976, there was an inexplicable time lag of an entire year in carrying them out. This is the kind of bureaucratic blunder that undermines the confidence of the American public and foreign governments in our national policies. The bulk of the sales which are now properly counted in fiscal year 1977 occurred before Jimmy Carter's inauguration. Moreover, construction contracts in Saudi Arabia are the largest single bloc of retabulated sales, and this is not the first time that such projects were added to a previously announced sales total.

The long delay in counting these sales in fiscal year 1977, and the consequent misleading of the Congress and the executive branch as to the actual level of sales, indicate serious mismanagement on the part of the Defense Security Assistance Agency. By a bureaucratic mistake of this size, DSAA has undermined the credibility of the President's pledge to reduce arms sales next year.

Since both the Congress and the executive branch relied on the lower figures in policy discussions in recent months, none of the $1.4 billion increase should be counted by the administration in determining next year's ceiling on weapons sales.

Mr. President, this example of delayed implementation of a clear Presidential directive raises other questions about the organization and role of the Defense Security Assistance Agency. DSAA was established in 1971 to implement approved military assistance programs and foreign military sales—"to direct, administer, and supervise, within the policies estab-

lished by the Assistant Secretary of Defense for International Security Affairs, approved Security Assistance plans and programs." DSAA was to provide centralized management for "nuts and bolts" arrangements and problems and remove these administration burdens from ISA's policy responsibilities. In theory, DSAA's function is policy implementation, but in practice it has come to play a major role in policy formulation.

An important reason for DSAA's undue influence in arms sales policymaking is that the DSAA Director also has been designated the Deputy Assistant Secretary of International Security Affairs for Security Assistance. The same officials are responsible for security assistance plans and requirements in both DSAA and ISA. This combination of nuts and bolts administration and a policy review role can give DSAA considerable operational control over the Defense Department's foreign sales activities.

Thus, under the present arrangement, personnel in top positions at the Defense Security Assistance Agency wear two hats, in that they administer and promote arms sales and at the same time they are involved in policy determinations on the wisdom of particular sales. This is a conflict of interest that should be speedily corrected. The Secretary of Defense should remove DSAA officials from ISA's policy review process and establish a separate civilian Security Assistance office under the Assistant Secretary for International Security Affairs.

We badly need an independent Defense Department review of arms sales proposals. The record to date indicates to me that important policy questions, such as the security of advanced U.S. technology, the capacity of developing nations to absorb and utilize sophisticated U.S. weapons systems without large-scale and long-term American technical assistance, and the arms control implications of major sales, have not been given adequate critical attention within the Department of Defense. For example, earlier this year, when 21 Senators asked for a thorough study of these questions in connection with the proposed sale of AWACS aircraft to Iran, DSAA prepared a technical "DOD Analysis of Alternative Systems for Iranian Air Defense" that rejustified the AWACS sale but did not address these important policy issues.

Under the premises of the President's new policy, arms sales are to be an exceptional foreign policy implement, to be used only when it can be clearly demonstrated that the transfer contributes to our national security interests; and the burden of persuasion is to be on those who favor a particular sale. This policy requires that the Defense Department conduct its own independent and critical review of arms sales policy questions, separate and distinct from the program managers and sales promoters in DSAA and the various Services.

The Congress recently authorized the establishment of a new Under Secretary of Defense for Policy, and I understand that responsibility for the Office of International Security Affairs will be given to the Under Secretary for Policy. Reorganization to accommodate this new position is a favorable time for the Secretary of Defense to set up a distinct, civilian Defense Department mechanism for policy review of arms sales proposals. This would eliminate any possible conflict of interest and coiceivably avoid the recurrence of any more $1.4 billion mistakes.

TAKING EXCEPTION TO THE ERA

Mr. HATCH. Mr. President, on November 21, 1977, a column appeared in the Washington Post taking exception to previous reports on the activities of women of the Mormon Church and the equal rights amendment. Mrs. Eleanor Ricks Colton, president of the Washington Stake (diocese) Mormon Relief Society, has eloquently addressed this controversial topic. In light of the outcome of the International Women's Year Conference held in Houston, Tex., last week, I would like to bring this timely article to the attention of my colleagues.

I ask unanimous consent that this column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Nov. 21, 1977]

A MORMON WOMAN LOOKS AT THE ERA

(By Eleanor Ricks Colton)

With the drive to pass the Equal Rights Amendment stalled at 35 states—three short of the necessary 38—leading proponents of ERA are looking for scapegoats. A favorite target is the Church of Jesus Christ of Latter-Day Saints, the Mormons.

On Oct. 26, for example, Bella Abzug, in a Washington press conference, accused the Mormons of being among several "subversive" groups planning to "disrupt" the National Women's Conference in Houston.

The labeling by conference leaders of those who disagree with them as "subversive" is reminiscent of the McCarthy era. It was Voltaire who said, "I disapprove of what you say, but I will defend to the death your right to say it." That is the spirit that should prevail in a democracy—something that former Rep. Abzug should have no trouble appreciating.

It appears that what Abzug is really fearful of is not disruption but democracy.

Contrary to some reports—including Ellen Goodman's column in The Post on Nov. 7—there has been no organized effort sponsored by the Mormon church to defeat ERA. We have been instructed not to use church buildings either to promote or discourage political points of view. Individual members are expected to make their own decisions and determine their own degree of involvement in ERA and all other political and social issues.

Goodman charged that the church had "bussed 12,000 women to the state conference" in Utah. This is untrue. I have carefully double-checked with Mormon officials at church headquarters in Salt Lake City, who confirm that, while encouraging women to attend the conference, the church did not sponsor or pay for their transportation. Costs were left to the women themselves. They also were not instructed on how to vote, and indeed a minority of them voted for ERA, as was their obvious right.

There is no effort being made by the Mormon church to disrupt the conference in Houston. The church's membership includes individuals holding many different viewpoints, and it is unworthy of the conference's leaders to suggest that our church is a threat to the conference simply because its official position differs from theirs.

The church is not against women's rights. Utah women received the right to vote in 1870—50 years before the country at large.

The Relief Society, the women's organization of the church, was established in 1842 and is one of the oldest women's organizations in the United States. Its goals are strengthening motherhood and broadening women's learning, development and involvement in religious, compassionate, educational and community pursuits.

The leaders of the Mormon church, in a statement dated Oct. 22, 1976, said they felt there were better means to achieving rights for women than by this amendment. Their main concern was the adverse effect it could have on the family.

I resent being told I am against women's rights if I'm not for ERA. I am *for* women's rights. I am *for* correcting inequities.

My mother was widowed in the middle of the Depression and had to work night and day to rear five children. It is wrong for women not to receive equal pay for equal work. My daughter is planning on entering law school next year. I rejoice over the options that are open for her, and give due credit to those women who have worked constructively to guarantee such opportunities.

There has been a steady stream of legislation and judicial decisions to improve the legal status of women during the past 10 years. Enough, I feel, to prove that we can continue to make progress without locking ourselves into an amendment so vague even constitutional lawyers can't predict its consequences; so controversial that the only real guarantee we are given is that it will spawn endless litigation and vest the courts with a dangerous potential for policy-making. We can better correct inequities with specific legislation.

If we could put half the energy that's being expended on ERA into the enforcement of existing laws, women would be much better off.

Many who have worked long and hard for ERA hold it as a symbol for equal rights. What they refuse to see is that the symbol has been tarnished. To thousands of women, it is a symbol of divisiveness and polarization; instead of uniting us. it is tearing our country apart.

It is tragic that the attitude of the conference leaders has not been "come let us reason together"—but "come let us pass the goals that the International Women's Year commission feels women need." Whenever any group of people, whatever their political views, feel they are being outmaneuvered by an articulate minority, they naturally react.

When two such inflammatory issues as abortion and ERA were established as major goals of the commission—which was funded by $5 million of taxpayer money—citizens who value the sanctity of life or who feel there is a better and safer route than ERA to equal rights for women understandably were upset. Given these circumstances, how could IWY's leaders have expected all peace and love as they rolled toward Houston?

It is true that some of us are unhappy that $5 million of our tax money is going to rubber stamp many proposals with which we cannot agree. But few Mormons have earned the vindictiveness and label of "subversive radicals" showered on them by those claiming "the conference will be an opportunity for every point of view to be expressed."

COMMENDATION FOR THE NAVY AND AIR FORCE

Mr. PROXMIRE. Mr. President, on October 5, I asked the Secretary of the Navy and the Secretary of the Air Force to guard against high ranking officers using Government aircraft to fly into the Washington, D.C. area for the annual

Navy/Air Force football game. I made this request in advance of the game to head off misuse of Government aircraft which had occurred in prior years under similar circumstances.

The two service Secretaries have now responded to my letter and I am pleased to report that both the Navy and Air Force have relatively good records for this event. With one exception, there were no high ranking officers reported to have attended the game via free Government transportation. Aircraft were met as they landed to check on the plans of the passengers. In no case was any specific flight authorized for the purpose of transporting officials to the game.

Given this good record, I am happy to commend both services and both service Secretaries for their good judgment and concern over the proper use of tax dollars.

There is one exception to this pattern. Under a special Defense Department policy for football at the service academies, 536 cadets, faculty members and staff of the Air Force Academy, were flown to the game at a cost of $92,518. The Air Force states that this expenditure was approved only:

On condition that their movement be accommodated within the military airlift command training program, that training hours not be increased for this purpose, that the flights in fact provide valid training, do not increase the rates charged for industrial fund airlift services, and that MAC have ample fuel for its approved flying hour program.

Transportation of cadets and midshipmen to several football games a year is traditional policy for the Pentagon which claims that there is no additional charge to the taxpayer since the training flight would have occurred in any event.

Mr. President, I ask unanimous consent that the correspondence with the Air Force and Navy be printed in the RECORD.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE AIR FORCE,
Washington, D.C., October 19, 1977.

DEAR SENATOR PROXMIRE: Thank you for your October 5 letter to the Secretary of the Air Force concerning travel to the October 8 Air Force Academy game.

The use of transportation at taxpayers' expense by Air Force personnel attending this year's football game at Annapolis was carefully limited to those whose attendance was considered to be officially required. Only selected cadets, faculty advisors, and key staff of the Academy, in that status, used military aircraft to attend the game. A specific list of names and the official groups, numbers of aircraft and a cost breakdown, which responds to your specific questions, is attached.

The Department of Defense recognizes the importance of athletic contests among the service academies and has instituted a special policy for football. The airlift of cadets for interservice academy games is approved on condition that their movement be accommodated within the Military Airlift Command (MAC) training program, that training hours not be increased for this purpose, that the flights in fact provide valid training, do not increase the rates charged for industrial fund airlift services, and that MAC have ample fuel for its approved flying hour program. In the case of the game on October 8, these conditions were fully met.

The presence of the 536 cadets, their faculty advisors, and key staff at the Navy game enhanced morale and esprit de corps, provided the cadets visibility in the area as an aid to the Air Force recruiting effort, and contributed directly to the kindred spirit of friendly rivalry shared by the Naval Academy and Air Force Academy.

In addition to the above traffic, we monitored all military aircraft that landed at Andrews and other civilian and military airfields in the area, and all government-paid commercial transportation into the Washington area during the period of October 6 through 8. We found that all visits were for official business; we called the office of each high-ranking military and civilian and found that none remained to attend the game.

If I can be of further service to you in this or any other matter, please do not hesitate to contact me.

Sincerely,

CHARLES C. BLANTON,
Major General, USAF.

LIST OF PERSONS ATTENDING THE AIR FORCE AT NAVY FOOTBALL GAME, OCTOBER 8, 1977, WHO TRAVELED AT GOVERNMENT EXPENSE

Name/group, date of travel, type aircraft, and remarks.

Lt. Gen. Kenneth L. Tallman, Superintendent, USAF Academy, October 4,* CT-39.

7 officers, 2 NCO's, 4 cadets, October 5, USN C-9,** advance party from USAFA.

1 officer and 3 cadets, October 6, CT-39, advance party from USAFA.

7 officers, 6 NCO's, 475 cadets, midshipmen, October 7, 4 each C-141's, cadet color, guard, 100 man drum and bugle corps, Falcon handlers, et cetera.

Brig. Gen. Wm. T. Woodyard, 2 officers, October 7, CT-39, dean of faculty.

*Lt. Gen. Tallman traveled early to provide testimony to congressional committee.

**Navy C-9 not scheduled for AF cadet transportation. Arrived in Colorado on "Educator Visit Program" with room for 13 members of USAFA advance party. Use of opportune C-9 avoided more costly alternate plans. In addition to arranging AF cadet support, advance party visited 20 D.C. high schools in recruiting effort.

COST OF ABOVE TRANSPORTATION ARRANGEMENTS

C-141s, total of 58.5 flying hours at $1,331 per hour	$77,864
CT-39s, total of 26 flying hours at $317 per hour	8,242
C-9, total of 6.5 flying hours at $844 per hour	5,486
Vehicle support October 5-9	926
Total cost	92,518

Breakdown of flying hour costs

	C-141	CT-39	C-9
Fuel/Oil	$876	$141	$460
Depot maint. (variable)	121	62	148
Supplies	106	21	---
Per diem	29	20	4
Civ. pay	68	13	27
Depot maint. (fixed)	98	37	186
Other	33	23	19
Total	1,331	317	844

DEPARTMENT OF THE NAVY,
Washington, D.C., October 25, 1977.

The Honorable WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: This is in response to your letter of October 5th requesting information concerning the use of government transportation in connection with attendance at the Navy/Air Force game at Annapolis on October 8th.

Each aircraft which landed at the Naval Air Facility, Washington, D.C. on October 7th and 8th was met by the Command Duty Officer. Interviews with the flight crews and passengers indicated that none of the persons embarked would attend the football game. The specific flight assessment is detailed as follows: Of the eighteen planes that landed during the two day period, five aircraft debarked Washington-based personnel. Eleven aircraft departed before the game leaving no passengers in the D.C. area. One aircraft stopped only to refuel, and one aircraft remained overnight. The one transit aircraft remaining overnight, and the only transit aircraft that could have had passengers go to the game, was a T-39 from VT-86 in Pensacola on a student naval flight officer training flight. The crew members, Capt. Graham, USMC, and Lt. Stefen, USN, were housed in the bachelor officers quarters at NAF Andrews. Neither they nor any other transit personnel who debarked intended to attend the game.

This survey included military aircraft only. No attempt was made to monitor people traveling to the Washington area on temporary additional duty or permanent change of station orders using commercial carrier.

I trust this information is appropriate and satisfies your inquiry.

Sincerely,

W. GRAHAM CLAYTOR, JR.,
Secretary of the Navy.

USE OF THE ARTS IN THERAPY FOR CREATIVE RESOLUTION OF PROBLEMATIC BEHAVIORS

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from New York (Mr. JAVITS) and the statement attached thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR JAVITS

The New England Council of Creative Therapies, Inc., held its fifth annual conference November 5-6 in Durham, New Hampshire. The objective of this conference was to increase awareness of the diverse uses of expressive therapies in meeting the needs of our society. In accord with my longstanding commitment to the arts, I commend this organization for its valuable use of the arts in therapy as a means for creative resolution of problematic behaviors. I would like to call to the attention of my distinguished colleagues a very interesting and perceptive statement made by Ms. Connie Naitove, who is the President of the New England Council of Creative Therapies.

STATEMENT BY MS. CONNIE NAITOVE

The arts are both a human right and an essential component of education, physical and mental health. That the arts may be a means for ameliorating a broad spectrum of social problems is not a new concept. Historically the importance of the expressive arts to the earliest human cultures is evidenced in the multitudinous cave drawings and artifacts. Anthropologists, among others, also assure us that dance and drama, which most certainly were accompanied by sounds, rhythms and music, were also amongst the first cultural expressions. Developing societies regarded training in various arts to be essential to their survival. These overt demonstrations of emotions and basic needs as well as the celebrations of events, which might otherwise have been eternally locked inside the individuals or lost along with a particular culture, objectified these feelings,

needs and attitudes and constitute the essential body of information on social development available. Indeed, it has been said that all that remains of man is his art.

The arts have been used throughout history to educate and influence society as well as to compensate its members for the burdens imposed upon them by nature and governments. Social and religious decrees against arts practices have altered the forms of expression but have never successfully eliminated them. Rather, as history reveals, the creative arts became basic forms of communication unifying and providing the populous an opportunity to vent opinions.

In these times of "communications gaps" between individuals, generations, societies and nations, the arts have been relegated to a position of minor impcrtance. While artists and therapists, educators and physicians recognize the potentials of the arts to meet some of the educational and therapeutic needs of society and are applying their knowledge and experience to remediate certain social and educational problems, governments persist in a narrow perspective which ignores this body of information.

We recognize the historical value of the arts as providing essential records of man's existence, his struggles, and the common bond we share with all humanity; in that sense we regard the arts as a communication media. We have established museums and theatres to provide a sort of cultural warehouse to preserve those records of human progress and development. In the cause of eulogizing the arts and enshrining them, they have, in effect, been removed from personal attainment. Their importance to the individual has been subordinated to a general concept of edification.

Because of this historic and aesthetic focus on the arts, their academic application has been largely passive and inhibiting rather than participatory and creative. We have lost sight of the basic qualities of the arts as a mode of communication, as an enhancement of learning skills, as a socially acceptable mode of emotional release and as a means for gaining personal satisfaction through expression. Perceiving these personal values as inherent in the arts, painters, sculptors, dancers, pcets and dramatists have come to believe that somewhere within the creative process lies the key to providing a life of quality. Many of these innovative individuals have proceeded to develop therapeutic disciplines which are currently finding acceptance in the areas of education, rehabilitation, recreation, psychotherapy and personal growth development.

It is natural that these valuable skills should thrive in the more advanced metropolitan areas and in institutions of higher learning, but unfortunately they are not broadly recognized or understcod. Surveys conducted in various rural and metropolitan sections of the country by organizations in the arts and therapeutic disciplines reveal that the public has an overwhelming interest in developing its creative potential. Yet federal support in the forms of recognition and funds has been meager at best. Awareness of the established values and potential application of the arts therapies must be more fully disseminated.

Creative expression through the arts is a viable educational and therapeutic tool because of the innate flexibility of the arts to affirm the individual's sense of efficacy. It provides a visible, audible and tangible link between the student and the teacher as well as the distressed individual and the therapeutic team. The arts provide a means to objectify skills and emotions. The individual is encouraged to focus on the process of creating rather than the aesthetics of the product. This concept has a broader application to problem-solving; the essential issue is what the individual learns about himself and his own mode of learning through the use of art forms.

By avoiding the element of aesthetics in these therapies, the stigma of failure is removed. The issues of talent and skill, which frustrate so many of us, are avoided, and hesitancy and inhibition are readily overcome in both child and adult. Further, as an individual becomes cognizant of his own repertoire of creative arts expressions, he gains a sense of identity. The awareness of individual identity and efficacy can lead to a confidence necessary to cope with areas where risk of failure has been a deterent. This provides the confidence necessary for greater social participation and the strengthening of our entire cultural fiber. Thus, the joy of being creative becomes one of many cultural benefits to be derived from artistic expression.

Just as there are numerous modes of expression, there are several educational and therapeutic approaches being practiced by these highly skilled therapists, utilizing all possible techniques for assisting individuals and groups to lead more active and fulfilling lives. By focusing on self-expression and communication, the arts process transcends limitations and differences between people.

Art, dance/movement, music and mime comprise the non-verbal arts therapies. The correlations between these arts and emotional release or catharsis has been drawn continuously from Plato through Jung into the contemporary literature on art and psychology. Rather than being relegated exclusively to the remediation of emotional outbursts, these disciplines offer a socially acceptable alternative to the expression of anger, frustration and violence. Statistics have shown that high percentages (75–80% or better) of those incarcerated in penal and correctional institutions suffer from learning disabilities, poor coordination and a poor self-image. Dance, art and mime therapies increase self-awareness and coordination, and enhance learning skills as well as verbal communication. They clarify symbolic and body language and evident discrepancies in behavior. They deal with our responses to stimui and increase our sensory awareness.

Since we cannot escape our bodies or our perceptions, and because we are born with the rhythms of heart and lung, these disciplines restore an awareness of these functions and behaviors. The arts provide an opportunity for verification as well as expression or perceptions not otherwise available to the disturbed or handicapped. They are healthful, motivating and satisfying activities for young and elderly alike. They afford the creator a sense of control as well as providing a record of his progress.

The verbal therapies of drama and poetry are also process-oriented. They offer an opportunity to explore real-life situations in a safe, protected, constructive environment. They provide an opportunity to explore potentially threatening situations either by direct confrontation, as in psychodrama, or indirectly, as in other forms of creative drama. Poetry restores the joy inherent in the sound and meaning of language and teaches us that sound is meant to be listened to. It frees verbal expression and clarifies it; it restores the "me" in meaning.

This process-oriented approach to the arts belongs in education, rehabilitation, psychotherapy and recreation because it enhances self-awareness, provides an opportunity to objectify feelings in a socially acceptable manner, enhances the individual sense of efficacy and identity in an era of Future Shock, and augments and clarifies communication. It has been applied successfully in a variety of social settings and with a variety of populations but has not been adequately applied to our national needs.

The argument for applying the arts in this educational and therapeutic manner is direct and simple: over and over, educators and therapists have told us that the more ways a new form of learning is synthesized, the more complete is the understanding; the more complete the understanding, the greater the sense of self-assurance. The more assured the individual, the more willing and able he is to apply that learning. A process-oriented application of the arts in education can enhance the production of creative solutions to societal issues. A process-oriented application of the arts in therapy can enhance the creative resolution of problematic behaviors and the ability to cope creatively in sensitive areas of social encounter.

Everyone has the right to be creative, everyone has the right to artistic expression. Thus, we must recognize and advance the role of the arts as therapy.

TRIBUTES TO MARY CALDWELL, CURATOR, HISTORICAL SOCIETY MUSEUM IN NEW CASTLE, IND.

Mr. LUGAR. Mr. President, Mary Caldwell recently retired as curator of the Historical Society Museum in New Castle, Ind.

Mrs. Caldwell is a delightful person who has dedicated herself to the preservation of Indiana heritage.

She was honored recently at the 90th semiannual meeting of the Henry County Historical Society, and received heartfelt tributes to her years of service. I ask unanimous consent that portions of these tributes be printed in the RECORD.

There being no objection, the tributes were ordered to be printed in the RECORD, as follows:

Mr. Richard P. Ratcliff, Society Trustee:

Mary Caldwell was born Oct. 11, 1891 in Decatur County, a daughter of Chester and Leona King. In 1908 she was graduated from Sandusky High School. In 1909 she came to New Castle and took a job as a clerk in the Burgess China Store on Broad Street, where she remained for one and one-half years.

In 1910 she became deputy county recorder and held this position until she was appointed county recorder in 1921. In 1922 she was elected Henry County Recorder and was reelected in 1926. Mary was the first woman in Henry County and probably the first in Indiana to hold public office.

From the close of 1930 to 1934 she was elected county auditor, a position to which she was reelected in 1938, serving until 1943. Her elective political career ended in 1943 although she did serve for three and a half years in the early 1940's as the manager of the New Castle License Bureau and again for one and a half years in the early 1950's.

In 1911 she married Fred Caldwell. To this union were born two children: Dorothy Ellen, a school psychologist now residing in New Haven, Connecticut; and Charles, who resides in Leucadia, California, and is engaged in a transfer business. Mary has three granddaughters and two grandsons. Her husband, Fred, died April 2, 1929, leaving Mary the responsibility of raising two small children.

In 1965 Mary Caldwell was appointed curator of the historical society museum by the Henry County Commissioners and remained in that position until just a month ago.

Mary was and is a walking encyclopedia. There is virtually nothing she cannot tell you about Henry County and its residents. And while her knowledge simply overpowers many of us when we are discussing our county with her, we soon remember that we

are talking with a woman who first served the public 67 years ago. She knew personally those men and women who put New Castle and Henry County on the map.

Let me go on record tonight and say that I idolize Mary Caldwell. She is an excellent example of what a woman of advanced years ought to be.

Mary Caldwell is a beautiful example of someone who has stayed young despite advancing years. Oh, that we could all grow old as gracefully as this dear lady.

Mary, I have attempted to bring those assembled in your honor tonight a few highlights of your illustrious life.

You have been an inspiration and an example for so many of us. May God richly bless you in the days ahead.

And, another tribute by Mrs. Lee Kern:

You have just heard a listing of the many elections won and services performed in this community by our guest of honor. She reached her pinnacle of prestige because she was intelligent, capable, efficient and presentable.

Aside from her basic courtesy and her tremendous fund of historic lore, Mary Caldwell never neglected the business side of being curator of the Museum. She already knew about keeping records and financial accounting details with the Court House.

In 1971 I had the opportunity to nominate Mary Caldwell for the BPW Citizen of the Year Civic Award. She was an easy winner and accepted that honor with her usual grace and poise.

Just think how many hundreds of visitors to the museum have been welcomed by this gracious lady who made a tour of the museum seem like a pleasant visit with a genial hostess as well as an educational experience.

And so, with apologies to the songwriter back the road a piece, I want to para-phrase: "She walks like a lady walks; she talks like a lady talks—And her words: they are wisdom's pearls—To my mind, she's my kind of girl!"

Mary, you always have been, and always will be—Our Kind of Girl!

STANDARDS FOR RURAL HOSPITALS IN IOWA

Mr. CULVER. Mr. President, in the past few weeks, the proposed National Guidelines for Health Planning published in the September 23 Federal Register setting a national standard of four general hospital beds for each 1,000 persons and requiring an average occupancy rate of 80 percent have encountered great opposition in Iowa, as well as many other rural States.

The action taken by the Department of Health, Education, and Welfare to reduce the number of unnecessary hospital beds is a part of a continuing effort to curb the rapidly rising costs of medical care.

While I believe everyone agrees there is a need to eliminate wasted hospital space and reduce health care costs, there is a legitimate concern from Iowans that this approach to eliminating excess hospital beds will have serious, detrimental effects upon hundreds of small rural community hospitals not only in Iowa, but throughout the Nation. I do not think the goal of lowering medical costs should be, or even can be, accomplished at the expense of small, rural community hospitals.

Mr. President, access to health care in rural communities is a special situation. Rural hospitals do not and cannot operate under the same conditions as large metropolitan hospitals and therefore should not be expected to meet the same requirements and still maintain high quality, accessible health care. In Iowa, for example, the bed ratio should reflect the State's high proportion of elderly persons living in nonmetropolitan areas, the lack of mobility of these people, and the chronic physician shortage.

I have received hundreds of letters from concerned Iowans who, with good reason, fear that these proposed regulations will force the closing of many desperately needed community hospitals. Numerous newspaper items have also appeared protesting the proposed guidelines. I believe that an editorial from the Des Moines Register exemplifies the heartfelt concern for the survival of essential rural hospitals. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

STANDARDS FOR HOSPITALS

The furor over proposed federal hopsital standards could develop into a tug of war between state health agencies and the Department of Health, Education and Welfare (HEW).

The HEW proposals call for a base ratio of four beds per 1,000 population and an average occupancy rate of 80 per cent. The proposals set guidelines for maintaining certain services, such as obstetrical units with at least 500 births a year.

The Iowa Health Systems Agency (HSA) has countered with a "target" of 4.6 beds per 1,000 and an average occupancy rate of 77.4 per cent. John Ross, HSA executive director, said he fears that "the federal guidelines will be cast in concrete without any input being recognized from the HSA."

The HSA and similar review panels throughout the country were set up to assure that the health needs of different areas would not be overlooked in carrying out federal health policies. Whether that objective is being downplayed by the Carter administration is not clear.

Conditions vary. Iowa has a large rural population and a high proportion of elderly people. The proposed HEW rules might be reasonable for some areas but not for others.

Public involvement in deciding important health policies is guaranteed by the review procedures of the HSA and its local and area advisory committees. That kind of involvement, drawing on an understanding of how the policies would affect certain areas, would be nullified by rule-making by HEW officials that ignores local conditions.

Iowa health facilities need revamping to satisfy changes in modern medical treatment as well as the federal demand to reduce costly waste. Some Iowa hospitals should be closed. Others should be limited to certain types of services. Still others should be converted to other uses. Those decisions should come from an understanding of what kind of health services Iowans need, rather than a fixed standard set in Washington.

CAREER EDUCATION INCENTIVE ACT

Mr. SCHWEIKER. Mr. President, last Tuesday, November 22, 1977, the Senate unanimously passed the conference report on H.R. 7, the Career Education Incentive Act. As a cosponsor of this important legislation, I was particularly pleased that both Houses of Congress acted so quickly during the first session of the 95th Congress to ensure passage.

I have long been concerned over the lack of contact that students have with the world of work and the community around them while they are in school. Many cannot see a reason for staying in school. They cannot understand the relationship between the things they learn in school and the skills they will need to pursue a career when they leave school. Many times, a student's first work experience allows him greater insight into school and encourages his active participation in directing his education. Today, we are seeing a large proportion of our college students attending school partime or after working for a number of years. These students have a clear notion of the value of a good education and they appreciate their schooling because they know what it will mean in other areas of their lives. I feel that the Career Education Incentive Act will enable the States and local schools to develop programs which will give students a renewed persepctive on their schooling.

This legislation utilizes a method of funding which is particularly apt for this type of educational program. The Federal Government will fund model projects and provide technical assistance to the States and schools. States and local educational agencies will have Federal start-up money to begin implementation of their projects—eventually, career education programs will be completely integrated into the curricula of the local schools, and Federal involvement for anything other than special projects will end. It is important for the focus of the beneficiaries of these funds which will be available for the next 5 years, to turn inward.

This brings out another strength of this legislation—its emphasis on the role of the community and community-based organizations in establishing educational policy and programs. Our communities have a great number of resources, and the schools should be encouraged to develop contacts with community members. Too often they look to the State and Federal Government to supply answers, or expertise in different areas, when there is a great wealth of experience and knowledge around them.

In our own State of Pennsylvania, I was pleased that an organization which has served our Nation well in the field of youth training and employment, had developed a very successful career intern program (CIP) for use in large urban schools with poor minority populations. The Opportunities Industrialization Centers, Inc., a private, community-based organization with members from all walks of life, has demonstrated great leadership and creativity in its development of CIP. Very often, it is the poor minority student with which this organization works, who is at the most severe disadvantage in terms of career education or expectations.

Many of these students see no reason to continue their schooling or even plan for a career in the future. They are surrounded in many cases by poverty and unemployment, and without some help

will be caught in the circle of poverty for the rest of their lives. A career awareness and education program can give these students a chance to organize their lives with information and experience that would otherwise be impossible for them to obtain.

The Human Resources Committee cited this project in the committee report to the Career Education Implementation Act, saying:

. . . the Committee was impressed with recently released results on the Career Intern Program (CIP) funded by the National Institute of Education for the past 3 years as a model project. CIP, developed by the Opportunities Industrialization Corp., established a career education and awareness program in a Philadelphia high school in which a majority of the students chosen to participate came from low-income families and had experienced serious academic problems. After 2 years, 67 percent of the CIP students were either graduated or were attending schools. Only 13 percent of the Control group were in school or graduated. Projects such as CIP which involved cooperation between a community-based organization and a local educational agency should be used as models and encouraged for development by local, State and Federal Governments.

I hope that increasingly this type of community participation and involvement will grow in the field of education. The Career Education Incentive Act is an important first step in this direction, and will go a long way in improving the quality of education in our schools.

CONVERSION OF OIL AND NATURAL GAS TO COAL CRITICAL ENERGY NEED

Mr. RANDOLPH. Mr. President, conversion of existing fuel consumption from oil and natural gas to coal is of crucial importance to solving the Nation's energy problem. On October 28, 1977, during debate on the tax portion of the energy bill, the knowledgeable Senator from South Carolina (Mr. HOLLINGS), based on a Congressional Budget Office estimate, stated that the Senate's proposed coal conversion program was defective. He indicated it represented a 50-percent "windfall" to industries and utilities which would have converted without the Senate's tax credit program.

Senator HOLLINGS' comment was challenged by me, only briefly at that time. I felt it deserved a more thorough analysis. If the able Senator's data was determined to be incorrect, it would be necessary to alter any mistaken impressions which might have been created. In the interim since October 28, a more complete examination has been conducted by the diligent Senator from Kentucky (Mr. FORD) who is an effective advocate and supporter for coal development programs. The results indicate that the CBO estimate is questionable due to the specific aspects of the information base which was employed.

I ask unanimous consent on behalf of Senator FORD and myself that the analysis of the Congressional Budget Office's study, including pertinent correspondence, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RESPONSE TO THE CONGRESSIONAL BUDGET OFFICE'S 50-PERCENT WINDFALL ESTIMATE FOR COAL CONVERSION

One of the difficulties of working in the United States Senate is that there is so little time to take a second look at our debates on the floor. On Friday, October 28, an exchange on the floor between Senator Hollings and Senator Randolph, prompted us to examine at length the issue being debated. Our motivation was clear. The debate covered an issue which is the linchpin of the entire national energy policy. We are, of course, referring to the conversion of industrial and utility fuels from oil and natural gas to coal. Without this conversion, the remainder of our legislative deliberations are meaningless. Without this conversion, and the concomitant savings of oil and natural gas, the American way of life and all that goes with it is impossible.

The positions in the October 28 debate were clear. Senator Hollings was opposed to tax credits as a means of encouraging energy savings through coal conversion. He maintained that the credit would go primarily to industries and utilities who would convert to coal even without the tax credit. To support his contention, Senator Hollings produced a letter from Congressional Budget Office Director, Dr. Alice Rivlin to Senator Muskie and the Senate Budget Committee, dated October 26. That letter stated that fully 50 percent of the coal conversion tax credit program would be a "windfall" because those units would have converted to coal without the incentive.

Senator Randolph was not convinced by Senator Hollings or the CBO letter. Senator Randolph cited the extreme reluctance of firms to convert in the past and noted particularly that "electric companies, the utilities of this country, and other units of power generation," had resisted strongly the move to coal even in the face of Congressional mandates. He concluded by establishing the fact that due to the inadequacy of the 1975 coal conversion legislation, the Congress found itself again in conference with a new coal conversion bill. With such a disappointing performance record, Senator Randolph believed the CBO's 50-percent windfall figure must be without merit.

The positions were clear on that Friday. Two colleagues, each trying to produce the fairest solution to the Nation's energy dilemma. Senator Hollings' position, in the form of Senator Magnuson's unprinted amendment number 1000 would have cut some $15 billion in tax refunds from the Senate's energy tax package. After extended floor debate, Senator Long moved to table the amendment. The tabling motion succeeded. However, we resolved then to examine this question further because the viability of any energy policy relies upon a successful conversion program.

Nine days have passed since the October 28 debate. Based upon a thorough examination of this issue, we are now prepared to say the CBO estimate of 50-percent windfall is inaccurate. This error and the impression it conveys must be corrected before the Senate completes the conference on coal conversion or begins the conference on the tax portion of the national energy policy. Following is a partial explanation of why the 50-percent figure is incorrect.

1. The CBO estimate is based upon information from a model known as PIES (Project Independence Evaluation System). That model, designed specifically for estimating on energy matters, is relatively good for some estimates, but it is reputed to be ineffective for estimates vis a vis coal.

After identifying the deficiency, the Office of Energy Policy and Planning, in the Executive Office of the President, developed a new model to deal specifically with coal, especially in the industrial sector. Until this new model (cf. Replacing Oil and Gas with Other Fuels in the Industrial Sector) was designed, there were no models of industrial coal use. Even though the new model is imprecise (models are speculative by definition), it represents a considerable improvement over the PIES model which the CBO chose to employ in developing their estimates. Indeed, the CBO has now asked the Office of Energy Policy and Planning to assist the CBO in the development of their own model.

In short, the CBO's assumptions and their base data are questionable. The information base CBO used for their computations is insufficient in accuracy and applicability for estimating windfall on coal conversion tax credits.

2. The CBO estimates, sent to Senator Muskie on October 26, 1977, was prepared with two days notice. Therefore, it is, of necessity, incomplete and less valuable than a fuller study, in which the CBO could have accounted more adequately for the variables crucial in coal conversion. For example:

a. The CBO estimate does not account adequately for what is termed the "hassle" factor. The handling of coal is considerably more difficult for industries than is oil or natural gas. Many firms will sacrifice in order to avoid the hassle of increased handling difficulties. Coal-fired plants require large holding areas contiguous to the plant for storage of coal. Substantial coal transportation problems to the site and on the site are encountered. Air quality presents a continual problem.

When a tax credit is offered, it changes the cost-benefit picture. What might not have been economically feasible before becomes more attractive with credit.

b. The CBO estimate does not indicate to what degree the Federal regulatory program on conversion was assumed to have succeeded. The second estimate affects markedly the first estimate.

c. The CBO estimate does not indicate specifically what level of industrial (as opposed to utility) use was anticipated. Clearly, the incentive provided contributes significantly to increased usage and, to some extent, increased supply.

d. The CBO estimate does not indicate, specifically, the manner in which it accounted for problems with coal availability. For example, difficulty with labor strikes and unions may impact fundamentally on a firm's decision to convert. The presence or absence of a tax credit incentive may be the determining factor in a firm's ultimate decision.

It was our concern about matters of this sort which prompted inquiries from Senator Ford's office to the CBO on Monday, October 31. Senator Ford asked about the methodology used in the CBO estimate and the assessment of specific variables. Mr. Richard D. Morgenstern, Deputy Assistant Director of CBO, responded on November 2 (a copy of that letter is attached). While the CBO's response did not include the aforementioned issues, it did refer to other items, which indicate further the potential inaccuracy of the CBO's 50 percent "windfall" figure. Permit us to indicate why the figure is questionable.

1. The CBO letter indicates that their estimate assumes that metallurgical coal would not be eligible for the proposed credit.

As the energy tax bill was amended on the floor, metallurgical coal is now eligible for the tax credit. Steel firms such as Lone Star Steel may be moved to convert to coal (and to cease use of, for example, natural gas) because the tax incentive has been revised to include metallurgical coal. Obviously, that incentive is not part of CBO's estimate.

2. The CBO letter refers to utility coal conversions not induced by, but still eligible for, the proposed tax credit. CBO's model is entirely a price model. It does not consider capital availability even though access to

capital is crucial to utilities. To the extent that more capital is available to a utility through a tax credit, the increased capital encourages the utility to build a new plant which would also be eligible for the credit. If a utility can be induced to convert to coal in a manner large enough to produce the expected economics of scale, then the utility is more likely to continue with coal for subsequent plants because the "hassle" factor has been reduced. However, without the tax credit, the point at which the total impact becomes economic is somewhat more remote.

3. The CBO letter refers to the Energy Supply and Environmental Coordination Act (ESECA). That act supposedly mandated conversion to coal. However, of those firms and utilities (approximately 70) ordered to convert, only one has done so. Indeed, they have found it more cost effective to oppose the order in court than to pay for plant conversion. With the tax credit, the additional incentive may serve as the critical economic stimulus to warrant conversion rather than court action.

4. The CBO letter omits any reference to the Metzenbaum oil and gas user amendment which passed the Senate before the CBO letter was written. That amendment includes both a tax and a tax credit which is believed to be the equivalent of 25 percent of the cost of conversion. Inasmuch as the Metzenbaum amendment is meant to be considered in concert with the Kennedy amendment (which reduces the tax credit from 40 percent to 15 percent), no accurate estimate of windfall can fail to consider its effect.

While the CBO could not have known about the Metzenbaum amendment before sending the October 26 letter to Senator Muskie, the CBO was aware of it before they sent their letter to Senator Ford's office on November 2.

In the final analysis, coal conversion induced by tax credits is an effective method of buying time to plan for the future. To be sure, any plan of this sort will include some plants which would have converted anyway. But that number is smaller than the CBO estimate.

The real danger of the CBO figure in the letter of October 28 is that it is not labeled as a rapidly devised speculation based upon soft data. Without such prefatory disclaimer, the CBO number encourages use by those who would mistake figures for facts. Such a mistake will lead to more tragic, irreparable mistakes: the failure to provide adequate incentives to spur conversions; and the failure to buy adequate time to develop new energy sources. If an inaccurate evaluation of tax credits for coal conversion succeeds in conference after failing on the floor of the Senate, the result may eventually be the precipitate exhaustion of finite oil and natural gas resources. If the Nation is caught unprepared the resultant economic dislocation will produce a profound disturbance in the American way of life. That is a result which is as dangerous as it is unacceptable.

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., November 2, 1977.

Dr. KEVIN GOTTLIEB,
Energy Aid, Dirksen Senate Office Building, Washington. D.C.

DEAR DR. GOTTLIEB: This letter is in response to your request for additional details on our October 26, 1977, letter to Senator Muskie, regarding a proposed 40 percent tax credit for coal conversion investments (the credit has since been lowered by floor amendment to 15 percent).

Investment tax credits are generally designed to stimulate investment beyond levels that would otherwise prevail. One frequent complaint about such credits is that much of the resulting tax expenditure accrues to those persons or firms which would have invested in the absence of the tax stimulus. This was one of the concerns regarding the 40 percent energy investment tax credit, and we were asked to estimate what portion of the investment eligible for the credit would have occurred anyway.

CBO's estimate of the oil import savings induced by the proposed 40 percent credit are almost identical to that provided by the Joint Tax Committee. CBO estimated savings of .9 MMBD by 1985, the staff of the Joint Committee estimate 1 MMBD.

But with or without that credit some utilities and factories would still turn to coal during the 1977–1985 period. To estimate this "non-induced" coal conversion we use the base case estimates [1] produced by the Administration in April 1977; that is, estimates of what would happen by 1985 in the absence of any new energy policies. The estimates are generally produced by the large computer model called PIES (Project Independence Evaluation System). Those estimates show that by 1985, without new energy policies, industrial coal use would increase by the equivalent of .8 MMBD. Some of that growth would involve metallurgical coal that would not be eligible for the proposed 40 percent tax credit. At least .45 MMBD, however, would be eligible and would therefore represent new coal users who would receive the tax credit even though they would have used coal in the absence of any additional stimulus.

In the utility sector there is an enormous increase in coal use expected—the equivalent of 3.3 MMBD by 1985. However, most of this would not be eligible for the proposed credit. Under the proposal, credits are available for new facilities only to the extent they replace existing oil or gas units. This is an appropriate restriction since new, large utilities built to meet expanded electricity demand would use coal anyway without additional stimulus.

PIES estimates about 20 gigawatts of oil and gas burning units would be replaced by new coal-fired units in the base case during 1976 to 1985. Using conservative assumptions about capacity utilization, these conversions translate into .35 MMBD oil equivalent. This figure represents utility coal conversions not induced by, but still eligible for, the proposed tax credit.

One other assumption significantly reduced our estimate of the non-induced utility coal conversion eligible for the tax credit. CBO assumed that existing power plants already ordered to convert under the current Energy Supply and Environmental Coordination Act (ESECA) would not receive the credit; the proposal as written does not include this restriction. If ESECA conversions are eligible, another .4 MMBD [2] would be added to the total of non-induced, but eligible conversions.

In summary, we expect 1.7 MMBD oil equivalent of coal conversion to qualify for the 40 percent tax credit. Approximately, .8 MMBD or 47 percent is likely to take place anyway, and thus we expect about the same portion of tax expenditure to accrue to those industries and utilities that would have used coal in the absence of the program. About .9 MMBD of conversions would be induced by the credit. If we included utility coal conversions ordered under ESECA in our non-induced, but eligible category, the portion would increase to 57 percent.

As noted about, the credit has been lowered from 40 to 15 percent since our letter was written. The lower credit may induce fewer coal conversions and would thereby lower the associated tax expenditure. At the same time, this change would increase the portion of the credit that will accrue to those who would convert to coal anyway.

If we can be of further assistance, please let us know.

Sincerely yours,

RICHARD D. MORGENSTERN,
Deputy Assistant Director, Natural Resources and Commerce.

MIDDLE EAST CAUTION ADVISED

Mr. MATHIAS. Mr. President, these are exciting times for those of us who have watched events unfold in the Middle East over the years. I know that I was certainly stirred by the picture of an Egyptian President being welcomed by the people of Israel. Anwar Sadat and Menachem Begin have taken a tremendous leap across the psychological chasm which has separated Arabs and Israelis in the Middle East for 30 years.

However, I throw out this cautionary note. These brave men are hanging onto the possibility of peace by their fingernails. President Sadat does not have the backing of a number of Arab leaders in his current efforts. Moreover, we must remember that the hard issues of final borders, the fate of the Palestinians, and the implementation of real peace remain to be negotiated.

We must encourage the efforts of the parties to continue the very hopeful beginnings registered in Jerusalem 10 days ago. The resolution we have before us today underlines the commitment of Congress to support the process of achieving a negotiated settlement of the Arab-Israeli conflict. I urge unanimous support of this resolution.

U.S. BANKS' INVESTMENT IN PANAMA

Mr. PROXMIRE. Mr. President, on October 25 I brought to the attention of my colleagues in the Senate information on the exposure of U.S. banks in Panama. That information was based on replies by the Federal Reserve Board and the Comptroller of the Currency to my request for the following data:

First. Total claims of U.S. banks—national banks only, in the case of the Comptroller's Office—including their foreign branches and subsidiaries, on Panamanian residents, broken down by maturity;

Second. The proportion of such claims which represent claims of U.S. and foreign bank branches in Panama, that is, excluding Panamanian banks and other Panamanian residents;

Third. For each of the 20 largest U.S. banks—national banks only, in the case of the Comptroller's Office—the percentage of total U.S.—or national—bank claims on Panamanian residents and the percentage of total U.S.—or national—bank claims on non-Panamanian banks in Panama, for each bank, but with the name, size and other identifying characteristics of the banks deleted;

Fourth. For each of the 20 largest U.S. national banks, total claims on Panamanian residents with more than 1 year remaining to maturity, as a percentage of total capital, but with the name, size and other identifying characteristics of the banks deleted.

Mr. President, I learned later that the data provided by the two agencies were not comparable. The Federal Reserve and the Comptroller's Office used completely different definitions of "total claims" on Panamanian residents in their responses to my request, despite the fact that both agencies were aware of my requests to each and collaborated in compiling the data used in their responses. The inability of the two principal Federal bank regulatory agencies to coordinate their replies and apply a common definition to a simple request for information is symptomatic of the confusion and inconsistency inherent in our fragmented Federal bank regulatory system. This incident points to the wisdom, and urgent need for adoption of S. 684, which would consolidate the bank regulatory functions of the existing agencies—the Federal Reserve, the Comptroller's Office and the FDIC—into a single Federal Bank Commission. I hope we will move promptly in the next session of Congress to adopt this critical reform measure before the three separate, uncoordinated agencies fumble more seriously their responsibilities relating to our banking system.

Mr. President, I regret any inconvenience to my colleagues and the public which may have been caused by misleading and erroneous material inserted in the RECORD on October 25 at pages 34964 and 34965. I ask unanimous consent that the new and corrected material received from the Federal Reserve Board and the Comptroller's Office, including tables, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BOARD OF GOVERNORS,
FEDERAL RESERVE SYSTEM,
Washington, D.C. November 3, 1977.

Mr. ROBERT W. RUSSELL,
Counsel, Committee of Banking, Housing, and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. RUSSELL: Enclosed is the information you requested to supplement Chairman Burn's letter of October 11, 1977, to the Committee. The supplementary information shows the distribution among 20 large banks (11 National banks and 9 State member banks) of external claims on Panama, external claims being defined as all claims other than claims on Panamanian residents held by a U.S. bank's Panamanian office and payable in Panamanian Balboas.

Column 1 gives the precentage distribution of these claims showing how much is accounted for by the three banks having the largest amount of external claims, the next 3, etc. Column 2 shows what proportion of external claims on one group of borrowers, Panamanian offices of non-Panamanian banks, are accounted for by each group.

As Table 1 of the October 11 letter shows, external claims on Panamanian offices of non-Panamanian banks represent $463 million of the $1433 million in total external claims. Of the $1433 million in total external claims, $802 million is held by national banks and $631 million by State member banks.

It should be noted that the three banks having the largest amount of external claims are not the same banks as those having the largest amount of total claims, due to the varying amount of local office business conducted by banks. Therefore, the individual banks included in each three bank aggregate in this table are not necessarily the same banks included in each grouping in Table 3 of the October 11 letter.

Also enclosed is the listing of foreign branches of member banks which you requested.

Sincerely,

MICHAEL G. MARTINSON,
Foreign Banking Analyst.

Attachments.

TABLE 5.—EXTERNAL CLAIMS [1]

Banks	Col. 1: Total external claims (percent)	Col. 2: External claims on Panamanian offices of non-Panamanian banks (percent)
1, 2, 3	38	33
4, 5, 6	28	36
7, 8, 9	16	12
10, 11, 12	8	8
13, 14, 15	5	6
16, 17, 18, 19, 20	4	5

[1] External claims are defined as all claims on Panamanian residents other than claims that are payable in Panamanian Balboas and are held by a bank's office in Panama.

FEDERAL RESERVE SYSTEM,
Washington, D.C., October 11, 1977.

Hon. WILLIAM PROXMIRE,
Chairman, Committee on Banking, Housing and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I am pleased to respond to your letter of September 19 requesting information about U.S. bank claims on Panamanian residents.

Enclosed are four tables prepared by our staff which provide the information in question. These tables are derived from several different sources. Table 1 was prepared from data collected by the Federal Reserve as of year end 1976 from a group of approximately eighty U.S. banks; these data were published in a press release issued on June 3, 1977.

Tables 2, 3 and 4 were prepared from data as of mid-1977 collected in a new survey on bank exposure conducted by the Federal Reserve in cooperation with other bank supervisory authorities. Twenty large U.S. banks reported total claims on Panama amounting to $2.2 billion in this survey, compared with $2.8 billion of claims on Panama reported in the earlier survey noted above for a larger group of banks. Data collected in the new survey are still being processed by our staff and may be subject to further revision. If significant revisions should occur later in the course of the editing process, I will provide you with a revised set of tables.

Data in Table 3 have been combined into groups of three banks in order to preserve the confidentiality of data for individual banks.

I hope this information will be useful to your Committee. Please let me know if I can be of further assistance.

Sincerely yours,

ARTHUR F. BURNS.

Enclosures.

U.S. BANK CLAIMS ON PANAMA

TABLE 1.—*Total U.S. head office, foreign branch, and foreign subsidiary claims on Panamanian residents, December 31, 1976.*

[Millions of dollars]

Total claims	$2,831
One year or less	1,514
Over 1 year to 2 years	90
Over 2 years	323
Unallocated	904

SOURCE.—FR 2029. Report filed by approximately 80 banks.

TABLE 2.—*Claims on Panama of 20 large U.S. Banks, June 30, 1977*

[Millions of dollars]

Claims on banks	$589
Claims on banks with head offices in other countries (including branches or affiliates of U.S. banks)	463
Claims on private nonbanks	583
Claims on official institutions	261
Claims on private nonbank and official institutions externally guaranteed	314
Claims on Panama at local offices	[1] 729
Total claims on Panama	2, 162

[1] From the regular 502S statistical report, it is estimated that branches of U.S. banks in Panama had liabilities of $367 million to local residents as of June 1977.

COMPTROLLER OF THE CURRENCY,
Washington, D.C., November 1, 1977.

Hon. WILLIAM PROXMIRE,
Chairman, Committee on Banking, Housing, and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is an amended response to your letter of September 28, 1977, in which you requested information regarding the commitments of United States national banks in Panama. In our original response, dated October 12, 1977, our staff had misinterpreted the intent of several of your questions and thus, after further discussions with your staff, the following amended information is provided.

1. As of June 30, 1977, total claims, including foreign branches and subsidiaries, on Panamanian residents aggregated $1.692 billion, including $709 million in local currency claims. Maturity distribution of the foreign currency claims is: $607 million matures in less than one year; $289 million matures in over one year but less than five years; and $87 million matures over five years. No maturity breakdown is available for the local currency claims.

2. On June 30, 1977, the proportion of such claims which represented claims on United States and foreign bank branches in Panama, that is, excluding Panamanian banks and other Panamanian residents, totaled $295 million.

3. For each of the twenty largest United States National Banks, claims on Panamanian residents, as a percentage of total national bank claims on Panamanian residents, were:

Bank	Amount [1]	Percent [2]
A	$7	0.41
B	0	0
C	0	0
D	11	.65
E	22	1.30
F	1	0
G	215	12.71
H	14	.82
I	25	1.48
J	1	0
K	478	28.25
L	350	20.69
M	3	.18
N	14	.82
O	12	.71
P	253	14.95
Q	36	2.13
R	25	1.48
S	34	2.01
T	10	.59
Total	1,511	89.18

[1] In millions of U.S. dollars.
[2] Percentage of total claims on Panamanian residents.

FOR EACH OF THE 20 LARGEST U.S. NATIONAL BANKS, CLAIMS ON NON-PANAMANIAN BANKS AS A PERCENTAGE OF TOTAL NATIONAL BANK CLAIMS ON NON-PANAMANIAN BANKS AND RESIDENTS

Bank	Amount [1]	Percent [2]
A	0	0
B	$1	.34
C	0	0
D	6	2.03

O	.31
P	1.03
Q	.41
R	2.89
S	2.51
T	.74

(1) Does not include local currency claims for which no maturity breakdown is available.

(2) Percentage of capital of total foreign currency claims on Panamanian residents with more than one year remaining.

We hope this has been responsive to your inquiries.

Sincerely,

JOHN O. HEIMANN,
Comptroller of the Currency.

COMPTROLLER OF THE CURRENCY,
Washington, D.C., October 12, 1977.

Hon. WILLIAM PROXMIRE,
Chairman, Committee on Banking, Housing, and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your letter dated September 28, 1977 requesting information regarding the commitments of U.S. national banks in Panama. cluding foreign branches and subsidiaries,

1. As of June 30, 1977, total claims, inincluding foreign branches and subsidiaries, on Panamanian residents aggregated $773 million with $403 million due in one year and under, $288 million maturing over one to five years, and $82 million due in five years and over.

2. On June 30, 1977, the proportion of such claims which represented claims cn United States and foreign bank branches in Panama, that is excluding Panamanian banks and other Panamanian residents, totaled $279 million.

3. For each of the twenty largest United States national banks, claims on Panamanian residents as a percentage of total national bank claims on Panamanian residents, were:

Bank	Amount (in millions of U.S. dollars)	Percentage of total claims on Panamanian residents (percent)
A	7	0.90
B	None	None
C	None	None
D	None	None
E	22	2.84
F	1	.13
G	163	21.08

S	2.51
T	0.74

We hope this has been responsive to your inquiries.

Sincerely,

JOHN G. HEIMANN,
Comptroller of the Currency.

Mr. PROXMIRE. Mr. President, the data initially supplied by the Comptroller concerning the claims of U.S. nationally chartered banks on Panamanian residents did not include claims denominated in the local Panamanian currency, the balboa. I do not know the Comptroller's reasons for excluding these claims. They

are significant, amounting to $709 million as of June 30, 1977, and, because the balboa is by treaty permanently fixed at par with the dollar, claims in the two currencies are largely interchangeable.

Once local currency claims are included and the data on foreign currency revised the Comptroller reports that U.S. national banks had $1.7 billion in claims on Panamanian residents as of June 30; $1 billion of the total was in foreign currency claims, principally in dollars, with the remaining $700 million denominated in balboas. The 20 largest national banks held $1.5 billion, 89 percent, of these claims.

The revised data provided by the Comptroller make it clear that the U.S. banks most involved in Panama are nationally chartered banks not State-chartered banks as previously reported. The Federal Reserve Board reported that the 20 U.S. banks with the largest claims in Panama—which includes a few large State-chartered banks as well as the largest nationally chartered banks—had $2.162 billion in total claims as of June 30. Of the total, $1.432 billion was in foreign currency claims—principally dollars—and $730 million in local currency claims—balboas. By comparison the 20 largest U.S. national banks had $1.5 billion in claims on Panama, $802 million in foreign currency claims, and $709 million in local currency claims.

Mr. President, the revised submissions from the Comptroller's Office and the Federal Reserve Board contain few surprises. A few U.S. banks do most of the business done in Panama by U.S. banks. U.S. banks use Panama largely for short-term, interbank transactions and to book loans throughout Central America. When the maturities of the claims are considered no bank appears to have inordinate exposure in Panama. That conclusion must be tempered in the case of national banks, however, because the Comptroller does not collect data on the maturity structure of local currency claims, which are held principally by three or four large nationally chartered U.S. banks. It would behoove the Comptroller to collect data on the maturity structure of those claims.

PRESIDENT SADAT'S INITIATIVES

Mr. BROOKE. Mr. President, the recent initiatives of President Sadat of Egypt have been both courageous and astonishing. At great personal and political risk he has sought to set the stage for serious and direct negotiations for a lasting peace between Israel and the Arab States. His efforts have been reciprocated by Israeli Prime Minister Begin who has indicated that he, too, is willing to strive boldly to settle peacefully the differences that have caused so much sorrow for Arab and Israeli alike.

The efforts of the Egyptian President merit the strong support of the people of America and their Government. I have no doubts that the American people and the vast majority of their representatives in Congress are ready to give such support. But, for some unexplicable reason, the administration has been lukewarm at best to President Sadat's efforts; indeed, one editorial has characterized the Carter administration's enthusiasm for President Sadat's diplomacy as able "to freeze the Nile."

It is impossible at present to decipher accurately the motives for this cool response on the part of the administration. A New York Times editorial this morning suggested six possibilities, and which I ask unanimous consent to be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BROOKE. Mr. President, the suggested possibilities are:

First. Administration officials may resent President Sadat's "diplomacy by surprise" because it reduces the administration's potential to influence the Egyptian President's decisions before they take place.

Second. The administration may also be cool toward the Sadat initiatives because of "* * * an excessive attachment to the preferred American path to negotiations, a Geneva conference offered to all the parties through considerable diplomatic labor."

Third. Present administration behavior might also be motivated by deference to Soviet sensibilities, reflecting, as the Times editorial suggests "* * * a conviction that peace in the Middle East will never be achieved or preserved without Moscow's participation and commitment."

Fourth. The administration may also be trying to signal certain Arab States such as Syria and Saudi Arabia and possibly even the PLO that American leadership is their best hope for attaining their interests.

Fifth. It could be that the administration is concerned for President Sadat's safety which is so intimately linked with Egypt's stability and is more fearful of the risks he is taking than he is.

Sixth. Finally, there is the risk of diplomatic failure that is inherent in President Sadat's initiatives.

This last point is, of course, a legitimate concern. A failure of the Sadat initiative could lead rapidly to deteriorating conditions and ultimately to war. That is the inevitable risk of any meaningful act by the parties directly involved in the conflict to cut through the decades of suspicion and hatred. But, rather than shrinking from being associated with that risk, as the administration has apparently done, the United States should be doing everything possible to follow the lead of Egypt and Israel in order to reduce the risk.

It is the right of Israel and Egypt and the other Arab States if they will, to formulate the procedural basis for negotiations that would hold promise of a settlement that would bring a lasting peace to the peoples of the Middle East. President Sadat and Prime Minister Begin are asserting that right and the United States should be fully supportive of them as they do so.

We do not have the option to be involved in the Middle East only if events suit our preconceived notions of how things should be done. And we cannot avoid having to make difficult choices that entail significant risks. The proper course of action for the United States at this time is to endorse without qualification the efforts of those in the Middle East who have evidenced by their actions a true desire for peace. Our representation at the Cairo conference should be of sufficient stature to leave no doubts that we are indeed willing to encourage Egypt and Israel, in face-to-face negotiations, to prepare the way for a settlement. And, if others in the Middle East or elsewhere evidence an unwillingness to come to grips with the central issue of true peace, we should not delude ourselves into believing that our interest is in appeasing them. There is a time for fundamental decisions regarding Middle East peace, and the courageous acts of President Sadat have accelerated the pace of events to where the choices for peace must be made.

EXHIBIT 1

[From the New York Times, Nov. 29, 1977]

THE UNITED STATES AS SPHINX

The Carter Administration's enthusiasm for President Sadat's diplomacy could freeze the Nile. It has been grudging, chilling and altogether unworthy of the United States, which should be cheering and rewarding every act of moderation in the Middle East.

For the second time this month, the Egyptian President has signaled his genuine acceptance of Israel and a desire to get on with the negotiations for an epochal settlement. Both times, despite formal words of support, Washington has chosen to emphasize the dangers instead of the opportunities in Mr. Sadat's enterprise, thereby contributing to the risks. Over a long weekend, the Administration hesitated to accept his invitation to a Cairo conference, preferring instead to consult with the Soviet Union and other recalcitrants and giving no help whatever to the moderate Arab parties now torn among contending forces. The still informal decision finally to accept and urge others to accept is hardly a vote of confidence.

Consider the possible motives for this strange behavior in Washington:

1. Resentment of Mr. Sadat's diplomacy-by-surprise, reflecting not just injured pride but a desire to influence his tactics before they take shape.

2. An excessive attachment to the preferred American path to negotiations, a Geneva conference offered to all the parties through considerable diplomatic labor.

3. A deference to Soviet sensibilities, reflecting a conviction that peace in the Middle East will never be achieved or preserved without Moscow's participation and commitment.

4. A desire to signal Syria or perhaps Saudi Arabia or even the Palestine Liberation Organization that their best interests lie in accepting American leadership in the Middle East negotiations.

5. A fear for Mr. Sadat's safety and Egypt's stability, taking more seriously than he does the threats on his life and position.

6. A fear of diplomatic failure unless Mr. Sadat is restrained, with bitter consequences for all parties.

The evidence suggests that all these calculations have figured in Washington's responses, but only the last is deserving of serious consideration. Resentment and inflexibility have no place in a situation that has frustrated all peacemakers for 30 years. The Middle East conflicts have always been the primary burden of Israeli and Egyptian societies. Do we dare ask, how dare they now take diplomacy into their own hands?

The Soviet Union in its way, and Syria and the P.L.O. in theirs, have contributed mightily to the hostilities over the years; they should be persuaded that they may be

missing a historic opportunity to press their interests at the conference table, not encouraged to avoid the table. And surely Mr. Sadat himself is a better judge than any American of his relations with Saudi Arabia, or of his chances of survival.

Fear that he may fail is reasonable enough, but it should have produced an extra measure of American support, rather than coolness. Mr. Sadat could fail if moderate Palestinians, Jordanians and Lebanese, though tempted to join him, are frightened off by the Soviet-Syrian campaign of rejection. Courage does not usually come in multiple doses. The United States should be celebrating Mr. Sadat's invitations to Cairo, urging their acceptance and promising to reduce the risks and enhance the rewards for those who agree.

Mr. Sadat could fail also if the Israelis harden the terms for their other neighbors, and perhaps even for him. That temptation will grow to the extent that other Arabs refuse even a gesture of comparable recognition of Israel, spurn direct negotiation and force the Egyptians to back down or risk a separate peace. Here again the American obligation is to help broaden the talks.

The hesitation in Washington suggests that the Administration has still not grasped—or accepted—the radical turn of events that took Mr. Sadat to Jerusalem last week. He served notice that he would neither wait nor fight again for any Arab party that refuses even to negotiate with Israel or which belabors procedural issues to the point where Israel does not have to negotiate seriously. He thus rejected the American approach to a Geneva conference, and particularly the Administration's deal with Moscow to make a Russian co-chairman of every future bargaining session. Better Begin than Brezhnev.

Mr. Sadat may have been too ambitious, or too daring, or too trusting of Israel's readiness to reciprocate a dramatic break with the past. We think not; Egypt and Israel have not only earned the right to define the patterns of accommodation, they also have the power to do so, provided only that they have the energetic support of the United States.

In any case, Mr. Sadat has made his break and is trying to create a continuing process of negotiation to escape the cycle of frustration in both war and diplomacy. The place for the United States is at his side and at Israel's, so that their noble effort may proceed. It is too late to play the Sphinx.

IOWA'S OPERATION SKY SCAN

Mr. CULVER. Mr. President, as Congress continues its consideration of legislation to create a national energy plan, it is good to remember that Government is not alone in its efforts to bring about a reduction in energy usage. More and more individual citizens were buying additional insulation for their homes and businesses even before President Carter declared war on the energy problem.

In Iowa, several utilities have encouraged those individual efforts by instituting Operation Sky Scan in which infrared photographs are taken of cities and towns from low flying airplanes. The photos clearly show which buildings are well insulated and which are not. The photos are made available so that utility customers can determine the heat efficiency of their homes and businesses.

In early tests the photos have seemed successful in encouraging a significant number of people to buy insulation, and Iowa is now becoming the first State to use such a project statewide.

Mr. President, we certainly need the efforts of both the public and private sectors in our battle to conserve energy. This project appears to be a useful approach which utilities in other States might also want to institute. I ask unanimous consent that a description of Operation Sky Scan contained in the November 1977, Iowa Energy Bulletin be printed in the RECORD.

There being no objection, the bulletin was ordered to be printed in the RECORD, as follows:

IOWA'S AERIAL ENERGY STUDY

THERMOGRAMS

Utility customers in more than 800 cities and towns will have the opportunity to see energy loss through the roof tops of residential homes and other buildings this winter because of inadequate insulation.

Operation Sky Scan, a thermogram survey, is being sponsored by Iowa's investor-owned natural gas and electric utilities.

A thermogram is a black and white photograph taken from an airplane by a temperature measuring scanner. The infrared film which is used detects energy loss by recording roof top temperatures.

Heat loss is demonstrated on the photograph in various shades of gray, with poorly insulated buildings being light in tone and well insulated structures shown in considerably darker shades.

The "picture of temperature" project is the first of its kind ever done on a state-wide basis, according to John M. Lewis, President of the Iowa Utility Association.

Texas Instruments, Inc., of Dallas will take thermogram photos on clear nights from a twin-engined plane flying at 1,600 to 1,800 feet. Outside temperatures must be below 35 degrees Fahrenheit and roof tops must be clear of snow.

Each participating utility will announce plans for making the thermograms available to its customers and Texas Instruments, Inc., will provide training to utility employees on how to interpret the photos.

Utilities sponsoring the project include: Interstate Power Company, Iowa Electric Light and Power Company, Iowa-Illinois Gas and Electric Company, Iowa Power and Light Company.

Iowa Public Service Company, Iowa Southern Utilities Company, Peoples Natural Gas and Union Electric Company.

Other privately owned utility companies participating in the program are Keokuk Gas Service Company, North Central Public Service Company and Minnesota Gas Company. Lewis said municipally-owned gas and electric utilities have also been invited to participate.

TRAGEDY IN INDIA

Mr. KENNEDY. Mr. President, one of the most devastating cyclones in over a century struck southern India last week, leaving in its wake a tragic trail of death and destruction. The loss in human life is almost beyond comprehension, and will perhaps never be fully known. The latest official estimates from the field indicate that the death toll will reach well over 20,000.

The cyclone washed away entire towns and villages, leaving more than 2 million people homeless. Estimates on the loss of property and crops now range well over $300 million. Within a few, tragic hours an already impoverished area was devastated, and millions of men, women and children dangerously close to malnutrition were left without food.

Despite many obstacles, not the least being the massive disruption of the area's transportation and communications system, the Government of India has moved urgently to meet emergency relief needs. International and voluntary agencies have offered a helping hand, as has the United States and other governments.

Hopefully, Mr. President, as the full scope of relief and rehabilitation needs become apparent—and the Indian Government assesses what, if anything, it may need from the international community—the United States will be prepared to draw upon available disaster relief funds to provide a significant contribution to India's recovery efforts. I stand ready, as I know others in Congress do, to offer special legislation, if necessary, to provide longer-term rehabilitation and reconstruction assistance.

In this connection, Mr. President, I commend to the attention of Senators an editorial in today's New York Times regarding measures that might be helpful in providing assistance for disaster preparedness. The United States, among other countries, has special experience in this area, and has already contributed to similar measures in Bangladesh—which is also subject to the devastating cyclones that come out of the Bay of Bengal. Hopefully the United States will offer its support for such disaster preparedness programs in southern India.

Mr. President, I know I speak for every American in offering deep sympathy and concern for the people of India who have suffered great tragedy. America's concern is already being expressed in the field through the actions of several American voluntary agencies, and I know it will be forthcoming when the Government of India identifies additional areas requiring rehabilitation and reconstruction assistance.

I ask unanimous consent that the New York Times editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 29, 1977]

CURBING THE CYCLONE'S TOLL

The numbers defy comprehension. Harassed Indian officials estimated 10,000—a convenient round figure—when asked how many died in a cyclone and tidal wave that struck in the state of Andhra Pradesh last week. The number of persons killed will never be known precisely. And, whatever it is, many more will die of diseases spread by polluted wells and the breakdown of sanitation facilities.

In the wake of such a calamity, attention naturally turns to relief for the injured and ruined survivors. Other nations and international agencies will contribute, but the heaviest burden will fall upon the Indian Government. Yet all should give at least equal attention to assuring that future storms do not take such a toll.

Some ways are known. Buried in all the numbing numbers is a hopeful contrast: Only a week earlier, a cyclone of nearly equal force struck the neighboring state of Tamil Nadu. But there, soldiers evacuated the residents of coastal areas and held the toll to 500 dead, although property damage was immense. In Andhra Pradesh army units were

summoned only after the cyclone hit, despite ample warning of its approach.

The contrast points up the importance of preparedness to blunt the impact of natural disasters. The first requirement is an emergency plan. Vehicles, radios, medical supplies and food must be stockpiled near disaster-prone areas. Ultimately, governments should prevent settlement of such areas. In the oft-ravaged coastal regions of India and Bangladesh, the land is seductively fertile. But ideally, those who farm there should have their homes inland on more secure ground.

Disaster preparedness is an area in which developing states can share experience. The Philippines has perhaps the most effective system for mitigating the toll of tropical storms. A good use for aid funds would be to send Philippine experts to other disaster-prone countries.

One obvious lesson too often ignored in calmer seasons is the connection between development and disaster preparedness. Because Andhra Pradesh was ill-prepared, India must spend vast sums on relief that it cannot easily afford. Preparedness costs money, but it saves still more money for other purposes.

U.S. LEADERSHIP IN HUMAN RIGHTS: REALITY OR RHETORIC

Mr. PROXMIRE. Mr. President, the United States is accustomed to seeing itself as the world leader in the struggle for human rights. In terms of publicity this is no doubt true, for I can think of no government which talks about the issue more than we do. However, I have real doubts about whether our actions always support our words.

In 1974, the Subcommittee on International Organizations and Movements of the House Committee on Foreign Affairs studied the U.S. track record in human rights. Their conclusions read as follows:

The human rights factor is not accorded the high priority it deserves in our country's foreign policy. Too often it becomes invisible on the vast foreign policy horizon of political, economic, and military affairs. Proponents of pure power politics too often dismiss it as a factor in diplomacy. Unfortunately, the prevailing attitude has led the United States into embracing governments which practice torture and unabashedly violate almost every human rights guarantee pronounced by the world community.

The subcommittee also analyzed several international treaties, and in particular the Genocide Convention. In doing so they upheld both the importance of the document and the importance of U.S. support:

U.S. ratification of the convention would help to enforce the terms of the convention and discourage those governments who might be tempted to commit genocide. The United States cannot be persuasive in urging other governments to respect the terms of a convention which we have failed to ratify.

The Senate's failure to ratify the Genocide Convention means that we have yet to accept international legal responsibility for the most heinous of human rights violations. It jeopardizes U.S. leadership and influence in the field of international human rights.

I could not agree more. Because our past track record in human rights has reflected expediency rather than commitment, our Government's sincerity and credibility have been put at stake. In short, several questionable foreign policy decisions have spoken much louder than our human rights rhetoric.

Since the time of the subcommittee's report, however, a new administration has come into office. An administration which has recognized our past inconsistencies, and has determined that the time for being a fair-weather friend of human rights has come to an end. I urge my colleagues to support President Carter's courageous stand and uphold the credibility of the U.S. Government by ratifying the Genocide Convention immediately.

ART MURPHY

Mr. CHURCH. Mr. President, Idaho has lost one of its most effective—and colorful—legislators, Art Murphy, the dean of the Idaho State Senate.

Art Murphy came from Idaho's mining country. He had the strength of the rock in him. He was universally admired by colleagues of both political parties, and was endowed with an abundant measure of commonsense.

As the Idaho Statesman of Boise editorialized, he was a "solid legislator."

He was that, indeed. He was my friend, and the friend of countless others. Idaho will miss him.

I ask unanimous consent, Mr. President, that the editorial which appeared in the Statesman on November 9, be printed in the RECORD, along with a news article from the Statesman of November 8.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Boise (Idaho) Statesman, Nov. 9, 1977]

"POPS" MURPHY

"Pops" Murphy is gone and the Legislature won't be the same.

Affectionately called Pops by his colleagues, Art Murphy of Mullan served almost three decades as an Idaho lawmaker. Unquestionably the dean of the Idaho Senate, the 79-year-old Democrat was loved and respected by members of both political parties. He was a solid legislator and a man who brought common sense and color to a body that sometimes seemed short on both. His death of cancer on Monday was mourned throughout the state.

Many of those who have risen to high places in or from Idaho politics learned a thing or two from "Pops" on the way up. He was the kind of man other men consulted before making important decisions. Interior Secretary Cecil Andrus, who this week called the Senate veteran "a great legislator," was a Murphy protege. Gov. John Evans referred to him as "my good friend and teacher." Senate Minority Leader Cy Chase, D-St. Maries, said everyone in the Senate leaned on his advice and experience.

Murphy compiled an impressive record of "firsts" during his legislative career. He introduced the first bill to set up the Idaho Fish & Game Commission, was the first to advocate year-around use of school classrooms, first to propose a vote-by-mail system, first to get a postcard registration bill through the Senate and led the Senate fight for the 19-year-old vote.

His last major legislative accomplishment was passage last winter of a "death with dignity" bill, which allows patients beyond hope to request termination of life-sustaining equipment.

Perhaps it was only appropriate. As Senate President Pro Tem Phil Batt put it, Murphy "protected the dignity of the Senate. He was a statesman."

He was that indeed. Idaho will miss him.

[From the Idaho Statesman, Nov. 8, 1977]

SENATOR ART MURPHY DIES OF CANCER

SPOKANE.—The dean of the Idaho Senate, Art Murphy of Mullan, died Monday in a Spokane hospital. He was 79.

Murphy, who was in the middle of his 15th legislative term (the last 11 in the Senate), was the only Idaho legislator ever to serve in both the majority and minority leadership of the House and Senate.

He was elected to the House in 1936 and served a total of 29 years.

Murphy, affectionately known as "Pops," was hospitalized near death from cancer in late 1973, but recovered and returned to the Legislature in 1974. He was hospitalized again Sept. 30 in critical condition, suffering from multiple myeloma, a form of cancer.

His death was mourned by political leaders of both parties Monday as the loss of a friend and a statesman.

"The state of Idaho has lost a great legislator and his family and I have lost a loved one," Interior Secretary Cecil Andrus said. "I hope those of us who follow in his footsteps remember the standards he set."

Andrus, a Murphy protege when he came to the Idaho Legislature in the early 1960s, made a special late-night trip to Spokane Oct. 28 to visit the ailing legislator. Andrus was in Idaho to speak at a water resource meeting and to dedicate the new Lewiston Hill portion of U.S. 95.

"He talked his way past a guard at the hospital (at 11:30 p.m.)," an Andrus aide said. "Ol' Pops was still awake, waiting. 'I knew you'd be here,' he told Andrus. They spent a little over half an hour together," the aide said.

It was Murphy who brought sudden tears to Andrus' eyes when the former governor was delivering his farewell State of the State address to the 1977 Idaho Legislature.

"I happened to glance over at a Republican legislator and saw tears going down his cheeks," Andrus said. "I thought 'Oh, no,' so I turned away quickly—and looked right smack into ol' Pop Murphy's eyes! That did it."

Sen. Frank Church, D-Idaho, said Murphy "was from mining country. He had the strength of the rock in him. He was my friend and I will miss him."

Gov. John Evans, who served several terms in the Idaho Senate with Murphy, said he was "deeply saddened at the death of my good friend and teacher. His passing is a loss to me personally, to the Idaho Senate, and to all the people in the state he loved so well.

"He left his mark on Idaho," the governor said. "His contributions over the many years will be remembered by history and future generations."

Senate Minority Leader Cy Chase, D-St. Maries, went to visit Murphy Monday. He arrived five minutes too late.

"We'll all miss him," Chase said later. "All of us leaned on him at times for advice and help, because he had such great experience and understood the legislative process so well. He never shirked, even though I know he was in a lot of pain at times. I think what kept him going as long as he did is that he enjoyed politics so much. It just seemed to pep him up when he could be involved."

When John Greenfield decided to seek election as chairman of the Idaho Democratic Party, the first man he contacted for advice and support was Art Murphy.

"I am saddened by his death," said Greenfield, who won the chairman's post in June. "His honesty and sound judgment have

guided all of us for many years. Art Murphy was especially good about involving younger people, including myself, in government and the political process. He was a wonderful man. We will all miss him very much."

The Senate's top Republican, President Pro Tem Phil Batt of Wilder, said Murphy was "a special friend. This is a deep personal loss to me, because we were 'partners' in many legislative ventures.

"He was particularly helpful to me in leadership, because sometimes when the two political factions would come to loggerheads, he'd lecture us both on the futility of being obstinate," Batt said. "He'd remind the Republicans that we had never been in the minority party, and remind the Democrats they had no license to be unfair. He always put the good of the Senate above political considerations."

Batt said Murphy, who towered over him by at least half a foot, was the man who dubbed him the "Little Giant" and called him his "little pardner."

"In general, he was one who protected the dignity of the Senate," said Batt. "He was a statesman."

Murphy was the first man to sponsor a slot machine bill, introduced the first bill to set up the Fish & Game Commission, was the first to advocate year-round use of school class-rooms, first to propose a vote-by-mail system, first to get a postcard registration bill through the Senate, and led the Senate fight for the 19-year-old vote.

Murphy once said he was "born on the wrong side of the Northern Pacific railroad tracks" in Sandpoint on May 18, 1898. He never completed high school, but started a professional baseball career during which he advanced as high as Oakland of the old Pacific Coast League, where he played on a pennant winner. He led the Timber League in 1926 with a .425 batting average, striking out only four times in 60 games.

Murphy, who served in the legislature under eight Idaho governors, represented District 4, which includes Shoshone County and part of Kootenai County. At the time of his death, he was Democratic caucus chairman, and also had served as chairman of half a dozen committees.

He served one term as House minority leader, one term as House majority leader, one term as Senate majority leader and one term as Senate minority leader. He also served seven years on the Legislative Council.

His last major legislative achievement was passage this year of a "death-with-dignity" bill, allowing terminally ill persons to request that they be disconnected from life-sustaining devices when there no longer was hope for recovery.

With Murphy's death, Sen. Richard Egbert, D-Tetonia, now is the oldest senator in terms of both age and legislative service. Egbert, 71, is halfway through his eighth term.

Under Idaho law, the governor must appoint Murphy's replacement from a list of three names submitted to him within 15 days by the District 4 Democratic chairman.

GUN CONTROL UPDATE

Mr. KENNEDY. Mr. President, last week Americans paused to give thanks for the blessings that have been bestowed on this Nation. During the same week many people in this country and around the world observed the 14th anniversary of the assassination of President John F. Kennedy.

The National Council for a Responsible Firearms Policy, an organization which for more than a decade has been a leading advocate of strict gun control, marked this 14th anniversary with a statement entitled, "Gun Control Update." The council said in its statement that 2½ million Americans have been victims during the past 14 years of their country's permissiveness regarding the ownership and possession of destructive weapons. Additionally, the statement points out that more Americans have been shot to death in the homes, the shops, and streets of America thus far in this century alone than have been killed in all the wars in this Nation's history. The council contends that strict gun control is not the sole answer to gun violence, but "it is an indispensable part of the answer that urgently needs to be found."

I believe that we must heed and be fully responsive to the imperatives of public safety as detailed in the council's article.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GUN-CONTROL UPDATE ON THE 14TH ANNIVERSARY OF THE ASSASSINATION OF PRESIDENT KENNEDY

Fourteen years have passed since President John F. Kennedy was shot to death with a mail-order rifle. It took the Federal government five years to muster enough determination to bring such shipments under strictest control. It would have taken even longer if the gun assassinations of Dr. Martin Luther King and Senator Robert Kennedy within a two-month period had not reopened the 1963 wound in the nation's conscience and made neglect of this problem all the more painful.

Major legislation was passed in 1968, but it was aimed only at controlling more effectively the commercial traffic in guns and ammunition and their purchase from bona fide dealers, Congress roundly rejected efforts to confine legal possession of guns to people tackle the rest of the problem—the need to confine legal possession of guns to people who have the basic credentials for responsible possession, and to hold such licensed gun owners strictly and legally accountable for the safe keeping, proper use and proper transfer of every gun in their possession. Thus, the assassins of John F. Kennedy, Martin Luther King and Robert F. Kennedy could just as easily now as then obtain the guns that fired those shots heard round the world.

Every year, thousands of less known but no less respectable Americans are attacked, wounded or killed with guns—statistics which the nation seems to accept as routinely as it does the ball scores and the stock market quotations.

In the 14 years since the murder of President Kennedy, 140,000 Americans have been murdered with guns. Another 140,000 have commited suicide with guns. Another million have been wounded with guns. Another 40,000 have been killed accidentally with guns, and another 1,500,000 have been robbed at gun point. Over 2½ million Americans in the past 14 years have thus been the victims of their country's permissiveness on who may have a gun and how this most destructive of personal weapons is kept.

More Americans have been shot to death in the homes, the shops and the streets of America thus far in this century alone than have been killed in all the wars in this nation's history. More Americans have been murdered by gunfire in their own country since the assassinations of Dr. King and Senator Kennedy in 1968 (the former with a rifle, the latter with a handgun) than were killed in Indochina during the entire period of U.S. military involvement there. Since the flow of all kinds of guns into all kinds of hands for all kinds of purposes remains largely unchecked, the danger to life and limb from the misuse of guns is greater now than when President Kennedy was killed—and gets greater with every passing day.

We live in a country where half the households have guns, and where there may be nearly as many guns as there are people. It is a country where no state or local government has a code of responsible gun ownership to keep guns out of unqualified and irresponsible hands, to insure that guns are kept cautiously not carelessly, and to hold every gun owner strictly and legally responsible for the safe possession, responsible use and legal disposition of each of his or her guns.

Existing Federal controls, dealing primarily with interstate commerce, use of the mails, and sales by licensed dealers, are too limited in purpose and too easily bypassed. The many thousands of state and local laws around the country are also inadequate and easily bypassed. Guns move easily into the hands of people who by any reasonable standard should not have them. Too often and with growing frequency the result is death or serious injury to innocent bystanders. The personal safety of every American, those who own guns as well as those who do not, is in jeopardy.

Strict gun control is not the only answer to the carnage of violence with guns—this man-made plague. But it is an indispensable part of the effective answer that urgently needs to be found. A government that does not face the facts of gun violence and face up to the urgency and stopping the easy accessibility of guns and ammunition to individuals not qualified to keep and use them responsibly deserves the strongest rebuke. Such a government is either inexcusably insensitive to the hard realities of violence in America or is playing shortsighted, shabby politics with the safety of the American people by subordinating their safety to the political expediency of appeasing a narrow-minded minority of the nation's gun owners.

The abysmal failure of the Federal government and virtually all state and local governments to adopt effective, reasonable and responsible gun-control policies in the overall public interest (in the interest of law-abiding Americans who own guns as well as those who do not) leaves America unsafe for its people, unsafe for their leaders, indeed unsafe for democracy itself. Freedom of expression, freedom of religion, freedom from want and freedom from fear are hallowed hallmarks of the American dream. A fifth freedom must now be added—freedom from violence and from the easy accessibility of most violent of weapons to those not qualified to use them responsibly.

Today on the 14th anniversary of the death of President Kennedy, the nation should ponder its failings regarding violence in general and gun violence in particular. The American people should then call on their leaders to lead the way to making this the safe country it urgently needs to be. The major responsibility is that of the President, who must put the power and prestige of his office behind a national firearms policy geared to the realities of late-twentieth-century America.

What statistic are we waiting for? The peril point has already been passed.

NOVEMBER 22, 1977.

DAVID J. STEINBERG,
Executive Director.

KEEPING THE SIKES ACT

Mr. CHURCH. Mr. President, the Resource Protection Subcommittee of the Senate Environment and Public Works Committee recently conducted a hearing to discuss reauthorizing the Sikes Act. That law, which is set to expire next year,

provides Federal land management agencies with additional authority to manage fish and wildlife habitat.

Because the Federal Government is such an extensive landowner in Idaho, it is important that critical habitat lands under the jurisdiction of the Forest Service and the Bureau of Land Management be kept in a condition that will support existing fish and wildlife populations. In fact, if these lands are managed wisely, existing populations could be significantly enlarged. With the ever growing popularity of fishing and hunting in my State and throughout the West, the prudent management of Federal habitat lands becomes much more consequential. It was in recognition of these facts that Congress approved the Sikes Act back in 1974, and I fully support its retention.

Mr. President, I ask unanimous consent that the testimony I presented to the Environment and Public Works Committee on November 23, in support of the Sikes Act be printed in the RECORD, along with the statement of the Idaho Fish and Game Department Director, Joseph Greenley, at the same hearing.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR FRANK CHURCH

Mr. Chairman, I appreciate this opportunity to testify before your subcommittee at this oversight hearing in support of retaining the fish and wildlife habitat management authority established with the enactment of P.L. 93-452.

The continuation of P.L. 93-452, the so-called "Sikes Act Amendment," is important to my state of Idaho. Two thirds of Idaho is federally owned. The two largest land management agencies—the Bureau of Land Management and the Forest Service—together have jurisdiction over 32 million acres within the state. Thus, the wildlife habitat programs and policies of these two agencies significantly affect the survival of Idaho's fish and game populations.

I have been a supporter of the Sikes Act amendment since its enactment in 1974. This legislation was aimed at meeting a pressing need, namely, the perpetuation and enhancement of adequate fish and wildlife habitat on federal lands. The need which prompted Congress to take this action over three years ago, is still with us in 1977. As each day goes by, it becomes ever more important for these federal agencies to begin the necessary work to stop the wildlife habitat losses which are forcing sharp reductions in game herds in Idaho and throughout the West. Unless some concrete steps are soon taken to improve the food and cover on which wildlife populations depend, then we may see the extinction of certain important herds. Wildlife experts all agree that Idaho's deer, elk, moose, antelope, bighorn sheep, and mountain goat populations can be greatly aided by habitat improvement and rejuvination. That's why we adopted the 1974 Sikes Act amendment.

The only problem so far with this law is that it has not yet been funded. In expectation of receiving Sikes Act funds in the fiscal year 1978 appropriation process, state agencies like the Idaho Fish and Game Department worked closely with the Forest Service and Bureau of Land Management in developing comprehensive plans for the improvement of critical habitats. However, when the appropriations were finalized, the wildlife habitat monies went to the general funds of these agencies instead of being earmarked for Sikes Act work. As the Director of the Idaho Department of Fish and Game, Joseph Greenley, pointed out in his testimony before the subcommittee earlier today, that is very upsetting to the Fish and Game Department. They feel very strongly that the Sikes Act should be given the opportunity to work. I concur in that opinion, and I would hope that your committee will reauthorize this long-overdue program, so that adequate habitat improvement programs can become a reality.

STATEMENT OF JOSEPH C. GREENLEY, DIRECTOR, IDAHO DEPARTMENT OF FISH AND GAME

Mr. Chairman, members of the committee, I appreciate your invitation to testify regarding the implementation of P.L. 93-452, commonly known as the Sikes Act Amendment.

Our interest in this subject is based on the fact that the amendment authorized wildlife management programs by the Bureau of Land Management and Forest Service, and these agencies are responsible for two-thirds of the land area in our State. We have agreements with both agencies pertaining to wildlife management which are to the effect that the Idaho Department of Fish and Game manages wildlife, and the land managing agencies manage the habitat.

And while the Idaho Department of Fish and Game is responsible for the protection and management of wildlife, we also recognize that in the long run wildlife depends not so much on the hunting regulations we might establish but upon the habitat for wildlife on the land—especially public lands administered by the Bureau of Land Management and Forest Service.

A chronic shortcoming in the past has been that while wildlife habitat management has supposedly been a part of these agencies' responsibilities, their funds for such programs have been critically inadequate, and we viewed the Sikes Act Amendment as the best approach yet developed to correct this deficiency.

Under terms of the Sikes Act Amendment and working closely with the Bureau of Land Management and Forest Service, many man hours were devoted to developing the cooperative agreements and specific on-the-ground project plans that were required before funds could be obtained for the actual implementation. Earlier this year I made a trip to Washington specifically to testify in support of the first appropriation request for the Bureau of Land Management and Forest Service under the Sikes Act.

The specific projects requested for Idaho were selected as the most pressing wildlife problems that could be solved by habitat developments under this Act.

For the Bureau of Land Management they included improvement of food and cover and management of the extremely critical isolated tracts of public land which remained as islands of native cover scattered throughout the highly developed irrigated farmland of southern Idaho. Pheasant habitat and, consequently, populations of our most popular game bird have been steadily declining due to changing farm practices on surrounding private land. Developing the full potential of the interspersed public lands would be a significant step toward reversing this trend.

The top Forest Service project was to restore, through controlled burning, the badly deteriorated winter ranges of our northern elk herds which have declined from a peak in the 1950's to about half their former numbers. Our Department had financed the research and, in cooperation with the Forest Service, conducted experimental burning on a limited scale. The studies are essentially complete, and all that remains is for adequate funding to apply the results and make the program operational.

Additional projects were to benefit other species, including anadromous fish and threatened or endangered species, with the total requests for Idaho programs amounting to $600,000 for the Bureau of Land Management and $2.5 million for the Forest Service.

At this point, we were optimistic that, after the considerable preparatory effort in cooperation with these agencies, actual on-the-ground implementation might actually begin in the near future.

We were dismayed to learn later that, although some funds for these wildlife programs were appropriated, they were channeled into their general authorization instead of under the specific authority of the Sikes Act and, further, that these agencies would not seek an extension of the Act. Their rationale, as we understand it, is that wildlife programs should be funded through their general budgets because seeking separate authorization under the Sikes Act would constitute duplicate requests and would not be practical.

Frankly, this is extremely disturbing to us. First, because after the efforts put forth with Bureau of Land Management and Forest Service personnel at their request to develop qualifying projects under the Sikes Act authorization. we feel this action is a serious breach of faith.

Second, the contention that wildlife plans developed under the Sikes Act effort will still be carried out, but under general appropriations, is not at all reassuring. Based on the track record of past wildlife funding by the Bureau of Land Management and Forest Service, all this means to us is that it's "business as usual" with wildlife in the general funding pot as before, inadequately funded to start with and doomed to the short end of it when the usual budget shifts and cuts occur.

We feel that if wildlife programs had been adequately funded in the past the Sikes Act Amendment would not have been needed, and it would not have been enacted by Congress.

The people of this nation, acting through Congress, clearly indicated that their intent was to provide badly needed supplementary funds to the historically weak wildlife programs of the federal land management agencies.

We feel this abandonment of the Sikes Act program is clearly counter to the original intent of Congress and extremely discouraging to cooperative efforts of the state wildlife agencies.

Mr. Chairman, the long and short of it is that there has been no implementation of the Sikes Act. Implementation has been thwarted at the critical budgetary stage by the agencies responsible for implementing it.

We can understand the administrative concern involved with budgeting for wildlife under two programs, but wildlife *needed* a supplementary program and still does. Regular channels were not satisfactory before, and we have seen little to assure us that they will be satisfactory in the future. The relatively new Organic Act and Resource Planning Act *may* improve the situation, but we feel this has yet to be proven.

The Sikes Act Amendment has not had a fair trial or any trial at all. Too much has gone into the planning spade work to stop before the first dollar is even appropriated for essential programs, and we would be happy to testify at any time regarding the importance of specific projects.

However, at this time our primary concern is for continuation of the amendment. For this reason, we respectfully urge that the Sikes Act Amendment be reenacted; that future funds be appropriated specifically under Sikes Act authorization for wildlife habitat projects developed in cooperation with the state wildlife agencies; and that the success of this program after five years of *funding* (not just five years of authorization) be evaluated at that time.

The wildlife record of the two agencies, after having operated for five years under the Organic Act and Resource Planning Act,

could also be reviewed and a determination made at that time whether the Sikes Act Amendment is still needed. To do so at this time would be premature.

Thank you, again, for the opportunity to testify.

PROGRESS ON WORLD FOOD

Mr. KENNEDY. Mr. President, it has been 3 years since the World Food Conference met in Rome, and we are now beginning to see some important signs of progress that the international community has indeed been awakened to the global crisis of food.

Not the least of this progress has been the creation and work of the World Food Council established upon the adjournment of the World Food Conference. The Council has been a high-level deliberative body reporting directly to the United Nations General Assembly. The Council has repeatedly sounded an international hunger alarm, and has continued the momentum started at the Rome Conference.

In addition, we have seen the creation of the International Fund for Agricultural Development—a $1 billion, very tangible result of the World Food Conference and the cooperative spirit engendered on this issue between the members of OPEC and Western nations.

The Conference also stimulated a wide-ranging review of our own Nation's policies toward food, and under the leadership of the new administration we have seen the first steps toward the creation of a world food bank, and a reordering of our food priorities and policies toward the Third World.

These and other signs of progress tell us what we have known all along—that wherever hunger and malnutrition exist, their eradication involves political decisions and risks, more than the lack of technology or skills. It is the political will to act that has been needed.

Mr. President, I commend to the attention of Senators two recent essays on the aftermath of the World Food Conference, that outline in more detail the initial progress that has been made as well as the tasks still before us. The first is an excellent summary from the New York Times by Clyde Farnsworth, and the second is a report prepared by the Interreligious Task Force on U.S. Food Policy.

I ask unanimous consent that they be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 6, 1977]

THREE YEARS AFTER THE ROME CONFERENCE: FOOD FOR THE HUNGRY

(By Clyde H. Farnsworth)

WASHINGTON.—As recounted in Genesis, "Joseph stored up grain in great abundance, like the sand of the sea, until he ceased to measure it, for it could not be measured." And when the famine came, the chronicler continues, "there was bread."

Today, three years after the World Food Conference in Rome, food security has improved for the half billion people who suffer from malnutrition—and the 15 million who die from it each year—as it did for the ancient Egyptians as a result of Joseph's grain reserve plan.

In the 1970's the world food economy has undergone perhaps its most far reaching transformation in history. There were huge food stocks and excess productive capacity as the 1970's began. Within a few years, as drought and famine again struck, as they had periodically through the centuries, the world was again struggling to survive from one harvest to the next.

Two years of good weather and record harvests are mainly responsible for the general lack of worry about food supplies today. India, for example, almost totally dependent on food aid three years ago, now has 20 million tons of grain brimming over in storage.

But the two-week conference in November 1974, which brought together 1,250 delegates from 130 countries, generated a momentum that is now working to increase food production in developing countries, establish a world food reserve, get more food aid to the poorest countries and improve nutrition.

Moreover, it has led to a rare cooperative spirit between members of the Organization of Petroleum Exporting Countries and the West, between the United States and the Soviet Union and even between China and other nations.

To coordinate all the follow-up machinery, the Rome conference established a high-level deliberative body known as the World Food Council, which reports to the United Nations General Assembly. Sayed Ahmed Marei, an Egyptian agricultural reformer who was secretary General of the food conference, became the first President of the food council. Last year he went back into Egyptian politics and was replaced by an energetic Filipino, Arturo Tenko, Minister of Agriculture in Manila.

Under Mr. Tenko, a dashing figure with an American wife, the council's ministerial conference last June in Manila began to move ahead on what is likely to be the most significant project to grow out of the food conference—a world network of food reserves.

There is to be a coordinated system of nationally held grain reserves and perhaps reserves of other commodities. The reserves would provide the main element of food security and could be used also as a buffer stock to moderate price fluctuations.

American farmers are not enthusiastic about the idea because they think a buffer stock could hold down prices. But consumers throughout the world would benefit, and the Carter Administration, siding with the consumers, has been pressing to get the project under way and has announced a first United States contribution to the reserve.

At the conference a total world reserve of 30 million tons was discussed; officials are now talking of a more modest 15 million tons, which would cost approximately $1.2 billion at present market prices. Annual storage and interest costs would be on the order of $110 million.

International negotiations are going forward on the food buffer stock, and some hope is being expressed that a preliminary agreement between the major producers and consumers will be reached by early next year.

If so there would finally be a modern parallel to the events described in Genesis, where Joseph, after interpreting Pharaoh's dream, gathered up all the food of the seven plenteous years to be ready for the seven years of famine.

Many of the Rome conference's activities have been slowed by the inevitable politicking, and foot-dragging that arise whenever new international organizations are created.

The work of the council itself in its first two years was viewed as a disappointment, largely because it became mired in the recriminatory bloc politicking of the North-South dialogue, the infinitely scoped debate between rich and poor countries over how to share the world's wealth more equitably. Developing countries, for instance, were uneasy simply because the two top officials in the council's secretariat were American.

Similarly, an argument over the funding, headquarters site and nationality of officers delayed the start-up of the International Fund for Agricultural Development (IFAD), a body that resulted from an Iranian initiative at the food conference. In fact, it will not really get under way until next month.

Run by a Saudi Arabian, Abdul Mushaim al-Sudeary, who holds a master's degree in water management from Arizona University, IFAD will operate from a Rome base; the Western nations and Saudi Arabia turned down the Shah of Iran's offer of Teheran.

IFAD now has more than $1 billion contributed by rich industrialized countries and members of the Organization of Petroleum Exporting Countries—in one of the few examples of cooperation between OPEC and the West. The funds will be spent over the next three years for irrigation and other agricultural development projects in the poorest countries.

"There is no doubt in my mind that the food conference was a plus," said Lester Brown, a global food specialist who heads the Worldwatch Institute here, which does research on worldwide resources.

He criticizes the conference, saying it ignored world population growth—the demand aspect of the food problem. Nevertheless, he says, as an educational event it won the world's attention and resulted in a number of contributions to greater stability—not the least of which was the grain agreement between the United States and the Soviet Union.

This five-year accord, negotiated just after the Rome conference, set up parameters in the United States-Soviet grain trade. They were designed to lower the possibility for any repeat of the disruptions and disarray caused in the 1972-74 period by sudden and enormous Russian purchases. Moscow, by acquiring up to 32 million tons in one year, contributed to the shortages and high prices—and virtual panic—that occurred in 1974, a lean year.

The food conference asked the United Nations Food and Agriculture Organization in Rome to set up a global information and warning system on food. The F.A.O. has done so, but so far neither the Soviet Union nor China, both conference participants, has cooperated with the F.A.O. Despite this, American and Soviet experts exchange visits in crop areas.

China has also turned more cooperative. For example, Peking has arranged an exchange program with a United Nations agricultural research center in Mexico City under which United Nations specialists now visit Chinese agricultural communes.

Even attitudes toward food itself were influenced by the Rome meeting, and new impetus was given to projects to change eating habits.

In Senegal's low-moisture soil it is practically impossible to grow wheat and rice. To avoid costly imports, this Sahelian country, one of the most severely affected by the 1972–74 drought, is now developing new ways to prepare the sorghum, millet and corn that can be cultivated. A tasty "instant" millet cous-cous is said to be growing in popularity. Millet flour is also being used in bread.

"We have a better focus now on food priorities and a better institutional framework to deal with them," said Edwin M. Martin, who led the American delegation to the Rome conference.

Mr. Martin now heads a consultative group on food production and investment in developing countries, another outgrowth of the conference. His group, cosponsored by the F.A.O. and the United Nations Development Program, links food production and investment to nutritional needs in projects it has

under way in Bangladesh, Senegal and Honduras. It is developing others in Haiti, Upper Volta and Tanzania.

Food, says Mr. Martin, is probably the most promising sector for cooperation between developed and developing countries. "It's the area where we have common interests," he commented. "Take food prices, for instance. The American consumer doesn't want high prices any more than the Indian consumer."

WORLD HUNGER AND POLITICAL WILL

The eradication of hunger and malnutrition, the bold goal affirmed by governments at the 1974 U.N. World Food Conference, is essentially a matter of political will. The major obstacles to its realization are, according to most observers, less technical than political. The missing link is not in knowing what needs to be done to end the chronic malnutrition of an estimated five hundred million persons, but rather in doing it.

Governments concerned with addressing chronic hunger face difficult political choices. Developing and developed countries must hold in tension the desirability for low food prices for consumers, particularly the poor, and the need for production incentives for farmers. Measures which generate welcome employment opportunities and which increase the purchasing power of the poor can at the same time fuel inflation.

Developing countries which seek within the limits of tight budgets to improve the quality of life in rural areas, where most hungry people live, must simultaneously cope with more visible needs and frequently more explosive situations in urban areas. Considerable political risk may be involved in undertaking such anti-hunger measures as democratizing land-holding patterns, extending agricultural extension and credit to small farmers, recognizing the rights of women and minorities, and mounting special programs for nutritionally vulnerable groups. Growing food crops for local consumption rather than cash crops for export runs the risk of alienating powerful land owners and trading interests.

Developed countries such as the United States have political problems of their own which constrain their would-be anti-hunger efforts. A difficult balancing act is required simultaneously to reduce unemployment and poverty in the U.S. and to allow the freer trade which developing countries need to reduce their unemployment; to find foreign markets for U.S. agricultural abundance and at the same time promote increased food production in poorer nations; and to increase spending for social programs in the U.S. and for development aid to other countries. The tensions between spending for hunger alleviation here and abroad on the one hand and for outlays for U.S. national defense on the other are well known.

Wherever hunger and malnutrition exist, their eradication involves political decisions and political risks. While hunger solutions are frequently complex, the central issue is for the most part not what governments should do, but whether they are willing. Hunger No. 12 examines the political willingness of governments to act—first, from the vantage point provided by the World Food Council and then as reflected in the Carter Administration's recent decision to create a national grain reserve and to limit U.S. planted acreage.

AN INTERNATIONAL VANTAGE POINT

The United Nations World Food Council provides probably the best international vantage point on world hunger and political will. An outgrowth of the World Food Conference, the Council monitors the changing world food scene, makes specific recommendations for action, and provides a forum where political will can be brought to bear on hunger-related issues. The Council, made up of 36 member governments and a small full-time professional staff, draws on the work of other intergovernmental agencies and reports to the United Nations General Assembly. Its annual sessions serve as a barometer of the state of international and national political will regarding hunger and malnutrition.

The World Food Council held its third annual meeting last June in Manila, the Philippines, with encouraging results. Taking stock of the continuing world food crisis, governments acknowledged the need to speed up changes in the global food system—a system which leaves at least one of every eight persons on the planet inadequately nourished. Governments also reaffirmed with a new seriousness the compact made at the World Food Conference among developing countries, developed countries, and international organizations to combat hunger and to improve nutrition. In the process, the World Food Council itself has begun to emerge as "The Little Engine That Could," generating political momentum on the unfinished hunger agenda.

STEMMING THE EROSION OF POLITICAL WILL

The Council sounded an international hunger alarm. Reviewing recent developments, governments concluded that the past several years of good crops world-wide have proved something of a mixed blessing. The crippling food shortages of 1972–74 have passed, the high prices of agricultural inputs have eased, more aid has been made available by wealthier nations, and world grain stocks have been substantially rebuilt. On the other hand, the diets of the chronically malnourished are not much improved. Food aid shipments have been inadequate both in tonnage and in nutritional impact. Food stocks are not yet managed in coordinated fashion. The financial resources for development are still not available either within poorer countries or in the form of outside aid. Recent food production gains could be quickly erased with the return of unhelpful weather. In short, the return of better crops has failed to bring durably improved nutrition to the world's poor. It has contributed instead to a reduced willingness on the part of governments to take difficult political steps to address the underlying causes of chronic hunger.

Faced with these ominous developments, the Council sought to rekindle languishing political will. It did so by persuading governments to renew their commitments to move against hunger. The "Program of Action to Eradicate Hunger and Malnutrition" adopted in Manila stressed direct action essentially along the lines agreed to at the World Food Conference in 1974. The Program is an integrated set of measures, the goals of which are to grow more food, particularly in developing countries; to establish national and international food reserves; to create more reliable and developmental food aid; to move toward a more open system of world food trade; and, through these and other measures, to improve nutrition for the chronically poor.

The goal of reaching a four percent annual growth rate for agricultural production in developing countries was reaffirmed, coupled with a call for the devotion of more resources to agriculture both in the budgets of developing countries and in development assistance flows. Countries with grain surpluses were urged to convert at least a portion of their stocks into consciously held and managed grain reserves, and international aid to developing countries for the purpose of building and maintaining reserves was called for. The need for national nutrition policies was again flagged.

How significant is the reaffirmation of commitments first made three years ago? There is hope in the fact that governments in Manila did not minimize the scale of the problem and in fact adjusted upwards their estimates of the cost of coping with it; that they singled out for special assistance in efforts to increase food production a group of "food priority countries"; that they gave new prominence to the need for an international network of national grain reserves; that they accentuated the need for more responsive food aid and for measures to trim post-harvest losses and to build better on-farm storage; and that they sought to energize United Nations food and development agencies.

Equally important, the Council adopted a "can do" approach to hunger. Developing countries played an active and constructive role, particularly in the person of the Council's new President, Philippines Agriculture Minister, Arturo R. Tanco, Jr. Agriculture Secretary Bob Bergland, the first Cabinet-level U.S. participant in a Council meeting, underscored President Carter's hunger concern and his own interest in having the U.S. play a leadership role. "Food must be an area of international cooperation, not international conflict," he told the delegates. "Problems of hunger and malnutrition must bring forth the best of our national political commitments. Food must not be regarded as a weapon or as an issue which divides us in either purpose or action." The Council itself thus became a new source of confidence in the international community's ability to address the hunger issue.

The true test, however, is not in what is said at international meetings. It is in the hard political steps each country, developing and developed, takes—or defers from taking—to put the chronically malnourished out of nutritional danger. And, of course, ultimately, the key is perhaps not so much what governments themselves do but what they encourage people to do, whether farmers or consumers, grain merchants or the poor, rural or urban citizens.

STEPS BY THE UNITED STATES

The Carter Administration announced on August 23 two actions of far-reaching importance. The U.S. is moving at once to develop national food reserves of 30–35 million metric tons and is encouraging U.S. farmers to plant 20% less wheat acreage during the 1977/78 crop year. An illuminating example of the positive application of political will to food problems, these decisions deserve careful review from the standpoint of their effect on U.S. and international efforts to eradicate hunger and malnutrition.

THE GRAIN RESERVES DECISION

The President's action on reserves appears to represent a major breakthrough, both within the U.S. and at the international level, toward creating an enduring system of world food security. The decision is widely expected to have a beneficial impact on a hungry world. It follows in large measure our reasoning and recommendations in Hunger No. 8, Grain Reserves (March, 1977).

Anticipating the legislative authority granted by Congress in the new omnibus farm farm bill,[1] the Carter Administration announced a policy which goes quite a way toward managing U.S. food stocks in a manner consistent with the need for assured food supplies at reasonably stable prices in this country and abroad. The reserve package has two features: an international emergency food reserve of up to six million metric tons and a separate market stabilization reserve of about 23–29 million metric tons. If reserves are built up to the maximum levels, about one third of U.S. end-year stocks would be incorporated into the reserve system.

---

[1] The new farm legislation and other steps taken by the Congress this year are the subject of Hunger No. 11. Political Action for the Sake of the Hungry (August 1977).

The U.S. International Emergency Food Reserve, for which the Administration is requesting additional legislative authority, is to be comprised of grain purchased and owned by the U.S. government. Portions will be released as food aid in response to urgent need overseas, with the reserve replenished with newly purchased commodities. Carefully isolated from the U.S. market and from use in the country, the emergency reserve will assure the availability of U.S. food aid in time of short supply. It should also spur the creation of international emergency reserves, of which this would be the U.S. component.

The second feature of the Administration's reserve decision is the creation of a market stabilization reserve. It will be composed of wheat, feedgrains, and rice held under the price support loan program. Farmers are encouraged to take out loans from the U.S. government, using their grain as collateral. If the market price remains below a certain level when the loan comes due, farmers may forfeit their crops and keep the loan money. If market prices are above the loan level, farmers generally opt to repay the government in full, reclaiming their grain and then selling it in the market. The grain under loan remains owned by farmers, normally in on-farm storage. In order to build farmer-owned and managed reserves, farmers will now also be allowed to extend their loans for an additional three years. The government through a variety of devices can encourage or discourage the sale or non-sale of the grain. Grain forfeited to the government must also be managed by USDA according to pre-arranged ground rules.

By removing grain from the market when prices are low and releasing grain onto the market when prices are high, the market stabilization reserve should operate to avoid the wide price swings of recent years. By using farmer-held storage in privately owned facilities and by stipulating reasonably high release, the reserve plan seems likely to avoid the pitfalls of attempts in decades past to manage stocks through government ownership and with release at lower prices.

The Administration's decision to create reserves of these two sorts, says an Agriculture Department official, reflects "the President's desire to be a leader in the fight against world hunger." It makes constructive use of agricultural abundance which previous administrations of both parties had viewed as "burdensome surpluses." Coming at a time when action by other governments on reserves has been lacking, the decision may well energize negotiation of an international wheat agreement. That agreement would provide a global framework for a common approach to the management of individual national wheat stocks.

The acreage reduction decision

The Administration's second decision—to institute acreage set-asides designed to reduce next year's production by about 20 million metric tons—has proved more controversial. Is it wise to reduce U.S. grain production at a time when chronic malnutrition and localized food shortages still exist and when the behavior of the world's weather and its governments remains somewhat unpredictable? Our conclusion is that acreage restrictions of the sort announced do not represent a significant threat to a more equitable and just world food policy and may, in fact, be a positive step toward buttressing the food production base here and abroad. Since this conclusion runs counter to what many in the religious community might expect, we wish to review the objections of critics in presenting our own view.

Some critics of the set-aside decision say that average reductions are unnecessary. They point out that while current U.S. stocks look large, they are not significantly larger than those which existed in 1972/73, just prior to their rapid depletion following poor harvests in many countries. Other critics, while conceding that sagging farm prices do create hardships for U.S. farmers, hold that a set-aside far larger than 20 perecnt would be needed to have a salutary impact on farm income. Still others fear that a set-aside program by the U.S. is likely to have serious diplomatic repercussions abroad and to inflate food prices at home.

At the heart of the set-aside decision, in our view, is the need to put a firm floor under grain prices received by U.S. farmers and to curtail the erosion of the agricultural base in this country. U.S. farmers, having, experienced a collapse of grain prices in recent years, are in indisputably serious economic straits. Farm prices are now lower in real terms than in 1970. Farm operating expenses have risen by 61% in the 1970s; farm debt has grown from $59 billion to $94 billion in the same period. The pressure has been greatest on family farms, tens of thousands of which have gone out of business.[2]

A set-aside decision will not, to be sure, solve the problem of U.S. agriculture. Low farm prices are only one of several factors creating difficulty for U.S. farmers, and government programs themselves (perhaps including the newly announced set-aside decision) have traditionally benefitted larger farmers more than smaller ones. Nonetheless, large uncontrolled grain stocks, with resultant low prices, are likely to cause marginal producers to fail and might even threaten the family farm basis of U.S. grain production. The decision to reduce acreage is therefore at least potentially helpful to American producers and U.S. agriculture.

Acreage restrictions do not, of course, decrease the involvement of the U.S. government in American agriculture. Most farmers, however, seem ready to accept a set-aside in conjunction with other policy measures, including price support loans, target price payments, and (with adequate safeguards) the accumulation of reserves. Taken together, these measures represent for most farmers an acceptable group of policy tools. Even these various measures, exercised in concert during the coming year, may fail to bring farmers' operations out of the red. They represent, however, the beginning of a more balanced approach to U.S. agricultural policy, the benefits of which may be substantial in subsequent years.

Some critics feel that acreage set-asides are not necessary since the new farm legislation seeks to guarantee farmers their out-of-pocket production costs. In our view, however, the government has a legitimate interest in limiting its expenditures under the price support program. Even if the proposed acreage restriction does not move crop prices above target price levels, lower rather than higher federal price support outlays are preferable. Furthermore, while production costs vary widely from region to region and even from farm to farm, average costs of production may well be significantly higher than the figures incorporated into this year's farm legislation.

Is the set-aside decision a risky one, gambling away 20 million metric tons of the 30–35 million ton security newly afforded by the reserves decision? The Agriculture Department answers this question in the negative, basing its projections on weather conditions likely to occur in at least 19 years out of 20. Given the "most likely" weather, U.S. production levels which would result in "burdensome" stocks without a set-aside, would yield "adequate" stocks with the announced set-aside. Even after a year of weather worse than any in recent years, stocks would still be greater than those in any year since 1972/73. Successive years of unusually bad harvests worldwide could prove troublesome if acreage restrictions were in effect, but the set-aside has been announced for a single year and will be reviewed before it is extended.

The grain tonnage involved further minimizes the risk of the decision. The set-aside would reduce actual grain production (as opposed to planted acreage) by only an estimated 8 percent or 20 million metric tons. (Unofficial predictions foresee grain production reduced by only 3 percent as a result of the set aside.) Twenty million tons represents a small fraction of total annual world grain production of more than 1.3 billion tons. Even with the announced restrictions, U.S. grain stocks next year are not expected to be drawn down below current levels. In fact, a small build-up is expected, as is indeed desirable, to offset increased demand and population growth. The limited cutback in production is not expected to affect prices for consumers, among whom the poor are of particular concern. In any case, consumer prices are only indirectly related to prices received by farmers. Producers currently receive 3–5¢ for the wheat in a 60–70¢ loaf of bread. With all of this in mind, the set-aside seems unlikely to decrease food security as it limits increases in U.S. stocks.

Decision helpful to developing countries

What of the criticism that intentionally growing less food could prove a liability to the U.S. in its dealings with a still hungry world? Fence-to-fence production and excessive U.S. surplus stock accumulation not only pose a long-range threat to U.S. agriculture. They may also be a major disservice to developing countries. The decision to reduce U.S. acreage may thus be helpful in indicating to other governments, developed and developing alike, that the U.S. does not see itself functioning as the world's granary. Instead the U.S. seeks more equitable burden-sharing arrangements with other nations. It may also send a message to developing countries that U.S. food exports in the future will be available at more stable but higher prices. This message could stimulate local production in developing countries, production which otherwise might be discouraged by the availability of cheaper food from outside. U.S. setasides may also encourage other nations, both rich and poor, to build their own grain reserves rather than to rely on imports from the United States. Unless there is a wide sharing in food production increases and in the holding of reserve stocks, there will in the future as in the past be a widely uneven sharing in food shortages.

All of these considerations suggest to us that the Administration's acreage set-aside plan for wheat is reasonable. We clearly would not object to the accumulation of even substantially larger stocks of grain once international mechanisms are in place to distribute the carrying burden equitably. Without such mechanisms, it seems to us that producers in both developed and developing countries would disproportionately bear the costs of a further build-up of grain stocks. We recommend that the set-aside program be carefully reviewed during its year of operation in the light of the changing world agricultural picture before it is extended to any subsequent year.

We therefore applaud the Administration's decision on reserves and support its announced plan of acreage restrictions as an interim measure in a poorly functioning international food system. We urge the Administration to take complementary and supportive initiatives with respect to food aid, development assistance, and other U.S. economic policies. These measures together hold the promise of playing a major role in helping to make the world's food system work for everyone.

---

[2] For a definition of "family farm" and more details on the changing character and structure of American agriculture, see Hunger No. 7, Family Farming and the Common Good (February, 1977).

THE PERSISTENCE OF HUNGER AMIDST PLENTY

What can be said of an international food system which allows the wide extremes of glut and want to exist side-by-side on a single planet? The system is simply not functioning adequately. World hunger is a major product of such malfunctioning and the world's hungry are the major casualties. What the world really needs is *more* food rather than *less*, coupled with more equitable distribution of existing food.

That is the message of the World Food Council. That is the context in which the twin U.S. decisions must be placed. U.S. grain reserves will help provide greater durable world food security. Acreage set-asides should be seen as a useful interim measure until production and consumption, human needs and effective economic demand can be brought into better balance.

Large supplies of grain, wherever located and however low in cost, are not by themselves an answer to world hunger. In the words of a recent study by the International Food Policy Research Institute, "only a development strategy whereby (food production) gains are widely shared through increased income for the poorer sections of the population can deal with the problems of inadequate food consumption." Increased food production in the developing countries must take place within the framework of overall development strategies which incorporate employment generation and other measures to increase the purchasing power of the poor. Improved delivery of rural services such as education, health and family planning, transportation, marketing, credit, and agricultural extension often must be accompanied by major structural reforms in matters such as land tenure, taxation, and political process. Perhaps most basically, the poor themselves must be involved as full participants in their own self-development. As noted earlier, such changes, while widely agreed upon in principle, can be politically troublesome in practice.

With such a broad and difficult agenda confronting the developing countries, it is important that U.S. policies help rather than hinder them in taking the political steps necessary to promote broad-based developments. Forthcoming U.S. policies, themselves involving an element of political risk, will be contingent upon the nurturing of a broadly based U.S. constituency for more wide-ranging and responsive efforts to eradicate hunger and malnutrition at home and abroad.

NOTICE CONCERNING NOMINATION BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nomination has been referred to and is now pending before the Committee on the Judiciary:

John H. Cary, of Tennessee, to be U.S. attorney for the eastern district of Tennessee for the term of 4 years vice John L. Bowers, Jr.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in this nomination to file with the committee, in writing, on or before Tuesday, December 6, 1977, any representations or objections they may wish to present concerning the above nomination with a further statement whether it is their intention to appear at any hearing which may be scheduled.

NOTICE CONCERNING NOMINATIONS BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

Julian K. Fite, of Oklahoma, to be U.S. attorney for the eastern district of Oklahoma for the term of 4 years vice Richard A. Pyle.

Rex O. Presley, of Oklahoma, to be U.S. marshal for the eastern district of Oklahoma for the term of 4 years vice Laurence B. Beard.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Tuesday, December 6, 1977, any representations or objections they may wish to present concerning the above nominations with a further statement whether it is their intention to appear at any hearing which may be scheduled.

COMMITTEE ON THE JUDICIARY REPORT

Mr. EASTLAND. Mr. President, I ask unanimous consent that a report from the Senate Committee on the Judiciary pursuant to section 302(b) of the Congressional Budget and Impoundment Control Act of 1974, distributing the committee's allocations under the second concurrent resolution for the fiscal year 1978, be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

COMMITTEE ON THE JUDICIARY: REPORT TO THE SENATE PURSUANT TO SECTION 302(b) OF THE CONGRESSIONAL BUDGET ACT OF 1974; ALLOCATIONS OF 2D CONCURRENT RESOLUTION AMOUNTS FOR FISCAL YEAR 1978

[In millions of dollars]

Program function—	Direct spending jurisdiction: Budget authority	Direct spending jurisdiction: Outlays	Entitlements requiring appropriations action: Budget authority	Entitlements requiring appropriations action: Outlays

800—General Government	228	228		
Committee total	230	223	104	103

[1] Less than $500,000.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senate stand in recess awaiting the call of the Chair.

There being no objection, at 1:34 p.m. the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 2:57 p.m., when called to order by the Presiding Officer (Mr. MELCHER).

RURAL HEALTH CLINICS SERVICES—CONFERENCE REPORT

Mr. TALMADGE. Mr. President, I submit a report of the committee of conference on H.R. 8422 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 8422) to amend titles XVIII and XIX of the Social Security Act to provide payment for rural health clinic services, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of November 29, 1977.)

Mr. TALMADGE. Mr. President this report, approved by the House of Representatives earlier today, relates to the rural health clinic amendments to medicare and medicaid.

These amendments to medicare and medicaid are necessary to expand the availability of medical and nursing care to the old and to the poor in those rural areas where physicians are often few, far between, or not to be found.

Rural clinics legislation was originally sponsored in this Congress by Senators CLARK and LEAHY, joined by many of our colleagues.

Senators BENTSEN, DOLE, and I subsequently offered an essentially similar proposal in the Senate.

Basically, H.R. 8422 authorizes payment by medicare and medicaid for the reasonable costs of services provided by physician assistants and nurse practitioners in rural clinics which meet appropriate standards.

The bill requires general direction of a clinic's professional activities by a doctor but it does not require that he be physically present in the clinic when services are provided.

Mr. President, this bill will not solve all of the health care problems in underserved rural areas.

It will, however, help deal constructively and responsibly in answering some of those problems. If my distinguished ranking minority member has a statement to make, I shall yield for that purpose at this time. Then I shall move the adoption of the conference report.

Mr. DOLE. Mr. President, the distinguished chairman of our subcommittee, I think, has explained the legislation. Certainly, it was Senator TALMADGE's leadership that made this legislation possible. I commend him for his dedication.

The availability of health care to our citizens is of concern to each of us in this room. It is, however, of particular concern to those of us who represent rural populations, though the inner city areas of many major metropolitan cities are also experiencing a health care crisis. Currently, about 1,500 of the 3,000 counties in the United States and numerous subcounty areas are officially classified as medically underserved. More than 20 percent of the population lives in these areas. To people in these areas access to health care providers and facilities is of critical importance. Unfortunately, reliance on the traditional health care delivery system is not meeting the needs in many instances.

Rural areas have experienced increasing difficulties in recruiting and retaining physicians. In my own State of Kansas, there are approximately 52 primary care physicians per 100,000 population. Because of statistics such as this, we must continue to emphasize the need for more physicians in these areas and support programs such as the National Health Service Corps, but also look to other professionals who are qualified to provide high quality medical and nursing care.

Many States have turned to the utilization of nurse practitioners and physician assistants. This legislation is designed to encourage, and not inhibit, as present law does, this utilization. Of course, it is not our intention to supersede any State Nurse Practice Acts, Medical Practice Acts, or laws regulating the practice of physician assistants.

The contribution of nurses and physician assistants, as members of the health care team, to the well-being of the public has certainly been seen by many of us over the years. The citizens of Kansas have benefited from many of these individuals, such as Ruth Murphy, a well-known and respected Kansas Public Health nurse, and the recipient of the first American Nurses Association honorary nurse practice award.

There is no doubt that these professionals have a tremendous potential that, if utilized appropriately, could be of untold help to rural citizens.

This legislation has undergone a great deal of examination by many individuals. With the leadership of my distinguished colleague, Mr. TALMADGE, the Finance Health Subcommittee attempted to deal with many of the questions and concerns that were raised. It is my belief that this conference report incorporates these points.

I am particularly pleased that a variation of my amendment to reimburse clinics who, in the absence of a home health care agency, provide part-time or intermittent nursing services and related supplies, furnished by a registered nurse or a licensed practical nurse to homebound patients, was accepted by the conferees.

I am also pleased to note that my request for a study of the advantages and the disadvantages of extending medicare coverage to community mental health centers with the additional suggestion to include in the study centers for the treatment of alcoholism and drug abuse, was also agreed upon.

Many of these centers provide the only mental health care in a community. Insufficient study and discussion on what we expect of these clinics and how we believe the clinics should operate has taken place. Before we proceed with any legislation that would set forth new methods of reimbursement, we must have these answers.

Mr. President, I believe this legislation is a significant step toward providing health care to those who are medically underserved. I, therefore, with my distinguished colleague, urge favorable consideration of this conference report.

Mr. HATHAWAY. Mr. President, I rise in support of the conference report on H.R. 8422, the rural health clinics bill. The bill provides for reimbursement under medicare for services performed in rural health clinics, including those performed by nurse practitioners and physician assistants. It also mandates coverage of these services under medicaid.

Passage of this bill will mean greater access to medical services for our Nation's rural residents. Many of these people have been deprived of adequate medical care in the past due to critical shortages of physicians. To date, many small, isolated communities have not been able to attract or retain a physician. In Maine, for example, there are 70 communities which lack adequate coverage by doctors, according to Federal standards. The problem is magnified by the fact that rural populations have a higher proportion of elderly and disabled persons as well as more illness than those in urban areas. Many indicators of health status point up a serious and growing disparity in the health of rural Americans compared to that of the general population.

The unadjusted death rate for Maine, for example, is among the highest in the Nation. Infant mortality is high, although the last decade has shown some marked improvements. Death rates for heart disease, cancer, stroke, lung disease, and cirrhosis are all greater for Maine than for the Nation as a whole as well as for New England.

Because of physician shortages, residents of rural areas such as Maine have come to rely on clinics which do not necessarily follow the traditional model of physician delivery of medical services. Often, the clinics are staffed by nurse practitioners and physician assistants, frequently the only available medical personnel in the area. These health professionals are specially trained to provide primary medical care services traditionally performed only by physicians. There is physician supervision, but a physician is not generally physically present when the services are performed. Due to the activities of nurse practitioners and physician assistants, many Americans are able to receive the medical attention which they sorely need. The services performed by these professionals are extremely valuable and should be encouraged.

Unfortunately, however, current law has failed to provide this encouragement. At present, services performed by nurse practitioners and physician assistants are not reimbursable under medicare unless they are provided under the supervision of a physician on the premises and incident to his or her services. In addition, State medicaid plans are not required to cover the services of nurse practitioners and physician assistants, and many do not. The situation is further aggravated by the fact that private insurance coverage for these services has been unavailable or inadequate.

This lack of coverage has resulted in hardship for many of our Nation's rural residents. Many of these people depend on medicare and medicaid to help pay for their costly but essential medical bills. Since the only available services are not eligible for reimbursement under medicare and medicaid, they must be paid for out of pocket by the patient, supported through a grant, or treated by the clinic as a bad debt. The inability of rural health clinics to collect consistently from either medicare, medicaid, or private insurance has contributed greatly to their financial instability. Nearly all of these clinics face an uncertain financial future. In fact, many clinics have been forced to close because of difficulties in obtaining long-term funding. This leaves the rural residents without any medical care at all.

The legislation before us helps to remedy the situation by providing medicare coverage for rural health clinic services performed by nurse practitioners and physician assistants without requiring the physical presence of a physician. It also requires State medicaid programs to provide for such services. Of course, arrangements for physician supervision must be made and clinic policies must be developed to govern the delivery of covered services. Furthermore, the bill requires appropriate procedures for utilization review as determined by the Secretary of Health, Education, and Welfare. This will help to insure high quality health care, while avoiding unnecessary services, and, consequently, needless expenditures.

The rural health clinics conference agreement also permits medicare and medicaid coverage for certain home health services provided by rural health clinics, where there exists a shortage of home health agencies. Furthermore, the bill requires the Secretary of Health, Education, and Welfare to submit a report within 6 months on the advantages and disadvantages of extending medicare coverage to mental health centers. This report will include separate evaluations for centers for the treatment of alcoholism and drug abuse.

Mr. President, as a cosponsor of the rural health clinics bill and a member of the conference committee, I have been following the progress of this legislation with great interest. I am confident that its enactment will be a giant step forward in meeting the health needs of rural Americans. I urge my distinguished colleagues to approve this measure.

Mr. LEAHY. Mr. President, it has been my privilege to work with the distinguished Senator from Iowa (Mr. CLARK) on this landmark legislation. The hearings we held in Iowa, Vermont, and Washington demonstrate its need.

Mr. President, I ask unanimous consent that Senator CLARK's statement on this bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR CLARK

Nearly ten months ago, Senator LEAHY and I introduced a bill—S. 708—to provide Medicare payment to rural health clinics. Fifty-seven other senators joined us in this effort, demonstrating broad support from both parties and across the ideological spectrum. Today I am very proud that this effort has finally come to fruition.

With the passage of H.R. 8422, the rural health clinic bill, Congress has committed itself to the proposition that rural citizens deserve equity in federal health insurance programs. It represents a message to policymakers that all communities, no matter how small, should have some source of health care services and that these services should be compensated.

H.R. 8422 corrects a serious obstacle to primary health services in rural, medically underserved areas—those parts of this country that lack an adequate supply of health manpower and basic health services. Under existing law, medicare and most state medicaid programs fail to pay for services provided by nurse practitioners or physician assistants, unless a supervising physician is present. H.R. 8422 removes this requirement, while insuring that there is adequate physician supervision of the medical services offered by a rural health clinic.

The reimbursement problem, which translates into financial disaster for many clinics and which discourages the development of new ones, was brought to our attention through a series of hearings that Senator LEAHY and I have conducted over the course of the past 2 years in the Midwest and in New England. This culminated in a hearing by the Senate Rural Development Subcommittee in Washington last March, at which we heard testimony from citizens from every corner of the nation and from health association representatives.

Following these hearings, and after discussions with 20 organizations that supported the legislation, we and the Senate Finance Committee broadened the scope of S. 708 in a way that significantly improves it. This legislation, as passed, now applies to the medicaid programs in every state as well as to the federal medicare program. Also, H.R. 8422 authorizes a large-scale demonstration program in urban, medically underserved areas so that we have sufficient information to consider extending the permanent program to those areas.

For the remainder of my remarks, I intend to briefly discuss the contents of H.R. 8422 as approved by Congress.

PROVISIONS OF H.R. 8422

H.R. 8422—the Rural Health Clinic Bill—provides coverage under Medicare and Medicaid for rural health clinic services. These services include physician services, services and supplies that would be covered as an incident to a physician's service, and additional services provided by physician assistants or nurse practitioners as authorized by state law and policies.

Rural health clinics are designated as such if they meet a number of requirements to insure high quality health care. These requirements are: arrangements with physicians for the supervision of medical services; the preparation of protocols for medical care and treatment by physicians; the availability of physicians for referral, consultation, and emergency assistance; clinical records; arrangements with hospitals for referral or admissions; written management policies; appropriate drug policies; appropriate procedures for utilization review; routine diagnostic services; and emergency drugs.

Since the legislation is directed at addressing the access problems of those with the greatest needs, clinics must serve patients who reside in areas that have been designated by the Department of H.E.W. as "medically underserved areas": or as "primary medical care manpower shortage areas". Existing rural, non-profit clinics not located in these designated areas would also qualify.

"Rural" would be defined in such a way as to include all communities that would be commonly considered as rural by size and by other characteristics. All communities that are not classified as "urbanized" by the Bureau of the Census (those of 50,000 population or more) would be considered "rural".

This legislation has the potential of assisting 31.6 million Americans who live in small towns and rural areas which are "medically underserved", in that health clinics that serve or will serve these people can be more financially viable.

Federal reimbursement would be continued to clinics located in areas that lose their designations as "medically underserved" so that physician-shortage areas are not discouraged from attempting to attract doctors.

The bill defines "physician assistant" and "nurse practitioner" as health providers (including nurse midwives) who perform, under the supervision of a physician, such services as legally authorized by state law or regulations. Therefore, reimbursement would be permitted in all states, except for those that specifically prohibit the provision of health services by nurse practitioners and physician assistants.

H.R. 8422 would not invalidate any state law concerning the use of these health providers, although it would allow the Secretary of H.E.W. to require standards for reimbursement that go beyond what some states now prescribe by law or regulation.

Reimbursement under both Medicare and Medicaid would be related on a reasonable basis to the actual costs of providing the covered health services. It is my hope that the Department of H.E.W. will develop reimbursement procedures that do not produce administrative burdens upon the small health clinics that use nurse practitioners or physician assistants.

I am especially attracted to the concept of a prospective system of payment, which would relieve clinics and H.E.W. of much of the needless billing procedures that are associated with a retrospective approach.

The bill does instruct the Secretary of HEW to study the desirability and feasibility of replacing the present deductible and coinsurance provisions of Medicare with a co-payment approach.

Medicare and Medicaid would cover the following costs: reasonable compensation for the services of physician assistants and nurse practitioners and any full-time physicians; the cost of services or supplies provided as an incident to the services of a physician, nurse practitioner, or physician assistant; overhead costs related to the provision of the covered services; the cost of the required supervisory services of a physician; and the patient care services provided by part-time physicians at the clinic. Covered services would include those services provided within the clinic and those provided outside the clinic walls, such as in-home services and nursing home services.

While this legislation is primarily directed toward alleviating the problem of access to health services in rural areas, the Finance Committee wisely decided to authorize a large-scale demonstration project in urban, medically underserved areas. The project would permit Medicare payment, on a cost-related basis, for the health services of nurse practitioners and physician assistants in urban health clinics. Since several questions had been raised concerning the cost of an urban component of this reimbursement program and of its potential for abuse, the Committee required the Secretary of H.E.W. to submit by January 1, 1981 a report to Congress that will consist of recommendations for the continuation of the urban program.

H.R. 8422 would also help rural clinics become designated as home health agencies. If a clinic is located in an area that lacks a home health agency, it may be approved as such regardless of whether a physician accompanies the nurse practitioner, physician assistant, registered nurse, or licensed practical nurse during the provision of services.

Finally, H.R. 8422 authorizes an H.E.W. report on the feasibility of extending Medicare coverage to mental health centers in urban and rural areas, and of coverage of preventive services furnished by rural health clinics.

Assuming that the President signs H.R 8422 prior to December 1, this new program must begin no later than February 1, 1978. But to ensure that this program takes effect on that date, the regulations should be issued no later than the first week of January, and they must be simple and easy to follow. Most of the existing clinics already receive reimbursement on a part-time basis when a physician is present. HEW should build upon this current reimbursement system, rather than establish a complicated new procedure that would be administratively burdensome for clinics.

Mr. TALMADGE. Mr. President, I move the adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. TALMADGE. I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CORRECTIONS IN ENROLLMENT OF H.R. 8422

Mr. TALMADGE. Mr. President, I ask the Chair to lay before the Senate a message from the House on House Concurrent Resolution 418 and ask for its immediate consideration.

The Presiding Officer laid before the Senate a message from the House of Representatives on House Concurrent Resolution 418 directing the clerk of the House of Representatives to make corrections in the enrollment of H.R. 8422.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, this resolution makes technical corrections in the enrollment of H.R. 8422, the rural health clinic bill, which has just been approved.

I move the adoption of the concurrent resolution.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution (H. Con. Res. 418) was considered and agreed to.

Mr. TALMADGE. I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. TALMADGE. Before yielding the floor, I want to salute my distinguished friend from Kansas, the distinguished ranking minority member on the Subcommiteee for Health, who worked hard and effectively on the legislation and the hearings thereon, also the markup of the bill and in the conference committee with the House.

I may say also that we had the complete and unanimous approval of every member of our committee on both sides of the aisle, Democratic and Republican.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT OF PRIVATE LAW 95–21

Mr. BAKER. Mr. President, I send to the desk a bill on behalf of the distinguished Senator from Wyoming and ask that it be considered.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the bill (S. 2328) to amend Private Law 95–21 to make a technical correction therein, which was read the first time by title and the second time at length.

Mr. HANSEN. Mr. President, this bill merely makes a technical correction of a typographical error in a bill passed earlier this month and signed into law on November 15, 1977.

On November 2, 1977, the Senate passed and sent to the House of Representatives H.R. 2501, an act to eliminate a conflict between the official survey and a private survey of the so-called Wold Tract within the Medicine Bow National Forest, Wyo. On November 3, 1977, the House approved H.R. 2501.

It was subsequently learned that, during the course of the various committee prints, a number contained within a legal description in the act was printed incorrectly as 1000.8 feet, rather than 100.8 feet. After a number of discussions with the Solicitor of the U.S. Department of Agriculture as well as legal experts in the State of Wyoming, it became clear that this error conveyed no more land than originally intended by the act. Under the rules of construction as well as other legal concepts, only the lands intended by the Congress will be conveyed.

The administration agreed with this assessment thus permitting H.R. 2501 to be signed into law on November 15, 1977, as Private Law 95–21.

While I believe amendment of this act, to remove the typographical error, is unnecessary, that action should be taken so as to eliminate any ambiguity which the error might cause. Thus I bring to the floor today, the bill—already cleared by both majority and minority members of the Senate Energy and Natural Resources Committee—to correct the typographical error in Private Law 95–21.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 2328) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1(1) of the Act entitled "An Act to eliminate a conflict between the official cadastral survey and a private survey of the so-called Wold Tract within the Medicine Bow National Forest, State of Wyoming", approved on November 15, 1977 (Private Law 95–21), is amended by striking "1,000.8 feet" and inserting in lieu thereof "100.8 feet".

"NATIONAL QUIET DAY"—SENATE JOINT RESOLUTION 100

Mr. DOLE. Mr. President, today I am introducing a joint resolution which requests the President to proclaim December 1, 1977, as "National Quiet Day." The reason for designating a quiet day is to call attention to urban and industrial noise, and its effect on hearing.

Mr. ROBERT C. BYRD. Mr. President, could we have quiet in the Senate Chamber?

Mr. DOLE. I think we have jurisdiction over this bill. The noise level in many American cities has been too high for a long time. Although some persons may learn to block out mentally this noise factor, there remains an element of danger.

The National Institute of Neurological and Communicative Disorders and Stroke reports that excessive noise can cause temporary, chronic, or permanent hearing losses. It further states that exposure to destructive noise may affect the development of speech and language, and listening skills. These facts carry even more import because the institute estimates that over 16 million Americans may be exposed to unsafe noise levels at their jobs. An additional 10 million city residents are also subjected to extremely high noise levels.

When faced with these facts, it is not surprising then that the most common chronic disability in the United States is impairment of hearing. Between 13 and 14 million Americans have hearing losses serious enough to affect their participation in everyday activities. Because of the magnitude of this problem, I think it appropriate that we set aside a special day to focus upon the consequences of noise pollution.

The Alexander Graham Bell Association for the Deaf has already proclaimed December 1 as "National Quiet Day." It is encouraging communities, schools, employers, and families to work together to identify extraneous noise, and to reduce or eliminate it. Not only is this an opportunity to protect children's hearing, but it is also a time to stress what can be done to compensate for hearing losses which have already been incurred.

I hope that my colleagues will support this resolution, and will join me in this effort to protect our Nation against the increasing incidence of hearing loss.

Mr. President, I had hoped that we might consider this resolution on Thursday, December 1, but after checking with the appropriate committees, I understand that that will not be possible; so I make the statement and introduce the joint resolution to support the efforts of the Alexander Graham Bell Association and others who are concerned about this noise as it affects our hearing.

Mr. President, I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. J. RES. 100

Whereas, urban noise is a major source of annoyance to both hearing and hearing impaired persons; and

Whereas, frequent exposure to loud noises may lead to a hearing loss; and

Whereas, it is appropriate to alert all citizens to the dangers of excessive noise and to the damage that can be incurred from noise pollution: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating December 1, 1977, as "National Quiet Day" and calling upon the people of the United States and interested groups and organizations to observe that day with appropriate ceremonies and activities.

DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE, AND RELATED AGENCIES APPROPRIATIONS, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 7555.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendment of the Senate to the amendment of the House to the amendment of the Senate numbered 82 to the bill (H.R. 7555) entitled "An Act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1978, and for other purposes."

UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. BROOKE be authorized to offer an amendment; that Mr. HELMS be authorized to offer a substitute amendment for the Brooke amendment; that a vote occur, up or down, on the substitute amendment by Mr. HELMS at 4 p.m. today; in the event that amendment does not carry, that Mr. HELMS be recognized to offer a second amendment; and that there be a time limitation thereon of 10 minutes, to be equally divided between Mr. HELMS and Mr. BROOKE; that a vote then occur on that amendment by Mr. HELMS; that upon the disposition of that amendment, a vote occur immediately without further intervening motion, amendment, or debate, on the amendment proposed by Mr. BROOKE.

Mr. BROOKE. Mr. President, reserving the right to object, I merely suggest to the majority leader that on the first amendment, the substitute amendment, that there be 1 minute for the Senator from North Carolina and 1 minute for the Senator from Massachusetts.

Mr. ROBERT C. BYRD. Mr. President, I so revise my request.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

(Later the following occurred:)

Mr. ROBERT C. BYRD. Mr. President, anent the unanimous-consent agreement that was entered into a moment ago with respect to the message from the House of Representatives on H.R. 7555, I ask unanimous consent that at 3:55 p.m. today the distinguished Senator from South Carolina be allowed to make a motion to recede with respect to the Senate amendment to the House amendment, which motion shall be decided without debate, and if that motion is agreed to Mr. BROOKE will then be allowed to move to concur in the House amendment with an amendment.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, it is understood, is it not, that the remainder of the order that was entered a bit earlier continues in force in conjunction with the order that was just entered?

The PRESIDING OFFICER. That is correct. The Senator is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

NUCLEAR REGULATORY COMMISSION APPROPRIATIONS, 1978—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. HART, I submit a report of the committee of conference on S. 1131 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. MELCHER). The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1131) to authorize appropriations for the Nuclear Regulatory Commission for the fiscal year 1978, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of November 1, 1978.)

Mr. HART. Mr. President, this authorization conference report represents the first legislation to come from the Senate Committee on Environment and Public Works under its newly acquired jurisdiction over nuclear regulatory issues. I believe it represents a useful first step as we exercise our legislative responsibilities over the agency. The Nuclear Regulatory Commission is charged with protecting public health and safety, and I am certain that this bill will enhance their ability to carry out that important mission.

I know I speak for all of the members of the committee in stating that the committee takes seriously its responsibility under this jurisdiction. And, as chairman of the Nuclear Regulation Subcommittee I am most grateful to all the Members who worked hard to bring this legislation to the floor.

In particular, I would like to thank the ranking minority member on the subcommittee, the distinguished Senator from Idaho, Senator MCCLURE, who spent many long hours in hearings and markup sessions on this legislation. I would also like to thank other members of the subcommittee, Senator GRAVEL, Senator MOYNIHAN, Senator ANDERSON, Senator BAKER, and Senator DOMENICI.

In addition, Mr. President, I would like to express special thanks to the distinguished chairman of the full committee and the ranking member, Senators RANDOLPH and STAFFORD whose leadership and support was most helpful.

Mr. BAKER. I would ask my distinguished colleague from Colorado if I am correct that there is no intention by this conference action to encroach upon the fiscal year 1978 DOE authorization in any respect?

Mr. HART. That is correct.

Mr. BAKER. Mr. President, I would ask the distinguished Senator from Colorado for a clarification of the language that appears in section 1(e) of the bill, which reads as follows:

(e) In the event that the license application is withdrawn or funding for the continuation of the Clinch River Breeder Reactor project is not authorized or appropriated, the total authorization in subsection (a) shall be reduced by $2,700,000.

I ask if I am correct when I interpret this section to say that there is no intention to determine the continuation of the Clinch River project through the vehicle of the authorization to the Nuclear Regulatory Commission?

Mr. HART. That is correct. The statement of the managers says that the conference report is completely neutral on the Clinch River project. If the Clinch River project continues, the language agreed upon by the conferees in section 1(e) is not intended, in any way, to restrict the activities of the NRC which are related to the licensing of the Clinch River breeder project. But if the Clinch River project does not continue, then it will be unnecessary for the NRC to continue related activities and therefore the conference report reduces the NRC authorization by the appropriate amount.

Mr. BAKER. The conference report slightly modified the language of the Senate bill, which previously said:

(e) In the event that the license application is withdrawn or the construction of the Clinch River Breeder Reactor Project is not authorized, the total authorization in subsection (a) shall be reduced by $3,700,000.

I ask my distinguished colleague from Colorado to state the intent of the modification of the language:

Mr. HART. The modified language is intended to emphasize the neutrality of the conference report on the Clinch River project. If the project continues to be authorized, related activities by NRC are expected to proceed. If funds for continuation of the project are appropriated and not contingent on a separate authorization, related activities by NRC are expected to proceed. However, if the Clinch River project does not continue, then related activities by the NRC are also expected not to continue.

Mr. BAKER. The President has vetoed the ERDA authorization bill (S. 1811) which contained $80 million for the Clinch River breeder reactor. It is very likely that the Senate will soon send the President a supplemental appropriations bill (H.R. 9375) which appropriates $80 million for the Clinch River project that can be spent without a separate authorization bill. Thus the $80 million contained in the supplemental appropriations bill is self-authorizing. Under these circumstances, the project will continue to be authorized under section 106 of Public Law 91–273, as amended.

I would like to ask the distinguished Senator from Colorado if the enactment of the supplemental appropriations bill, H.R. 9375 is sufficient to retain the $2.7 million referred to in section 1(e) of the Nuclear Regulatory Commission's authorization bill S. 1131.

Mr. HART. Yes, enactment of the supplemental appropriation bill, H.R. 9375, would be sufficient to continue funding of the nuclear regulatory research in support of the licensing of the Clinch River breeder reactor project.

Of course, until the supplemental appropriations bill becomes law its final form will not be clear, and it is not entirely clear whether that appropriation is self-authorizing.

Mr. SASSER. Mr. President, I plan to support the conference report on S. 1131, the authorization bill for the Nuclear Regulatory Commission. However, I would like to ask the distinguished chairman of the subcommittee, Senator HART, to clarify one point.

The President has vetoed the Department of Energy authorization bill, which contained authorization for $80 million for the Clinch River breeder reactor project. It will be some weeks before the Congress will have the opportunity to override or sustain that veto.

At the same time the supplemental appropriations bill is working its way

through the Congress. That bill has been approved by both the House and the Senate and contains $80 million in appropriations for the CRBR. The conference report for the supplemental must still be agreed to by the Congress before the measure is sent to the President.

I just want assurance that the language in the conference report before us relating to the Clinch River project does not prejudice any other act of the Congress. In other words, I am seeking assurance that this bill before us is neutral and does not circumvent in any way either the potential authorization or appropriation for the Clinch River project.

I ask the distinguished Senator from Colorado if I am correct that it is the intention of the conference report that if the appropriations for Clinch River are provided that there will be no reduction in funding of the NRC related to that project under the bill before us now?

Mr. HART. That is correct.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CORRECTIONS IN THE ENROLLMENT OF S. 1131

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on House Concurrent Resolution 397.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution (H. Con. Res. 397) was considered and agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the House concurrent resolution was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THIRTY-MINUTE RECESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess for 30 minutes.

There being no objection, the Senate, at 3:18 p.m., recessed until 3:48 p.m.; whereupon, the Senate reassembled when called to order by the presiding officer (Mr. HARRY F. BYRD, JR.).

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to order at any time, with one show of seconds, rollcall votes on the two amendments by Mr. HELMS and on the amendment by Mr. BROOKE.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENDANGERED SPECIES ACT AUTHORIZATIONS — CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, on behalf of the Senator from Iowa (Mr. CULVER), I submit a report of the committee of conference on S. 1316, and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the proceedings of the House of Representatives.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

DEPARTMENT OF LABOR AND HEALTH, EDUCATION, AND WELFARE AND RELATED AGENCIES APPROPRIATIONS, 1978

The Senate continued with the consideration of the message from the House of Representatives on H.R. 7555.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. HOLLINGS. Mr. President, I move that the Senate recede from its amendment numbered 82.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from South Carolina.

The motion was agreed to.

UP AMENDMENT NO. 1077

Mr. BROOKE. Mr. President, I move that the Senate concur in the House amendment with an amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. BROOKE) proposes an unprinted amendment numbered 1077:

None of the funds contained in this act shall be used to perform abortions—

Mr. BROOKE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter inserted by the House, insert the following:

SEC. 209. None of the funds contained in this Act shall be used to perform abortions:

Except where the life of the mother would be endangered if the fetus were carried to term;

Or except for such medical procedures necessary for the victims of rape or incest, when such rape or incest has been reported to a law enforcement agency or public health service or its equivalent;

Or except in those instances where severe and long-lasting physical health damage to the mother would result if the pregnancy were carried to term.

Nor are payments prohibited for drugs or devices to prevent implantation of the fertilized ovum, or for medical procedures necessary for the termination of an ectopic pregnancy.

The Secretary shall promptly issue regulations and establish procedures to ensure that the provisions of this section are rigorously enforced.

The PRESIDING OFFICER. The Senator from North Carolina.

UP AMENDMENT NO. 1078

Mr. HELMS. Mr. President, I have an amendment at the desk which is in the nature of a substitute, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 1078 in lieu of the language proposed by the Senator from Massachusetts (Mr. BROOKE).

In lieu of the language proposed to be inserted by the Senator from Massachusetts, insert the following:

SEC. 209. None of the funds contained in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.

Mr. HELMS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HELMS. Is there a time limitation on this amendment?

The PRESIDING OFFICER. The agreement states there will be a 10-minute time limitation, with the vote to

occur at 4 o'clock which has already arrived.

Mr. HELMS. Mr. President, I ask unanimous consent that Carl Anderson, of my staff, be granted the privileges of the floor during the consideration of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I will not take up much time of the Senate in connection with this amendment in the nature of a substitute, except to point out that it is the Hyde amendment which the Senate adopted last year and which is presently in effect.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina.

Mr. HOLLINGS. Mr. President, Chairman MAGNUSON has asked me to make it absolutely clear to the Members of the Senate and the administration that it is imperative that the Departments and agencies which are funded through this bill strictly follow the language contained in both the Senate report and the conference report.

Further, it is quite clear that the chairman concurs with the statements on abortion made by Senator BROOKE and fully endorses his interpretation of this important language.

Mr. BROOKE. I would direct several questions to the majority manager (Mr. HOLLINGS) of this bill because I believe it is vital we make clear the legislative intent of the provision we are acting upon. This is particularly necessary since HEW has refused to give us any interpretation in advance. We have been advised by the Department that they are looking to us to tell them the intent of the language we are recommending. We will be as precise as we can so that no doubt is left in Mr. Califano's mind as to what we intend. And we expect our intent to be carried out in the regulations the Secretary will issue.

The language makes an exception for providing "medical procedures necessary for the victims of rape or incest." It is our intention that "medical procedures necessary" not be viewed as a limitation on the length of time during which medical assistance will be available. We fully intend "medical procedures necessary" to include abortions. So long as the rape or incest has been reported to a law enforcement agency or to a public health service or its equivalent the woman is eligible for a publicly funded abortion. Am I not correct about our intent that "medical procedures necessary" does include abortions?

Mr. HOLLINGS. The Senator is absolutely correct. Moreover, I would like to make it very clear that a woman, who is a victim of rape or incest may have an abortion as long as she reports the incident.

Mr. BROOKE. The provision also requires a report to a law enforcement agency or public health service or its equivalent. Obviously a law enforcement agency includes the police—State, county, or city. But it is not exclusively these organizations. Since we are dealing with women who are victims of attack, we do not want to pile trauma upon tragedy by forcing them to go through a process that is more geared to criminals than to people who deserve our greatest sympathy. If, for example, there is a human relations division within a police department, the report could be made through such an office. A police chaplain's office could be assigned the job of receiving reports. We urge HEW, working on its own or through the Justice Department, to encourage law enforcement agencies to establish special bureaus with personnel who are trained to deal with rape or incest victims. Would you not agree this is the intent of this portion of the language on rape and incest?

Mr. HOLLINGS. That certainly is our intent. If the victims themselves make the report to a law enforcement agency, we want the arrangements to be as humane as possible.

Mr. BROOKE. Our language does not say who must make the report to the law enforcement agency or public health service or its equivalent. It is our intent that the report may be made by third parties, such as doctors, attorneys including, but not limited to legal services lawyers, rape center counselors, welfare agencies, poverty agencies or family members or relatives. Our only requirement here is that someone or some organization make the report to relevant authorities cited in the provision. Am I correct in my explanation of our intent on this matter?

Mr. HOLLINGS. The Senator is correct.

Mr. BROOKE. We also want to tell HEW what we mean by a "public health service or its equivalent." A public health service is one that serves the public in the immediate local area, or over a wider region. It could be a Government service and in many areas likely would be. But where such Government service does not exist, we intend that the private sector equivalent of such service would be eligible to receive the relevant report. Thus, in addition to services funded from public moneys we also would include services funded by a combination of public and private moneys, or even moneys totally from the private sector, if that is the best "equivalent" that can be found.

Thus, authorized recipients of reports would include, but not be limited to, family planning organizations, health maintenance organizations, rape crisis centers, health and counseling centers run by local charitable organizations, special phone-in counseling services, or any kind of neighborhood or other health or counseling center for people with problems.

We also intend that HEW make certain the health center alternative is, at a minimum, available to each community and within easy reaching distance. We do not want to find situations where HEW has not made a good faith effort to provide the alternative of reporting to a health center. Would the distinguished manager from the State of South Carolina agree with my definition as to what we mean by a "public health service or its equivalent"?

Mr. HOLLINGS. I emphatically do.

Mr. BROOKE. Mr. President, I would like to say in conclusion that we have voted on the Hyde amendment time and time and time again, and maybe more times than that. The Senate has rejected the Hyde amendment. I ask the Senate to do the same thing today. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mr. ALLEN), the Senator from Indiana (Mr. BAYH), the Senator from Iowa (Mr. CLARK), the Senator from California (Mr. CRANSTON), the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Washington (Mr. MAGNUSON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from New York (Mr. MOYNIHAN), the Senator from Rhode Island (Mr. PELL), the Senator from Alabama (Mr. SPARKMAN), the Senator from Illinois (Mr. STEVENSON), the Senator from Delaware (Mr. BIDEN), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I further announce that the Senator from Missouri (Mr. EAGLETON) is absent on official business.

I also announce that the Senator from Maine (Mr. MUSKIE) is absent because of illness.

I also announce that the Senator from Washington (Mr. JACKSON) is absent because of illness in the family.

I further announce that, if present and voting, the Senator from Delaware (Mr. BIDEN), the Senator from Missouri (Mr. EAGLETON), the Senator from Nebraska (Mr. ZORINSKY) would each vote "yea."

I further announce that, if present and voting the Senator from New Jersey (Mr. WILLIAMS), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Iowa (Mr. CLARK), the Senator from Rhode Island (Mr. PELL), the Senator from New York (Mr. MOYNIHAN), and the Senators from Washington (Mr. JACKSON, and Mr. MAGNUSON) would each vote "nay."

Mr. BAKER. I announce that the Senator from Oklahoma (Mr. BARTLETT), the Senator from Nebraska (Mr. CURTIS), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), the Senator from New York (Mr. JAVITS), the Senator from Nevada (Mr. LAXALT), the Senator from Oregon (Mr. PACKWOOD), the Senator from Illinois (Mr. PERCY), the Sena-

tor from Alaska (Mr. STEVENS), the Senator from Texas (Mr. TOWER), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I also announce that the Senator from Delaware (Mr. ROTH) is absent due to a death in the family.

I further announce that, if present and voting, the Senator from New York (Mr. JAVITS) and the Senator from Alaska (Mr. STEVENS) would each vote "nay."

The result was announced—yeas 21, nays 42, as follows:

[Rollcall Vote No. 633 Leg.]

YEAS—21

Byrd, Harry F., Jr.	Hatch	Randolph
Danforth	Hatfield	Schweiker
Dole	Helms	Stennis
Domenici	Johnston	Stone
Durkin	Lugar	Thurmond
Eastland	McClure	Young
Ford	Melcher	
	Proxmire	

NAYS—42

Anderson	DeConcini	Metzenbaum
Baker	Glenn	Morgan
Bellmon	Hansen	Nelson
Bentsen	Hart	Nunn
Brooke	Hathaway	Pearson
Bumpers	Hollings	Ribicoff
Burdick	Inouye	Riegle
Byrd, Robert C.	Kennedy	Sarbanes
Cannon	Leahy	Sasser
Case	Long	Schmitt
Chafee	Mathias	Scott
Chiles	Matsunaga	Stafford
Church	McGovern	Talmadge
Culver	Metcalf	Weicker

NOT VOTING—36

Abourezk	Griffin	Muskie
Allen	Haskell	Packwood
Bartlett	Hayakawa	Pell
Bayh	Heinz	Percy
Biden	Huddleston	Roth
Clark	Humphrey	Sparkman
Cranston	Jackson	Stevens
Curtis	Javits	Stevenson
Eagleton	Laxalt	Tower
Garn	Magnuson	Wallop
Goldwater	McIntyre	Williams
Gravel	Moynihan	Zorinsky

So Mr. HELMS' amendment (No. 1078) was rejected.

Mr. BROOKE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1079

Mr. HELMS. Mr. President, I send an amendment to the desk and ask that it be considered.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes unprinted amendment No. 1079.

On line 7, insert the word "promptly" after the word "been" and before the word "reported".

The PRESIDING OFFICER. The Senate is not in order.

There is a 10-minute limitation on the amendment just offered by the Senator from North Carolina. Who yields time?

Mr. DOLE. Will the Senator yield for a unanimous-consent request?

Mr. HELMS. I am happy to yield.

Mr. DOLE. I ask unanimous consent that Sheila Burke of my staff may have the privilege of the floor during consideration of and vote on this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I yield myself such time as I may require. I ask the Chair if we may have a modicum of order.

The PRESIDING OFFICER. The Senate will be in order.

The Senate is not in order.

The Senator may proceed.

Mr. HELMS. I thank the Chair.

Mr. President, this is the simplest of all amendments. It adds one word, the word "promptly," to make the amendment of the distinguished Senator from Massachusetts read:

Except where the life of the mother would be endangered if the fetus were carried to term;

Or except for such medical procedures necessary for the victims of rape or incest, when such rape or incest has been promptly reported to a law enforcement agency or public health service or its equivalent;

Mr. President, Senators are fully aware, I am sure, of the disclosures of fraud and mismanagement in medicaid and other programs administered by the Department of Health, Education, and Welfare. Without the word "promptly," this amendment will be an invitation to additional fraud.

I cannot see how any Senator would oppose the insertion of the word "promptly" to the reporting requirement proposed by the Senator from Massachusetts. The word "promptly" before the word "reported" will eliminate the possibility that 2 or 3 months after the fact a supposed victim would claim to have been raped when, as a matter of fact, she had not. Although this proposed requirement of "promptness" applies to cases of both rape and incest this does not mean that what constitutes prompt reporting in a case of rape is identical with prompt reporting in a case of incest.

This takes away nothing from the rights of any individual and it certainly offers a measure of protection to the taxpayers of the United States.

Mr. President, I urge adoption of the amendment and I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. BROOKE addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. BROOKE. Mr. President, we have made compromise after compromise in an effort to resolve this very thorny issue which has prevented passage of the Labor-HEW appropriations bill for fiscal 1978 and the amendment of the distinguished Senator from North Carolina is just a further attempt to weaken the Senate's position.

The amendment which I have offered today is the result of still further compromises with the House of Representatives and is language which chairman GEORGE MAHON and I and several others worked on in an effort to resolve this conflict.

The Senate has never had a reporting provision in its language. So one of the compromises was that there be a report in cases of rape or incest to a law enforcement agency or public health service, or its equivalent.

That is the language which we had agreed upon, and what we are trying to do now is to send that language back to the House this evening so that they can act upon this finally and resolve this question.

I purposely did not permit others who wanted to strengthen the language, bringing it closer to the Senate language, to add an amendment. But we did enter into an agreement with the distinguished Senator from North Carolina to bring up these two amendments, one of which was the substitution of the Hyde language which the Senate has rejected time and time again, and rejected also today by an overwhelming vote.

The second one was to add another word which would further weaken our language on the reporting of rape or incest, which I hope the Senate will also reject by an overwhelming vote so that we can, at long last, Mr. President, send this language back to the House.

It is this language which has been keeping us from passing the Labor–HEW appropriations bill.

The House is there waiting now for the bill to be sent to them and, hopefully, they will take a vote on it.

The last vote where we made a compromise with the House relative to the health of the mother only failed of passage in the other body by 21 votes.

Since that time, we have made such further compromises that we feel, in all good conscience, we just cannot go any further than this and that the Senate should send it back to the House, as it has sent language back before, and hopefully the House will accept this compromise language.

I hope, Mr. President, that we will reject the amendment by the distinguished Senator from North Carolina, even though I am sure it is very well intentioned, and even though I have the greatest respect for how strongly he feels about this issue.

Mr. SCOTT. Will the Senator from North Carolina yield briefly?

Mr. HELMS. I yield to the Senator from Virginia.

Mr. SCOTT. Mr. President, I voted against my friend from North Carolina on his first amendment. I have a mixed reaction. I can see two sides on this overall abortion question.

But to ask that someone who has been molested, who has been raped, to report promptly seems like a reasonable thing.

So I would change my vote here and support the amendment of the distinguished senior Senator from North Carolina.

I think it is a reasonable thing to do and I hope that the other Senators might consider the reasonableness of the amendment.

Mr. HANSEN. Mr. President, will the distinguished Senator from Massachusetts yield?

Mr. BROOKE. Yes.

Mr. HANSEN. Mr. President, it has been a difficult time for all of us, certainly for the Senator from Wyoming. I will oppose the Helms amendment.

It seems to me that to require that the victim of incest report promptly just totally ignores what a situation is going to be. I think most of us have to recognize that only when pregnancy is likely to become obvious will the facts then be disclosed, that a little girl was the victim of incest.

I want to do everything I can. I want to be as cooperative as I can. But it seems to me, for exactly the opposite reasons, to require that a victim of incest report promptly what had happened belies the factual situation.

Mr. BROOKE. Mr. President, I thank the distinguished Senator from Wyoming. He is exactly correct.

In addition thereto, we found in many cases of rape or incest there is no reporting at all because there is a stigma attached to the victims of such incidents.

We have gone so far as to agree to have a reporting requirement written into the bill, and now adding further this word "promptly" would make the problem even worse for the victims.

Mr. HELMS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. One minute.

Mr. HELMS. I yield the remainder of my time to the able Senator from Pennsylvania.

Mr. SCHWEIKER. I thank the distinguished Senator.

Mr. President, I want to compliment the Senator from North Carolina for his leadership in this area.

I rise in support of the Senator's amendment. I think it is a reasonable amendment to add the word "promptly" in terms of requiring reporting.

I think without this amendment, the rape provision becomes a loophole. As I read this language now, it would indicate to me that a woman simply has to go into an abortion clinic and say, "I have been raped," and that would fulfill the reporting condition here.

It does not say when a rape has to be reported, and I think that circumvents the whole concept.

I think requiring "prompt" reporting is a reasonable requirement.

I hope the Senate will support the amendment.

The PRESIDING OFFICER. All time on the amendment has expired.

The question is on agreeing to the amendment of the Senator from North Carolina. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. ROBERT BYRD. I announce that the Senator from Alabama (Mr. ALLEN), the Senator from Indiana (Mr. BAYH), the Senator from Delaware (Mr. BIDEN), the Senator from Iowa (Mr. CLARK), the Senator from California (Mr. CRANSTON), the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Washington (Mr. MAGNUSON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from New York (Mr. MOYNIHAN), the Senator from Rhode Island (Mr. PELL), the Senator from Alabama (Mr. SPARKMAN), the Senator from Illinois (Mr. STEVENSON), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I further announce that the Senator from Missouri (Mr. EAGLETON) is absent on official business.

I also announce that the Senator from Maine (Mr. MUSKIE) is absent because of illness.

I also announce that the Senator from Washington (Mr. JACKSON) is absent because of illness in the family.

I further announce that, if present and voting, the Senator from Delaware (Mr. BIDEN), the Senator from Missouri (Mr. EAGLETON), the Senator from Nebraska (Mr. ZORINSKY), and the Senator from Rhode Island (Mr. PELL) would each vote "yea."

I further announce that, if present and voting, the Senator from Iowa (Mr. CLARK), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Washington (Mr. JACKSON), the Senator from New York (Mr. MOYNIHAN), and the Senator from Washington (Mr. MAGNUSON) would each vote "nay."

Mr. BAKER. I announce that the Senator from Oklahoma (Mr. BARTLETT), the Senator from Nebraska (Mr. CURTIS), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), the Senator from New York (Mr. JAVITS), the Senator from Nevada (Mr. LAXALT), the Senator from Oregon (Mr. PACKWOOD), the Senator from Illinois (Mr. PERCY), the Senator from Alaska (Mr. STEVENS), the Senator from Texas (Mr. TOWER), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I also announce that the Senator from Delaware (Mr. ROTH) is absent due to a death in the family.

I further announce that, if present and voting, the Senator from New York (Mr. JAVITS) would vote "nay."

The result was announced—yeas 23, nays 42, as follows:

[Rollcall Vote No. 634 Leg.]

YEAS—23

Anderson	Hatch	Randolph
Danforth	Hatfield	Schweiker
DeConcini	Helms	Scott
Dole	Lugar	Stennis
Domenici	McClure	Stone
Durkin	Melcher	Thurmond
Eastland	Nelson	Young
Ford	Proxmire	

NAYS—42

Abourezk	Culver	Metzenbaum
Baker	Glenn	Morgan
Bellmon	Hansen	Nunn
Bentsen	Hart	Pearson
Brooke	Hathaway	Ribicoff
Bumpers	Hollings	Riegle
Burdick	Inouye	Sarbanes
Byrd, Harry F., Jr.	Johnston	Sasser
	Kennedy	Schmitt
Byrd, Robert C.	Leahy	Stafford
Cannon	Long	Talmadge
Case	Mathias	Weicker
Chafee	Matsunaga	Williams
Chiles	McGovern	
Church	Metcalf	

NOT VOTING—34

Allen	Haskell	Packwood
Bartlett	Hayakawa	Pell
Bayh	Heinz	Percy
Biden	Huddleston	Roth
Clark	Humphrey	Sparkman
Cranston	Jackson	Stevens
Curtis	Javits	Stevenson
Eagleton	Laxalt	Tower
Garn	Magnuson	Wallop
Goldwater	McIntyre	Zorinsky
Gravel	Moynihan	
Griffin	Muskie	

So Mr. HELMS' amendment (No. 1079) was rejected.

Mr. BROOKE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HOLLINGS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the motion by the Senator from Massachusetts (Mr. BROOKE) to concur in the House amendment with an amendment.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Alabama (Mr. ALLEN), the Senator from Indiana (Mr. BAYH), the Senator from Delaware (Mr. BIDEN), the Senator from Iowa (Mr. CLARK), the Senator from California (Mr. CRANSTON), the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Washington (Mr. MAGNUSON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from New York (Mr. MOYNIHAN), the Senator from Rhode Island (Mr. PELL), the Senator from Alabama (Mr. SPARKMAN), the Senator from Illinois (Mr. STEVENSON), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I further announce that the Senator from Missouri (Mr. EAGLETON) is absent on official business.

I also announce that the Senator from Maine (Mr. MUSKIE) is absent because of illness.

I also announce that the Senator from Washington (Mr. JACKSON) is absent because of illness in the family.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PELL), the Senator from Iowa (Mr. CLARK), the Senator from Washington (Mr. JACKSON), the Senator from New York (Mr. MOYNIHAN), the Senator from Minnesota (Mr. HUMPHREY), and the Senator from Washington (Mr. MAGNUSON), would each vote "yea."

I further announce that, if present and voting, the Senator from Delaware (Mr. BIDEN), the Senator from Missouri (Mr. EAGLETON), and the Senator from Nebraska (Mr. ZORINSKY) would each vote "nay."

Mr. BAKER. I announce that the Senator from Oklahoma (Mr. BARTLETT), the Senator from Nebraska (Mr. CURTIS), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN),

the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), the Senator from New York (Mr. JAVITS), the Senator from Nevada (Mr. LAXALT), the Senator from Oregon (Mr. PACKWOOD), the Senator from Illinois (Mr. PERCY) the Senator from Alaska (Mr. STEVENS), the Senator from Texas (Mr. TOWER), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I also announce that the Senator from Delaware (Mr. ROTH) is absent due to a death in the family.

I further announce that, if present and voting, the Senator from New York (Mr. JAVITS), and the Senator from Alaska (Mr. STEVENS) would each vote "yea."

The result was announced—yeas 44, nays 21, as follows:

[Rollcall Vote No. 635 Leg.]

YEAS—44

Abourezk	Church	Metcalf
Anderson	Culver	Metzenbaum
Baker	Dole	Morgan
Bellmon	Glenn	Nelson
Bentsen	Hansen	Nunn
Brooke	Hart	Pearson
Bumpers	Hathaway	Ribicoff
Burdick	Hollings	Riegle
Byrd, Harry F., Jr.	Inouye	Sarbanes
Byrd, Robert C.	Kennedy	Sasser
Cannon	Leahy	Schmitt

Goldwater	McIntyre	Zorinsky
Gravel	Moynihan	
Griffin	Muskie	

So the motion was agreed to.

Mr. BROOKE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF TIME FOR FILING REPORT ON BLIND TRUSTS

Mr. RIBICOFF. Mr. President, I ask unanimous consent that the Governmental Affairs Committee have until February 1, 1978, to file the report on blind trusts required by section 311 of Senate Resolution 110 agreed to April 1, 1977.

The PRESIDING OFFICER (Mr. MATSUNAGA). Without objection, it is so ordered.

NO FURTHER ROLLCALL VOTES TODAY

Mr. ROBERT C. BYRD. Mr. President, there will be no more rollcall votes today.

ORDER FOR RECESS OUT OF FURTHER RESPECT TO THE MEMORY OF SENATOR McCLELLAN

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess, as a further mark of respect to the memory of our late depared colleague, Senator McCLELLAN, until 10 a.m. on Thursday.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR FILING CONFERENCE REPORT ON H.R. 6666 AT ANY TIME BEFORE 6 P.M. TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent for permission for the conference report on the legal services measure, H.R. 6666, to be filed at any time before 6 o'clock p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished minority leader.

SUBSTITUTION OF A CONFEREE

Mr. BAKER. Mr. President, I ask unanimous consent that the distinguished junior Senator from Missouri (Mr. DANFORTH) replace the Senator from Utah (Mr. LAXALT) as a conferee in the conference on the social security amendments (H.R. 9346).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the majority leader.

CONCURRENT RESOLUTION COMMENDING ANWAR EL SADAT, THE PRESIDENT OF EGYPT, AND MENACHEM BEGIN, THE PRIME MINISTER OF ISRAEL

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on House Concurrent Resolution 417.

This request, before the clerk reports, has been cleared with the distinguished minority leader, and it is made on the basis that this is an international event that is of great moment, and in view of the fact that the House of Representatives has already passed the concurrent resolution and sent it over to the Senate.

If the Senate should defer action until January, then the importance of the resolution would have been diluted, and the action on the resolution by the Senate then would not have the impact that it would otherwise have, if taken at this time.

Mr. BAKER. Mr. President, will the majority leader yield to me briefly?

Mr. ROBERT C. BYRD. Yes, I yield.

Mr. BAKER. Mr. President, I concur with the remarks made by the distinguished majority leader. Both he and I have represented on this floor to our colleagues that no new matters would be taken up except conference reports, energy matters, and other matters of important national security import, as I recall the language we used in that colloquy.

To me, this is a matter of national security importance, and if we were not at this time to deal with it, especially after action in the other body, I think that would have a significance of its own. Therefore, I entirely agree with the majority leader, and have no objection to proceeding with the matter at this time.

Mr. ROBERT C. BYRD. In addition, it is considered noncontroversial.

Mr. BAKER. That is correct.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

Mr. CHURCH. Mr. President, reserving the right to object, and I shall not object, I wish to express appreciation to the majority leader and the minority leader for making it possible for the Senate to approve this resolution at this time.

Under normal circumstances this resolution would be referred to the Committee on Foreign Relations for consideration. The text of the resolution was, in fact, discussed at a committee meeting this morning which had been called to receive a briefing on progress in the SALT negotiations. All members at that meeting agreed that the extraordinary developments in the Middle East and the noncontroversial nature of the resolution warranted its consideration by the Senate without referral to the committee. This procedure has the full support of Senator CASE, the ranking Republican member.

For the record, I wish to state that I believe this should not be viewed in any way as a precedent for the future and would certainly not be done if the circumstances did not warrant immediate action by the Congress. The resolution is a very simple one which should have the support of every Member of this body, all of whom I know share my desire for achievement of an early settlement of the conflict in the Middle East. Let us hope that the courageous steps taken by

President Sadat and Prime Minister Begin will point the way to further progress in that direction.

For the record, I would like to state further that, in addition, to members of the Foreign Relations Committee, this resolution has the active support of Senators CRANSTON, KENNEDY, MATHIAS, DECONCINI, DANFORTH, HEINZ, and BROOKE.

The PRESIDING OFFICER. Is there objection?

Mr. KENNEDY. Mr. President, reserving the right to object, I, too, wish to thank the majority leader and the minority leader for their willingness to permit the Senate to consider this important initiative at this time.

TOWARD PEACE IN THE MIDDLE EAST

Mr. President, I am pleased to cosponsor the concurrent resolution before us today on the Middle East. It rightly commends President Sadat and Prime Minister Begin for their courageous efforts to achieve a comprehensive, just and durable peace in the Middle East. It supports what will be critical efforts to build the momentum for peace created by their meetings in Jerusalem and by subsequent events.

The events of the past weeks have dramatically reduced the atmosphere of distrust and misunderstanding between Egypt and Israel. Who would have predicted, even 1 month ago, that the President of Egypt and Prime Minister of Israel would meet directly with each other in Jerusalem, to talk about a genuine peace? I for one believe that these two leaders have reached a profound, mutual commitment to serious negotiations, rather than resorting to the conflict which has repeatedly ravaged the Middle East.

It was courageous for President Sadat to tell the Israeli Knesset that "We welcome you among us in security and peace."

I welcome Prime Minister Begin's response that "All of us are united in this one hope and longing to have peace" and his reassurance that "Everything is open to negotiation."

It is now essential to maintain the momentum for peace. It is essential not to waste the political vision and personal courage inherent in the new initiatives of President Sadat. The first opportunity to do this will be the multilateral meeting called by President Sadat in Cairo. We must all hope that this meeting will move us forward in the context of the Geneva Conference. The United States should actively pursue any and all possibilities which will move the negotiating process toward a peaceful settlement, which can be in the interests of all parties in the region.

Hopefully, other Arab governments will also come to recognize the wisdom of President Sadat's initiative for peace, and to work with Egypt and Israel in moving toward a genuine peace from which they can all benefit. Finally, we must expect the Soviets to behave responsibly as cochairmen of the Geneva Conference as well as cosigners of last month's joint statement on the Middle East.

Therefore, not only we but all our friends and allies should do all we can to encourage face-to-face and constructive negotiations among Israel and her neighbors. In an eloquent speech to the United Nations, Ambassador Young called for us to "capture the mood of change. Let us build on hope and good will."

I ask unanimous consent that Ambassador Young's speech, and Deputy Secretary Warren Christopher's important speech on the same subject—emphasizing the administration's intention to build on the momentum toward a just and lasting peace—be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMBASSADOR YOUNG'S STATEMENT ON THE MIDDLE EAST—NOVEMBER 24, 1977

We are meeting to discuss the situation in the Middle East at a crucial and perhaps pivotal time in the history of that region. A remarkable event in the political life of the Middle East has occurred. We are all acutely aware that the politics of the area will never be as they were before Egyptian President Anwar Sadat visited Israel.

President Sadat came in peace, was welcomed in peace by Prime Minister Begin and the Israeli people, by that simple yet dramatic act, the prospects for a just and durable peace have been significantly advanced especially if all concerned have the vision and the will to recognize and build upon the psychological transformation it has made possible. My government urges all of the parties to maintain the new momentum towards peace.

We in the United States have long been convinced that all of the peoples of the Middle East would like to put the past behind them and to live peacefully together in the context of a just and agreed solution to their political differences. President Sadat's journey for peace and the wholehearted—yes, even emotional—response of the Israeli and Egyptian nations have emphatically confirmed that judgment.

It is important, however, to recognize that this was not just an isolated act of political vision, without a solid base in the recent past or significance for a future that is both desirable and attainable. President Sadat's visit was unexpected and unprecedented, but it was a logical extension of the solemn undertaking of all of the Arab states and Israel in the wake of the 1973 War that they would engage—immediately, we should recall—in negotiations aimed at implementation of Security Council Resolution 242. With their acceptance of Security Council Resolution 338, the Arab states and Israel agreed that they would seek to resolve their differences through discussion, compromise and mutual accommodation.

The decision in 1973 to engage in negotiations between the parties marked a major turning point in the Arab-Israeli dispute. The first Geneva Conference convened under the compulsion of effecting a military disengagement in a situation which threatened an imminent resumption of hostilities. While two subsequent disengagement agreements were effected, serious negotiation of the overall peace envisaged in Resolution 242 has yet to begin in earnest.

Since this assembly discussed this issue one year ago, the Middle East has been an arena of intense diplomatic activity aimed at a single and simple goal—the resumption of direct negotiations between the parties in order to achieve a comprehensive peace. While the setting of the goal—a Geneva Conference by the end of the year—was easy, achievement of that goal has proved elusive. All of the parties are agreed that the key substantive questions to be addressed were the nature of peace; Israeli withdrawal, agreement on final borders, and arrangements to make those borders secure; and the Palestinian question, for which representatives of the Palestinian people as well as of the governments concerned must be included in the negotiating process. Procedural problems remain to be resolved, but let us remember that procedural arrangements do not in themselves determine the outcome of negotiations—only the negotiations themselves produce agreements. I repeat that the momentum of the past week must not be allowed to slip away. Let us capture the mood of change. Let us build on hope and goodwill. If we do so, fundamental, serious and unconditional negotiations could begin in the very near future.

What do the events of the past weekend mean for us here in New York? President Sadat has reminded us that many of the obstacles to peace in the Middle East are psychological. Both President Sadat and Prime Minister Begin have demonstrated the need to shed the bonds of the past if we are to avoid repeating the mistakes which have led to so much suffering and violence. We believe that this General Assembly can contribute to the process of peace as it deals with the remaining items relating to the Middle East to be brought up for discussion this year. But we should measure our performance by a new standard. If some of those who are so directly involved can discuss their differences in reasoned tones in an effort to make progress, ought not the rest of us declare a moratorium on the extreme rhetoric of the past which breeds hatred and violence? If we genuinely want to support the search for a just and durable peace in the Middle East, can we afford to repeat the practice of passing resolutions to score phyrric victories regardless of their ultimate effect—resolutions that seek to prejudge issues which can only by resolved through negotiations between the parties, all the parties concerned?

We have seen a demonstration of rare vision which has caught the imagination of the world. Psychologically, peace seems closer to our grasp. If we demonstrate similar courage and readiness to break with the rituals and taboos of the past, we believe the United Nations can make the contribution the world expects of it.

REMARKS OF WARREN CHRISTOPHER, DEPUTY SECRETARY OF STATE

I am delighted to be back home in California and honored to be with you at this important moment in the history of Israel and of all the peoples of the Middle East. I am pleased to be able to discuss with you the prospects for peace between the Arab nations and the State of Israel.

These prospects are real . . . more real than at any time in the past 30 years of conflict. They must be nourished by evidence of tangible progress toward peace, to give those who speak for peace hope to sustain their efforts and to overcome the doubters, the cynics, those who remain prisoners of the past, and the opponents of peace who unhappily are still a force in the Middle East.

With all our hearts, we must pray that the opportunities now presented are not lost.

With courage and ingenuity, leaders of vision in the Middle East must seek to main-

tain the momentum now begun in the holy city of Jerusalem. We are prepared to use the good offices and full influence of the United States to help them.

All Americans share the emotions, the sense of excitement over the dramatic developments of the past days, developments which no one of us could have confidently expected just a short fortnight ago.

The leader of the largest of the Arab states has stood in the Knesset of Israel, has met face-to-face with political leaders whom a generation of Arabs refused ever to acknowledge.

President Sadat deserves not only our congratulations but our praise and respect for his courage in taking this step to break the frozen attitudes of the past and open new prospects for peace. Prime Minister Begin has also demonstrated his statesmanship in the warmth of his welcome for President Sadat.

At one stroke President Sadat's trip has broken through the psychological barrier of distrust and suspicion which previously had prevented the participants in this 30-year conflict from making peace. The speeches in the Knesset on Sunday, and the private talks which have followed in Jerusalem, dramatized beyond all doubt one single fact: the leader of the largest Arab state and the leaders of Israel are united in their genuine desire for peace.

In the words of President Sadat to his Israeli audience—"As we really and truly seek peace, we really and truly welcome you to live among us in peace and security, in fact and in deed."

We see this initiative as a beginning. It foreshadows the face-to-face negotiations which must come between all the participants in the conflict, if the vision and imagination displayed in Jerusalem over the past few days are to be translated into reality.

Many commentators have noted that the speeches to the Knesset have left open the basic issues to be negotiated. This of course misses the essential point.

It is the fact of the visit that is important. A new ingredient has come to the peace process. Both President Sadat and Prime Minister Begin have taken action to prove their determination to work for an overall settlement. They want to get to the forum which already exists for that purpose—the Geneva Middle East Peace Conference, where all the parties can be represented and peace treaties can be negotiated dealing with all the issues that separate Arabs and Israelis. What we know from the events of the past few days gives us hope that the momentum for reconvening that conference can continue to build.

I want you to know that President Carter, Secretary Vance, and those of us involved in making and executing this country's foreign policy believe that—despite all the pitfalls and difficulties—we now have the best chance since 1948 for real peace in the Middle East.

I mean the kind of peace which is not just a temporary, armed truce.

I mean the kind of peace which will safegard Israel's integrity and security and open the way to cooperation among all the peoples of the Middle East.

I mean the kind of peace in which new generations of parents in Israel and in the Arab countries will no longer live with the certainty that many of their children will be killed in a future Middle Eastern war.

The search for that kind of peace has been a long one.

All of us have vivid recollections of the drama of those momentous first years after the Second World War.

There was the rise of a national spirit among the survivors of the Holocaust, and there was the heroism of the years of immigration into Palestine.

There was the struggle, in this country and around the world, to gain support for the idea of a Jewish homeland. The outcome of that struggle, we all recall, often seemed very much in doubt, but against all odds Israel was born.

At midnight on May 14, 1948, the Provisional Government of Israel proclaimed a Jewish state. Only eleven minutes later, on President Truman's instruction, the United States gave recognition to the provisional government. Now, almost three decades later, we see a dramatic opportunity to move from a state of confrontation to a state of true peace.

This is what we want; this is what we are working for now. This is what we saw begin to happen last weekend.

It will be a long journey. We will have to pass many way stations. But we will persevere.

We are not undertaking our efforts in the misguided belief that we can impose a settlement of our own choice upon the nations invloved. In the end those nations themselves must achieve a settlement which satisfies their own, varied interests.

Now that the pace of Middle East diplomacy is clearly quickening, it is useful to pause a moment and review what this Administration has been trying to accomplish this year.

Our efforts began with Secretary Vance's trip to the Middle East last February, and continued with the meetings during the Spring between President Carter and the Middle Eastern heads of state.

This initiative achieved the following:

Agreement among the parties to seek an overall settlement of their conflict.

Their agreement to try to reconvene the Geneva Conference this year.

Their agreement that the settlement must resolve three core issues. First, the nature of the peace to be established between the parties; second, withdrawal of troops from occupied territories and agreement on secure and recognized borders for all the states, as set forth in UN Security Council Resolutions 242 and 338; and third, resolution of the Palestinian question.

In all our discussions, then and now, we have made clear that Resolutions 242 and 338 remain the agreed basis for the Geneva Conference.

On this foundation we began to move from the general to the specific, from defining the issues to seeking agreement on how to reconvene the Geneva Conference.

This endeavor has involved intensive, almost daily, contacts by President Carter and Secretary Vance with chiefs of state and foreign ministers of the affected nations regarding the procedures for reconvening the Geneva Conference. The endeavor to promote the negotiating process continues.

With all the difficult decisions and calculated risks this effort inevitably involves, one unchanging fact will remain the cornerstone of American policy. In pursuing negotiations, Israel can do so confident that America's commitment to its security is unshakeable.

That commitment goes beyond mere words of support; as Secretary Vance has said, it is a commitment of the heart as well as of policy.

Since 1973, the United States has provided almost 10 billion dollars in military and economic assistance to Israel. That aid is now running at $1.8 billion annually.

In the first six months of the Carter Administration, more than $500 million in new military equipment was authorized for Israel—bringing to $2.5 billion the total amount of military supplies running on schedule in the pipeline to Israel.

Israel need not fear any U.S. withdrawal of essential support—now, at Geneva, or in the future. We will not jeopardize Israel's security by trying to exert pressure through withholding military or economic assistance.

Against this backdrop let me discuss two matters which I know are of deep importance to you as well as to me:

The role of the Soviet Union in the forthcoming negotiations, and, our approach to the Palestinian issue.

It would be wrong and shortsighted in these weeks of intense diplomacy to pretend that the Soviet Union, as co-chairman of the Geneva Conference, does not have an interest in the Middle East. Or to pretend it does not have a role to play in the outcome of negotiations—a constructive role or a troublesome role.

That is why, through our recent joint statement, we sought to engage the Soviets on the most constructive basis at this most critical moment. We do not take lightly the Soviet commitments implied in that statement. As one co-chairman of the Geneva Conference, we continue to impress upon the other co-chairman the responsibility we both have to use our influence to help negotiations for a Middle East settlement to move forward.

Neither the Soviet Union nor the United States wants a new war in the Middle East which would carry with it the threat of confrontation between the two nuclear superpowers.

Recognition in certain Arab countries that this is the Soviet attitude should help hasten peace.

Just as we cannot avoid the reality of Soviet interest and participation, we cannot avoid the Palestinian question—not if we want a real chance for peace.

Israel recognizes, as we do, that the Palestinian issue must be addressed and, in time, resolved. It has agreed, in our discussions about a reconvened Geneva conference, that Palestinians should participate as part of a unified Arab delegation.

President Carter has endorsed the concept of a Palestinian homeland or entity. He has stated, however, that the United States does not prefer an independent Palestinian state, and that our preference would be for such an entity to be linked with Jordan.

Of course, this issue, like the others, is for the parties themselves to decide, but we believe that no negotiated settlement could endure if it did not offer the Palestinians the hope of a future better and more productive than their past.

Let me assure you at the same time of President Carter's and Secretary Vance's firm commitment that the legitimate rights of the Palestinians will not be realized at the expense of Israel's rights to sovereignty and security.

And, beyond that, there is the hope of peaceful economic cooperation . . . in which the land may be made more fertile . . . in which the money now spent on arms may be spent for homes and schools and human happiness. . . . Scarce water supplies of the desert could be fairly and fruitfully shared . . . and technology could be passed among all the region's peoples, for the betterment of their daily well-being.

That kind of peace will not be easy to achieve.

It can only be achieved by the countries and peoples of the Middle East themselves.

It will involve courage and sacrifice by all.

But, given the opportunity which now exists—and may not exist again soon—I believe we must pursue it.

The alternatives—ranging from continued tension and armed truce, to war of expanding proportions—are flatly unacceptable. I know you share that judgment.

The United States has a choice in this situation:

—We can make a passing try to support the efforts of the parties to bring about negotiations, but give up when the issues get difficult;

—Or we can make a determined effort to avoid all the human tragedy and material waste of another war; making the effort because it is right to do so, regardless of how difficult our way may be.

Speaking for myself, and for this Administration, let me say that we have made our choice.

We shall continue to be actively engaged, as the parties desire, in efforts to produce fruitful negotiations. While we are still assessing the full results of the historic meeting in Jerusalem, we believe it can advance the process of negotiations significantly. Both President Sadat and Prime Minister Begin have expressed the desire to pursue these negotiations as soon as possible through the existing forum of the Geneva Conference. With their encouragement, the President does not intend to miss this moment. He intends to build on the momentum of this weekend to help move toward the goal we share with Arabs and Israel alike—a just and lasting peace in the Middle East.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 417) commending Anwar el Sadat, the President of Egypt, and Menachem Begin, the Prime Minister of Israel.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 417) was agreed to, as follows:

H. CON. RES. 417

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that Anwar el Sadat, the President of Egypt, and Menachem Begin, the Prime Minister of Israel, be commended for the courageous steps they have taken to resolve the differences between their nations and to bring peace between Israel and her Arab neighbors through face to face negotiations in the context of a Geneva conference. We hope this will result in further face to face negotiations which will lead to a comprehensive, just and durable peace.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DUTY ON INTRAVENOUS FAT EMULSION

Mr. ROBERT C. BYRD. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 1904.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendments of the Senate numbered 1, 2, 3, and 4 to the bill (H.R. 1904) entitled "An Act to suspend until July 1, 1980, the duty on intravenous fat emulsion".

Resolved, That the House agree to the amendment of the Senate numbered 5 to the aforesaid bill with the following amendment:

In lieu of the matter proposed by the said amendment, insert:

SEC. 3. (a)(1) Notwithstanding the provisions of section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, the entries listed in paragraph (2) covering certain musical instruments, shall be liquidated or reliquidated and, if appropriate, refund of duties made. Notwithstanding the provisions of General Headnote 3(e) of the Tariff Schedules of the United States (19 U.S.C. 1202) or any other provision of law, for purposes of the liquidations or reliquidations authorized by this subsection, such entries shall be appraised at invoice unit prices net, packed, and shall be subject to duty at the applicable rates set forth in column 1 of such schedules.

(2) The entries referred to in paragraph (1) are as follows:

Entry number:	Date of entry:
100284	July 14, 1972.
100607	July 27, 1973.
101233	August 18, 1972.
101426	September 1, 1972.
101756	September 14, 1972.
102217	October 15, 1973.
102394	October 7, 1971.
102483	October 15, 1971.
102687	November 15, 1971.
102708	July 8, 1973.
102711	November 17, 1971.
102781	October 20, 1972.
103117	December 16, 1971.
103252	November 8, 1972.
103275	December 28, 1971.
103576	November 22, 1972.
103638	November 27, 1972.
104335	December 21, 1972.
104601	March 8, 1972.
104920	January 16, 1973.
105205	April 10, 1972.
105998	May 15, 1972.
105998	March 2, 1973.
106002	May 15, 1972.
106730	June 21, 1972.
106731	June 21, 1972.
106888	June 29, 1972.
103114	December 16, 1971.
108444	June 11, 1973.

(b) In order to permit Jack R. Misner, of North Tonawanda, New York, to complete the renovation of the schooner Panda (entry numbered 902261, September 25, 1972) within the United States (which renovation has been delayed because of material shortages), the Secretary of the Treasury, notwithstanding the provisions of subpart 5C of schedule 8 of the Tariff Schedules of the United States (19 U.S.C. 1202), shall extend the expiration date of the temporary importation bond covering the schooner Panda until the close of September 18, 1977.

Resolved, That the House disagree to the amendment of the Senate numbered 6 to the aforesaid bill.

Resolved, That the House agree to the amendment of the Senate to the title of the bill.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate concur in the House amendment to the Senate amendment numbered 5.

The motion was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate recede from its amendment numbered 6.

The motion was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move to reconsider the vote by which both actions were taken.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I move that the votes be reconsidered.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER TO CONVENE AT 11 A.M. ON THURSDAY, DECEMBER 1, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, when the Senate convenes on Thursday, it convene at 11 a.m. instead of 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, on Thursday it is anticipated that there will be consideration of a conference report on the supplemental appropriations bill (H.R. 9375). There may be other conference reports ready on Thursday, and they may necessitate one or more rollcall votes. We cannot be sure.

RECESS TO 11 A.M., THURSDAY, DECEMBER 1, 1977

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered and as a further mark of respect to our late departed colleague, Mr. JOHN MCCLELLAN of Arkansas, that the Senate stand in recess until 11 a.m. on Thursday.

The motion was agreed to and, at 5:24 p.m. the Senate recessed until 11 a.m. Thursday, December 1, 1977.

NOMINATIONS

Executive nominations received after the adjournment of the Senate on November 22, 1977, pursuant to the order of November 4, 1977:

THE JUDICIARY

Paul A. Simmons, of Pennsylvania, to be U.S. district judge for the western district of Pennsylvania, vice Ralph F. Scalera, resigned.

DEPARTMENT OF JUSTICE

Andrew E. Gardner, of North Carolina, to be U.S. marshal for the western district of North Carolina for the term of 4 years, vice Max E. Wilson.

Edward P. Gribben, of South Dakota, to be U.S. marshal for the district of South Dakota for the term of 4 years, vice George L. Tennyson, resigned.

Executive nominations received by the Senate on November 23, 1977, pursuant to the order of the Senate of November 4, 1977:

DEPARTMENT OF ENERGY

Lincoln E. Moses, of California, to be Administrator of the Energy Information Administration (new position).

IN THE PUBLIC HEALTH SERVICE

The following candidates for personnel action in the Regular Corps of the Public Health Service subject to qualifications therefor as provided by law and regulations:

1. For appointment:

To be senior surgeon

Manuel Bustos
Lisa S. Chung
James D. Fett
George I. Lythcott
James W. Lorio
Jalal-Addin Najafi
Joost J. Oppenheim
Stephen C. Pugh
Pierre F. Renault
Arthur J. L. Strauss
Bernard Talbot
Arthur C. Ungerleider

To be surgeon

James M. Arrington
James E. Berner
George S. Bowen
George W. Brown
Jonathan L. Costa
William J. Cunningham
Elmer M. Cranton
Bienvenido E. DeLaPaz
Marlene E. Haffner
Barbara L. Krames
Joseph A. Merchant
Godfrey P. Oakley, Jr.
Frank M. Ochberg
Steven L. Shore
Theodore M. Winitsky

To be senior assistant surgeon

Russell N. Bingham
Jared J. Gardner
Steven D. Helgerson
Stephen P. Heyse
Virginia B. Kopelman
Jeffrey M. Newman
Dana O. Olson
Richard K. Rudy
Roland B. Williams
Loren A. Zech

To be senior dental surgeon

Gene P. Lewis

To be dental surgeon

J. David Erickson
Tommy N. Johnson
Clifford C. Scharke

To be senior assistant dental surgeon

Douglas W. Alderman
Anthony M. Battistella
Patrick C. Blake
Ronald P. Burakoff
Stephen B. Corbin
Richard D. Crockett
Dennis E. Doelle
Robert S. Enders
Douglas B. Fritz
James J. Jan
William R. Maas
Jay M. Marks
Jay B. Maxfield
Victor A. Palmieri
Robert J. Partak
John P. Rossetti
Jerome J. Savel
William A. Shaner III
Wallace G. Smith III
John W. Stahl
Rodney Wong

To be nurse officer

Alicia M. Blessington
Dorothy Deloof
Anne Gray
George A. Hanney
Gilda M. Martoglio
Ina C. Palmer
Dolores M. Staudenrau
Sadie J. Stout
Marilyn K. Vanderven

To be senior assistant nurse officer

Margaret Brady
William P. Emmerling
Richard I. Gerber
Kathleen A. Moore
Vona Poole
Claire A. Travis
Dea Weisman
Daniel J. Walz
Kathleen A. Weber

To be assistant nurse officer

Christine B. Kuehnle
Anne T. Gwiazdowski
James D. Smith

To be sanitary engineer

Gerald K. Falin
John M. Smith

To be senior assistant sanitary engineer

Bruce P. Almich
Alwin L. Dieffenbach
Larry S. Gaynor
Tobias A. Hegdahl
W. Robert Hutson, Jr.
Paul F. Kanitz
Thomas T. Kariya, Jr.
Richard H. Olsher
Carl A. Roth
Elliot A. Shefrin

To be scientist

Melvyn R. Altman
John J. Farmer III
Robert W. Gwadz
Harvey P. Stein
David G. Taylor
Reiko H. True
Charles A. Wells

To be senior assistant scientist

Charles K. Bowles
Laurence J. Doemeny
Donald D. Dollberg
A. Roland Garcia
Thomas B. Shope, Jr.

To be sanitarian

Gregory J. Glahn

To be assistant sanitarian

Kenneth W. Holt
Ervin L. Moore
Gary L. Rothfus

To be veterinary officer

Ronald S. Hines

To be senior assistant veterinary officer

Dennis D. Juranek

To be senior assistant pharmacist

Michael R. Ball
John A. Becher
Thomas M. Budge
Thomas H. Butler
Gary A. Erickson
Dennis R. Gillham
Terrance L. Green
George J. Grimes, Jr.
James W. Hall
Steven K. Halstead
Joseph C. Hostetler
Edwin J. Kirsch
Gary R. Lawless
Eddie R. Lee
Roger L. McGhee
Gregory G. Moeller
Frank J. Nice
Robert W. Pollock
Karl W. Schilling
William B. Sisco
William P. Sleasman
Wayne M. Turner
Paul L. Vance
David S. Weick
Ray D. Westerlage
Eric A. Wynkoop
John B. Young

To be assistant pharmacist

Richard A. Chambers
Roy S. Cram, Jr.
Joan C. Ginetis
Galen R. Goeden
Rodney W. Hill
Janet M. Jones
Paul G. Ketteridge
Nickola L. Kuhn
James W. Little
Robert B. Oshida
Larry A. Pfeifer
Bonnie L. Pitt
Gordon W. Reiter
Ronnie D. Thomas

To be dietitian

Carolyn C. Blackwood

To be senior assistant dietitian

Cynthia L. W. Chung

To be assistant dietitian

Therese E. Bradley
Frank T. Logiudice, Jr.

To be assistant therapist

Mark D. Stoff
Wayne S. Smith

To be health services officer

James H. Cavender
Gayland M. Erikson
Charles M. Kirk
John Rodak, Jr.

To be senior assistant health services officer

Robert N. Burns
Thomas R. Burns
Earl J. Damato
Norman E. Dodds
Lawrence Eldridge
Henry H. Knox
Thomas Loftus
Linda A. Loring
Joel A. Ludlam
Clyde E. Moss, Jr.
Robert J. Ostrowski
Fred M. Randall
Amos A. Slaymaker, Jr.
Cynthia H. Smith
Richard J. Smith III
John J. Whalen

To be assistant health services officer

Jack L. Christy
Paul Durand
Merrel V. Jones, Jr.
Kurt R. Maurer
John L. McCrohan, Jr.
Clifford L. Moseley
Ronald A. Reddick
Donald E. Simpson

IN THE PUBLIC HEALTH SERVICE

The following candidates for personnel action in the Regular Corps of the Public Health Service subject to qualifications therefor as provided by law and regulations:

1. For permanent promotion:

To be medical director

N. Burton Attico
Gerald D. Aurbach
Vincent H. Bono, Jr.
Richard L. Brent
Bertram S. Brown
Willard R. Brown
John L. Cutler
Delbert H. Dayton, Jr.
Vincent A. Discala
S. Paul Ehrlich, Jr.
W. King Engel
Leland L. Fairbanks
James P. Fields
James M. Gilbert
Lorenzo Guzman
John H. Hammann
Alfonso H. Holguin
Robert L. Kaiser
Leonard J. Karlin
James H. Kauth
Sun H. Lau
Edward L. Michals
Wandyr J. Moore
Bayard H. Morrison III
John B. Muth
Ernest V. Nau
Milton Z. Nichaman
Stuart C. Nottingham
Michael Ogden
Gerald H. Payne
James K. Penry
H. McDonald Rimple
James A. Rose
Wesley W. Sikkema
Richard A. Smith
Dean F. Tirador
Robert C. Vanderwagen
Frank L. Zwemer

To be senior surgeon

Charles D. Allen
Costan W. Berard
George R. Brenneman
Lionel H. DeMontigny
John M. Dyer, Jr.
Jack T. Ellis
Ernest Feigenbaum
Robert A. Gotshall, Jr.
Frederick C. Hoesly
Ernest J. Johnson
Albert C. Kolbye, Jr.
Floyd M. Kregenow
John M. Lane
George M. Leiby, Jr.
Richard T. Light
James B. Lucas
Joseph F. Piffat
Peter L. Putnam
Charles R. Stark
Emanuel Stein
Donald A. Swetter
Carl F. Szuter
Bruce D. Tempest
Leo H. Voneuler

To be surgeon

Thomas R. Bender
Michael P. Hudgins
Mark H. Jweig
John A. Knight, Jr.
Laurence J. Platt

To de dental director

Stephen J. Garza
Alfred Hamel
James E. Hamner III
Joe T. Hillsman
Herschel S. Horowitz
Samuel Kakehashi
Kenneth C. Lynn
James A. McTaggart
Joseph P. Moffa, Jr.
Donald C. Reel
Charles R. Robinson
George B. Spruce, Jr.
Theodore G. Strenski
Leo Trusewitsch
Daniel F. Whiteside

To be senior dental surgeon

William F. Bird
William B. Bock
James N. Bogden
Edward B. Dowd
Paul D. Frazier
Lester B. Hilborn
Winslow B. Lee
Rollie W. Lyman
Martin L. MacIntyre
Gerald S. Morrill
John H. Reiber
Emil L. Rigg
Glenn W. Smith
Thomas M. Tarpley, Jr.
Blair W. Thurgood

To be dental surgeon

C. Michael Beck
Stephen R. Curtice
John L. Drager
Howard L. Kelly
Channing D. Smith
John R. Sundell
Ronald M. Weitz
William J. Williams

To be nurse director

Marion N. Keagle
Mary R. A. Kennedy
Agnes M. Newell
Virginia K. Saba

To be senior nurse officer

Juanita M. Barkley
Rose A. Britanak
Bertha E. Bryant
Margaret J. Howe
Pauline R. Jones
Jane Ann Moretto
Barbara A. Rolling
Frances M. Snyder
Jerry L. Weston

To be senior assistant nurse officer

Carl P. Perilla

To be sanitary engineer director

Thomas N. Hushower
Paul A. Kenline
Delbert A. Larson
Leroy G. Martin

To be senior sanitary engineer

James R. Buchtel
Richard A. Coddington
Donald G. Fox
Floyd L. Galpin
Charles D. Larson
Rodger L. Leupold
Lee R. Lunsford
Donald W. Mantay
Ronald A. Popkin
John T. Talty
Ronald A. Venezia
William L. Wagner

To be sanitary engineer

David W. Alton
Francis W. Bennett
Bruce T. Ferris
Henry M. Holman
Douglas L. Johnson
Theodore Levin
William H. Stroup
Darryl D. Tyler

To be senior assistant sanitary engineer

Gordon H. Wilcox

To be scientist director

Richard L. Blanchard
Gerald D. Brooks
Richard W. Gerhardt
Stanley Glenn
George P. Healy
Billie E. Jones
Fortune V. Mannino
Peter B. Smith
Conrad E. Yunker

To be senior scientist

Bobby F. Craft
William P. Kirk II
Melvin J. Meketon
Frank A. Pedersen
Kenneth O. Phifer

To be scientist

Bobby D. Brayboy
Michael A. Ricciutti
Hugh S. Sloan, Jr.

To be sanitarian director

Ramon E. Barea
John L. Dietemann
Gerald I. Goldschmidt
Harold E. Knight
David S. Reid
J. W. Stacy
Charles S. Stanley
Robert A. Stevens
Robert W. Wilson

To be senior sanitarian

James M. Cox
Harry A. Doutt
Thomas A. Ford, Jr.
Richard W. Gillespie
Robert M. Hallisey
James H. Hensley
Matthew C. Lynch
Frank W. Mackison
Wendell C. McElwee
Eugene R. Meyer
David B. Moses
Stephen J. Pijar
David R. Snavely
Corwin D. Strong
Robert J. Weatherby

To be sanitarian

Wayne A. Bliss
Troy W. Cole
William A. Kingsbury
Truman L. McCasland

To be veterinary officer director

Everette F. Baker, Jr.
Robert P. Botts
Joe R. Held
Roy F. Kinard, Jr.
Paul D. Lambert
William T. London
Carl E. Miller
Walter Moore, Jr.
Carl D. Olsen
Jerry F. Stara

To be senior veterinary officer

George L. Clarke
Donald K. Hinkle
Arnold F. Kaufmann
William G. Winkler

To be veterinary officer

Francis W. Chandler, Jr.

To be pharmacist director

Donald B. Hare

To be senior pharmacist

Fred Angres
Norman L. Dunfee
John J. Lucas
Donald E. Mabry
William A. Millar II
Thomas B. Poux
Roger W. Tenney
Clair G. Wetmore

To be pharmacist

William H. Caldwell
John S. Cipriano
Charles W. Cook
James C. Cradock
Gayle R. Dolecek
Aubrie L. Duncan
Vincent J. Fierro
John T. Harlowe
James A. Keene
William H. Kehoe, Jr.
Mary L. Pengelly
Theodore B. Pukas
Jerome C. Short

To be senior assistant pharmacist

Alfredo Matiella, Jr.
David J. Morgan
Donald C. Peters
Robert M. Shelley
Gary E. Work
Tommy L. Worth

To be dietitian director

Esther C. Namian
Audrey J. Paulbitski

To be senior dietitian

A. Eileen Murnin
Elizabeth K. Witter

To be senior assistant dietitian

Cathy A. Tonjes
Mary P. Wolf

To be therapist director

John L. Echternach
Norma J. Ewan
Michael J. Oliva
Walter S. Sekiya
Donald E. Shipley

To be senior therapist

C. Douglas Billion
Kingsley M. Miner
Herbert R. Pruett
Frank H. Troske, Jr.
James L. Witt

To be therapist

Robert K. Baus
Judith V. Culver

To be senior assistant therapist

Harold W. Egbert
Andrew L. Smith

To be health services director

Karst J. Besteman
Lawrence D. Burke
Isom H. Herron III
Joseph K. Owen
John F. Roatch
Chandler C. Waggoner

To be senior health services officer

Richard H. Gaulke
Frederick E. Hamblet
James M. Hardin
Robert F. Hickman
Peter E. Kauffman
Ralph D. Myhre
A. Robert Polcari
Roger H. Schneider
Ronald L. Shearin
Richard L. Varner

To be health services officer

John C. Bernson
Joel G. Bostrom
Alfred H. Campbell
John H. Eilert, Jr.
James B. Gill, Jr.
Carl G. Leukefeld
Edwin A. Miller
Earl A. Pearson
John H. Peterson
Martiniano R. Sandoval
Donald R. Soeken
Wilbur F. Vanpelt
George J. Vasconcelos
David E. Weber

To be senior assistant health services officer

Ronald E. Basil
James M. Harmon
Alejandro R. Montanez
James F. Neighbors
Gary B. Utter
Gordon H. Wilcox

IN THE ARMY

The following-named officers for promotion in the Reserve of the Army of the United States, under the provisions of title 10, U.S.C., sections 3370 and 3383:

ARMY PROMOTION LIST

To be colonel

Abeyta, Salomon, xxx-xx-xxxx.
Acohido, Ben V., xxx-xx-xxxx.
Adams, Adran D., xxx-xx-xxxx.
Adams, Harold R., xxx-xx-xxxx.
Adams, James R., xxx-xx-xxxx.
Agersinger, Donald, xxx-xx-xxxx.
Aleixo, Edward F., xxx-xx-xxxx.
Alexander, William, xxx-xx-xxxx.
Andersh, Laverne, xxx-xx-xxxx.
Anderson, Chester M., xxx-xx-xxxx.
Anderson, Robert R., xxx-xx-xxxx.
Armstrong, Robert A., xxx-xx-xxxx.
Arnold, Charles E., xxx-xx-xxxx.
Arnold, Joseph R., xxx-xx-xxxx.
Ashmore, Charles B., xxx-xx-xxxx.
Ather, Stanley S., xxx-xx-xxxx.
Atwell, Charles A., xxx-xx-xxxx.
Aultman, Dorrance, xxx-xx-xxxx.
Austin, James K., xxx-xx-xxxx.
Baer, John Gilbert, xxx-xx-xxxx.
Baker, Arnold W., xxx-xx-xxxx.
Baker, Donovan J., xxx-xx-xxxx.
Baker, James, xxx-xx-xxxx.
Banchefsky, Howard, xxx-xx-xxxx.
Barker, George E., xxx-xx-xxxx.
Barnett, John C., xxx-xx-xxxx.
Barnette, Anderson, xxx-xx-xxxx.
Barrie, James W., xxx-xx-xxxx.

CONFIRMATIONS

Executive nominations confirmed by the Senate November 29, 1977:

DEPARTMENT OF JUSTICE

Herman Sillas, Jr., of California, to be U.S. attorney for the eastern district of California for the term of 4 years.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate

THE JUDICIARY

Monroe G. McKay, of Utah, to be U.S. circuit judge for the Tenth Circuit.

HOUSE OF REPRESENTATIVES—*Tuesday, November 29, 1977*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Only fear the Lord and serve Him faithfully with all your heart; for consider what great things He has done for you.—I Samuel 12: 24.

Eternal Father, who has been with us in our going out and our coming in and has brought us together, this day we pray for wisdom and strength as we continue our work. In the midst of differences of opinions may there be no differences in relationships and though we disagree in part may we remember our agreements are greater and deeper. Beyond our personal likes and dislikes may we seek the highest good of our beloved country. Grant that Your Spirit may move mightily through our people that they and we may walk in Your way and be willing to do Your will.

We thank You for the splendid career of our beloved Senator MCCLELLAN who has gone home to be with You. Bless his family with the peace of Your presence and give them courage to live through the days that be ahead.

In the spirit of the Master we pray. Amen.

CALL OF THE HOUSE

Mr. ASHBROOK. Mr. Speaker, under rule I, clause 1 of the rules of the House, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. WRIGHT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 746]

Abdnor	Dicks	Krueger
Alexander	Diggs	Le Fante
Ambro	Dingell	Livingston
Andrews, N.C.	Eckhardt	Marienee
Applegate	Edwards, Calif.	Mazzoli
Armstrong	Fithian	McCloskey
Badillo	Flippo	McDonald
Beard, Tenn.	Ford, Tenn.	Meeds
Bedell	Giaimo	Mikva
Biaggi	Goldwater	Moss
Blouin	Gonzalez	Myers, Michael
Bolling	Harsha	Pepper
Bonior	Heckler	Quayle
Brodhead	Hillis	Roberts
Burke, Fla.	Holtzman	Roe
Burton, John	Hughes	Rose
Chisholm	Jenkins	Rosenthal
Cleveland	Jones, Tenn.	Rousselot
Cochran	Jordan	Ruppe
Conyers	Kasten	Santini
Cunningham	Kastenmeier	Scheuer
Davis	Kelly	Smith, Nebr.
Dellums	Kemp	St Germain
Dent	Koch	Teague
Tsongas	Walsh	Yatron
Udall	Whalen	
Van Deerlin	White	

The SPEAKER pro tempore (Mr. FOLEY). On this rollcall 355 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

TRIBUTE TO THE LATE HONORABLE JOHN L. MCCLELLAN

(Mr. THORNTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THORNTON. Mr. Speaker, it is with a deep sense of personal loss that I report to my colleagues in the House of Representatives the death of Arkansas' senior Senator, JOHN L. MCCLELLAN.

Senator MCCLELLAN served in the House of Representatives during the 74th and 75th Congresses, representing the Sixth Congressional District of Arkansas which included the town of Sheridan, which was his hometown, and my own.

He died peacefully in his sleep yesterday, November 28, and in this moment of loss to our State and our Nation my thoughts are with Senator MCCLELLAN'S wife, Norma, and all his family. I know he had looked forward to his retirement which he announced last week because he truly enjoyed being with his family.

He was a great and good man who gave all he had to bring into reality the goals he believed to be worthwhile. The many achievements which resulted from his good works will long remind us of his strong and effective service to the people.

He was my friend and I will miss him very much.

Mr. Speaker, I yield to the dean of the Arkansas congressional delegation, our colleague JOHN PAUL HAMMERSCHMIDT.

Mr. HAMMERSCHMIDT. Mr. Speaker, I am pleased to join with my Arkansas colleagues in arranging for a special order later this week to honor one of the finest men ever to serve in the Congress: The late JOHN L. MCCLELLAN, of Arkansas. Today, our State mourns, deeply, the passing of this greatest of its sons. For more than 38 years, he served, faithfully and well, the people of Arkansas and the people of the United States—first in the House, and, later, in the Senate.

I would hope that all of my colleagues in this body will take this forthcoming opportunity to join in a special tribute to this very special man.

Mr. THORNTON. I thank the gentleman from Arkansas.

Mr. Speaker, I yield to my distinguished colleague from Arkansas, the Honorable JIM TUCKER.

Mr. TUCKER. Mr. Speaker, I thank my friend, the gentleman from Arkansas (Mr. THORNTON) for yielding.

Mr. Speaker, JOHN L. MCCLELLAN was a magnificent advocate for great principles. He believed in the importance and dignity of politics and government and spent 50 years of his life in that role. He was our U.S. Senator for my entire life. He was my employer. The first job I ever had in Washington was working for him. He was my colleague. I was proud I was able to serve my country with him for these past 11 months.

His loss leaves a great void for the State and the Nation and me personally.

I join my colleagues in mourning his loss and I look forward to joining them later in the week in the special order for that purpose.

Mr. THORNTON. Mr. Speaker, as has been previously stated, there will be a special order announced later during which Members of the House may express their respect for our colleague and friend.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE REPORT ON HOUSE JOINT RESOLUTION 662, CONTINUING APPROPRIATIONS FOR DISTRICT OF COLUMBIA FOR FISCAL YEAR 1978

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a report on the joint resolution (H.J. Res. 662) making further continuing appropriations for the District of Columbia for the fiscal year 1978, and for other purposes.

The SPEAKER pro tempore (Mr. FOLEY). Is there objection to the request of the gentleman from Texas?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF S. 1340, ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION AUTHORIZATION ACT OF 1978—CIVILIAN APPLICATIONS

Mr. LONG of Louisiana, from the Committee on Rules, submitted a privileged report (Rept. No. 95–821) on the resolution (H. Res. 916) providing for consideration of the Senate bill (S. 1340) to authorize appropriations to the Energy Research and Development Administration for energy research, development, demonstration, and related programs in accordance with section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, as amended, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 662, CONTINUING APPROPRIATIONS FOR THE FISCAL YEAR 1978

Mr. LONG of Louisiana, from the Committee on Rules, submitted a privileged report (Rept. No. 95–822) on the resolution (H. Res. 917) providing for consideration of the joint resolution (H.J. Res. 662) making further continuing appropriations for the fiscal year 1978, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PERMISSION FOR SUBCOMMITTEE ON PROGRAM AND BUDGET AUTHORIZATION OF THE PERMANENT SELECT COMMITTEE ON INTELLIGENCE TO SIT TODAY UNDER THE 5-MINUTE RULE

Mr. BURLISON of Missouri. Mr. Speaker, I ask unanimous consent that the Subcommittee on Program and Budget Authorization of the Permanent Select Committee on Intelligence may be permitted to sit during today's proceedings of the House under the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

RESOLUTION COMMENDING ANWAR EL SADAT PRESIDENT OF EGYPT, AND MENACHEM BEGIN, PRIME MINISTER OF ISRAEL

Mr. WRIGHT. Mr. Speaker, I send to the desk the concurrent resolution (H. Con. Res. 417) commending Anwar el Sadat the President of Egypt, and Menachem Begin, the Prime Minister of Israel, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 417

Resolved by the House of Representatives (the Senate concurring), that it is the sense of the Congress that Anwar el Sadat, the President of Egypt, and Menachem Begin, the Prime Minister of Israel, be commended for the courageous steps they have taken to resolve the differences between their nations and to bring peace between Israel and her Arab neighbors through face to face negotiations in the context of a Geneva conference. We hope this will result in further face to face negotiations which will lead to a comprehensive, just and durable peace.

The SPEAKER pro tempore. The gentleman from Texas (Mr. WRIGHT) is recognized for 1 hour.

Mr. WRIGHT. Mr. Speaker, the concurrent resolution I offer today is cosigned by the minority leader, and it is self-expressive. It needs little additional elaboration.

I believe all of us feel strongly that the bold and courageous initiative taken by President Anwar el Sadat of Egypt and the gracious response on the part of Israel by Prime Minister Menachem Begin have constituted the greatest step forward in the last 30 years toward peace in the Middle East.

It seems appropriate, therefore, that we in the Congress express our commendations and our hopes that this bold step taken by these two leaders, and through them by their respective peoples, may lead to the kinds of negotiations that will result in a just and lasting peace in the Middle East.

The resolution is additionally cosponsored by approximately 50 other Members, whose names I would like to list at this point:

Brademas, Rostenkowski, Zablocki, Fascell, Rosenthal, Dodd, Bingham, Foley, Long of Louisiana, Yates, Fountain, Rooney, Alexander, Howard, Carney, Moakley, Danielson, Waxman, Blanchard.

Quillen, Skubitz, Hamilton, Carter, Hammerschmidt, Fraser, Cochran, Solarz, Wolff, Pepper, Zeferetti, Boland, Bonior, Thompson, Le Fante, Young of Missouri, Reuss.

Guyer, Ketchum, Corman, Marks, Hyde, Cornwell, Kildee, Flood, Conte, Edgar, Krebs, and Corrada.

Mr. RHODES. Mr. Speaker, would the distinguished majority leader yield?

Mr. WRIGHT. Of course, I yield to the distinguished minority leader.

Mr. RHODES. Mr. Speaker, I thank my distinguished friend.

Mr. Speaker, I welcomed the action on the part of the majority leader in introducing this resolution. I was most pleased to cosponsor it. I agree with the majority leader that the things which have occurred in the Middle East in the last 10 days constitute the most hopeful signs of a course toward peace that we have seen in that part of the world.

I am particularly pleased that the majority leader and several Members of this body were in the Knesset at the time the speech was made by the President of Egypt. I think it served more eloquently, perhaps, even than this resolution to signify the fact that this body is most interested in promoting peace in that part of the world.

We all take much satisfaction in the step the President of Egypt and the Prime Minister of Israel have taken. I hope that the initiative which has been taken by these two great statesmen will result in a momentum which will continue to a peaceful solution.

I am also pleased that the President of Egypt has called a conference for the purpose of discussing the ground rules for a Geneva Conference, so that many divisive and yet relatively unimportant matters of procedure could be taken care of before a plenary session of the Conference is convened.

I think that this is very definitely a step in the right direction, and I hope that the nations of the world will respond positively to the initiative of the President of Egypt.

Mr. CARNEY. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Ohio.

Mr. CARNEY. Mr. Speaker, it was my privilege and honor to be one of the Members, under the leadership of JIM WRIGHT, to be on this team. I think President Sadat and Prime Minister Begin are to be honored, but also I would be remiss if I did not say that great leadership was shown by our two leaders, Mr. WRIGHT, representing the majority party, and Mr. QUILLEN, representing the minority, resulted in a beautiful job in expressing the hopes and desires of the American people for peace, as well as those of the people in the Middle East.

I want to say that I think it was a wonderful trip, and I want to thank Chairman WRIGHT for his wonderful leadership.

Mr. WRIGHT. I thank the gentleman.

Mr. CARTER. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Kentucky.

Mr. CARTER. Mr. Speaker, I would like to commend the distinguished gentleman from Texas, who lead our delegation, for his wonderful work. I also wish to commend the gentleman from Tennessee, our ranking minority Member. Certainly, I want to commend Mr. WRIGHT for introducing this resolution, of which I am a cosponsor.

Further, I want to state that no man ever led a delegation more honorably, more astutely, or spoke as well to groups of varying beliefs, than the distinguished gentleman from Texas. He made the entire delegation proud of his actions.

Of course, during the time we were in Egypt and in Israel, we saw their great hopes for peace, and we trust that through the efforts of President Anwar Sadat and Prime Minister Begin, that in the future these hopes will become a reality. I thank the distinguished majority leader for yielding to me.

Mr. SKUBITZ. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Kansas.

Mr. SKUBITZ. Mr. Speaker, I want to join in commending the distinguished majority leader for the joint resolution he has brought up today. I am pleased to join him in cosponsoring the resolution and am proud of the role the United States has played in developing the atmosphere in which the latest Egyptian-Israel peace efforts are being conducted.

I believe it is important that Congress be aware of the major foreign policy developments in the world. For that reason,

I was pleased to be a member of the leadership delegation which met with President Sadat and Prime Minister Begin earlier this month. The bipartisan delegation was able to demonstrate congressional concern for peace in the Middle East at a very critical and historic moment. In addition, we came away with a much greater understanding of the difficult problems yet to be resolved before peace can be achieved in the Middle East.

I was disappointed to note that the Hutchinson News and the Ottawa Herald, the two major international news authorities in my State, found little of importance in the historic meeting and our leadership delegation except to criticize a Congressman from Kansas for being present.

Mr. BLANCHARD. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Michigan.

Mr. BLANCHARD. I thank the majority leader for yielding to me.

Mr. Speaker, I too want to commend our majority leader and our ranking Republican minority Member, Mr. QUILLEN, and all those on the mission committees, for the leadership they exercised. I particularly want to commend the majority leader for allowing some of the lesser known Members to go on the trip and to participate fully in all meetings and discussions.

I think it is noteworthy that our distinguished majority leader, representing the United States with eloquence in a way in which all of us would be proud, has followed up the mission with the resolution he has introduced today. I support the resolution, and thank the gentleman for yielding.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from New York.

Mr. GILMAN. I thank the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT) for yielding to me. I rise to join with my colleagues and the distinguished minority leader in voicing support for this important, timely resolution supportive of the Middle East initiatives offered by the distinguished majority leader.

I, too, join with my colleagues in expressing appreciation to our majority leader and the members of his delegation for having represented the Congress in the Knesset at the time of this historic visit and address by President Anwar Sadat.

By initiating direct negotiations on Israeli soil between their respective nations, which have been the major antagonists in the Middle East through 30 years of war and shortlived peace, Prime Minister Begin and President Sadat have heralded a new era of optimism and diplomatic flexibility in which the Arabs and the Israelis can hopefully resolve the fundamental conflicts which have marked the constant turmoil between their two worlds. Not only has Egypt finally recognized the sovereignty of the State of Israel and its right to defensible borders, but has accomplished an enormous psychological breakthrough by making possible an ongoing, face-to-face dialog between Israel and the Arab world. President Sadat's visit to Israel has generated a momentum which will result in further negotiations, hopefully including the leaders of other Arab countries, and eventually could very well lead to a durable and lasting peace in the Middle East. At this time Jordan, the Sudan, and Morocco, Tunisia and Saudi Arabia have indicated their own tacit approval of these negotiations. At the very least, there now exists an opportunity to establish diplomatic and trade relations between Israel and Egypt.

Certainly, there are many tough decisions to be made, many compromises to reach, and innumerable historic walls to dismantle, but the first step has been taken. In the words of Abba Eban,

> The existence of a dialog doesn't insure success, but the absence of it insures failure.

In urging my colleagues to fully support this resolution, I hope and pray that this bold initiative will lead to a long-lasting harmony in the Middle East.

Mr. FOUNTAIN. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from North Carolina.

Mr. FOUNTAIN. Mr. Speaker, I would like to associate myself with the remarks made by the majority leader, the minority leader, and others who have spoken in support of this resolution, which I was happy to join in introducing.

Mr. Speaker, we have witnessed in the last 2 weeks one of the most notable events in the history of the world. The leaders of two principal nations involved in a major conflict of long duration have met face to face. Beyond that, one of them has traveled to the other country and spoken to that parliament in an appeal for peace.

Rarely before have two men acted so courageously in search of peace. One of the more encouraging aspects of this whole series of events is that they apparently represent the sentiments of their countrymen. Only a short time ago, many observers of the international scene would have predicted that their actions would have been fruitless at best—that they were working counter to the feelings within each country. In fact, both the Israeli and Egyptian people have demonstrated large measures of support for their leaders' initiatives in search of a settlement.

President Sadat and Prime Minister Begin deserve the wholehearted commendations and support of the people of the United States. We should appeal to the world to support the search for a permanent peace in the Middle East. The opportunity is now before us and we should take advantage of it.

Mr. ROONEY. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Pennsylvania.

Mr. ROONEY. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the majority leader. Also, I would like to associate myself with the remarks made by the gentleman from Texas, and I am very pleased to be a cosponsor of this resolution.

Having shared with the majority leader and other of our colleagues the extraordinary opportunities for direct discussions with President Sadat, Prime Minister Begin, and many more key officials of Egypt and Israel, I am convinced that there exists today a real willingness on both sides of the Middle East dispute to reach agreements which can restore peace.

The fact that an American delegation headed by the majority leader of this House had scheduled visits to Egypt and Israel to meet with the principal officials of both, I am firmly convinced, helped bring about in such short order the startling visit to Israel by President Sadat.

Together, the leaders of those Nations have begun the critical first steps to negotiate peace. Their meeting provided some immediate results—restoration of telephone communication between Israel and Egypt, the presence of the Arab press in Jerusalem, a commitment of Egyptian help to restore a Mosque in Israel. Each of them is but a small development to be sure but of such tremendous importance in light of Israeli-Egyptian relations only 3 weeks ago.

Now, President Sadat has invited other Arab leaders and Israeli officials to come to Egypt this weekend to prepare for resumption of peace talks in Geneva. If the Arab nations are sincere in their desire to resolve the difficult issues which have disrupted the Middle East for three decades, this meeting in Egypt is their opportunity to demonstrate that sincerity. Sadat and Begin have taken bold initiatives and have shown determination to press toward productive negotiations. The rest of the Arab world is remiss if it fails to participate.

Mr. ZABLOCKI. Mr. Speaker, I rise in support of House Concurrent Resolution 417, commending President Anwar el Sadat and Premier Menachem Begin for their courageous efforts to bring peace to the Middle East.

The historic meeting between President Sadat and Premier Begin in Jerusalem on November 19 began a dialog, which, despite current divisions among the Arab nations, will hopefuly pave the way toward further fruitful negotiations in the context of the Geneva Conference—negotiations which, as stated in the resolution, will lead to a comprehensive, just and durable peace in that crucial area of the world.

It has been said that peace does not break out like war. Rather, peace comes as a result of accommodation and understanding amongst the parties concerned. The meeting in Jerusalem was a giant step for the people of the Middle East, and, indeed for the people of the world in that process. The meeting, however, was only a beginning. It is in the interest of all parties concerned that this beginning be nurtured and that the process toward a just and lasting peace be continued to a successful conclusion.

Mr. Speaker, I commend the distinguished majority leader and the distinguished minority leader for their efforts to being this resolution before us today and urge its adoption.

Mr. BINGHAM. Mr. Speaker, President Anwar Sadat's peace initiative is a

truly remarkable event. For so many years it has seemed that Arab rejection of Israel made peace an impossible dream. Then with a suddenness most often associated with a lightning military maneuver, Sadat was in Israel. The Israeli military band played the Egyptian national anthem and President Sadat stood at attention for the Hatikva. Sadat reviewed the Israel troops. Sadat and Prime Minister Begin visited Yad Vashem, the Holocaust memorial, together and then Sadat addressed the Knesset. Sadat and Golda Meir joked together and Begin and Sadat discussed their grandchildren. Not since man walked on the Moon have we seen images quite so remarkable, and, in that case, the sight was not so totally unexpected.

Those who say that the events in Jerusalem were of little consequence and that nothing has really changed are mistaken. Peace is still a long way off, but everything has changed. Today marks the 30th anniversary of the United Nations resolution which authorized the establishment of the State of Israel and in all that time Israel's existence has been in effect rejected by her Arab neighbors. Israel cannot be found on maps sold in Arab countries. There are no telephone communications. The short rail trip from Haifa to Beirut has not been made in three decades. The most terrible result of the Arab rejection of Israel was that Israel has been forced to fight incessantly for physical survival—with a loss of 10,000 men. Until the Sadat visit, there was every reason to believe that another war was likely, if not inevitable.

The Sadat mission was an effort to break out of the 30-year pattern of Arab threats, nonrecognition, and attacks. With wisdom all too rare, President Sadat recognized that to follow old paths could only bring his nation more widows, fatherless children, and continued erosion of Egypt's economic base. With the introduction of more and more sophisticated weapons to the Middle East, Sadat realized that without a bold initiative to bring peace terrible destruction loomed. Sadat made his move.

He met a joyous reception in Israel. That was no surprise. Israel's leaders have consistently called for direct negotiations with Arab leaders and have said that they would go anywhere in the cause of peace. The people of Israel cheered Sadat wherever he went. From his arrival at the King David Hotel where a thousand Israelis chanted "Sa-dat Sa-dat" to his departure route to Ben Gurion Airport which was lined with applauding Israelis, the people of that nation made it clear that for them Sadat was a hero. In their yearning for peace, they were willing to put aside memories of 30 years of hostilities and of the Yom Kippur attack of just 4 years ago which left 3,000 dead and the nation stunned.

Upon his return to Egypt, President Sadat was greeted by over 1 million of his countrymen. In the past 2 weeks cheering crowds have applauded Sadat and hailed him as the "man of peace." The Egyptian people has demonstrated that its desire for peace is as strong as that of the people of Israel. It is clear that President Sadat's initiative is not merely the product of the thinking of one farsighted leader but that it is a product of the feelings and aspirations of millions of his countrymen.

Nevertheless there are those in the Arab world who refuse to accept the Sadat initiative. Syria, Iraq, Libya, and the PLO have filled the Mideastern airwaves with denunciations and threats. Libya and Iraq have called for Arab summits to oppose Sadat. Spokesmen have called for Sadat's assassination, while the PLO's representative at the United Nations has warned that the people of Egypt will deal with Sadat. Other "rejectionists" have advocated an economic boycott of Egypt. It is all rather familiar. Arab extremists from Damascus to Tripoli are threatening to employ the same tactics against Sadat and Egypt that were used for 30 years against Israel. Interested not in a negotiated peace but in the annihilation of Israel, they will fight anyone who places obstacles on the road to war and destruction.

These violent attacks on Sadat's initiatives tend to vindicate Israel's longstanding refusal to negotiate with the PLO. Despite the PLO's much proclaimed concern for the Palestinian Arab people, it turns its back on a peace initiative that could well lead to a solution for the Palestinians. Israel has understood all along that peace could only become a real possibility when Arab leaders openly and unabashedly accept Israel as a neighbor. The PLO could never do that, but Israel was prepared to wait until legitimate Arab leaders could. In a real sense, Israel has been waiting for Sadat for 30 years. His journey to Jerusalem demonstrated that Israel was right in holding out.

The United States should do everything in its power to facilitate the success of the Sadat initiatives. I am pleased that the United States will join Israel and Egypt at the Cairo conference which is to lay the groundwork for Geneva. The road to a peaceful settlement, and even the road to Geneva, still appears long and hard. It is difficult to believe that the Arab States now vehemently denouncing Sadat for his Jerusalem journey would be serious negotiating partners at Geneva. The United States should continue to encourage all states to come to Geneva, but at the same time we must not underestimate the significance and value of the Israel-Egyptian process now underway. An overall settlement is a dazzling goal, but may be impossible at present. Certainly a resolution of the differences between Egypt and Israel, now clearly within reach, would be a long step in the right direction. The Sadat-Begin meeting began a process we must nurture with care, and as we do so let us not assume that "papa always knows best."

Mr. ROGERS. Mr. Speaker, I join my colleagues in this expression of support for the recent peace initiatives by the Governments of Egypt and Israel.

Last week the State of Israel played host to a momentous event in the history of the Middle East when President Anwar Sadat was welcomed into Jerusalem by Prime Minister Menachem Begin.

The reception of the Egyptian head of state in the historic capital of Israel was a bold action by both governments.

It was not an easy thing to do. Both governments acted in the context of a history of strife and conflict which has touched the lives of all citizens of both countries. In both countries, thousands of families have lost loved ones to this conflict.

In this joint action, the two governments have indicated that they place the goal of a lasting peace for their peoples above past bitterness. Under the most difficult of circumstances, they have cleared away obstacles to discussion of their differences.

Of course, these differences are substantial and deeply held. The road to peace must necessarily remain a difficult one. And for this reason, most have received the news with cautious optimism.

But all must recognize that with this bold action, the two governments have greatly increased the prospects for a just peace and recognition once and for all of the right of Israel to exist.

The world is grateful to them, and now we must pledge our continued support in the difficult negotiations to come.

Mr. ADDABBO. Mr. Speaker, I wish to associate myself with the resolution offered by the gentleman from Texas (Mr. WRIGHT) regarding the events in the Middle East. I too believe the world owes President Sadat of Egypt a debt of thanks for having the courage to end 30 years of bitterness and hate through the simple expediency of going personally to meet with Israeli leaders.

It was at one time a bold and courageous step which was desperately needed to break the impasse that has for so long frustrated all efforts to bring peace to that troubled section of the world.

All of us here hope that the parties in dispute in the Middle East go to Geneva and sit together and resolve their problems diplomatically, rather than resorting once again to the last resort that warfare represents.

Those of us who have long hoped for an end to the fighting in the Middle East have more reason for optimism today than we have had in years. Both the Israeli and the Egyptian Governments deserve our applause for the steps they have taken to bring peace a step closer. We urge the other Arab leaders to join with President Sadat in working to promote peace rather than hatred. President Sadat has taken a noble step forward that cannot be allowed to wither through intransigence. In supporting the Wright resolution today, the House has put itself on the side of justice and decency in the Middle East.

Mr. DON H. CLAUSEN. Mr. Speaker, I rise in support of the resolution and commend the majority leader and the other Members involved for their bipartisan efforts in advancing the cause of peace in the Middle East. All Americans have become greatly encouraged by the initiatives taken by President Sadat of Egypt and Prime Minister Begin of Israel, and while we realize this is only a tentative first step, and not the occasion to minimize the great problems which must be solved before true peace

can come to the Middle East, it is still a beginning.

While our hopes are high we must appreciate that conflicting interests in that region require we maintain a sense of realism, and not become overly optimistic. At the same time, we must not let down our guard, nor abandon our efforts to search for new avenues which provide a promise of peaceful settlement of disputes.

The Middle East is extremely important, not only to the United States, but to the peace and stability of the entire world.

I completely support the efforts made to enhance the prospects for peace.

Mrs. HOLT. Mr. Speaker, I believe the House should be aware of the contribution made by Chairman MELVIN PRICE of the Armed Services Committee to the search for peace in the Mid East.

Under his leadership, several of us recently journeyed to the Mideast to review the security needs of our allies in that troubled part of the world.

On November 10, the very day after Egyptian President Sadat announced that he would be willing to go to Israel in the quest for peace, we met with Israeli Prime Minister Begin. Mr. Begin knew we would be in Egypt the following day, and he urged us to tell President Sadat that he would be welcome in Israel, that Mr. Begin shared the desire for face-to-face negotiations.

Chairman PRICE carried that hopeful message to President Sadat and told him of Mr. Begin's sincerity. Because of President Sadat's confidence in Chairman PRICE and the Armed Services Committee we were able to make an important impact on the sensitive moves toward the historic meeting in Jerusalem.

The events I have described have reinforced my confidence and pride in Chairman PRICE. As our spokesman, his knowledge and skill had tremendous value. His leadership enabled us to have very rewarding discussions with Prime Minister Begin and President Sadat on many significant issues.

GENERAL LEAVE

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on this concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WRIGHT. Mr. Speaker, I move the previous question on the concurrent resolution.

The previous question was ordered.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

HOLY CROWN OF ST. STEPHEN

(Ms. OAKAR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. OAKAR. Mr. Speaker, today hundreds of Hungarian-Americans from across the country are uniting in Washington to let their views be known to Congress and to the President of the United States. They do not want the precious Holy Crown of St. Stephen, which symbolizes their religious and personal freedom, returned to a Communist regime which is the antithesis of human rights. These brave people have weathered the icy rain but their hearts are warm and they are right now exercising their freedom of expression in front of the White House, something that does not exist in the Communist countries. At 2 p.m. these people will be on the Capitol steps to greet Members of the House. I urge my colleagues to meet them and listen to their pleas.

MAYFIELD, KY., HIGH SCHOOL

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, yesterday I attended a celebration at the high school in my hometown of Mayfield, Ky., in honor of the Mayfield High School football team. The team became class AA State champions last Friday by defeating Corbin, Ky.; high school 14–13 in a game played at Richmond, Ky.

I want to congratulate my hometown high school team, the Mayfield Cardinals upon winning this championship and attaining a 12–1 season record.

Among the very proud in Mayfield are School Superintendent Don Sparks and the school's principal, Ralph Colby.

Special congratulations to Head Coach Jack Morris and Assistant Coaches Louis McDonald, Joe David Smith, Doc Sanders, Paul Leahy, and Bob Counts.

Deserving congratulations also to the 27 players who participated in the championship game, namely: Jeff Boyd, Jeff Puckett, Joey Shelton, Greg Hawkins, David Wyatt, Richard Riley, David Slaughter, Tom Nelson, Jim Waldrop, Lee Lovelace, Jeff Jackson, Gary Hobs, Darrin McAfee, Bubba Hendley, Jesse Holder, Brad Sparks, Phil Sutherlin, Chet Wiman, Bob Isbell, Robert Hawkins, David Elliott, David Madding, George Taylor, Mark Brown, John Dillard, Craig Sims, and Brian Berhow.

A TRIBUTE TO THE TEXAS LONGHORNS

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, and Members of the House, when the distinguished gentleman from Massachusetts, Speaker THOMAS P. O'NEILL and majority leader JIM WRIGHT came to Austin, Tex., on September 10 for the opening game of the 1977 college football season between the University of Texas and Boston College, not even the astute Speaker of the House realized that he was witnessing the launching of a national championship season for the Texas Longhorns.

The Longhorns beat Boston College 44 to 0 that day and with their combination of power and speed went on to win 10 more games, win the southwest conference championship and become the No. 1 ranked team in college football by both the Associated Press and the United Press International polls.

Two games after the victory over Boston College, the Longhorns shocked the Nation by defeating an excellent team from Oklahoma University. Perhaps it was then that the Longhorns, and everyone else, realized that this was a championship team.

They ended their regular season last Saturday by beating their traditional tough foes Texas A. & M. University by 57 to 28. In that game halfback Earl Campbell ran for 222 yards to make him the No. 1 ground gainer and scorer in the NCAA this season.

College football still brings as many thrills and chills as any other sport in our Nation. It is a good wholesome, American sport.

The No. 1 team—University of Texas—in that sport is composed of some of the finest young men that I have ever met including Earl Campbell, Randy McEachern, Ham Jones and Lam Jones, Alfred Jackson, Russell Erxleben, Brad Shearer, George James, Lance Taylor, Johnny Johnson, M. E. Michael, and many other young men who have worked hard together all season.

Coach Fred Akers has brought national honors to himself and the whole team. The Nation commends him and his team for their spirit and determination.

This year has been one of the finest in the history of Texas football and I am sure that the whole Nation will join in singing "The Eyes of Texas Are Upon You." Hook 'em Horns.

Mr. BRADEMAS. Mr. Speaker, I listened with some interest to the remarks of my distinguished colleague and valued friend from Austin, the gentleman from Texas (Mr. PICKLE), about the team that plays football down there, and I agree that it is a formidable outfit.

Indeed, I would remind the gentleman that he and I have engaged in wagers in respect to the outcome of Cotton Bowl games played between the University of Notre Dame and the University of Texas on two other occasions. Texas won once, and Notre Dame won once.

I want to take this opportunity to say that I think the Fighting Irish of Notre Dame are likely on the 2d of January next year to prevail again, and I am sure that my friend, JAKE PICKLE, and I can work out some suitable arrangement whereby he and I can once again do our part in insuring that the American people are made aware of which is the greatest football team in the United States.

Mr. PICKLE. Mr. Speaker, will the gentleman yield?

Mr. BRADEMAS. I yield to the gentleman from Texas.

Mr. PICKLE. Mr. Speaker, the last wager we had was a Texas football against an Irish shillelagh. That shillelagh was only about 4 or 5 inches long—a mighty weak and small item.

I would hope that the gentleman would come up with a better wager, and put more consideration into it.

Mr. ASHBROOK. Mr. Speaker, will the gentleman yield?

Mr. BRADEMAS. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Speaker, I wonder whether my friend, the gentleman from Indiana (Mr. BRADEMAS), might take into consideration that the team from Indiana might not be playing that particular game.

Mr. BRADEMAS. Mr. Speaker, it certainly will not be Ohio State.

APPOINTMENT OF CONFEREES ON H.R. 9418, CAPITATION GRANTS FOR THIRD-YEAR MEDICAL STUDENTS

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 9418) to amend the Public Health Service Act to require increases in the enrollment of third-year medical students as a condition to medical schools' receiving capitation grants under such act, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia? The Chair hears none, and, without objection, appoints the following conferees: Messrs. STAGGERS, ROGERS, PREYER, SCHEUER, WAXMAN, CARTER, and BROYHILL.

There was no objection.

DECLARING STATE OF WAR AGAINST AMYOTROPHIC LATERAL SCLEROSIS

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from further consideration of the Senate concurrent resolution (S. Con. Res. 26), expressing the sense of Congress that action should be taken to focus national attention on the extent and consequences of and the need to find a cure for amyotrophic lateral sclerosis, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate concurrent resclution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

Mr. CARTER. Reserving the right to object, Mr. Speaker, I support Senate Concurrent Resolution No. 26 which calls attention to the disease amyotrophic lateral sclerosis—or ALS.

This resolution does not authorize any funds—but instead expresses the sense of Congress that action should be taken to focus national attention on this dread condition—and the need for finding its cure.

Mr. Speaker, ALS which is popularly known as "Lou Gehrig's disease" is a neurological disorder affecting adults, generally in the prime of their life.

ALS occurs in persons of every race and nationality but affects men three times more frequently than women.

This disorder is characterized by a degeneration of motor cells in the spinal cord and brain which leads rapidly to paralysis and ultimately death.

According to the Amytrophic Lateral Sclerosis Society of America more than 40,000 Americans have become victims of this condition and about 10,000 new cases are diagnosed every year.

To date no treatment has proven effective against ALS and the cause of this condition is still unknown.

However, important research is being conducted and supported by the National Institute of Neurological and Communicative Disorders and Stroke as well as by various private organizations.

The possibility that a virus might be the causal factor responsible for ALS is one idea which has been receiving considerable attention. Other research is in progress to determine additional factors which could cause the motor neurons to cease functioning. Moreover, the island of Guam which has a very high incidence of ALS has been one focus for research efforts.

Mr. Speaker, it is very important that research efforts in this field be continued and strengthened. If a cause-effect relationship could be established scientists would then have the basis for developing effective treatment for persons with ALS.

In conclusion I urge adoption of this resolution. It will help serve as an important rallying symbol for the concerned families, friends, organizations, and researchers who are devoted to finding a cure for this disease.

Thank you, Mr. Speaker.

Mr. STAGGERS. Mr. Speaker, will the gentleman yield?

Mr. CARTER. I yield to the gentleman from West Virginia.

Mr. STAGGERS. Mr. Speaker, Senate Concurrent Resolution 26 was introduced in the Senate on May 18, 1977 by Senator CRANSTON and referred to the Committee on Human Resources. It was favorably reported by that Committee on October 20 and passed the Senate on November 4, 1977. The resolution calls for action to focus national attention on the extent and consequences of the disease called amyotrophic lateral sclerosis—ALS—and on the need to find a cure for this disease. The House comparable resolution, H. Res. 302, was first introduced by Mr. SOLARZ on February 17, 1977 and now has 231 cosponsors. On November 8, Mr. SOLARZ and Mr. ROGERS introduced House Concurrent Resolution 410 to conform the language of the earlier House resolution to that of the Senate-passed resolution.

Senate Concurrent Resolution 26 makes no changes in existing law and does not commit the expenditure of any Federal funds. It seeks only to bring attention to the serious nature of ALS and its severe and negative impact on the quality of life of its victims and their families, including economic, social, and psychological hardships. It notes the failure of biomedical research efforts to date in finding a cause and cure for ALS and recognizes the need for the development of effective methods of treatment.

Mr. Speaker, today I am pleased to present Senate Concurrent Resolution 26 to the House for its consideration. It expresses the sense of the Congress that action should be taken to focus national attention on the extent and consequences of ALS—the disease amyotrophic lateral sclerosis—and on the need for finding a cure for it.

ALS is also called Lou Gehrig's disease. It afflicts an estimated 40,000 people in the United States, and claims 10,000 new victims each year. According to the Amyotropic Lateral Sclerosis Society of America, ALS may have as great an incidence as multiple sclerosis and perhaps four times the incidence of muscular dystrophy. This frightening and devastating disease attacks the motor nerve cells of the adult nervous system which support the brain and spinal cord. The resulting paralysis does not, however, destroy the victim's intellectual capacity. The patient remains mentally alert throughout the course of the disease. Most victims survive only 3 years after the disease is diagnosed. The economic, social, and psychological effect of ALS on its victims and their families is catastrophic. At present, ALS victims have no hope. No effective treatment has yet been developed, nor has a cure been discovered. Further research on ALS is greatly needed. The National Institute of Neurological and Communicative Disorders and Stroke—NINCDS—at the National Institutes of Health is involved in many ALS-related research activities. The ALS Society of America is also supporting vitally needed ALS research and it should be commended for this work. But much more needs to be done.

The total incapacitation experienced by victims of ALS completely bars them from participating as active members of society. Since this disease affects mostly adults, the ALS Society of America estimates that our economy loses approximately $200 million a year due to the victim's loss of earning power. This figure is based on an average income of $7,000 per year. Government transfer payments for welfare and for aid to dependent children represent another substantial loss to our economy of approximately $400 million. These are the public expenses of this disease. The private expenses of the ALS victim and family are much, much greater—depleting not just the pocketbook, but the social and psychological well-being as well.

The Senate passed Senate Concurrent Resolution 26 on November 4 of this year under the able leadership of Senator CRANSTON. The Senate passage of this resolution was a step forward in this Nation's fight against ALS, and I believe this is a battle which should be joined by the House. In fact, this body has already demonstrated its support of this resolution since a similar version, House Resolution 302, introduced by Mr. SOLARZ, was cosponsored by 231 House Members.

Senate Concurrent Resolution 26 does not authorize any additional expenditures of Federal funds. It does not change existing law respecting Federal biomedical research programs and activities. Rather, its purpose is to help educate the public on the seriousness of ALS and to help create an atmosphere of public concern and commitment toward research efforts to find a cure for ALS.

I would like to thank and commend the sponsor of the House Resolution, Mr. SOLARZ, for his valuable and dedicated work on this resolution. I would also like to commend Senator CRANSTON for his strong commitment and support of the Senate ALS resolution. In addition, I want to extend a particular thanks to

the gentleman from Florida (Mr. ROGERS) for his strong support and interest in the House ALS resolution. Finally, a special thank you is due to each of the 231 House Members who lent their support to this measure by adding their names as cosponsors to House Resolution 302.

Mr. Speaker, in conclusion, I urge all my colleageus in the House to join me in support of this resolution which addresses itself to a disease which constitutes a sizeable public health problem in the United States—amyotrophic lateral sclerosis. I know that it will do much for the morale of ALS victims throughout our Nation and they will be grateful for a favorable vote in the House.

Mr. CARTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The Clerk read the concurrent resolution as follows:

S. CON. RES. 26

Whereas amyotrophic lateral sclerosis, or Lou Gehrig's disease, constitutes a serious health problem in the United States in that it afflicts thousands of Americans annually;

Whereas the complications of amyotrophic lateral sclerosis significantly decrease the quality of life and have a major negative economic, social, and psychological impact on the families of its victims;

Whereas biomedical research efforts to date have been unsuccessful in finding the cause of amyotrophic lateral sclerosis;

Whereas the development of advanced methods of treatment of amyotrophic lateral sclerosis deserves national priority; and

Whereas the citizens of the United States should have a full understanding of the nature of the human, social, and economic impact of amyotrophic lateral sclerosis and of the need to discover its cause and to develop a cure: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that action should be taken to focus national attention on the extent and consequences of amyotrophic lateral sclerosis and on the need for finding a cure for this disease.

Mr. ROGERS. Mr. Speaker, on November 4, the Senate passed Senate Concurrent Resolution 26, a resolution which calls for action to focus national attention on the extent and consequences of the disease amyotrophic lateral sclerosis and on the need to find a cure for this disease.

Amyotrophic lateral sclerosis is commonly referred to as ALS, or Lou Gehrig's disease. It is a highly intricate and complex disease which affects the adult nervous system, progressively weakening the brain and spinal cord until the muscle tissue is wasted. It does not, however, impair the brain's intellectual function, so that the victim is fully cognizant of his worsening and painful condition. ALS creates substantial economic, social, and psychological hardships which impact not only on the victim, but on his family as well. A person afflicted with ALS can expect to survive no longer than 3 to 5 years and no cure for it has yet been found. The resulting drain on a family's finances is extensive.

ALS also causes a drain on the national economy. The Amyorophic Lateral Sclerosis Society of America estimates that the total number of ALS victims stands at approximately 40,000 in the United States, with at least 10,000 new cases documented every year. The society estimated that the economy suffers a loss of earning power of approximately $200 million a year due to heads-of-households afflicted with ALS. The annual loss to the economy from Government aid to dependent children and welfare is estimated to be $400 million.

To date, no effective treatment for ALS has been developed. Although the National Institutes of Health, through its National Institute of Neurological and Communicative Disorders and Stroke—NINCDS—has research programs directed at uncovering the causes and remedies for this disease—and some progress has been achieved in the areas of virology, immunology, and brain chemistry—the highly intricate and complex nature of ALS has made it difficult to develop a clinical cure. NINCDS now has several ALS research programs underway. The Institute, in conjunction with the National Academy of Sciences, is planning an investigation of the role of environmental factors on American servicemen suffering from ALS. NINCDS scientists are conducting laboratory research aimed at identifying the cause of a broad range of neurological diseases. Such research might prove instrumental in uncovering the cause of ALS. The NINCDS is also conducting two clinical research programs aimed at gaining knowledge which may lead to methods of treatment for ALS. One of these programs is based at NIH's clinical center, where selected ALS patients, including atypical ALS patients, and those with disease symptoms closely resembling ALS, are accepted for research purposes. Finally, the NINCDS is investigating the possible involvement of metabolic conditions in the cause of ALS.

NIH is not alone in the field of ALS research. The Amyotrophic Lateral Sclerosis Society of America is also conducting research studies into the causes and cure of ALS. This year the Scientific Advisory Committee of the ALS society approved the allocation of $311,000 to cover a 3-year period, for ALS research grants. This society is to be highly commended for its dedication and activities in the fight against ALS.

Mr. Speaker, the House recognizes the serious nature of this disease and 231 House Members have cosponsored House Resolution 302, which is similar to the Senate-passed resolution. House Resolution 302 was introduced by Mr. SOLARZ for the first time in February of this year. More recently, Mr. SOLARZ and I introduced House Concurrent Resolution 410, which revises House Resolution 302 to conform to the language of the Senate-passed resolution.

I want to take this opportunity to thank the sponsors of this resolution in both the House and Senate. In particular, I want to thank and commend Mr. SOLARZ for his hard work, dedication, and leadership as the prime sponsor of this resolution. In addition, I want to thank the gentleman from West Virginia (Mr. STAGGERS) for his leadership in bringing this resolution to the House floor, and the gentleman from Kentucky (Mr. CARTER) for his interest and support of this resolution. Finally, I want to thank all the members of the Subcommittee on Health and the Environment, Mr. SATTERFIELD, Mr. PREYER, Mr. Mr. SCHEUER, Mr. WAXMAN, Mr. FLORIO, Mr. MAGUIRE, Mr. MARKEY, Mr. OTTINGER, Mr. WALGREN, Mr. BROYHILL, Mr. MADIGAN, and Mr. SKUBITZ for their interest in this resolution.

Mr. Speaker, Senate Concurrent Resolution 26 and the comparable House resolution, House Concurrent Resolution 410, are identical. These resolutions do not change existing law or authorize the expenditure of any Federal funds, but they do have an extremely important function—to focus national attention on ALS and on the need for finding its cure. I urge all my colleagues in the House to join me in support of Senate Concurrent Resolution 26.

Mr. SOLARZ. Mr. Speaker, I rise to applaud, salute, and thank my colleagues Mr. STAGGERS, Mr. ROGERS, and Mr. CARTER for their support of this important resolution.

As you may know, for nearly 3 years I have been actively involved in the fight against the dread disease amyotropic lateral sclerosis.

Last February I introduced a resolution which was an attempt to focus national attention on ALS and to highlights its deadly and debilitating effects. I am happy to say that this resolution was cosponsored by 231 other Members of Congress from both sides of the aisle.

In the Senate, Senator CRANSTON introduced a similar resolution and it boasted 60 cosponsors before passage as Senate Concurrent Resolution 26 on November 4, 1977.

Today we have the opportunity to pass House Concurrent Resolution 410 expressing the sense of the House, the Senate concurring, on the need for action to find a cure for ALS.

ALS, popularly known as Lou Gehrig's disease, is a neurological disorder affecting adults, generally in the prime of life. It is characterized by a degeneration of motor cells in the spinal cord and brain. This degeneration leads rapidly to paralysis and ultimately death. Over 10,000 adults are stricken with ALS each year for no apparent reason and with no real hope for recovery.

Like polio, ALS attacks the motor cells of the brain and spinal cord. Initially many patients show problems in speech, swallowing and chewing, while others have loss of strength in an arm or leg. The onset of the disease is slow but after a few weeks the patient is struck with violent twitching and painful cramps. Then he quickly sinks into a near full paralysis.

Initial diagnosis is quite difficult and often confused with multiple sclerosis. The expected lifespan for the postdiagnosis patient is a disturbing 3 or 4 years. Over 60 percent of the ALS patients are men who after a comparatively illness-free life suddenly are left useless and unable to move a single muscle.

This severe paralysis is responsible for more than the loss of one man or woman. It is a human problem of staggering magnitude. A simple calculation will demonstrate this clearly. There are at

least 10,000 new ALS cases in the United States every year. The patient is typically male, who is the head of a household and in most cases the large expenses associated with ALS depletes both the bank account and the spirit of the family. Based on an average income of only $7,000 per annum, an estimate of the loss of earning power to the economy is at least $200 million a year. In addition, a like amount in Government transfer payments for welfare and aid for dependent children realize a net loss to the economy of $400 million. Clearly a cure would be one of the great milestones in medical history.

This concurrent resolution asks for no money; asks for no special week, day or hour. This resolution simply shows the concern and care of the Congress for the suffering of tens of thousands of Americans who have ALS and their families.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate concurrent resolution just concurred in.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

PROVIDING FOR MANDATORY INSPECTION OF DOMESTICATED RABBITS SLAUGHTERED FOR HUMAN FOOD—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore (Mr. WRIGHT). The unfinished business is the further consideration of the veto message of the President of the United States on the bill (H.R. 2521) to provide for the mandatory inspection of domesticated rabbits slaughtered for human food, and for other purposes.

The question is, Will the House, on reconsideration, pass the bill, the objections of the President to the contrary notwithstanding?

The Chair recognizes the gentleman from Washington (Mr. FOLEY) for 1 hour.

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the message, together with the accompanying bill, be referred to the Committee on Agriculture.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

VACATING ORDER OF THE HOUSE OF WEDNESDAY, NOVEMBER 2, 1977, PROVIDING FOR THE HOUSE TO MEET ONLY ON TUESDAYS AND FRIDAYS

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the order of the House of Wednesday, November 2, 1977, providing for the House to meet only on Tuesdays and Fridays, be vacated and that when the House adjourns today, it adjourn to meet at noon on Wednesday, November 30, 1977.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I wonder if the distinguished chairman of the Democratic Caucus could tell us what the plans are for the balance of this week and for the rest of the session. I have heard some suggestions that the House will again go into pro forma sessions, with the idea of fooling the public into thinking that we are going to have an energy bill before Christmas. If that is to be the case, then we could tie a red ribbon on it and put it under the Nation's Christmas tree. But if we are to have these sham sessions, then the gentleman from Maryland may insist there be a quorum present at all times, various international travel plans notwithstanding.

Mr. Speaker, I think what we ought to do would be to quit, shelve the so-called energy bill and be done with it for the year. We could save the taxpayers' nerves and pocketbooks.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Speaker, I would advise the gentleman from Maryland (Mr. BAUMAN) that it is the intention of the conference committee on energy to continue to meet and to attempt to resolve the differences between the House of Representatives and the Senate. We have very largely completed action on the utility rate negotiations, and that will probably be completed this week, and on conservation and coal conversion, that will probably be completed by the 2d of December. The remaining other two parts of the five parts of the President's energy program, which have been adopted in various manner by the House and the Senate that deal with gas pricing and other tax provisions, it is still the hope of the committee that the conference committee can conclude its work in order to bring a conference report back to the Senate and the House floor for action before Christmas.

I cannot speak for the leadership at this point, but I believe that there may be the intention following this week to go into the 3-day recess periods, hoping that the continued progress of the conference committee can result in the adoption of a conference report on energy before the holiday period.

Mr. BAUMAN. Mr. Speaker, further reserving the right to object. the gentleman from Washington (Mr. FOLEY) means before Christmas of 1977?

Mr. FOLEY. Christmas of 1977, the gentleman is correct.

Mr. BAUMAN. We will have an energy bill before that time?

Mr. FOLEY. That is the hope, that the conference could conclude its work prior to that period of time. Now what progress can be made on the two remaining parts in the next 2 weeks I think will be the critical test on whether it can be presented to the Members.

Mr. BAUMAN. Mr. Speaker, the gentleman from Maryland was under the misapprehension that November 29—is that not today's date—was supposed to be the day that the energy bill was to have been considered, and similar hope was expressed as to that date also?

Mr. FOLEY. But that hope, Mr. Speaker, unfortunately was dashed by the circumstances.

Mr. BAUMAN. Dashed indeed. So we will continue to have pro forma sessions up until Christmas Eve in the hope that we will perhaps have some grotesque ornament to hang on the national Christmas tree in the form of an energy bill?

Mr. FOLEY. I hope that the energy bill can be completed before Christmas because it would be a gift to the entire Nation, and it would be certainly wise public policy and therefore we hope for that conclusion.

Mr. BAUMAN. I thank the gentleman for his cheerful holiday explanation and withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

DISPENSING WITH BUSINESS IN ORDER UNDER THE CALENDAR WEDNESDAY RULE ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday, November 30, 1977, may be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

CONFERENCE REPORT ON H.R. 7, CAREER EDUCATION

Mr. PERKINS. Mr. Speaker, I call up the conference report on the bill (H.R. 7) to authorize a career education program for elementary and secondary schools, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of November 15, 1977.)

Mr. PERKINS (during the reading). Mr. Speaker, I ask unanimous consent that the further reading of the statement be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The SPEAKER pro tempore. The gentleman from Kentucky (Mr. PERKINS) and the gentleman from Alabama (Mr. BUCHANAN) will be recognized for 30 minutes each.

The Chair recognizes the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, I yield myself 7 minutes.

Mr. Speaker, the conference report on H.R. 7 which we are bringing to the floor today is the product of a very fruitful and cooperative conference committee. All the members of the committee reached unanimous agreement on all of these provisions so that what we have under consideration today is a bipartisan and unanimously supported conference agreement. I believe that this speaks well for the bill before us and for the work of all of the committee members.

I would especially like to commend the members of the Subcommittee on Elementary, Secondary, and Vocational Education who were conferees, especially Congressman BLOUIN who had his own career education bill and Congressmen KILDEE, LE FANTE, WEISS, and HEFTEL who took such an active part in writing this legislation. The committee's ranking minority member, AL QUIE, was also most helpful and diligent as always. Congressman JOHN BUCHANAN is also to be commended for his role in guiding this legislation through.

Mr. Speaker, the basic purpose of this bill is to encourage the Nation's schools to place a greater emphasis upon career awareness, exploration, decisionmaking, and planning. This means that we at the national level will seek to encourage, but not in any way require, our Nation's schools to broaden their offerings so that students will have a much better idea of the types of jobs available to them when they finish school, and of the types of skills needed to fill those jobs.

Today, unfortunately, many youngsters do not have this knowledge because their long years of schooling cut them off from the world of employment. To illustrate this point, I would like to refer to a recent survey conducted by the National Assessment of Educational Progress. This survey found that less than half of the 17-year-olds in the Nation could name more than one skill needed for the job they had tentatively chosen.

The bill before us today seeks to reverse that trend in order to provide our students with a better knowledge of jobs and of the skills needed for those jobs.

The bill contained in this conference report has three principal features which are meant to help carry out that basic purpose.

First, the conference report makes funds available for States to move from limited demonstrations of career education at the elementary and secondary levels to actual implementation in ways affecting all instructional programs and all teachers at these levels. To date, most of the Federal funding of career education has been for model and demonstration programs at the elementary and secondary levels. This conference report reflects the feeling of the conference committee that these model programs have shown their worth and that the time is right for a broadscale implementation of the ideas and practices learned from them.

Second, the conference report makes clear that the Federal role is to be of a very limited nature in this effort, both in terms of appropriations and in terms of the number of years these appropriations are to be provided. We are only authorizing $400 million over a 5-year period under this conference report, and these sums decline rapidly over the 5-year period so that there will be no doubt of the limited nature of the Federal assistance.

Third, the conference report respects the preeminence of the States and local school districts in this field by giving considerable flexibility in the types of career education activities which can be funded. The Federal role must be limited in terms of the requirements we impose, not only because of the limited dollars we will be appropriating, but also because the concept of career education itself is very diverse and is being implemented very differently in different States and school districts. Consequently, the Federal role emphasizes technical assistance to the States in carrying out their plans, and information gathering so that the States will have the best and most current information on jobs available to them when they are implementing this bill.

These features underscore how the Federal role is to be limited in this area in terms of the amount of assistance, in terms of the number of years this assistance will be provided, and in terms of the number of Federal requirements involved in receiving this assistance. Our whole purpose is to serve as a catalyst to the States to help them to carry through on their own plans for career education.

But, I do want to emphasize that by enacting this bill the Congress will be showing its concern that students not be isolated from the realities of the job market. Rather, we would hope that the schools could help by exposing their students to a variety of jobs, so that they will learn about jobs and the skills needed for them.

Mr. Speaker, for the information of the Members I would now like to go into more detail in describing this bill.

AUTHORIZATIONS

The legislation represents a new idea in categorical programs in that it calls for a short-term Federal investment which declines from fiscal year 1979 through fiscal year 1983. The authorization levels are $50 million for fiscal year 1979, $100 million for fiscal year 1980, $100 million for fiscal year 1981, $50 million for fiscal 1982, and $25 million for fiscal year 1983. After the fifth year, States and local districts are expected to take over the full costs of career education programs.

I believe this structured phaseout of Federal funds is particularly well suited to the concept of career education, since the goal of the legislation is the infusion of career education into the regular school curriculum. The accomplishment of this goal depends to a large extent upon retraining of existing education personnel and purchase of instructional materials rather than supporting large numbers of new staff in each district, and will not involve sizable costs to the States and local districts once the training procedures are established and the materials purchased.

STATE MATCHING REQUIREMENTS

In keeping with the notion of a limited Federal role, the bill also contains State matching requirements which increase over the 5-year period of the bill. For fiscal year 1979, the programs would be 100 percent federally funded. Funds for employing State-level staff would require 25 percent State matching in fiscal year 1980 and 50 percent State matching in each of the next 3 years. Other activities in the State plans would be 100 percent federally funded in fiscal year 1980, and require 25 percent State matching in fiscal year 1981, 50 percent in fiscal year 1982, and 75 percent in fiscal year 1983.

In hearings on H.R. 7, a number of witnesses testified that States and local districts are very supportive of the concept of career education (55 of the 57 States and territories have appointed career education coordinators), but that a small amount of Federal seed money is necessary to get a comprehensive effort started. Witnesses also testified to the far-reaching effects of Federal funds. This testimony indicated to committee members that States would be willing to assume some of the costs of career education programs, and that the benefits of the initial Federal investment would carry over into the years when the Federal funding begins to decline.

STATE PLANNING AND ACCOUNTABILITY REQUIREMENTS

The conference report incorporates a number of provisions intended to insure that States implement career education at the elementary and secondary levels in an orderly fashion with the commitment of all available resources. Each State desiring funds under the act must file an application and submit a State plan during fiscal year 1979. The State plan must set out explicitly the objectives the State seeks to achieve, how the funds will be used to achieve these objectives, and the criteria by which funds will be distributed within the State. In distributing funds, States must assure that payments will not be allocated solely on the basis of per capita enrollments and that the needs of private schoolchildren and of districts with high unemployment, sparse population, and few students have been given due regard. States must also assure they will maintain their own effort.

As a followup to the State plan States must file annual reports analyzing how these objectives have been met, unless the Commissioner deems such reports unnecessary. And, the U.S. Office of Education must report back to the States its analysis of each State's progress. This type of "feedback" ought to provide the States with the technical assistance they need to achieve the objectives they have set out in their State plans.

POSTSECONDARY CAREER EDUCATION DEMONSTRATION

Most funds for research and demonstration in career education since 1972 have been concentrated at the elementary and secondary level, and for that reason, the conferees feel that broad implementation is appropriate at those

levels. However, the concept of career education is in itself comprehensive and has implications for institutions of higher education.

Toward that end, the conference report authorizes $15 million per year for fiscal years 1979 through 1983 for postsecondary career education demonstration projects. However, the conference report also makes clear that no funds may be made available to institutions of higher education under the authority of section 406 (f) of the Education Amendments of 1974 in any year that this new authorization is funded.

We feel that this provision ought to aid in refining career education and its application to the postsecondary level, while making certain that any existing authorities for research and demonstration would not duplicate these efforts.

STATE LEADERSHIP

Each State receiving funds is required to employ staff with specific skills to administer and coordinate their career education programs. For fiscal year 1979, up to 10 percent of a State's grant may be used for employing State level staff, and for fiscal years 1980 through 1983, up to 5 percent may be used.

The conference report also permits States to use up to 10 percent of their grant each year for State leadership activities, including conducting inservice training and institutes, collecting and disseminating career education materials, conducting needs assessments, and engaging in collaborative arrangements with agencies and organizations representing business, labor, industry, and the professions.

The committee found that career education has widespread support among the general public, and works best when the entire community is involved, since the concept is so intrinsically related to the world of work. We see these collaborative arrangements as being especially important in fostering community involvement.

LOCAL USES OF FUNDS

As I mentioned before, the range of activities that can be funded under the act at the local level is broad. The types of activities that can be funded at the local level include inservice training, purchase of materials and supplies, instilling career education concepts into the classroom, collaboration with community groups, and the development of work experience and field trips for students exploring various careers. The only requirement imposed at the local level is that 15 percent of a State's grant must be spent for local programs in guidance and counseling.

I would like to point out that most students are sorely lacking in the kinds of career skills that these activities seek to provide. The National Assessment for Educational Progress recently found that less than half of the 17-year-olds in the Nation could name more than one skill needed for the job they had tentatively chosen. Over half had trouble writing a job application, and only 35 percent said they had talked to a guidance counselor about their career plans.

While the conference committee feels that these local activities are the backbone of the career education program and wishes to give districts as much flexibility as possible to meet their individual career education needs, we also feel that guidance and counseling is a crucial component in any career education program.

BIAS AND STEREOTYPING

During the committee's consideration of this legislation, we heard testimony that biased and stereotyped educational practices can reinforce stereotyping in the labor market. To prevent this from occurring, the conference report contains a number of amendments to assure that career education programs will be free of bias and stereotyping on account of race, sex, handicap, age, and economic status.

These provisions include collaborative arrangements with organizations representing women, handicapped, minority groups, and older Americans at the State and local level, hiring of a person familiar with the problems of discrimination at the State level, setting forth policies to assure equal access to career education in the State plan, and development of nonstereotyped career education materials.

ALLOTMENTS

The conference report provides that funds shall be allotted to the States including Puerto Rico on the basis of the population aged 5 through 18, with no State receiving less than $125,000 per year. One percent of the funds is set aside for grants to the outlying areas. States receiving the minimum allotment are exempted from complying with the requirements regarding State level staff.

FEDERAL ADMINISTRATION

The Office of Career Education in the Office of Education is charged with administering the act, performing a national leadership role, and providing technical assistance to participating States and territories upon request. The National Institute of Education is permitted to continue its research functions in the area of career education. The National Advisory Council on Career Education is charged with continuing its present functions, and the membership of the Council is expanded to include representatives of business and labor, and of organizations of handicapped, minority groups and women.

The Commissioner of Education is permitted to reserve up to one-half of 1 percent of the funds appropriated for a one-time national evaluation of the programs supported under the act.

MODEL PROGRAMS

The conference report also permits the Commissioner to reserve up to 5 percent of the funds for Federal administration and for making grants to support model programs in career education, including programs demonstrating the most effective methods and techniques in career education and exemplary projects designed to eliminate bias and stereotyping. In addition, no funds may be appropriated for grants or contracts with local educational agencies pursuant to section 406(f) of the Education Amendments of 1974, in any year that this provision is funded.

CAREER EDUCATION INFORMATION PROGRAM

The Commissioner is also permitted to reserve up to 1 percent of the funds to conduct a national career education information program. The Commissioner is charged with examining existing career information activities, including those of the National Occupational Information Coordinating Committee, examining the information needs of eligible organizations and individuals under the act, and furnishing and disseminating this information and information on exemplary career education programs.

In preparing for the Vocational Education Amendments of 1976, the committee was surprised by the lack of occupational information and of coordination between various agencies and bureaus using such information. I believe this provision ties well into existing efforts to improve our data base in this area.

For the sake of legislative history, I would like to point out that all three of these set-asides of funds to the Commissioner—for evaluation, model programs, and information—are meant to be taken from the appropriations before the State allocations are made. Otherwise, the purposes of these requirements may be thwarted by insufficient appropriations.

DEFINITION OF CAREER EDUCATION

Although the conference report affirms the comprehensiveness of the concept of career education and in its general definition of career education, we felt that for the specific purposes of funding under the act, career education ought to be defined so as to exclude those activities involving specific job skill training. In addition, the conference report includes amendments assuring that these career education programs will not be administered solely as part of the vocational education program.

I believe these particular provisions are necessary because some confusion still exists in the public mind regarding the concepts of career education and vocational education, and this language assists in clarifying that they are two distinct concepts. Also, funds for specific job skill training are already available under the Vocational Education Act and the Comprehensive Employment and Training Act; and, therefore, these limited funds ought not to be used for the purpose of actual training.

Mr. Speaker, I believe that this conference report is a well-balanced piece of legislation, encouraging but not requiring the adoption of career education in our schools. It stands in the long tradition of limited Federal funds being used as a catalyst to help States and local school districts bring about change and reform. I believe that the House should overwhelmingly adopt this conference report because it will provide the opportunity for thousands of our citizens to make better informed judgments on the types of careers they want to choose.

Mr. TREEN. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Speaker, I understand in the conference the total authorization was increased $50 million?

Mr. PERKINS. That is correct.

The SPEAKER pro tempore. The time of the gentleman from Kentucky has expired.

Mr. PERKINS. Mr. Speaker, I yield myself 3 additional minutes.

Mr. TREEN. Mr. Speaker, if the gentleman will yield further, it was $275 million for the program over 5 years in the House bill and now it is $325 million that the House has agreed to?

Mr. PERKINS. It is $400 million.

Mr. TREEN. $400 million?

Mr. PERKINS. Yes.

Mr. TREEN. The additional $50 million is for what purpose?

Mr. PERKINS. We have just spread it out over a period of 5 years, $50 million the first year, $100 million the second year and $100 million in the third year, and $50 million in the fourth year. Then the fifth year is down to $25 million.

Mr. TREEN. So there was an increase of $125 million by the conference?

Mr. PERKINS. Yes, if you do not consider the postsecondary funds earmarked under the House bill in the Carter Education Act.

Mr. TREEN. Can the gentleman tell me what will be the source of these funds, assuming they are appropriated?

Mr. PERKINS. Well, the funds, assuming they would be appropriated, will be disbursed on a population basis within the States according to the population ages between 5 and 18. The States will have the sole authority to expend the funds in ways to make these youngsters aware of career opportunities; but in no wise and in no way can the funds be utilized for specific jobs training purposes.

Mr. TREEN. My question was on the source of the funds. Assuming appropriations are made, will they be financed by additional taxes or additional deficits?

Mr. PERKINS. Let me say to my distinguished colleague that we are naturally running up deficits. I would hope to see the trend otherwise; but insofar as important legislation is concerned, we have got to go forward. It would be my hope that we could reverse the trend the gentleman is talking about and maybe put the operation of the Government on a pay-as-you-go basis. So far as I am concerned, I would like to cast a vote along that line myself.

Mr. BUCHANAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in suport of the conference report on H.R. 7, the "Career Education Incentive Act." This legislation originated in the House, and I was most happy the first day of the 95th Congress to join Chairman PERKINS, AL QUIE, and other colleagues on both sides of the aisle in introducing it. I think it is a tribute to Chairman PERKINS that the substance of this conference report is little changed from the original bill. It is an important piece of education legislation, one which can help bring about a much-needed emphasis in American education.

A significant factor in educational failure is the failure of students to see the relevancy of what is demanded in school to what is needed in life. For some, academic achievement is reward enough; for many, if not most, there needs to be a closer connection made between school and work—between what is learned in school and what is needed to build a career in a worthwhile occupation. Traditional school counseling has not provided this connection, even for the college-bound who traditionally have been the main targets of such counseling. Most of us can look back on our own school days and easily recall how little awareness we had of the variety of career choices and opportunities open to us. School counseling and guidance services are an important part of any total program of career guidance, but they cannot alone do the job.

The concept of career education—where career awareness infuses the entire curriculum and augments the entire educational process—is a sound one. Its value has been demonstrated in countless experiments and programs in schools all over the Nation. Both the National Institute of Education and the U.S. Office of Education have assisted in initiating and evaluating career education programs, but the largest part of the activity by far has been funded solely by State and local funds. I think it is important to understand that this educational program has wide support among educators, business, labor, community leaders, and parents in several thousand schools across the Nation.

In my area, in Jefferson County, Ala., with 73 participating schools and in Birmingham with 100 schools, we already have strong career education programs. Dr. J. Revis Hall, the Jefferson County superintendent of schools, and John Rogers, our director of career education, have given outstanding leadership. The same is true of Dr. Wilmer Cody, the superintendent of schools in Birmingham, and Marsha Walker, the director of career education. It is not possible in a brief time to describe all of the activities initiated in the two systems—and all of it without Federal assistance—but both systems have been building career education programs since 1972. One example of the kind of community activity involved is that for 3 years the two systems have participated in career guidance institutes conduced for teachers by the National Alliance of Businessmen. About 250 teachers have participated.

The State of Alabama has moved forward in developing career education programs. We have been fortunate in having the leadership of State Superintendent Wayne Teague and a State career education coordinator, Anita Barber. The enactment of this legislation—and its subsequent funding in appropriations for fiscal 1979 and the four succeeding years—would enormously strengthen their efforts and permit a successful culmination of them.

One particular thrust of the Senate version of H.R. 7—the elimination of sex bias and stereotyping in programs dealing with career choices—greatly strengthens the original bill. I want to call these provisions to the attention of program administrators at all levels.

The provisions of H.R. 7 as embodied in this conference report have been described in detail by Chairman PERKINS. I need not repeat them. But I would like to emphasize most strongly that the concept of career education is one which ties together student, school, community, and family in a program designed to help every single student to understand his or her career possibilities and to relate those in a meaningful way to the basic educational skills. It promotes understanding of the relevancy of both academic preparation for higher education and vocational education which may stop at the secondary level, or may also lead to postsecondary work. It makes the need for a sound education understandable to students who in large part have been cut off from the whole world of work and career development in schools which have stood apart from the broad economic community in which adults must function effectively in order to lead productive and satisfying lives.

Changed times and changed circumstances demand change in education. Education must at a minimum equip individuals to make a constructive contribution to the economic and social life of the community. This cannot be accomplished in isolation from the community. It cannot be accomplished when students are unable to relate their own interests, abilities, and aspirations to real life situations. Career education is not a panacea for all the problems of education, and is not offered as such. But it is a realistic approach to one of the basic problems of education, which I have attempted to describe in this statement. Accordingly, there is every reason to believe that this concept can make a major contribution to the solution of other problems.

I am proud to have been a sponsor of H.R. 7. I think we worked out a very good bill with the other body, and I urge adoption of the conference report.

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from California.

Mr. DON H. CLAUSEN. Mr. Speaker, I rise in strong support of the final version agreed to by the House and Senate conferees on H.R. 7, the bill to authorize a career education program for elementary, secondary, and postsecondary schools.

I commend my colleagues on the House Education and Labor Committee for their untiring efforts to develop a comprehensive bill to insure that more emphasis is placed on career awareness, exploration, decisionmaking and planning in our schools. In particular, I congratulate the distinguished chairman of the committee (Mr. PERKINS) and the ranking minority member from Minnesota (Mr. QUIE) for their careful preparation of this legislation. I must also compliment the gentleman from Alabama (Mr. BUCHANAN) for his personal commitment to the legislation and his efforts to gain its final approval.

Career education programs can provide the important link for our young people between what is taught in school and what is needed to build a career in work of their choice; and, I feel the time is right to implement these programs in a comprehensive manner and on a broad national scale.

This legislation is consistent with our

goal of providing assistance to our local school systems without exerting unnecessary Federal control. The "no strings attached" approach of this bill allows the States greater flexibility in the use of the funds authorized and insures that the money is channeled into those areas with special needs. This is education at its very best as it leaves the educational decisions solely in the hands of those most familiar with the wants and needs of their school systems.

Specifically, the bill authorizes total grants to the States of $325 million over a 5-year period for elementary and secondary career education; $50 million for fiscal year 1979, $100 million for fiscal year 1980, $100 million for fiscal year 1981, $50 million for fiscal year 1982, and $25 million for fiscal year 1983. A minimum per-State allotment has been set at $125,000. In addition, $15 million is authorized for each of the 5 years to conduct postsecondary career education demonstration projects of national significance.

It is anticipated that after these initial 5 years, career education will have become a part of the regular education programs reaching all students and all teachers and that full responsibility for continuation of the programs will be assumed by the States.

I am convinced that this is the correct approach and that we are making a sound and very valuable investment in one of our greatest national resources—our youth.

I urge my colleagues to support this legislation.

Mr. BUCHANAN. Mr. Speaker, I yield 5 minutes to the gentleman from Louisiana (Mr. TREEN).

Mr. TREEN. Mr. Speaker, I hesitate to take the well to oppose a bill that has such a motherhood label as "aid to education," and I also do this reluctantly because of my great respect for the chairman of the Education and Labor Committee and for the ranking minority members of this committee. I want to make a disclaimer that I am not in opposition to the passage of this legislation because I oppose career education. Indeed, I think that in the schools of this country there has not been sufficient emphasis on education relating to careers.

My question, though, is whether or not the Federal Government needs to undertake this program. In some of our educational aid programs, we justify Federal involvement because the allocation formula helps certain areas of the country that are considered underfunded in educational programs. But, under this program, it is simply a doling out of money based upon the population in each State between 5 and 18 years of age. So, it has no redistribution purposes as between the different States, as so many education programs that were designed to help the South. The question I raise also is this: What sources of revenue are there in sight to pay for this program?

The President of the United States says that in 1981 we are going to balance the budget. Many of us in this House on both sides of the aisle would like to help him toward that goal. But, according to the conference report, we step up the authorization to $100 million by the year 1981.

I directed a question to the distinguished chairman of the committee as to where the revenues will come from. They will come either from additional borrowing, which means additional deficit, or they will come from additional taxes. Who in this House will get up and propose the additional taxes to raise the $400 million authorized by this bill? I know that today $100 million, which is the authorized level for 1980 and 1981, does not sound like much money. But that is one-tenth of $1 billion. And we have to start somewhere if we are going to achieve that promised balanced budget.

The Members have probably heard this question from their constituents: How are we going to balance the budget by 1981? I have had that question thrust at me time and time again. My response has been that it is very difficult to cut back on existing programs. The Members know that is true. It is very hard to cut back. I wonder if the Committee on Education and Labor is going to recommend any cut in authorization for educational programs for the year 1981. I understand the opposite will happen. The existing programs will rise in their authorization levels and in the appropriations levels. So where do we start? We start by looking at the new programs. This is not an old program. This is an entirely new program which passed this House under suspension of the rules, and only 14 Members voted against it.

Mr. Speaker, I say that if we are going to make a start on eliminating our monstrous annual deficits, we have to start by looking critically at every new program. Ultimately, of course, this new program will be financed by the taxpayers, whether we borrow temporarily or not to pay for it in 1981 and the other years. The taxpayers will pay for it. I say that the States are just as capable, and in many instances they are more capable, of raising the funds if they want this type of educational program in their States. They are the same people from whom we are extracting money when we levy a Federal tax as a State tax. Since there is no redistribution involved in this case—it is purely a program of extracting taxes and giving funds back to the States—I say that here is a perfect example of an instance where we should let the States do what they are perfectly capable of doing. Five percent of this money is just for Federal administration. So we see, right there, we have a 5-percent take from the money that would be used in this program. This is an admirable goal. But I say—and this I think is consistent with the words of both candidates who ran for president last fall—let us not do the things on the Federal level that the States are perfectly capable of doing. This is a good example. In my opinion, this is a place where we need to start to try to give the President that balanced budget in 1981.

Mr. BUCHANAN. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, there is nothing I would like better than to see the full load of education borne by State, by local, and by private agencies. But the fact is that this can no longer be the case in the United States. My own city of Birmingham is the only major city, to my knowledge, in recent years that has voted a new tax upon itself to finance education for its children. Given the amount of tax take in the form of income tax that the Federal Government consumes, this is the only level in which we can raise the revenues to make an increased investment in one of the highest priorities, the priority of education.

Mr. Speaker, I would point out to my distinguished friend, whom I deeply respect—and I also applaud his efforts toward a balanced budget and toward fiscal responsibility—that the money in this bill is for a limited time and a limited amount, and it constitutes the widow's mite spent by our Government which is spending a king's ransom for many other purposes.

Mr. Speaker, I would suggest to my friend that this is a good investment in our future.

Mr. TREEN. Mr. Speaker, will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Speaker, the gentleman talked about this being the only place where we can get the money. The money is coming from the people who live in Alabama, as well as from the people who live in New York, the people who live in Kentucky, and the people who live in Louisiana.

Those people are not any different, are they, when it comes to paying Federal taxes and State taxes?

Mr. BUCHANAN. Certainly not. But I would say to my friend, the gentleman from Louisiana (Mr. TREEN), that my State for example has already, with its own funding, done a good deal in career education. We have a good record in that field, and we are very proud of that.

This bill is providing a stimulus to States around the country to provide the same kind of vital opportunities for young people that are being provided by some funds which are purely State funds, and I really think this is a very good program.

Mr. TREEN. Mr. Speaker, will the gentleman yield further?

Mr. BUCHANAN. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Speaker, is the gentleman saying that the Federal Government must do this because the States will not do it? Is that what it boils down to?

The dollars are not any more efficient because they come from the Federal Government; will the gentleman concede that?

Mr. BUCHANAN. Mr. Speaker, I do concede the dollars would not be any more efficient, but I think we must make this limited Federal investment in order to help secure and to help provide a broader long-term participation by all the States. I think that full participation by all the States will result in profound value to the country in career education, and it is my hope that this limited investment will accomplish just that.

Mr. Speaker, I yield 3 minutes to the gentleman from Michigan (Mr. PURSELL).

Mr. PURSELL. Mr. Speaker, as a member of the conference committee, I would like to state that I wholeheartedly support this valuable piece of legislation.

I agree with all the Members who are concerned about national, State, and local government budgets. However, the Federal Government has historically usurped the local tax base to such an extent that the money is coming directly to Washington and the local governments are forced to rely on an antiquated property tax base to help finance schools.

If we look at the communities throughout the Nation that are organized municipalities or that have developed a national strategy for using Federal revenue sharing in cities, townships, and counties, we see that the educational community is split nationally and they do not have a real national strategy. Therefore, we spend only about $10 billion a year on educational programs out of a $400 billion Federal budget.

I share with most of the Members the feeling that we must invest for the future of our younger generation, and that we must maximize productivity and improve the quality of education so that we can achieve a better standard of living in America.

Mr. Speaker, I think this is a step in the right direction, and I share with both the Democratic and Republican members of the conference committee the feeling that we must support this legislation.

Mr. JEFFORDS. Mr. Speaker, H.R. 7 is an important and valuable step toward the goal of helping students of all ages to integrate their ideas about work with other aspects of their educations. Yet, the minimum allotments authorized for States under the act will not be sufficient to support adequate programs in small States such as Vermont and many others. The issue is clear: the fixed costs of starting an adequate program are greater than the minimum allotment.

H.R. 7 seeks to redress a widely recognized problem: Our educational system has not been able successfully to help students relate what they learn in school to what they will do when they leave school. Further, many students are unaware of the variety of careers open to them. Most are unable to match their individual talents to specific careers, in part because they do not receive adequate advice and counseling throughout their school years. The National Advisory Council on Career Education has listed 11 specific shortfalls of current educational programs, including the most basic problem:

Too many persons leave our educational system at both the secondary and collegiate levels unequipped with the vocational skills, the self-understanding and career decisionmaking skills, or the work attitudes that are essential for making a successful transition from school to work.

In order to meet the problems outlined by these criticisms and others, H.R. 7 mandates a number of activities at both State and local levels. For example, States are asked to provide leadership and action in:

(A) conducting inservice institutes for educational personnel;

(B) training local career education coordinators;

(C) collecting, evaluating, and disseminating, career education materials on an intrastate and interstate basis with special emphasis on overcoming sex bias and stereotyping;

(D) conducting statewide needs assessment and evaluation studies;

(E) conducting statewide career education leadership conferences;

(F) engaging in collaborative relationships with other agencies of State government and with public agencies and private organizations representing business, labor, industry and the professions and organizations representing the handicapped, minority groups, women, and older Americans; and

(G) promoting the adaptation of teacher-training curricula to the concept of career education by institutions of higher education located in the State;

Yet, States can spend only 20 percent of their funds in fiscal year 1979, and 15 percent in succeeding years, for all of these State-level purposes. Even if the act were to be fully funded, Vermont would receive only about $136,000 to accomplish all of these goals. Twenty percent of $136,000 is not adequate for State-level activities.

No matter what the good intentions on the part of each State, such amounts are not adequate to support effective programs. For example, the Vermont State career education office has developed a career education consortium of all institutions of higher education in the State. The members meet and contribute actively to the State career allotment plan. All of this takes money, yet the Vermont allotment under H.R. 7 would not be adequate to continue this project while also supporting other mandated activities under the act.

In addition, States must distribute funds under the act to local education agencies for a wide variety of classroom and other purposes. Eighty percent of $136,000, or $108,800, is not adequate to fund the 13 separate local activities mandated by H.R. 7 for all of the school districts in Vermont, or in any other small State.

Small, rural States face particular problems in mounting effective programs, because their populations are dispersed and the range of locally available career options is limited. A straight proportionate-to-population allotment schedule ignores the fact that effective programs require an adequate minimum expenditure unrelated to population. The minimum $125,000 allotment contained in H.R. 7 is not adequate, and we cannot expect small States to mount adequate career education programs at this funding level. I urge you to join me in supporting H.R. 7 because it promises to help States begin to solve a complex educational problem. I also urge you to join me in reconsidering the tiny minimum allotment allowed States under this act, and in future legislation providing more realistic funding for small States like Vermont to meet the basic, laudable goals of this legislation.

Mr. TEAGUE. Mr. Speaker, today we are considering a conference report on the Elementary and Secondary Career Education Act of 1977. I realize that the House may not amend a conference report and under the rules may only accept or reject the report. I have no problem with H.R. 7, the bill under consideration, and do not want my remarks to be considered as a criticism of the bill or the conference report accompanying the bill. My purpose for rising today is to bring to the attention of this body the continuing criticism which I hear and read with regard to education programs administered by the Department of Health, Education, and Welfare. You may recall that a Member of this body leveled a very serious charge when H.R. 8701, the GI Bill Improvements Act of 1977, was being considered on the floor following amendments by the Senate. In fact, the words used were that the VA education program is a mess. On November 11, I took the occasion to respond to the remarks of the gentleman who had called the VA education program a mess by pointing to recent newspaper stories about the enormous rate of unpaid student education loans which have become a major national scandal. The New York Times in a recent article emphasized that while the Federal Government shovels out billions of dollars every year to colleges and universities, there is no unifying policy in higher education, nor is there any central coordination.

During the recent recess, I came across another article about one aspect of the education program administered by the Department of Health, Education, and Welfare. The article pointed out that HEW manages 130 education programs and that this year the Federal Government will shell out a total of $19.6 billion for education. Another article that has been brought to my attention appeared in the November 1977 issue of the Washingtonian Monthly entitled "Tilting at Windmills." While I do not subscribe to the recommendations made by the article, it is another example of the serious concern of so many of our citizens with regard to the Federal Student Loan program and the apparent inability of the Federal Government to obtain repayments from students who have defaulted on the loans. As the article in the Washingtonian Monthly points out, 37 HEW officials making between $15,000 and $43,000 a year have failed to repay Federal student loans. When high-paid HEW officials thumb their noses at their obligations to repay Federal student loans, I feel it is fair to say that this program is in a mess. It is not a theoretical mess. It is not a rhetorical mess. It is a mess documented by the facts.

Mr. Speaker, at this time I would like to make as part of my remarks the Washingtonian Monthly article entitled "Tilting at Windmills" and a newspaper article in the November 27 issue of the Washington Post entitled "U.S. School Aid Extension: Hand-Wringing, Verbal Brickbats." In addition, I want to include as part of these remarks recent news items from the American Legion magazine and the Washington Star that bear on this subject.

Lastly, Mr. Speaker, the President has signed into law H.R. 8701, the GI Bill Improvements Act of 1977, which is now identified as Public Law 95–202, and I would like to include as part of my statement the remarks of the President

when he signed Public Law 85–202 on November 23. As the President indicated, the nearly $25 billion that we have spent on the current GI bill has been an excellent investment in the Nation's future. Can we say the same thing for the billions of dollars that have been poured into the educational programs administered by the Department of Health, Education, and Welfare? I, for one, will keep my eye on these programs and make sure HEW administrators are carrying out the intent of Congress. It appears that a sizable portion of America's taxpayers doubt they are getting their money's worth.

The articles follow:

[From the Washington Monthly, November 1977]

TILTING AT WINDMILLS

The cost of higher education is being recognized more and more as a serious national problem. The Washington Monthly got into it several years ago through a logical back door. One of our central concerns has been the extreme caution, often bordering on cowardice, of federal employees—their unwillingness to blow the whistle when they encounter wrong-doing, or to take risks to make sure their bosses are exposed to the right ideas and facts. Some of the reasons we've found for that caution are deeply ingrained in character and difficult to do anything about. But one seems easy to cure. It is the cost of college, a cause for caution most commonly found in people between 40 and 55 who feel that they can't take the slightest risk of losing the job that is paying their children's tuition—that indeed it would be selfish of them to seek the personal glory of courageous public service at the risk of denying their children a college education.

To us, then, a federal student loan program became an important way to deal with the fears of these government employees, and of course, as we thought about it, with the fears of non-rich parents throughout the country. But the present federal student loan program is a disaster. It needs to be taken out of the hands of the banks, made available to everyone who needs it, and made impossible for either schools or students to defraud. The way to do all this is to make the loans payable by the government directly to schools for tuition and directly to the students for living expenses, in installments as needed. If a student gets cheated, either he or the government should be able to sue the school or its head (so that he can't hide behind a corporate shield) for triple damages. So that the student won't fail to repay—as we recently learned 37 HEW officials making between $15,000 and $43,000 a year had failed to do—repayment should be withheld from earnings along with income taxes at a rate of 3 to 5 per cent annually. For once there is a reasonable simple solution to a pressing public problem. We hope Congress will get busy and enact it.

[From the Washington Post, Nov. 27, 1977]

U.S. SCHOOL AID EXTENSION; HAND-WRINGING, VERBAL BRICKBATS

(By Bill Peterson)

President Carter will shortly be forced to do something his administration has so far studiously avoided: set forth a policy on aid to education.

Within the next week, Carter and Health, Education and Welfare Secretary Joseph A. Califano Jr. will be given position papers on two of the most important educational issues they will face while in office; proposals to continue the largest single federal aid program for elementary and secondary schools, and whether or not to create a Cabinet-level Department of Education.

The issues have little popular appeal and have produced a minimum of public interest. But both hold far reaching implications for the federal role in education and have created an extraordinary amount of handwringing in Congress, education circles and inside the administration.

This is especially true of the extension of the Elementary and Secondary Education Act, the largest single federal aid to education program, which expires next year.

For months now, the heavies in the education world have been holding hearings, writing position papers, issuing studies and exchanging verbal brickbats over the program, which will supply $3.7 billion to the nation's schools this year.

They've spent more than $15 million doing so, and accumulated a bookcase full of official-looking documents.

Yet little breathtakingly different is expected to develop from the process, according to congressional and administration sources. The debate has been essentially over two basic issues: does federal compensatory aid to education do any good, and who should get federal dollars for what?

Carter is expected to submit his educational plans to Congress by mid-January. So far Califano and other policymakers have sketched only the broadest outlines of what these plans may be.

There is, however, general agreement in the administration and Congress that the heart of the ESEA, Title I, which is aimed at providing compensatory funds to disadvantaged children, should be continued with more federal dollars—20 per cent more under one proposal sent to the Office of Management and Budget.

The key question is how to divide limited funds. Money for education is tight. And any shift in emphasis—or even in the statistical data used to distribute funds—can touch off emotional political fights.

Califano, in a recent Chicago speech, gave the best insight into administration thinking. He proposed more Title I funds for high schools, more money for inner-city schools, more emphasis on parent involvement, making schools "social service centers," and expanding Title I programs into the summer.

The administration, he said, "will explore new ways to help Title I areas with especially large concentrations of needy children." Only 5 per cent of the nation's high school students now receive compensatory education, he added, "yet it is in the high schools where test scores in many areas are falling and where the dropout rates are the highest."

The other area Califano has expressed a strong interest in is testing to establish standards in basic reading, writing and arithmetic skills—an apparent reaction to the back-to-basics movement. In a speech last month, the secretary said he opposes a standardized national competency test, but "I believe that every state should have a program for developing and measuring basic skills that includes competency testing."

He also announced that HEW will throw its weight and dollars behind "a new emphasis on basic skills" and will finance a series of moves to support testing efforts.

A little background is in order here. When President Johnson signed the original ESEA legislation, a cornerstone of his Great Society program, back in 1965, he declared, "No law I have signed or will ever sign means more to the future of America."

Until that time, virtually the only assistance Washington provided for local schools was for impact aid, which gives money to districts with major concentrations of federal workers. ESEA, however, provided a major infusion of federal dollars to most of the nation's 16,000 school districts, aid that now amounts to 8 per cent of the budgets of the nation's elementary and secondary school systems.

It directed the major part of these funds, through the Title I program, toward instructional help for the nation's poorest schools and children.

Since that time, the federal role in education has expended by leaps and bounds; today, HEW manages 130 different education programs. And this year Uncle Sam will shell out a total of $19.6 billion for education.

Not all of this gets to public school systems, nor to education per se, however. The U.S. education budget, for instance, includes $2.8 billion this year for child nutrition and $1.6 billion for educating servicemen.

The diversity of the programs and a desire to create a stronger advocate for educational spending in Washington have led to a concerted push by the National Education Association and other groups this year for a Cabinet-level Department of Education.

Carter, while a candidate, pledged to work for such a department and has set up a task force to study the matter as part of his government reorganization project. But Califano opposes a new department, and the administration has been notably silent on the issue.

The education task force has completed the initial phase of its work and expects to give Carter its findings within the next two weeks, according to Pat Gwalting, who heads the effort. The group, she said, has looked at three options: leaving education in HEW and upgrading its status there; creating a new department to oversee just education programs; or making a broader new Cabinet post that would include education and human development programs.

Education programs are now scattered in more than 40 different agencies in the departments of HEW, Agriculture, Defense and Labor. Policy often conflicts; the policymaking apparatus is cumbersome.

The difficulty in coming up with an administration policy on the elementary and secondary education bill provides a case in point. Discussions on it have taken almost six months.

HEW has three separate power centers involved in the fray, complicating matters. One is in the office of Commissioner of Education Ernest L. Boyer, formerly head of the State University of New York and a skillful bureaucratic infighter; another comes under Assistant HEW Secretary of Education Mary Berry, an aggressive former chancellor of the University of Colorado, at Boulder, the third, and most powerful is Califano's immediate circle. Each has its own policy staff, its own turf and interest to protect.

Each of the eight separate programs under ESEA presented policy conflicts. In addition, charges of mismanagement and too much paperwork in some programs had to be dealt with. But Title I and bilingual education developed into the task force's two most controversial issues.

The problem with bilingual education was that the government had spent a half a billion dollars in nine years to help students with little or no command of English, but it had done very little to find if the program did any good. Yet the program has entrenched often vocal, constituencies, making it difficult to alter.

The evidence on Title I was conflicting. For almost a decade the evaluations of the program were poor. Charges of mismanagement on the federal, state and local levels were widespread.

But a National Institute of Education study, which came out in September, concluded Title I programs had dramatically increased reading and math abilities in first and third graders tested.

The study had a couple of holes. It didn't, for example, show that pupils retained what they learned through the summer during the school year. But the study told the administration and members of Congress what they wanted to hear.

The biggest single challenge to the status quo in Title I has come from Rep. Albert H. Quie, of Minnesota, the ranking Republican

on the House Education and Labor Committee. He has proposed that funds be distributed on the basis of low achievement rather than poverty.

"I believe that every child who has serious problems learning to read, write and count is in need of special help," he says.

Currently, Title I funds are distributed under a complex formula that uses the number of children from families with incomes below the federal poverty line and in homes that receive Aid for Dependent Children. Figures are based on the 1970 census.

Population, however, has shifted since 1970. The South, which has traditionally benefited more from Title I than other regions of the country, has grown more prosperous; the Northeast less so.

Critics say the Quie formula would take money away from poor school districts and give it to the middle class; thus it is frowned on by the administration.

[From the Washington Star, Nov. 13, 1977]

STUDENTS TURN DEAF EAR ON UNPAID LOAN QUERY

The Department of Health, Education and Welfare said yesterday it has received replies from only 1 percent of the 22,500 persons it contacted for being in default on student loans for at least four years.

Among the 121 replies analyzed—250 were received—only 49 persons promised to pay in full, said HEW Secretary Joseph Califano.

Califano said 35 persons refused to pay, 17 said they were unable to pay now, one asserted he is permanently disabled, which could result in the loan being forgiven, seven were dead, and 12 said they would visit an HEW office of discuss the debt.

Taxpayers have paid an estimated $413.6 million to cover government guaranteed loans to students who never paid them back. The Office of Education estimates one in six of the loans it guarantees is not paid back.

HEW mailed leters Oct. 30–31 to 22,500 of the 50,000 whose defaults are at least four years old. Letters also will be sent soon to the other 344,000 borrowers who have defaulted on federally insured loans.

HEW said the letter writing campaign is the first government effort since 1972 to reach student loan defaulters other than those employed by HEW.

The replies represent a good response rate, said Leo Kornfeld, director of student aid at HEW's Office of Education. He said many recipients quickly phoned HEW.

Kornfeld noted HEW regional offices have arranged with U.S. attorneys to prosecute defaulters.

[From the American Legion Magazine, November 1977]

U.S. CURBS THREATS OF BILL COLLECTORS, BUT DUNS STUDENT LOAN DEFAULTERS, AND INITIATES NEW WAR ON PAPERWORK

The Office of Education, meanwhile announced that it will call in a private collection agency—presumably, one of the more ethical ones—to track down student loan defaulters and collect the unpaid loans which had been federally insured.

Since the program began in 1967, some 390,000 student loans—out of approximately 4 million, have been left unpaid, leaving Uncle Sam responsible for $413 million in I.O.U.'s. Additionally, several thousand students wriggled out of their promise to pay back their tuition loans, amounting to $24 million, by going into bankruptcy.

In admitting that the collecting of the student debt was too much for his own dunning staff of 106, Leo Kornfeld, Deputy Commissioner for Student Financial Assistance, said that the decision to call in professional bill collectors is "rooted in our firm conviction that those who are able but unwilling to pay their debts do a grave injustice to the American public who provided them with an opportunity for education."

Mr. BLOUIN. Mr. Speaker, a little over 2 years ago, during the time the Subcommittee on Elementary, Secondary, and Vocational Education was conducting hearings over the reauthorization of the vocational education amendments, I began to feel there was something lacking—not so much with the concept of occupational or vocational education, but in the area of assisting students to know their interests; to know what their opportunities are; what career choices there were available to them.

This was the beginning—in my mind—of the career education concept. Since that time due to the initiative of the chairman of the Elementary, Secondary, and Vocational Education Subcommittee, my distinguished colleague and friend, the Honorable CARL PERKINS, the career education concept has developed into a piece of legislation which passed both the House and Senate in an almost unanimous fashion. I am pleased to have actively assisted the chairman in the development of this legislation and would like to commend him for being so receptive to my thoughts and ideas as the legislation was formulated for introduction last spring.

I do not feel there is a need to expound on all the components of the bill as the Members have already expressed their support for the bill during its initial passage in April. However, I do have some observations I would like to share with you prior to your vote on the conference report.

The House version was built around the principle that the bill's concept should be directed toward the elementary and secondary level. Postsecondary schools were not included as eligible recipients, however the House version did prohibit local education agencies from receiving any funds appropriated for career education demonstration projects under section 406(f) of the Education Amendments of 1974. Thus, restricting section 406(f) funds to postsecondary career education demonstration projects.

The version which passed the Senate, however, authorized $15 million for each of the 5 fiscal years of the act to be used for postsecondary career education demonstration projects, with a seemingly strong emphasis toward career placement guidance and counseling. In addition, there was no reference to section 406(f) funds.

The conference substitute kept the Senate language with the provision that "no funds may be authorized to be appropriated under section 406(f) of the Education Amendments of 1974 for postsecondary education projects in any year in which this provision is funded."

I supported the conference substitute, only because it carried a separate $15 million authorization. My reluctance was based on the fact that I see this legislation as a concept which must begin early in the elementary grades. The intent of career education—in my opinion—is that to be meaningful it must give students a more accurate picture of the workaday world. It should give them a better idea of the careers available to them in our society and it should grant them a better assessment of the skills, talents, and training they need to fill those jobs.

To be quite frank, the career education concept employed at the postsecondary level is after the fact, at least as I envision the concept. I am not opposed to the career education demonstration idea, however I would rather it would have been addressed through the vehicle contained in the House bill. The $15 million separate authorization does of course place additional emphasis on career education demonstration projects, thus I would hope that those postsecondary institutions utilizing these dollars will develop substantive projects which will be directed toward the original concept of the bill and not be used solely as dollars to assist the development of postsecondary placement services. A second observation is directed toward the 15-percent setaside for guidance and counseling, which was a part of the House-passed bill. The Senate bill contained no comparable provision, however the Senate receded to the House on this point, although the conferees wisely made clear in the conference report "that this requirement regarding a minimal expenditure for guidance and counseling activities is a requirement applicable to the State's allocation and is not a requirement which each local school district receiving funds must follow."

I actively supported the retention of the 15-percent setaside, as I believe that in order to truly develop an "integrated" career education program, guidance and counseling must be a vital component in its development. I would, however, like to direct a comment toward the guidance and counseling profession. The 15-percent setaside, grants them a specific responsibility in the development of an integrated career education program. As a Member who has actively supported the profession in the past, I will be watching for their leadership in the development of a meaningful career education program nationwide. It is a big responsibility, but one I feel confident they can master.

Mr. Speaker, my remarks thus far have been in the form of communicating the idea that those components who are mandated the responsibility of carrying out this legislation, have the responsibility of making it work—of making it a better program through demonstration projects and through the creation of innovative ideas.

I would be remiss in my words of caution, if I did not also mention that career education will not work if teachers and administrators, local school boards, business, labor, and civic officials do not help make it work. Individuals at the local level, both within and without the educational system have a wealth of background, knowledge, and experience which can be very valuable in the planning process for career education programs at the local level. That knowledge and experience will be essential in the implementation of successful career education programs. Once this legislation is enacted, I hope these individuals will accept the challenge and the responsi-

bility to assume a leadership role at the State and local level.

Mr. Speaker, I am proud to have been a part of this concept from its beginning and I urge the adoption of the conference report.

Mr. QUIE. Mr. Speaker, I have for many years urged that our schools do a better job of acquainting young people with the whole range of career opportunities open to them, and in the process involve the community and the home in that effort. There are many reasons for our unconscionably high rate of youth unemployment. but undoubtedly one is the gulf which exists between school and work. This gulf is more often bridged by vocational education, but the need for close linkages between education and work extends to all of education. It is particularly acute for our elementary and secondary schools, to which this bill is for the most part addressed.

I think it is most appropriate to recall the enormous contribution of Dr. Sidney Marland, who as U.S. Commissioner of Education and Assistant Secretary for Education in HEW brought national attention to the need for a career education emphasis in our schools. We also owe much to the original thinking and continued leadership of Dr. Kenneth Hoyt, who as Director of the Office of Career Education in the U.S. Office of Education has worked tirelessly and with great success in getting these programs started in the schools. Without their combined effort the Congress would not have moved as it has to initiate and implement a national program.

For several years now the U.S. Office of Education, operating with an appropriation of about $10 million a year, has financed model programs around the country which have demonstrated that career awareness can be successfully infused in the elementary and secondary school curriculum. Moreover, most States now have State coordinators of career education programs and thousands of school districts have made a beginning on such programs without Federal assistance. In Minnesota Ms. Phyllis Paul has been the consultant for career education in the State Department of Education and we have some outstanding programs involving schools, industry, the community, and institutions of higher education. However, we need the stimulous of Federal grants to the States to move this program beyond the project stage and make it an integral part of our total educational system.

H.R. 7 is designed for this purpose, and I am pleased to have joined Chairman PERKINS as one of its sponsors. But it is not just another authorization for Federal grants which will continue on the books for years long after the need for the initial stimulus is past. It has some unique features. For one thing, section 4(b) contains a "self destruct" provision in the authorization which will immediately test whether the Congress is serious about this program. No funds may be appropriated for any fiscal year after fiscal 1979 unless they had been appropriated for the immediately preceding fiscal year.

Thus, if no funds are appropriated for fiscal 1979, none are authorized thereafter. Also, the authorizations over 5 years start at a substantial $50 million the first year, raise to $100 million for each of the next 2, and then taper off to $50 million and $25 million for the last 2 years. This is to emphasize the conviction of our committee, which was shared in the other body, that this indeed should be a temporary program and that the very nature of the concept of career education is such that once it is firmly implanted in the educational system continued Federal assistance is unnecessary. Also, Federal grants used for paying State personnel and administrative costs may not total more than 10 percent in the first year or 5 percent thereafter. Federal funds used to pay the State staff must be matched with 25 percent non-Federal funds the second year and 50 percent thereafter; program funds have to be matched 25 percent in the third year, 50 percent in the fourth year, and 75 percent in the final year. This is intended to emphasize the declining Federal role as the program moves along.

Both versions of H.R. 7 were so structured that a very large percentage of funds going to each State—80 percent in the first year and 85 percent thereafter—will be allocated to local educational agencies for actually implementing career education programs. State leadership is important, but these Federal funds will be concentrated on funding actual programs in local school systems.

Mr. Speaker, there were not very many or very significant differences between the two versions of H.R. 7. The Senate had slightly larger authorization figures and a separate $15 million annual authorization for project grants to colleges and universities for career education programs, which we accepted. They accepted our rather unique provision for a self destructing authorization, which I have described, and for a definition of career education which stresses the relationship between work values and other life roles and choices, such as family life. They also agreed to our provision earmarking at least 15 percent of the funds not set aside for State level activities for counseling and guidance activities at the local level.

Finally, this bill authorizes support for a practical program in education for which the need is both apparent and universal, and which has been tested over a period of years. There is every indication that the stimulation which can be provided through H.R. 7 will be enough to move education in a direction which it should have taken long ago. I urge adoption of the conference report.

Mr. PERKINS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore (Mr. SMITH of Iowa). The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. TREEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device; and there were—yeas 372, nays 20, not voting 42, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Jones of Tennessee for, with Mr. McDonald against.

Until further notice:

Ms. Chisholm with Mr. Kasten.
Mr. Dent with Mr. Quayle.
Mr. Le Fante with Mr. Whalen.
Mr. Teague with Mr. Rose.
Mr. Shipley with Mr. Kelly.
Mr. Biaggi with Mr. Cleveland.
Mr. Milford with Mr. Goldwater.
Mr. Diggs with Mr. Ruppe.
Mr. Badillo with Mr. Rousselot.
Mr. Fithian with Mr. Cochran of Mississippi.
Mr. Koch with Mr. Armstrong.
Mr. Jenkins with Mr. Cunningham.
Mr. Giaimo with Mr. Krueger.
Mr. Gaydos with Mr. Blouin.
Mr. White with Mr. Beard of Tennessee.
Mr. Van Deerlin with Mr. Moss.
Mr. Pepper with Mr. Roberts.
Mr. John Burton with Mr. Alexander.
Mr. Dingell with Mrs. Smith of Nebraska.

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had adopted the following resolution:

S. RES. 328

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of Honorable John L. McClellan, late a Senator from the State of Arkansas.

Resolved, That the President of the Senate appoint a committee, of which he shall be a member, to attend the funeral of the deceased Senator.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That when the Senate stands adjourned or in recess today, it do so as a further mark of respect to the memory of the deceased.

GENERAL LEAVE

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 7, the Elementary and Secondary Career Education Act of 1977.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

INTERNATIONAL FISHERY AGREEMENT WITH MEXICO

Mr. MURPHY of New York. Mr. Speaker, I move to take from the Speaker's table the bill (H.R. 9794) to bring the governing international fishery agreement with Mexico within the purview of the Fishery Conservation Zone Transition Act, with a Senate amendment thereto, and recede from the disagreement to and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, after line 8, insert:

SEC. 3. (a) Section 15 of the Coastal Zone Management Act Amendments of 1976 (15 U.S.C. 1511a) is amended as follows:

(1) Subsection (a) of that section is amended by striking out "Associate" each place it appears therein and inserting in lieu thereof in each place "Assistant".

(2) Subsection (b) of that section is repealed.

(3) Subsection (c) of that section is redesignated as subsection (b).

(b) There shall be in the National Oceanic and Atmospheric Administration a General Counsel appointed by the President, by and with the advice and consent of the Senate, who shall be compensated at the rate now or hereafter provided for level V of the Executive Pay Rates (5 U.S.C. 5316). The General Counsel shall serve as the chief legal officer for all legal matters which may arise in connection with the conduct of the functions of the Administration.

(c) Section 5316 of title 5, United States Code, is amended by striking out paragraph (140), and inserting in lieu thereof the following new paragraphs:

"(140) Assistant Administrator for Coastal Zone Management, National Oceanic and Atmospheric Administration."

"(141) General Counsel, National Oceanic and Atmospheric Administration."

"(142) Assistant Administrators (4), National Oceanic and Atmospheric Administration."

(d) Section 2(e) of Reorganization Plan Number 4 of 1970 (relating to the National Oceanic and Atmospheric Administration) (84 Stat. 2090) is amended—

(1) by striking out "three additional officers" in the first sentence thereof, and inserting in lieu thereof "four assistant administrators";

(2) by striking out "such officer" in the second sentence thereof, and inserting in lieu thereof "such assistant administrator", and

(3) by striking out "under the classified civil service," and inserting in lieu thereof "without regard to the provisions of title 5, United States Code, governing appointments in the competitive service,".

(e) The Secretary of Commerce may, in order to carry out the functions vested in the Secretary and carried out through the National Oceanic and Atmospheric Administration, establish, fix the compensation for, and make appointments to, eight new positions within the National Oceanic and Atmospheric Administration. Such positions may be established without regard to the provisions of chapter 51 of title 5, United States Code, and the compensation therefor may be fixed without regard to chapter 53 of such title 5, except the rates of compensation for such positions shall not exceed the maximum rate established from time to time for GS-18 of the General Schedule under section 5332 of title 5, United States Code. An appointment to each such position may be made by the Secretary without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and persons appointed to such positions shall serve at the pleasure of the Secretary. The positions authorized by this subsection shall be in addition to the number of positions otherwise authorized by law.

Mr. MURPHY of New York (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the Senate amendment be dispensed with and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FORSYTHE. Mr. Speaker, I demand a division on the question and the vote on whether to recede. On the House vote to recede, I will offer a privileged motion.

The SPEAKER pro tempore. The question will be divided.

The gentleman from New York (Mr. MURPHY) will be recognized for 1 hour.

Mr. MURPHY of New York. Mr. Speaker, the House passed H.R. 9794 on the first day of this month.

As passed by the House, H.R. 9794 would give congressional approval to the governing international fishery agreement with Mexico and it would waive the procedural requirements of the 200-Mile Fisheries Zone Act so that the agreement could go into effect immediately.

Mr. Speaker, the Senate passed H.R. 9794 with an amendment.

As passed by the Senate, H.R. 9794 retains the House-passed language of the bill—which has to do with the Mexican fisheries agreement—and it adds a new provision to the bill which would authorize the addition of new high-level positions in the National Oceanic and Atmospheric Administration—better known as NOAA.

Mr. Speaker, Reorganization Plan No. 4 of 1970 established NOAA to provide a focus for those Federal civilian programs dealing with the oceans and atmosphere. At that time the Federal efforts relating to the oceans were confined largely to scientific investigation and the provision

of ocean services such as mapping and the reporting of environmental data. Over the last 7 years NOAA has been assigned increasing responsibilities involving regulation, management, and protection of the resources of the sea.

However, the statutes that have expanded NOAA's role, such as the Fisheries Conservation and Management Act of 1976, the Marine Mammal Protection Act of 1972, and the Endangered Species Act of 1973, did not provide authority for NOAA to modify its management structure, particularly in view of its expanded mission.

Three executive level V positions established pursuant to section 2(e) of Reorganization Plan No. 4 of 1970 are in classified civil service, on the theory that their duties would be of a scientific and technical nature with a minimum of policy development. However, subsequent enactments have required NOAA to make a number of major policy decisions of a sensitivity far greater than those originally contemplated by Reorganization Plan No. 4. In the past few years, for example, NOAA officials have made several resource management and protection decisions which have vitally affected the entire U.S. fishing industry, including the tuna fleet and Indian and non-Indian salmon fishermen in the Pacific Northwest. The number and difficulty of these decisions will surely increase as the resources of the seas are further explored and developed.

Mr. Speaker, at the time the reorganization plan was submitted in 1970, it was acknowledged that NOAA development would have to be monitored and changes made in the plan as necessary. As Federal ocean programs and policy continue to develop, it may be that significant organization changes in NOAA will become necessary. However, there is a need at this time for certain less fundamental administrative changes to assure effective direction of its existing programs. The amendment to the bill provided by the Senate would give this much-needed flexibility to the Secretary to appoint needed policy-level personnel to assist in the design and implementation of the invigorated programs of NOAA.

First, the amendment would abolish the three existing civil service-level positions and replace them with four new policy-level positions to assure the Administrator the flexibility to form a team capable of vigorously confronting the challenges NOAA faces. This change is in keeping with the trend exemplified in the Coastal Zone Management Act Amendments of 1976 to exempt these types of policy positions from the classified civil service. Persons occupying the present level V positions, if not appointed to one of the new positions, would have the rights granted by title 5 of the United States Code to persons in the classified service affected by the abolition of an existing position.

Second, the amendment would make a technical change in the Coastal Zone Management Act Amendments of 1976 to change the title of head of that program from "Associate Administrator" to "Assistant Administrator" to match the title of others of the same rank.

Third, it would authorize a General Counsel to be appointed by the President, by and with the advice and consent of the Senate, to be compensated at a level V executive pay rate. The General Counsel would serve as the chief legal officer for all matters that may arise concerning NOAA when carrying out its functions.

Finally, the amendment would authorize the Secretary to appoint eight new positions in NOAA at pay rates not to exceed GS–18. While NOAA has been able, by virtue of special legislative provisions, to add high level scientific personnel, it is unable to add top-level career personnel with backgrounds in fields like economics, political science, resource management, law and regulatory policy. These skills are essential if NOAA is to respond to its increased responsibilities for enforcement, management, and policy development under the new legislation of the last 4 years.

Mr. Speaker, I urge the prompt passage of H.R. 9794, as amended by the Senate.

Mr. Speaker, at this time I yield to the distinguished gentleman from New Jersey (Mr. FORSYTHE).

Mr. FORSYTHE. Mr. Speaker, I thank the gentleman. If this is the appropriate time, I have a privileged motion at the desk and I ask for its consideration.

The SPEAKER pro tempore. The first question is, Will the House recede from its disagreement to the Senate amendment.

The House receded from its disagreement to the Senate amendment.

PREFERENTIAL MOTION OFFERED BY MR. FORSYTHE

Mr. FORSYTHE. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. FORSYTHE moves to concur in the amendment of the Senate with an amendment, as follows: In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

SEC. 3. (a)(1) Section 2 of Reorganization Plan Numbered 4 of 1970 (relating to the National Oceanic and Atmospheric Administration, 84 Stat. 2090) is amended to read as follows:

"(e)(1) There shall be in the Administration a General Counsel and five Assistant Administrators, one of whom shall be the Assistant Administrator for Coastal Zone Management and one of whom shall be the Assistant Administrator for Fisheries. The General Counsel and each Assistant Administrator shall be appointed by the Secretary, subject to approval of the President, and shall be compensated at a rate now or hereafter provided for level V of the Executive Schedule Pay Rates (5 U.S.C. 5316).

"(2) The General Counsel shall serve as the chief legal officer for all legal matters which may arise in connection with the conduct of the functions of the Administration.

"(3) The Assistant Administrator for Coastal Zone Management shall be an individual who is, by reason of background and experience, especially qualified to direct the implementation and administration of the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.).

"(4) The Assistant Administrator for Fisheries shall be responsible for all matters related to living marine resources which may arise in connection with the conduct of the functions of the Administration."

(2) Subsection (a) of section 15 of the Coastal Zone Management Act Amendments of 1976 (15 U.S.C. 1511a) is repealed.

(b) Section 5316 of title 5, United States Code, is amended by striking out paragraph (140) and inserting in lieu thereof the following new paragraphs:

"(140) Assistant Administrator for Coastal Zone Management, National Oceanic and Atmospheric Administration.

"(141) Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration.

"(142) Assistant Administrators (3), National Oceanic and Atmospheric Administration.

"(143) General Counsel, National Oceanic and Atmospheric Administration."

(c) Section 5108(a) of Title 5, United States Code, is amended by striking out "3293" and inserting in lieu thereof "3301".

Mr. FORSYTHE (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The Chair recognizes the gentleman from New York (Mr. MURPHY).

Mr. MURPHY of New York. Mr. Speaker, the gentleman from New Jersey has offered an amendment that was carefully worked out with the members of the Post Office and Civil Service Committee. The net effect of the amendment is to insure that NOAA has an Assistant Administrator of Fisheries as well as an Assistant Administrator for Coastal Zone Management. It would also add eight more supergrade positions to the civil service supergrade pool, with these eight new supergrade positions to be slotted to NOAA.

As I just mentioned, this legislation adds eight supergrades to the National Oceanic and Atmospheric Administration, but the amendment offered by the gentleman from New Jersey keeps it within section 5108(a) of title 5 of the United States Code, and these eight supergrades for NOAA come out of the civil service supergrade pool.

Mrs. SCHROEDER. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Speaker, I want to thank the gentleman from New York and the other gentlemen on the committee for listening and trying to correct this problem. I think we have all been concerned about the growth of supergrades, and we were worried about the Senate language before this amendment was offered. The Civil Service Commission lost all management over mushrooming numbers of supergrades because of people slipping them in everywhere.

If the Senate language held these eight supergrades would not be qualified under the merit system and would not come from the central supergrade pool Civil Service controls. This amendment insists the supergrades be qualified under the merit system and come from the pool by increasing the pool to include them. This allows Civil Service to oversee the growth of supergrades. Every agency wants more. There must be a check.

We are certainly hoping that the Civil Service Commission sees our legislative intent in that the eight additional slots in the supergrade pool are for NOAA. I

want to thank the committee for working hard to work out this problem.

Mr. MURPHY of New York. I want to thank the gentlewoman from Colorado for her contribution. The Committee on Merchant Marine and Fisheries is grateful to her and to Chairman Nix for their cooperation. I want to particularly thank the gentlewoman for her assurance that these eight supergrades are for NOAA.

Mr. HARRIS. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Speaker, I must oppose H.R. 9794 today because of certain Senate amendments to the bill. When the Senate considered the bill, providing for fishing agreements with Mexico, it added several provisions creating new supergrade and executive level positions in the National Oceanic and Atmospheric Administration. I believe this action was wrong and will further perpetuate the hodge-podge process of creating top-level positions in the executive branch. Congress and all recent administrations have tolerated this practice for too long.

HARRIS-UDALL LEGISLATION WOULD CORRECT

I have introduced legislation, H.R. 832, and cosponsored H.R. 5544, introduced by Mr. UDALL, which will bring some order to this topsy-turvy growth of high-level jobs. These bills would restore the central supergrade pool with a top numerical limit and would repeal the many disparate supergrade authorities that have created supergrade jobs outside the pool. Additionally, my bill would "sunset" all current executive level positions and require the President to submit to the Congress a comprehensive plan for executive level positions in the executive branch. Both bills would require all legislation which designates certain supergrade and executive level positions to be referred to the House Post Office and Civil Service Committee which could exercise some central control over creation of top jobs and coordinate them in a rational plan. Hearings will be held on these bills in January and I will work to see that the bills are enacted into law.

CONGRESS CONTRIBUTES TO ERRATIC GROWTH

The problem has been that various congressional committees include in their legislation the authority for additional executive level and supergrade positions to carry out the law or program authorized by the main purposes of the bill. The unfortunate result has been that these jobs come into being almost randomly—with no central, overall control or plan. No one—not Congress, not the Civil Service Commission, not the Office of Management and Budget nor the White House—provides any central focus. In fact, the Civil Service Commission has indicated that it has difficulty just finding out how many there are.

This lack of control has meant much inconsistency throughout the various agencies. The Quadrennial Commission, for example, questioned why the Special Representative for Trade Negotiations should be an executive level I, the same level as a Cabinet secretary. They pointed out that the Administrator of the Federal Aviation Administration is at level II ($57,500), but probably should be at level III ($52,500). They reported that the Administrator of LEAA is at level III but the Administrator of NASA is at level II. They suggested that perhaps the Director of the FBI should be a level III, not a level II.

CONTROL OF GOVERNMENT NEEDED AT THE TOP

The creation of these positions comes about because of several motivations. One department may want a sixth assistant secretary because another department has six. Or creating an executive level slot may be a "plum" to an individual or group. I suppose it could also be a way to give someone a pay raise.

My point is that establishing top positions and designating their grade and pay level should be considered in light of the total structure of government and public need; coordination and direction is needed at the top.

I believe we must stop this senseless sprouting of top jobs. We have been fooling ourselves for too long thinking there is someone calling the shots at the top. In reality, the situation has been an uncoordinated series of disparate acts, in which we the Congress have been a partner. I think it is time we put a stop to this.

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Kansas.

Mr. GLICKMAN. I would just ask, in connection with this NOAA reorganization, is there anything in the reorganization designating where these supergrades will go? Let me make my point clear. I am concerned about the fact that the National Weather Service is being relegated to much more subservient status than it has had over the last few years, and for that reason we may seeing deteriorating weather forecasts in this country.

Mr. MURPHY of New York. The Administrator of NOAA is assigning one of these supergrades to the overall supervision of climate. Climate, of course, and weather, which was a basic part of the agency which eventually became NOAA, was never really given the supervision that it should have. Now, however, climate and weather are going to have one of these supergrades with the necessary scientific oversight very carefully assigned to it. In addition, I would like to point out to the gentleman that the Administrator of NOAA promised in testimony before the Committee, that he would consult us in the establishment and filling of these supergrade positions.

Mr. GLICKMAN. I am glad to hear that, because I am extremely concerned. I am hearing from meteorologists that they are also concerned that the weather forecasting in this country by the National Weather Service is not being done as it should be done. In fact, improper weather forecasting may cost lives, and also may reap agricultural turmoil. So, I appreciate the gentleman's remarks.

Mr. FORSYTHE. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from New Jersey.

Mr. FORSYTHE. I thank the chairman for yielding to me. I would just like to point out that I believe that this reorganization really is trying to build NOAA to a point where it can be far more effective as an administrative operation, where it has in the past been largely a scientific operation. I do not think it is downgraded in the scientific effort of the Agency, but since we in this Congress have added substantial missions to the role of NOAA, I think the added necessity for administration is very evident.

I think this amendment and the reorganization amendment to the bill does that, and I urge its support.

Mr. MURPHY of New York. Mr. Speaker, I thank the gentleman from New Jersey for offering the amendment and for his help and cooperation.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Texas.

Mr. DE LA GARZA. I thank the gentleman for yielding.

Mr. Speaker, the basic thrust of the initial legislation was to waive the 60-day period and to approve the International Fishing Agreement with Mexico. In order to show our spirit of cooperation and good will to Mexico, I endorse that part of the legislation we have here today. Hopefully, we will continue the consultation between our two countries and I look forward that our agreement with Mexico in relation to our fishing in the Mexican waters may be reconsidered in order to take care of what I consider an inequity against the shrimp industry in the United States.

Again, I repeat, to show our good faith and our spirit of cooperation in wanting to continue the consultation between our two countries in all matters which affect our two peoples, I think we should approve this legislation.

Mr. MURPHY of New York. Mr. Speaker, I move the previous question on the preferential motion.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from New Jersey (Mr. FORSYTHE).

The preferential motion was agreed to.

A motion to reconsider was laid on the table.

INTERNATIONAL SAFE CONTAINER ACT

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 8159) to establish uniform structural requirements for intermodal cargo containers, subject to the jurisdiction of the United States, designed to be transported interchangeably by sea and land carriers, and moving in, or designed to move in, international trade, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "International Safe Container Act".

SEC. 2. DEFINITIONS.

As used in this Act—

(a) The term "Secretary" means the Secretary of Transportation.

(b) The term "Convention" means the International Convention for Safe Containers, and the annexes thereto, done at Geneva, Switzerland, December 2, 1972.

(c) The term "container" shall have the same meaning as that term is defined in the Constitution.

(d) The term "international transport" means the transportation of a container—

(1) to any place within the jurisdiction of the United States from a place within a foreign country;

(2) by United States carriers between two points both of which are outside of the United States; or

(3) from any place within the jurisdiction of the United States to any place within a foreign country.

(e) The term "United States" includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Canal Zone, Guam, American Samoa, the United States Virgin Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.

(f) The term "new container" means a container (other than a container specially designed for air transport) which is used or is designed for use in international transport, the construction of which began on or after September 6, 1977.

(g) The term "existing container" means a container (other than a container specially designed for air transport) which is used or is designed for use in international transport and which is not a new container.

(h) The term "owner" means a person who owns a container, or, if a written lease or bailment provides for the lessee or bailee to exercise the owner's responsibility for maintaining and examining the container, the lessee or bailee of a container, to the extent such agreement so provides.

(i) The term "safety approval plate" shall have the same meaning as that term is defined in annex I of the Convention.

SEC. 3. DUTIES OF AN OWNER.

(a) Beginning on the date the instrument of ratification is deposited by the United States in accordance with the provisions of article VII of the Convention, for new containers, and beginning on September 6, 1982, for existing containers, the owner of each such container—

(1) who is domiciled and has his principal office in the United States, shall have each such container initially approved in accordance with the procedure established by the Secretary or by the administration of another contracting party to the Convention; and shall, thereafter, have each such container periodically examined, as provided in the Convention, in accordance with the procedure established by the Secretary; and

(2) who is either domiciled or has his principal office in the United States, shall have each such container initially approved in accordance with the procedure established by the Secretary or by the administration of another contracting party to the Convention; and shall, thereafter, have each such container periodically examined, as provided in the Convention, in accordance with the procedure established by the administration of either the country where he is domiciled or has his principal office (so long as such country is a party to the Convention).

Any owner of either a new or existing container who is neither domiciled nor maintains a principal office in the United States, or in any other country which is a party to the Convention, may submit their containers for approval and periodic examination according to the procedure established by the Secretary.

(b) During the period beginning on the date the instrument of ratification is deposited by the United States in accordance with the provisions of article VII of the Convention, and before September 6, 1982, an owner of an existing container may have such container approved according to the procedure established by the Secretary, and have a safety approval plate affixed to it, if such container is found to meet the standards of the Convention.

SEC. 4. DUTIES OF THE SECRETARY.

(a) On and after the date the instrument of ratification is deposited by the United States in accordance with the provisions of article VII of the Convention, the Secretary shall enforce and carry out the provisions of the Convention, and, unless an earlier date is specifically provided, the provisions of this Act, in the United States.

(b) The Secretary shall, as soon as practicable after the date of enactment of this Act, promulgate, and from time to time, amend, those regulations he deems necessary for such enforcement. Such regulations, among other things, shall—

(1) establish procedures for the testing, inspection, and initial approval of existing and new containers and of designs for new containers, including procedures relating to the affixing, invalidating, and removal of safety approval plates for containers;

(2) establish procedures to be followed by owners of containers relating to the periodic examination of containers, as provided in the Convention; and

(3) provide a method for developing, collecting, and disseminating data concerning container safety and the international transport of containers.

(c) At any time after the date of enactment of this Act, the Secretary may—

(1) authorize the affixation of a safety approval plate to any container which, after examination, is found not to have a safety approval plate attached to it and which the owner has established meets the standards of the Convention;

(2) delegate and withdraw the delegation of authority to initially approve existing and new containers and designs for new containers, and to authorize the affixing of safety approval plates; and

(3) establish a schedule of fees to be charged and collected for services performed by the Secretary, or under authority delegated by the Secretary, relating to the testing, inspection, and initial approval of containers and container designs.

(d) Those delegations made under subsection (c)(2) may be made to any person, including any public or private agency or nonprofit organization. The Secretary before making any delegation under such subsection, shall promulgate regulations relating to—

(1) the criteria to be followed in selecting a person, public or private agency, or nonprofit organization as a recipient of delegated functions under such subsection;

(2) the manner in which such recipient shall carry out such delegated functions, including the records such recipient must keep, and a detailed description of the exact functions such recipient may exercise; and

(3) the review that will be carried out by the Secretary to determine that any recipient of delegated functions is performing properly the functions so delegated.

No recipient of authority delegated under such subsection may assess or collect, or attempt to assess or collect, any penalty for violation of any provision of this Act, the Convention, or any order of the Secretary issued under this Act, or issue or attempt to issue any detention or other order. Any records required to be kept by regulations promulgated by the Secretary under this subsection shall be available to the Secretary, for inspection, upon request. The name and address of the recipient, if other than the owner, together with the functions so delegated and the period of designation, shall be published in the Federal Register and otherwise publicized as appropriate.

(e) The Secretary shall, to the maximum possible extent, encourage the development and use of intermodal transport, using containers constructed to facilitate economical, safe, and expeditious handling of containerized cargo without intermediate reloading while such cargo is in transport over land, air, and sea areas.

SEC. 5. ENFORCEMENT.

(a)(1) On and after the date the instrument of ratification is deposited by the United States in accordance with the provisions of article VII of the Convention, to ensure compliance with this Act, and with the Convention, the Secretary may—

(A) examine, or require to be examined, new containers, and existing containers which are subject to this Act, in international transport, and test, inspect, and approve designs for new containers and new containers being manufactured;

(B) issue a detention order removing or excluding a container from service until the owner of the container establishes to the Secretary's satisfaction that the container meets the standards of the Convention, if the container is subject to this Act and does not have a valid safety approval plate attached to it, or if there is significant evidence that such a container bearing a safety approval plate is in a condition which creates an obvious risk to safety; and

(C) take whatever other appropriate action he deems necessary, including issuance of any necessary orders, to remove the container involved from service, or restrict its use, in those instances where he finds that a container is not in compliance with the provisions of this Act or the Convention but does not present an obvious risk to safety. The Secretary may permit the movement to another location of a container which he finds to be unsafe or which does not have a valid safety approval plate affixed to it, under whatever restriction he considers necessary and consistent with the intent of the Convention, for repair or other appropriate disposition.

(2) Beginning on September 6, 1982, the Secretary may examine or require to be examined any existing container in international transport.

(b) The owner of the container involved in any action taken by the Secretary under this section with respect to an examination of a container, shall pay for or reimburse the Secretary for expenses arising from such actions, except for the costs of routine examinations of containers or safety approval plates. In addition, the owner of containers submitted to the procedure established by the Secretary for testing, inspection, and initial approval, and the manufacturers who submit designs of containers to the procedures established by the Secretary for testing, inspection, an initial approval shall pay for or reimburse the Secretary for the expenses arising from such testing, inspection or approval. Funds received by the Secertary in reimbursement shall be credited to the appropriations bearing the cost thereof.

(c) A container bearing a safety approval plate authorized by a country which is a party to the Convention shall be presumed to be in a safe condition unless there is significant evidence that the container creates an obvious risk to safety.

(d) Whenever the Secretary issues a detention or other order under this section, he shall promptly notify, in writing, either the owner of the container subject to such order, his agent, or, when the identity of such owner is not apparent from the container of shipping documents, the custodian. The notification shall reasonably identify the container involved, give the location of the container, and reasonably describe the condition or situation which gave rise to the order. An order issued by the Secretary under this section

shall remain in effect until the container is declared by the Secretary, or under regulations promulgated by the Secretary, to be in compliance with the standards of the Convention, or until it is permanently removed from service, whichever first occurs.

(e) If there is reason to believe that a container to which there is affixed a safety approval plate issued by a foreign country was defective at the time of approval, the Secretary shall notify the country which issued the approval of such defect.

SEC. 6. PENALTIES.

(a) On and after the date the instrument of ratification is deposited by the United States in accordance with the provisions of article VII of the Convention, any owner, agent, or custodian who—

(1) has been notified of an order issued by the Secretary under section 6; and

(2) fails to take reasonable and prompt action to prevent or stop a container subject to that order from being moved in violation of that order;

shall be subject to a civil penalty of not more than $5,000 for each container so moved. Each day the container remains in service while the order is in effect shall be treated as a separate violation.

(b) The Secretary shall assess and collect any penalty incurred under this section, and, in his discretion may remit, mitigate, or compromise any such penalty. No penalty shall be assessed until after the person charged has been given notice and an opportunity for a hearing. In assessing, remitting, mitigating, or compromising a penalty the Secretary shall consider the gravity of the violation, the hazards involved, and the record of the person charged with respect to violations of this Act or of the Convention. Upon failure of any person to pay any penalty assessed against him by the Secretary, the Secretary shall request the Attorney General to begin an action in any district court of the United States to recover the amount of the penalty unpaid.

SEC. 7. EMPLOYEE PROTECTION.

(a) No person shall discharge or in any manner discriminate against an employee because the employee has reported the existence of an unsafe container or reported a violation of this Act to the Secretary or his agents.

(b) An employee who believes that he has been discharged or discriminated against in violation of this section may, within 60 days after the violation occurs, file a complaint alleging discrimination with the Secretary of Labor.

(c) The Secretary of Labor may investigate the complaint and, if he determines that this section has been violated, bring an action in an appropriate United States district court. The district court shall have jurisdiction to restrain violations of subsection (a) of this section and to order appropriate relief, including rehiring and reinstatement of the employee to his former position with back pay.

(d) Within 30 days after the receipt of a complaint filed under this section the Secretary of Labor shall notify the complainant of his intended action regarding the complaint.

SEC. 8. AMENDMENTS TO THE CONVENTION.

(a) The Secretary of State, with the concurrence of the Secretary, may propose amendments to the Convention or may request a conference for amending the Convention in accordance with article IX of the Convention. An amendment communicated to the United States in accordance with article IX(2) of the Convention may be accepted for the United States by the President, with the advice and consent of the Senate. The President may make a declaration that the United States does not accept an amendment.

(b) The Secretary of State, with the concurrence of the Secretary, may propose amendments to the annexes of the Convention, may propose a conference for amending annexes to the Convention and shall consider and act on amendments to the annexes of the Convention adopted by the Maritime Safety Committee and communicated to the United States in accordance with article X(2) of the Convention. If a proposed amendment is approved by the United States, the amendment shall enter into force in accordance with article X of the Convention. If any proposed amendment is objected to, the Secretary of State shall promptly communicate the objection as provided in article X(3) of the Convention.

(c) The Secretary of State, with the concurrence of the Secretary, shall appoint an arbitrator when one is required to resolve a dispute within the meaning of article XIII of the Convention.

SEC. 9. AUTHORIZATION OF APPROPRIATION.

Beginning with the fiscal year ending September 30, 1979, and for each fiscal year thereafter, there are authorized to be appropriated such sums as are necessary to carry out the provisions of this Act.

Mr. MURPHY of New York (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MURPHY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 8159, a bill to implement the International Convention for Safe Containers, 1972, as reported by the Committee on Merchant Marine and Fisheries.

The bill represents a legislative proposal from the Secretary of Transportation which was referred jointly to the Committee on Interstate and Foreign Commerce and the Committee on International Relations. Subsequent to that time, discussions with the other committees and with the Parliamentarian's office resulted in a unanimous consent request by Chairman HARLEY O. STAGGERS of the Committee on Interstate and Foreign Commerce that the executive communication also be referred to the Committee on Merchant Marine and Fisheries, which has jurisdiction over the U.S. Coast Guard. The Coast Guard participated in drafting the proposal, was deeply involved in the drafting of the international convention which this proposal would implement, and will be the agency principally responsible for its enforcement.

This is new legislation to provide regulatory authority to govern the safe movement of intermodal cargo containers moving in international trade. International regulations were nonexistent and had been considered unnecessary due to the excellent safety record, achieved largely due to the effectiveness of principles developed in the U.S. private sector.

Notwithstanding this record, in recent years, a number of nations indicated their intention of developing unilateral regulations which would be applied to all containers crossing their borders. The convention signals concern and agreement by the international community that safe container regulations would best be developed on a common basis.

This legislation will enable the United States to ratify the convention, thereby permitting U.S. containers to continue to move freely in international trade. It will also provide the United States with the capability of carrying out a domestic program for approving containers, for issuing safety approval plates, for regulating and policing the approval process, and for removing defective containers from international trade. This authority will provide for control and enforcement measures to assure the continued safe movement of all containers.

The Subcommittee on Coast Guard and Navigation, the Subcommittee on Merchant Marine, and the Committee on Merchant Marine and Fisheries have endorsed the bill, as amended, by unanimous voice vote. The Committee on Interstate and Foreign Commerce and the Committee on International Relations, after considering the action taken as reported, elected not to hold hearings or to file separate reports on the bill. Instead, the chairmen of these committees forwarded letters to the chairman of the Merchant Marine and Fisheries Committee, endorsing the action which had been taken. Copies of those letters are included in the report and should serve the purposes of the rule for action by all the committees to whom the bill was jointly referred. I want to thank my colleagues for their expeditious endorsement and complete support.

I now call upon the House to favorably act on H.R. 8159 to enable the United States to become a party to the International Convention for Safe Containers at the earliest possible date.

Mr. TREEN. Mr. Speaker, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Speaker, I would like to join my colleagues in urging the House to agree to H.R. 8159, the International Safe Container Act, as amended by the Senate on November 4, 1977.

H.R. 8159 implements the International Convention for Safe Containers, and the annexes thereto, signed in Geneva on December 2, 1972. By its terms, the convention came into force internationally on September 6, 1977. The Senate gave its advice and consent to ratification on September 15, 1976.

The Safety Convention specifies the structural requirements which transport containers must meet to assure a high level of human safety in the normal handling, stacking, and transportation of such containers. H.R. 8159 provides that containers subject to the bill must meet the minimum safety standards prescribed in the convention.

Basically, the Senate amendment adds language directing the Secretary of Transportation to encourage the development and use of intermodal transportation by containers, specifies the duties of a container owner with regard to initial approval and periodic inspection of containers, and sets forth the conditions under which a delegation of authority to approve containers and to affix the safety

approval plate may be made. The amendment also extends the applicability of the civil penalty provision to include authorized corrective orders in addition to "detention orders," and moves the effective date provisions to each concerned section rather than one "effective date" section.

I believe this is a good bill, and urge the House to accept the Senate amendment.

The SPEAKER pro tempore. Is there objection to the first request of the gentleman from New York (Mr. MURPHY)?

There was no objection.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 8422, RURAL HEALTH CLINIC SERVICES

Mr. ROSTENKOWSKI. Mr. Speaker, I call up the conference report on the bill (H.R. 8422) to amend titles XVIII and XIX of the Social Security Act to provide payment for rural health clinic services, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of November 1, 1977.)

Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 30 minutes, and the gentleman from Tennessee (Mr. DUNCAN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to call up the conference report on H.R. 8422, a bill to provide medicare and medicaid coverage for services furnished in rural health clinics. Approval of this report represents the final congressional step toward enactment of a bill that has been of great personal interest to me since my colleague from Tennessee, Mr. DUNCAN, and I went into the mountains of Tennessee to observe the dedicated work of practitioners furnishing services in rural clinics.

I would like to commend my colleague, Mr. ROGERS, for his contribution to this legislation and the distinguished gentleman from Georgia, Senator TALMADGE, for paralleling our efforts in the Senate.

Mr. Speaker, the minor differences between the two bills were resolved in the conference in an expeditious manner.

With respect to eligible clinics, the conferees' agreement provided that clinics are eligible which are located in rural areas designated by the Secretary as having medically underserved populations under title XIII of the Public Health Service Act or designated as having a shortage of medical care manpower under title III of the Public Health Service Act. Rural areas are areas other than urbanized areas as defined by the Bureau of the Census. In addition to clinics located in the defined shortage areas, a private, nonprofit clinic which, as determined by the Secretary to have an insufficient supply of physicians, would be eligible for coverage as a rural health clinic.

The House conferees accepted the Senate amendment which deletes the term "primary care practitioner" and substitutes the terms "nurse practitioner" and "physician assistant." Members will recall that the term "primary care practitioner" was used in the House bill only because of the objections to the term "physician extender" used in the rural clinic as originally introduced. The use of the two distinct terms to describe the various types of practitioners covered under the bill appears to effectively resolve this issue.

The conferees also agreed to a modification of a Senate provision relating to home health services furnished by a rural health clinic. The agreement provides that, in areas without home health agencies, the services of a professional registered nurse or a licensed practical nurse furnished to homebound patients could be covered as rural clinic services.

The House provisions requiring clinics to furnish routine lab services and drugs necessary for emergency cases were accepted by the Senate conferees with the modification that the availability of emergency drugs would be mandatory only to the extent allowed by State and Federal law. The Senate also accepted the House provision which assures that rural clinics located in areas which subsequently lose their designations as rural or as having a shortage of medical services would continue to be eligible as a rural health clinic under medicare and medicaid.

The Senate conferees were unwilling to accept the House provision which would have directed the Secretary to provide medicare reimbursement on a demonstration basis for comprehensive mental health centers. The conferees instead agreed to a 6-month study of the merits of extending medicare coverage for mental health centers and centers for drug abuse and alcoholism.

Finally, the conferees agreed to a Senate amendment relating to the National Institute for Occupational Safety and Health after agreeing to a technical modification which conformed the amendment to a nearly identical provision previously approved by the House as part of a separate bill.

Mr. DUNCAN of Tennessee. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to rise in support of the conference report on H.R. 8422, that would provide coverage for services under the medicare and medicaid programs that are provided by rural health clinics. It has been more than a year since the chairman of the Ways and Means Health Subcommittee—my distinguished colleague from Illinois, and I visited two rural health clinics in my own State of Tennessee. At that time, we observed on a firsthand basis how physician assistants and nurse practitioners could provide primary and emergency care of extremely high quality to many citizens—young and old—who otherwise would not have access to such treatment.

A great deal of hard work and careful deliberation on the part of my colleagues on the Ways and Means Committee and the Interstate and Foreign Commerce Committee, of the staffs of those committees, and of numerous groups and individuals has gone into this legislation. I think that we have a fine product that reflects those endeavors. Through a great deal of cooperation on the part of many diverse parties, including our medical and nursing communities, the Appalachian Regional Commission, and the physician's assistants and nurse practitioners themselves, legislation has evolved that undoubtedly will pave the way to more equitable distribution of services, and access to medical care for citizens in our rural areas.

In addition to enabling rural health clinics to obtain additional funds with which to provide vitally needed services, the legislation contains a number of provisions to insure that the clinics will have adequate governing policies, provide important routine diagnostic services, have arrangements with hospitals for referral of patients who need services that are not available at the clinic and otherwise meet standards that the Secretary may determine are necessary to insure the health and safety of patients. We also will learn a great deal about appropriate methods for reimbursing clinics in medically underserved urban areas, that employ physician assistants and nurse practitioners in providing primary care.

I am also pleased to report the bill that the House overwhelmingly approved under suspension of the rules has, if anything, been strengthened in conference. Among other things, arrangements with respect to physician supervision will be improved through even greater coordination by physicians and the nurse practitioners and physician assistants with whom they will work; clinics will be required to have appropriate procedures for utilization review, as the Secretary determines may be "necessary and feasible"; and clarifying language will be provided with respect to the administering and availability of drugs and biologicals, to allow consistency with State and Federal law.

Mr. Speaker, I have been an advocate of this legislation for quite some time, because I am convinced that it is essential and will add stature to the health legislation of our country. I now strongly urge my colleagues to approve the conference report on H.R. 8422, so that we can do our part to provide the people with a law that is timely, cost-effective, and an important step toward providing access to high-quality care for all our citizens.

Finally, Mr. Speaker, I am hopeful that the Secretary of HEW will see that the entire department cooperates with the rural health clinics, to help them in providing the people whom they serve. In

particular, I am hopeful that we will not witness what we have unfortunately seen with so many other programs Congress has enacted; namely, the issuance of burdensome, confusing, unnecessary, and expensive regulations that frequently hinder and frustrate the fulfillment of the purposes of the bill. I am confident that, with the cooperation of HEW, this program will succeed and provide a model for the development of new, efficient methods of health care delivery.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. ROGERS).

Mr. ROGERS. Mr. Speaker, I thank the gentleman for yielding.

First of all, I want to compliment the distinguished gentleman from Illinois (Mr. ROSTENKOWSKI), the distinguished gentleman from Tennessee (Mr. DUNCAN), and of course, the ranking minority member on my own committee, the distinguished gentleman from Kentucky (Mr. CARTER), as well as all of the members of the committee for working together to bring this conference report to the floor.

Mr. Speaker, the House can be proud of this conference report; I recommend it for several important reasons.

This bill will help insure that rural medicare and medicaid beneficiaries have access to primary health care services. For beneficiaries living near existing rural health clinics, the bill will mandate coverage of the services of the clinic; and for those beneficiaries living in areas without such services, the bill will encourage the development of primary care services.

The bill provides assurances that these rural health clinics will be staffed by well-trained individuals and will provide quality health care.

The bill is cost conscious. It authorizes reimbursement for nurse practitioners and physician assistants, who are capable of providing good quality medical care under the supervision of a physician, but whose salaries are far less than those of physicians. It also mandates reimbursement on a cost-related basis but gives the Secretary of HEW authority to insure that only necessary costs are incurred.

The bill recognizes the many dedicated consumers and providers of primary care services in the rural areas of our country who are working together to develop new primary care services.

And last, the bill recognizes the unique circumstances under which rural health clinics provide primary care services and tailors the reimbursement system to meet those well-defined circumstances.

Members will note that the conference report allows RN's or LPN's employed by a rural health clinic to provide intermittent nursing care to home-bound patients if there is a shortage of home health agencies in the area. It should be stressed that these services would be provided under a written plan of treatment approved by a physician. The physician would be responsible for that plan of treatment, and would, of course, exercise his personal judgment regarding the appropriateness and adequacy of care to be provided by the personnel available. Additionally, it should be stressed that the requirements of State law would continue to be applicable regarding the care delivered. If an LPN is allowed to provide care only under the supervision of an RN under a State law, this requirement would continue to be binding.

I would like to add that it is the expectation of the conference committee that the urban clinic demonstration will include physician-directed clinics which have part-time physicians as well as full-time physicians.

I urge adoption of the conference report.

Mr. CARTER. Mr. Speaker, will the gentleman yield?

Mr. ROSTENKOWSKI. I am happy to yield to the gentleman from Kentucky (Mr. CARTER).

Mr. CARTER. Mr. Speaker, I strongly support the conference report on H.R. 8422 which amends titles 18 and 19 of the Social Security Act to provide payment for rural health clinic services. This legislation means much to the rural areas such as I represent. I happen to have a hospital in my area which is rather unique in the United States in that in it there is a school of midwifery. The midwives from there work helping to deliver youngsters throughout the mountains of eastern Kentucky, as they have done over the years. This legislation will be of great help to them.

Moreover this measure provides demonstration authority to pay for comparable services in medically underserved urban areas—reaching several million more Americans. Thus the people in the ghettos will be able to receive decent medical care through physicians' assistants' and nurse practitioners' services.

Mr. Speaker, I take a special interest in this bill because I am personally familiar with the severe lack of accessible health services for many Americans living in rural areas.

As representative of a rural district in southeastern Kentucky and having practiced medicine for many years in that area before coming to congress I can assure my distinguished colleagues that this legislation is needed.

Because I felt that this problem was so important I introduced my own legislation, H.R. 6259, last April to provide a similar approach to reimbursing rural clinics.

I am pleased that many of the features of my legislation have been incorporated into the conference report provisions.

In particular I am pleased that the conferees agreed to reaffirm our committee's direction to the Department of HEW to conduct demonstration projects to provide coverage of preventive health services furnished by these clinics.

The concept of reimbursing preventive services was included in my original legislation, and I believe this demonstration approach will prove very fruitful.

It is my belief that provision of preventive health care will ultimately be cost-effective in the long run, and that such measures should be incorporated into our health care delivery system whenever possible. As we know, an ounce of prevention is still worth a pound of cure.

At this point, I would like to include for the RECORD an excerpt from pages 11–12 of the Commerce Committee's report on the Rural Clinics Legislation which describes in detail our committee's intent regarding the preventive services demonstrations:

DEMONSTRATION PROJECTS FOR PREVENTIVE HEALTH SERVICES IN RURAL AND URBAN HEALTH CLINICS

The committee recognizes that our present reimbursement system provides payment for the treatment of disease. The committee believes that mechanisms for paying for preventive health care services must be tested to determine whether the provision of such services will result in improved health status and will reduce health care cost. The committee believes that section 222 of the Social Security Amendments of 1972 provides broad authority for HEW to carry out demonstration projects to reimburse preventive health services. Because this authority exists the committee did not amend the bill, but it is the committee's intent that the Secretary will conduct demonstration projects in which rural health clinics covered by the bill and urban health clinics participating in the demonstration projects will be reimbursed on a cost basis for providing preventive health care. The committee intends for HEW to include a broad range of preventive health services and activities and expects that those services and activities will include:

(a) Physical exams and diagnostic services made in connection with such an exam for the purpose of assessing an individual's physical condition without regard to whether such individual has manifested symptoms of illness;

(b) Health education and counseling designed to prevent nutritional or other health problems of the individual, including counseling for conditions of terminal illness;

(c) Immunizations and services related thereto;

(d) Services for illness management designed to minimize handicapping and discomforting conditions due to a chronic illness;

(e) Preventive dental care; and

(f) Other activities carried out by clinic staff which promote health and well-being regardless of whether those activities are performed in the clinic, in local schools or in other public places in the community. The committee expects the demonstration project to be carried out on a broad enough scale to allow the Secretary to evaluate: (1) The effect on health status of providing such services; (2) the impact of providing such services on the rate of hospitalization, workdays lost and school absence; (3) the frequency and intensity of utilization of such services; (4) the appropriate staffing requirements of rural and urban health clinics for prover provision of such services; (5) the methods available for ensuring proper utilization and quality control of such services; (6) the extent to which services are considered and should be considered as preventive services; (7) the desirability of providing such services to individuals not eligible for medicare and medicaid; (8) the cost, including the cost per patient per year, projected cost, and cost effectiveness of providing preventive services to people who utilize rural and urban health clinics; (9) the appropriateness of cost base reimbursement and payment for such services; (10) the extent of payments made through private insurers for provision of such services; (11) present Federal and State funding for provision of such services; and (12) the appropriateness of including preventive services under title XVIII and XIX of the Social Security Act. The committee expects the Secretary to report

to Congress no later than January 1, 1981, including any recommendations for legislative change which the Secretary finds necessary and desirable as a result of carrying out this demonstration project.

Mr. Speaker, there are a few changes in this legislation from the House-passed version which I feel have improved this measure, and which I would like to mention briefly.

First, we adopted the Senate terminology of "physician assistant" and "nurse practitioner" to refer to those nonphysician personnel whose services will be covered by this legislation.

Second, the conferees agreed to include the services of nurse midwives furnished through the clinics, as eligible services for reimbursement through the clinic.

This provision is particularly important because I know through the work of the Frontier Nursing Service in my district what an outstanding job these nurse midwives can do.

Third, we adopted the Senate provision calling for a detailed study of the advantages and disadvantages of reimbursing comprehensive mental health centers under medicare and medicaid. This provision was accepted as a substitute for the House provision calling for demonstration projects. In my view, the study is a preferable approach, and I believe it will provide helpful information with regard to the types of mental health services which are available, and the costs of such services.

Mr. Speaker, I strongly support this legislation and urge its approval.

Mr. STAGGERS. Mr. Speaker, I rise in support of the conference report on H.R. 8422. I am pleased to join with my colleague, the gentleman from Illinois (Mr. ROSTENKOWSKI), in recommending the conference report on this legislation to provide medicare and medicaid payments to rural health clinics.

The spirit of accommodation and cooperation which characterized the working relationship between members of my own committee and members of the Ways and Means Committee, and the conferees from the Senate, in working out our differences on this legislation is a truly remarkable one. On this legislation, as on H.R. 3, the Medicare-Medicaid Antifraud Amendments which were signed by the President on October 25, this constructive working relationship resulted in a stronger and more comprehensive piece of legislation. I commend particularly the chairmen of the health subcommittees—PAUL ROGERS of the Commerce Committee and DAN ROSTENKOWSKI of the Ways and Means Committee—and the ranking minority members of the subcommittees, TIM LEE CARTER and JOHN DUNCAN, for their dedicated work to address the problems of rural health clinics and to bring legislation to fruition in this session.

The conference report has retained all of the essential features of the bill that passed the House. I am particularly pleased to note the retention of the provision which assures continued eligibility for medicare and medicaid funding for rural clinics once they have qualified for program payments. These clinics need assurance that they will not lose their status as qualified providers simply because the characteristics of the area within which they are located change, if they are to be economically stable.

I am also pleased that our accommodation with the Senate allowing payments to clinics in medical manpower shortage areas as well as areas with medically underserved populations which are not urbanized, and to existing nonprofit clinics which are operating in nonurban areas where the Secretary finds the supply of physicians insufficient, is quite similar to the position recommended by the Committee on Interstate and Foreign Commerce when it reported H.R. 8422 to the House.

This is a good conference report. The legislation will be of great assistance in bringing more adequate health care services to the residents of rural areas throughout the Nation. I urge the adoption of the conference report.

Mr. PREYER. Mr. Speaker, I am particularly pleased that the House has taken such a positive position in support of this legislation. The rural health clinic bill will go a long way toward increasing access to health care for millions of Americans.

I am satisfied with the bill before us today. The conference committee was fair and understanding, and the result is a bill which was unanimously acceptable to the conferees.

Many people will benefit from the conference language that guarantees that the presence of a clinic already in place is not grounds to decide that an area is not a shortage area. The clinics in Snow Camp, Carolina Beach, Westfield, and Saluda, N.C., which fit into this category, will be able to continue to provide the excellent service and care to which the rural citizens in these areas have been accustomed.

Mr. ROSTENKOWSKI. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that I may be permitted to revise and extend my own remarks, and also that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

DIRECTING THE CLERK OF THE HOUSE OF REPRESENTATIVES TO MAKE CORRECTIONS IN THE ENROLLMENT OF H.R. 8422

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of the concurrent resolution (H. Con. Res. 418) directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 8422.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 418

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H.R. 8422) to amend titles XVIII and XIX of the Social Security Act to provide payment for rural health clinic services, and for other purposes, the Clerk of the House of Representatives shall make the following corrections:

(1) In proposed subsection (aa) of section 1861 of the Social Security Act (as added by section 1(d) of the bill) (A) strike out "providing rural health clinic services" in paragraph (2)(A) and insert in lieu thereof "furnishing to outpatients services described in subparagraphs (A) and (B) of paragraph (1)"; (B) strike out "such clinic" in paragraph (2)(B); and (C) strike out "the services referred to in subparagraph (A) which it provides" in paragraph (2)(E) and insert in lieu thereof "those services described in paragraph (1) which it furnishes".

(2) In section 1(e) of the bill (A) strike out "of the Social Security Act, except for clause (i) of such section" and insert in lieu thereof "or section 1905(1) of the Social Security Act, except for clause (i) of section 1861(aa)(2)"; and (B) strike out "titles XVIII or XIX" and insert in lieu thereof "title XVIII or XIX, respectively,".

(3) In section 1(i)(4) of the bill insert "in the last sentence" before "and inserting".

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

DIRECTING THE CLERK TO MAKE CORRECTIONS IN ENROLLMENT OF H.R. 7345, VETERANS AND SURVIVORS PENSION ADJUSTMENT ACT OF 1977

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the concurrent resolution (H. Con. Res. 419) directing the Clerk of the House of Representatives to make certain corrections in the enrollment of H.R. 7345, to amend title 38 of of the United States Code to increase the rates of disability and death pension and to increase the rates of dependency and indemnity compensation for parents, and for other purposes, which passed the House Thursday, November 3.

The Clerk read the title of the concurrent resolution.

The Clerk read the concurrent resolution as follows:

H. CON. RES. 419

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H.R. 7345) to amend title 38 of the United States Code to increase the rates of disability and death pension and to increase the rates of dependency and indemnity compensation for parents, and for other purposes, the Clerk of the House of Representatives shall make the following corrections:

(1) In section 101(1) of the bill, strike out "section (b)(1)" and insert in lieu thereof "subsection (b)(1)".

(2) In the table in section 415(c)(1) of title 38, United States Code, as proposed in section 201(3) of the bill, strike of "3,700" and insert in lieu thereof "3,770".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Mr. HAMMERSCHMIDT. Mr. Speaker, reserving the right to object, and I do not plan to object, I yield to the gentleman from Mississippi, the distinguished chairman of the subcommittee, to explain this technical correction.

Mr. MONTGOMERY. Mr. Speaker, when we passed the pension bill, H.R. 7345, on November 3, we corrected some errors in the pension rate structure; however, in doing so, we inserted one wrong figure and this resolution will simply take care of that mistake. It changes one income limitation figure from $3,700 to $3,770.

I can assure my colleagues that the other body has agreed to this change.

Mr. HAMMERSCHMIDT. Mr. Speaker, I concur fully with the explanation of the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

REORGANIZATION PLAN NO. 2 OF 1977

Mr. BROOKS. Mr. Speaker, pursuant to section 912 of Public Law 93–17, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the resolution (H. Res. 827), to disapprove Reorganization Plan Numbered 2 of 1977, and pending that motion, Mr. Speaker, I ask unanimous consent that general debate on the resolution be limited to not to exceed 2 hours, to be equally divided and controlled by the gentleman from New York, Mr. HORTON, and myself.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. BROOKS).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. RUSSO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 387, nays 2, not voting 45, as follows:

Mr. BROWN of Michigan changed his vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the resolution (H. Res. 827), with Mr. KILDEE in the chair.

The Clerk read the title of the resolution.

By unanimous consent, the first reading of the resolution was dispensed with.

The CHAIRMAN. Pursuant to section 912 of Public Law 95–17 and under the unanimous-consent agreement, the gentleman from Texas (Mr. BROOKS) will be recognized for 1 hour, and the gentleman from New York (Mr. HORTON) will be recognized for 1 hour.

The Chair recognizes the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, today we have before us the second reorganization plan submitted to the Congress by President Carter which establishes in the executive branch a new International Communication Agency which will consolidate the function now exercised by the U.S. Information Agency and the Bureau of Educational and Cultural Affairs now in the State Department. The USIA and the Bureau will be abolished.

When he submitted the plan to Congress, President Carter said the purpose of the reorganization is "to broaden our informational, educational, and cultural intercourse with the world since this is the major means by which our Government can inform others about our country and inform ourselves about the rest of the world." He went on to say that the new agency "will play a central role in building these two-way bridges of under-

standing between our people and the other peoples of the world."

The plan was considered by the Committee on Government Operations, and it was reported to the House with a vote of 34 to 3. The committee concluded that the new agency will improve the administration of the laws relating to cultural and educational exchanges between the people of the United States and the people of foreign nations and it will facilitate the communication abroad of factual information about the United States.

During the course of our consideration of the plan, a number of questions were raised which resulted in amendments submitted by the President. It is our opinion that the amendments have improved the reorganization making it more acceptable to the House.

I call your attention to three matters which have aroused some concern. The first involves the integrity of the Voice of America. In submitting the plan to the Congress, the President referred to the charter enacted by the Congress which provides that "VOA news will be accurate, objective, and comprehensive," and that VOA will "present a balanced and comprehensive projection of significant American thought and institutions." He stated that under his administration the Voice of America "will be solely responsible for the content of news broadcasts—for there is no more valued coin than candor in the marketplace of ideas."

There has also been some concern about the relationship of the new International Communication Agency to the Department of State. The USIA is presently subject to policy direction from the Secretary of State. The plan makes no significant change in this status. We asked for further clarification on this point and were advised by the Executive Associate Director of the President's reorganization project that although the Secretary will provide the agency with general policy direction, including direction as to foreign policy, to assure that the actions of the agency are not inconsistent with such policy, the Secretary will have no operational role with respect to the budget, management, personnel, or general day-to-day operation of the agency. I might add that the reorganization enhances the status of the director of the new agency as he will serve as the principal adviser to the President, the National Security Council, and the Secretary of State on International Communication.

To assure that the objectivity of the exchange program is continued, the plan requires the director of the new agency "to insure that the scholarly integrity and nonpolitical character of the educational and cultural exchange activities vested in the director are maintained."

It was estimated by the Congressional Budget Office that the plan would result in no additional cost to the Government and may achieve a small cost saving.

It is our opinion that the plan meets the requirements of the Reorganization Act and that it will improve the administration of the programs to be carried out by the new agency. We, therefore, support this reorganization and urge the House to allow it to go into effect.

House Resolution 827 is the instrument by which we act upon the President's Reorganization Plan No. 2. Our recommendation to the House is that House Resolution 827 be rejected. Since the resolution reads that the House does not favor reorganization plan No. 2 of 1977, a vote to support the plan will be a "no" vote on the resolution. Those who oppose the plan will vote "yes."

I urge that the Members vote "no" on the disapproval resolution.

Mr. HORTON. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, while I intend to support Reorganization Plan No. 2 to establish a new International Communication Agency, I must admit that I do so with some apprehension. I am apprehensive about the plan because of the very "trying," to put it nicely, experience that our committee had with this plan. I would like to take just a few moments to expand on that remark.

Reorganization Plan No. 2 is actually just a simple consolidation of two agencies, the U.S. Information Agency (USIA) and the State Department's Bureau of Educational and Cultural Affairs, into a new agency called the International Communication Agency. In the field, both the information and cultural and educational affairs duties are performed by USIA personnel. It was only back in Washington that the two responsibilities were split. Therefore, this consolidation has been recommended for years and this particular plan should have been a very noncontroversial proposal. Unfortunately, the handling of this plan by the administration has caused our committee severe problems.

The main problem is the lack of specifics. The Reorganization Act of 1977 is very specific on what details should be in the message. Section 903(b) of the act states:

> The message shall also estimate any reduction or increase in expenditures (itemized so far as practicable), and describe any improvements in management, delivery of Federal services, execution of the laws, and increases in efficiency of Government operations, which is expected will be realized as a result of the reorganizations included in the plan.

However, this is what the President's message said regarding specifics:

> It is not practicable to specify all of the expenditure reductions and other economies that will result from the proposed reorganization and therefore I do not do so.

The second problem is that the message and the plan are not always similar. For example, in the message considerable emphasis is placed on a new mission of "listening" to others, and most of the administration witnesses stressed this point. However, there is no mention of this mission in the actual plan and under repeated questioning on how this new mission would actually be accomplished, adequate responses were not forthcoming.

The message also stated that two of the proposed four Associate Directors would be designated for the Voice of America and for Educational and Cultural Affairs, but these designations were not in the plan. This was finally corrected by an amendment from the administration, but nowhere in the message or plan is there any indication of what the other two Associate Directors will be doing. These are level IV personnel making $50,000, yet we do not know their responsibilities.

Also, it should be pointed out that under the old arrangement, there was one level IV as Assistant Secretary of State for Educational and Cultural Affairs, one level II as Director of USIA with a level IV as his Deputy. Under this new arrangement, we are doubling these executive level jobs with a level II as Director, a level III as his Assistant, and four level IV Associate Directors—again, two of which we are not sure of their position.

Perhaps the most important problem we had in the committee is that after reading the message and plan, after repeated questioning of the administration's witnesses, we are still uncertain of the relationship of the new agency with the State Department.

It should be pointed out that the administration did finally send up some background information that answered some, but not all, of the questions. Unfortunately, this material was received too late to be used in hearings and, as I previously noted, most of this information should have been in the original message.

Mr. Chairman, I understand that in the future we will be receiving reorganization plans on some very, very complex matters like retirement plans, civil rights, and legal services. If they handle these complex plans as they handled what should have been a simple plan, I will not be apprehensive at all—I will very forcefully oppose them. The new Reorganization Act of 1977 is very specific on what details should be supplied to Congress, and this act simply must be followed by the administration in any future reorganization proposals. If Congress continues to pass these plans under present conditions, we will not be performing our constitutional duty.

However, despite these apprehensions, I will support this plan because, as I mentioned earlier, the theory behind the consolidation of these two agencies is very sound. Since the functions were only split in Washington and not in the field, I anticipate that we will see a more efficient organization in the future.

Therefore, I urge my colleagues to support the plan by voting against the resolution.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. HORTON. Mr. Chairman, I yield myself 2 additional minutes.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Illinois.

Mr. ERLENBORN. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, I would like to just reemphasize a portion of the remarks just made by the gentleman from New York (Mr. HORTON) and that is that this reorganization plan was handled very

haphazardly and in a very shabby fashion by the administration. I believe that many Members of the committee feel as I do, that, in their judgment, unless these reorganization plans are handled better by the administration in the future that they will face rough sledding in our Committee on Government Operations. In particular, I think many of us were offended by what has now become almost boilerplate language, not only of this administration but also of prior administrations both Democrat and Republican alike, and that is the statement that the OMB—the successor of the Bureau of the Budget—seems to like to put in in every one of these Presidential messages that it is not feasible to estimate the savings. In this particular case when the OMB and the Office of the President were asked specifically to identify the savings, it turned out those were not savings that they could identify, even though the President's message indicated that it was just not practical to identify them with particularity.

I believe the gentleman pointed out that the plan may actually cost more than the present administration and there are no savings whatsoever.

Mr. HORTON. I will agree with what the gentleman from Illinois (Mr. ERLENBORN) has said. As I stated in my opening remarks, section 903(b) of the act spells out specifically what we have asked for, and the fact is that the President said he would not give us this information.

If this happens in the future, we are not going to be willing to accept these reorganization plans. The Congress has the right to know whether there are going to be any economies that will result, and what measures are going to be taken in the reorganization plan insofar as improvements in management, delivery of Federal services, execution of the laws, and increases in efficiency of Government operations.

We are entitled to know this, and the administration ought to specifically emphasize what savings or additional savings will occur. We need this information.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. HORTON. Mr. Chairman, I yield myself 2 additional minutes.

Mr. Chairman, we need this information. We did not get it in this plan and we are serving notice on the administration that this type of information is going to be required in the future.

Mr. ERLENBORN. I thank the gentleman. I think the gentleman will recall that we on the committee inserted the language to which the gentleman is referring, seeking for particulars there in the message from the President. We did that when we extended the Presidential authority earlier this year.

It has been the purpose of our committee to try to get this President and past Presidents to specify with particularity the savings or what additional expenses may be incurred. This just has not been complied with, and I think it must be, and if it is not in the future then I think we must begin to reject some of these plans sent by the President and live up to what it is we are required to be doing.

Mr. HORTON. I thank the gentleman from Illinois.

I am sure the gentleman will agree with me—and he has been on the committee almost as long as I have and we have seen a lot of these reorganization plans—this is one of the few amendments that have been proposed. I realize we have not had amendments in the past, but certainly we do not want to have these plans sent up and then five or six amendments sent up later. If this work is done properly prior to the time the plan is sent up, there is no need for amendments.

The sending up of amendments creates problems, as it has done here, because we do not have an opportunity to go back and have hearings on the amendments after they are sent up. It is better to have the administration make decisions after consulting with the Congress before the plan is sent up. The fact that the plan was sent up and then amended indicates the plan was not very well thought out before it was sent up.

I do want to serve notice on the administration that we will hold them to this degree of specifics in the next reorganization plan that is sent up.

I thank the gentleman.

Mr. ERLENBORN. Again I thank the gentleman for yielding and I commend him for his statement.

Mr. CORCORAN of Illinois. Mr. Speaker, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Illinois (Mr. CORCORAN).

Mr. CORCORAN of Illinois. Mr. Chairman, I commend the gentleman in the well and our colleague, the gentleman from New York.

Mr. Chairman, I rise in support of Reorganization Plan No. 2. I think it attempts to resolve some administrative problems within our international information system and for that reason I will vote against the disapproval resolution.

I would like to point out a problem with the plan which I think is a dangerous precedent for the future. During the lengthy debate over the extension of reorganization authority, a provision was added to the President's legislative proposal which requires an estimate of any cost reduction or increas in expenditure which would result from the adoption of the plan.

As the gentleman from New York (Mr. HORTON) has stated, the President's message explained that it was not practicable to specify all of the expenditure reductions and other economies.

Mr. Chairman, this statement meets the letter of the reorganization authority statute, but it does not comply with the spirit. It may very well be that there will be no cost savings as a result of reorganization plan No. 2. If that is the case, then the administration should so state. There is no requirement that they do so. But to leave the impression that there may be some when there is probably no possibility that such a savings will occur, is less than complete candor.

We have heard a great deal about the zeal of this administration to reorganize the Federal bureaucracy. Everyone supports that goal. But cosmetic changes which do not yield concrete results in improved efficiency, delivery of services, or savings of tax dollars should not receive the approval of the Congress.

I urge my colleagues to support reorganization plan No. 2. I respectfully suggest to the President that future reorganization plans should more accurately reflect the realities of the plan and not speculate about the possibility of benefits which are not likely to occur. Mr. Chairman, the compaign of last year is over. The time to govern is now.

Mr. HORTON. Mr. Chairman, I thank the gentleman from Illinois for his remarks.

Mr. BROOKS. Mr. Chairman, I yield 10 minutes to the gentleman from Arkansas (Mr. THORNTON).

Mr. THORNTON. Mr. Chairman, first I would like to thank the distinguished chairman for yielding and for the gentleman's able leadership in the House.

Mr. Chairman, I rise in support of House Resolution 827 and urge that we vote yes to disapprove this reorganization plan. I do so recognizing that the plan may, indeed, be more efficient, that it may result in some small, although not disclosed savings in dollars, and that it may in some way permit a more efficient administration of the programs which are to be combined; but efficiency is not the supreme good in government. A basic question must be resolved and I would like to ask that we turn our attention to that question. That question is whether these programs should be mixed, whether they are of the type which should require that they be co-administered or whether these programs are different in aim and objective, whereby a mixture of the programs could cause the programs to lose their effectiveness, resulting in the loss of the great advantage which has accrued to this Nation by the operation of the cultural and educational exchanges provided for by the Fulbright-Hays educational exchange program. While I certainly agree with the administration on the importance of building bridges between nations of differing traditions, ideologies and economic systems, I am deeply concerned that, if this plan goes into effect, we will actually impair one of the most effective means of increasing international understanding that has ever been conceived. By merging the USIA's unilateral information and publicity operations with the educational and cultural activities of the Department of State, we run a real risk of compromising the growth and effectiveness of the Fulbright-Hays educational exchange program.

The purpose of the Fulbright-Hays program as authorized by Congress, is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries." Under this program, grants are made to U.S. citizens and foreign nationals for a variety of educational activities, primarily university teaching, advanced research, graduate study, and teaching in elementary and secondary schools.

The Department of State, through the Bureau of Educational and Cultural Affairs, administers this program with the

assistance of over 40 binational educational commissions and foundations in countries which have an executive agreement with the United States for a continuing exchange program; about 40 U.S. embassies in other countries; and three major cooperating agencies in the United States. In addition, the President is empowered to appoint 10 distinguished Americans to sit on the board of foreign scholarships which develops policy, supervises the academic exchanges, and is responsible for the selection of students and educational institutions who participate.

During the past 30 years, about 120,000 individuals from the United States and more than 100 participating foreign nations have received grants under the Fulbright program. While some have become Presidents, Prime Ministers, and holders of other offices which enable them to mold national and world policies, others have made important contributions to humanity in such diverse fields as education, publishing, and health administration.

Since the inception of this program in 1947, the total amount of U.S. Government funds which has been invested in it through the end of 1976, is only approximately $500 million. This averages about $17 million per year. And although the Fulbright program was begun in the United States, participating foreign nations are increasingly sharing in the cost of its exchanges. Twenty-two of the more than 40 nations which have established binational commissions to assist in the administration of the program now share in its cost through direct financial contributions. In 1976, they provided nearly $3.5 million for its operation.

While I am certain that the Carter administration intends to maintain the integrity of this program, I think it is important to note that the committee report states that by means of the merger of the functions of the USIA with the Bureau of Educational and Cultural Affairs, the USIA's fiscal year 1977 budget of $264 million will be combined with the Bureau's $59 million and the USIA's current employment level of 8,500—of which 2,200 work for the Voice of America, and 4,400 are foreign nationals employed overseas—will be combined with the Bureau's current employment level of 250 persons. In making these comparisons, it seems to me that both in terms of budget and in terms of manpower, it will be difficult, even with the best of intentions, to keep the information programs from submerging the educational and cultural programs.

It seems to me to be clear that there is a very grave risk that in making this mix, we will submerge this tremendously effective educational program to the larger program of publicity and outreach by this Nation on a unilateral basis, confusing the purposes of an educational program with that of information dissemination. I submit that this is a mix that is mistaken.

Even though the President has amended the reorganization plan in order to reflect his consideration of some of the concerns that I have articulated here, in an attempt to preserve the scholarly integrity of the program, I am concerned that it is going to be difficult, if not impossible, to keep the program from being swallowed up in the larger, more expensive operation.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. THORNTON. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, I was swayed enough by the gentleman's argument to be concerned about the situation he described in his dear colleague letter. In all honesty, I felt that what I should do is check with the White House.

They have said that there will be a separate associate director for each one of the programs, and that this would insure the integrity of the Fulbright program. One other thing they did say was, in fact, the Fulbright program was being administered in some countries by USIA personnel because there are no other personnel to do it.

My concern was that foreign governments or people who have gone through a program such as this might be labeled with a USIA label, which would make them less effective in their own relationships later on. But, if in fact it is already being administered that way, it sort of weakened the concern on the side of the gentleman's argument.

I wonder if the gentleman has some response to the White House response to my questions?

Mr. THORNTON. I thank the gentleman for asking the question. It points out a very significant feature, it seems to me.

First of all, the White House has recognized the hazard which is involved in attempting to consolidate or combine the two programs. I do endorse the amendments which have been offered, but they do not get to the basic point as to whether the programs should be mixed or whether they should be administered together.

It seems to me we are dealing with two things here. First of all, how this country handles these programs administratively? The answer to that, it seems to me, is something that is particularly a matter of concern to this country, and efficiency goes into that question.

Another question is, how is it perceived overseas? What is the effect of combining these programs into one agency upon those nations which now participate bilaterally with us in this program? How do they perceive our mixing a program which has been a good, solid educational program, with a program which is information dissemination? If they perceive this program as becoming focused upon our own national goals and objectives, it may well be that they will be reluctant to participate as fully, and we will inadvertently damage the program.

I recognize that the White House has taken steps by amendment to try to correct this, but what they are doing, it seems to me, is trying to pull back from the mix. I suggest it should be pulled back entirely, and we should spend 1 year of study to determine exactly how this program can be best administered, and at the same time continue to meet the objectives of the Fulbright-Hays program.

Mr. GARY A. MYERS. Is the gentleman aware of any other opportunities to reorganize which could, in fact, achieve the objective the White House has in making an administrative improvement by combining with some other agency of the Federal Government that operates in the same sphere?

Mr. THORNTON. It would seem to me, without trying to articulate a reorganization plan of my own, that there are indeed a number of other agencies which are involved in information dissemination, such as Radio Free Europe, for example, or perhaps others which might be combined in an information dissemination program to achieve efficiency.

The CHAIRMAN. The time of the gentleman from Arkansas (Mr. THORNTON) has expired.

Mr. BROOKS. Mr. Chairman, I yield 3 additional minutes to the gentleman from Arkansas.

Mr. THORNTON. Mr. Chairman, it seems to me that the purposes of the cultural and educational exchange program could be carried forward by combining it with such things as scientific exchanges of information with other nations. Scholarship, it seems to me, is a matter which is very important. We are searching for knowledge and a better understanding of the world in which we live. And it is not appropriate to deal with that in an agency which is also directed to information dissemination.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield further?

Mr. THORNTON. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. I thank the gentleman for yielding.

Mr. Chairman, has the gentleman made any of the suggestions to the White House as an alternate line of responsibility to protect the integrity of these plans?

Mr. THORNTON. This proposal came to my attention at a time when we were in recess, and I have not made such a proposal directly to the White House.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. THORNTON. I yield to the gentleman from New York.

Mr. HORTON. I thank the gentleman for yielding.

Mr. Chairman, in answer to the question of the gentleman from Pennsylvania, we did ask these questions when the matter was first before the subcommittee, and as a result of our concern about the integrity of these plans, the amendments were sent up and received just prior to the time we went on recess.

As I indicated in my opening remarks, I was concerned that we did not have an opportunity to have hearings, but the time is running and we have to act on this now or else it will take effect by default. So in order to give the House a chance to vote, it was important for us to bring the resolution out on the floor now.

Mr. Chairman, I will yield additional time to the gentleman from Arkansas (Mr. THORNTON) if the gentleman runs out of time. The gentleman does not have to worry about his time.

Mr. THORNTON. I thank the gentleman.

Mr. HORTON. But I do feel it is important to point out that we were concerned in the subcommittee about this matter, and it was as a result of that con-

cern that the two amendments were sent up.

One of them says that the Director shall insure that the scholarly integrity and nonpolitical character of educational and cultural exchange activities vested in the Director are maintained.

The second amendment says that the Commission's reports to the Congress shall include assessments of the degree to which the scholarly integrity and nonpolitical character of the educational and cultural exchange activities vested in the Director have been maintained, and assessments of the attitudes of foreign scholars and governments regarding such activities.

Those amendments were sent up as a direct result of our concern in the subcommittee with regard to the very program the gentleman is talking about, the Fulbright exchange program.

Mr. THORNTON. Mr. Chairman, I do appreciate very much that these amendments were adopted out of a concern for the very issues I am talking about. I want to compliment the committee in approving these amendments. However, they do not resolve the basic issue as to whether these two functions should be mixed together.

The CHAIRMAN. The time of the gentleman from Arkansas (Mr. THORNTON) has again expired.

Mr. HORTON. Mr. Chairman, I yield 2 minutes to the gentleman from Arkansas (Mr. THORNTON).

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. THORNTON. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank the gentleman for yielding.

Mr. Chairman, I share my colleague's concern, not only with the way in which the bureaucratic arrangements are structured, as our colleague explained so ably, but, more, how the program is perceived. I think there is a difference in being a scholar under the State Department and being a scholar under the U.S. Communications Agency. Something pertaining to information is so often construed to mean propaganda. We should really be quite careful in separating this from anything that is educational and cultural. I think the perception, despite the amendment, remains a very important element.

Mr. THORNTON. I thank the gentlewoman for her contribution.

Mr. PEASE. Mr. Chairman, will the gentleman yield?

Mr. THORNTON. I yield to the gentleman from Ohio (Mr. PEASE) who I believe is a Fulbright scholar.

Mr. PEASE. I thank the gentleman for yielding.

Mr. Chairman, I would like to associate myself with the gentleman's remarks and also those of the gentlewoman from New Jersey. Perceptions are equally as important as the actual facts of the situation.

This new agency is proposed to be called the International Communications Agency, and it will bring in the U.S. Information Agency, which is certainly appropriate in the area of information and communication, but the other agency that it brings in would be the Bureau of Educational and Cultural Affairs. I submit that is not appropriate for an agency that is titled as a communications agency.

The Fulbright scholarship program, involving scholars of nationalities other than our own, is a two-way street, because we have people coming back and forth. It does involve scholarships; it is not proselytizing, it is not propaganda in any way.

It is not appropriate to have scholars fulfilling a governmental communications function, as this reorganization plan perhaps does not provide, but it might leave people to believe that they were performing that function. Indeed, such a function would be incompatible with scholarship programs.

The CHAIRMAN. The time of the gentleman from Arkansas (Mr. THORNTON) has expired.

Mr. HORTON. Mr. Chairman, I yield 4 additional minutes to the gentleman from Arkansas (Mr. THORNTON).

Mr. PEASE. Mr. Chairman, will the gentleman yield further?

Mr. THORNTON. I yield to the gentleman from Ohio.

Mr. PEASE. Mr. Chairman, I thank the gentleman for yielding.

It is to me imperative that other nations not perceive the Fulbright scholarship program to be a part of our foreign propaganda effort. This is not the intent of this administration, I am sure, but it could be the actual result in the future. Surely that could at any time be the perceived result on the part of other nations, and we cannot control their presumptions.

This potentially dangerous course might be justified if there were overriding savings to be made and efficiencies of administration to be effected. But we are merely substituting one agency for another; we are not eliminating an agency. There are no appreciable dollar savings about which we have been told today, and for that reason it seems to me that this reorganization, with its built-in hazards, is not worthwhile.

Mr. Chairman, I believe we ought to vote yes for the resolution and ask the Carter administration to try again.

Mr. THORNTON. Mr. Chairman, I thank the gentleman from Ohio (Mr. PEASE).

If I may, I would like to make one additional statement.

I believe my concerns were best expressed by the author of this program, former Senator J. William Fulbright, in remarks he made on the occasion of the 25th anniversary of the Educational Exchange program between the United States and Norway, on March 7, 1975:

> If international education is to advance these aims—of perception and perspective, of empathy and the humanizing of international relations—it cannot be treated as a conventional instrument of a nation's foreign policy. Most emphatically, it cannot be treated as a propaganda program designed to "improve the image" of a country or to cast its current policies in a favorable light. Nor can its primary purpose be regarded as simply the cultivation of "good will," which may come as a by-product of serious educational activities but cannot be regarded as their direct objective.
>
> Nor can educational exchange properly be treated as an instrument of foreign policy in anything like the sense that diplomacy is such an instrument; it is indeed a corruption of the educational process—and one that is likely to fail besides—to try to use educational exchange as a means of advancing directly current political economic, or military projects. Education can be regarded as an instrument of foreign policy only in the sense that the cultivation of international perception and perspective are—or ought to be—important long-term objectives of a country's foreign policy.

Because I am deeply concerned that we may inadvertently be placing this educational exchange program in jeopardy, I urge you to support the resolution disapproving the second reorganization plan.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. THORNTON. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, to put this in perspective, I think if a U.S. Congressman or Senator had visited South Korea, for example, under a South Korean informational services program and had gone through that program, he might find it a tremendous political liability to himself, whereas if he had participated in a cultural and educational exchange with the South Korean Government during that same period of time, the integrity of that program having been protected and well known throughout the world, clearly he would not have sustained the political damage that might otherwise have been done to him.

I think that is what we have to look at today. I am not bringing up South Korea today as a criticism against that country, but I merely suggest that currently there is a situation that exists that we must recognize which demonstrates a potential hazard in this move.

Mr. THORNTON. Mr. Chairman, I think that is a very clear illustration, one that puts this matter in perspective in a way that each of us can understand. I thank the gentleman for his contribution.

Mr. BROOKS. Mr. Chairman, I yield myself 1 minute and 30 seconds.

Mr. Chairman, I first want to say that I commend the gentleman from Arkansas (Mr. THORNTON), who is a very distinguished and able representative of his entire State, for his diligence and his concern, particularly about the Mutual Education and Cultural Exchange Act of 1971. I want to assure the gentleman that I now have a nagging feeling that perhaps we in the Committee on Government Operations have overlooked this entire area and ought to spend a little time in really evaluating the program from an objective standpoint.

Mr. Chairman, we are aware of the concern about the Mutual Educational and Cultural Exchange Act of 1961 which the gentleman from Arkansas has expressed.

I believe that the plan, as amended, provides adequate protection for this important program in a number of ways: First, the plan requires that one of the four Associate Directors of the new agency be designated as the Associate Director for Educational and Cultural Affairs. This high status assures that

there will be one identifiable individual who, by the way, will be subject to Senate confirmation—responsible for the Fulbright program and the other educational and cultural exchange programs in the ICA.

Second, the independent Board of Foreign Scholarships, which is appointed by the President and which in turn selects the American recipients of Fulbright grants, will be retained under the plan. The Board, which has an excellent reputation, and the 43 binational commissions overseas have provided strong leadership for the program over the years and we are sure that they will continue to do so in the future.

Third, the plan expressly requires that the Director of the ICA "shall insure that the scholarly integrity and nonpolitical character of educational and cultural exchange activities" of the agency be maintained.

Fourth, the Advisory Commission on International Communication, Cultural and Educational Affairs created by the plan will report at least annually to the Congress. Its reports must include—

Assessments of the degree to which the scholarly integrity and nonpolitical character of the educational and cultural exchange activities vested in the Director have been maintained, and assessments of the attitudes of foreign scholars and governments regarding such activities.

Finally, the American academic community has a strong and abiding interest in the Fulbright-Hays program. I have no doubt that they will be vigilant on its behalf and that they will not hesitate to make their voices heard if there is the slightest hint of impropriety in the conduct of these activities.

We do appreciate the gentleman's concerns, but we have concluded that they are fully addressed by the plan and have overwhelmingly recommended that the resolution of disapproval not be agreed to and the reorganization be put into effect.

We certainly appreciate the gentleman's concerns and those of our colleague, the gentleman from Ohio (Mr. PEASE), but we in the committee have concluded that they are fully addressed by the plan and have overwhelmingly recommended that the resolution of disapproval not be agreed to and we support the procedure by which the reorganization plan will be put into effect and ask the Members to vote "no" on this disapproval resolution.

Mr. THORNTON. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from Arkansas.

Mr. THORNTON. Mr. Chairman, I thank the gentleman for yielding.

I must say that I am greatly pleased to have the assurances of the chairman with respect to his continuing interest in making sure that the integrity of this program is not compromised should this reorganization plan be approved.

I would like to suggest that it would also be possible for the committee to engage in this kind of oversight and review of the plan should the resolution be adopted and the reorganization plan disapproved. This would give an adequate time for study.

I thank the gentleman for his comments.

Mr. HORTON. Mr. Chairman, I yield 5 minutes to the gentleman from Alabama (Mr. BUCHANAN).

Mr. BUCHANAN. Mr. Chairman, I rise in opposition to House Resolution 827.

If we defeat this resolution and thereby permit Reorganization Plan No. 2 to go into effect, we will consolidate into one independent agency—the International Communication Agency—the functions of the U.S. Information Agency plus the separate but, I would insist, similar educational and cultural functions now performed by the Department of State.

Mr. Chairman, I share the respect of all Members here for our distinguished friend, who preceded me in the well. The chairman of the Committee on Government Operations has given him certain assurances about future oversight activities.

I would like to share with the gentleman some results of the study that has already taken place on this subject over a period of years. I am ranking minority member on the Subcommittee on International Operations. We have held a series of hearings over a period of years on this subject. Under the leadership of the distinguished chairman, the gentleman from Florida (Mr. FASCELL), we had extensive hearings on this subject this past spring and summer.

As a result of those hearings, the subcommittee recommended unanimously that a reorganization plan along the lines of that subsequently proposed by the administration be undertaken.

Mr. Chairman, the fact is that the basic situation with which we have been confronted for years is that of two bureaucracies having generals who give the orders to one set of foot soldiers in the field. That hardly could be characterized as logical Government organization.

Mr. Chairman, I think, as I shall try to make even more plain, that the basic program about which my colleagues have expressed concern will remain untouched and unscathed. However, we do here remedy a basic flaw of organization that I think has long needed such remedy.

Many of the witnesses appearing before our subcommittee had expressed support for a proposal similar to that which we recommended. I am a little intrigued, I must admit, at the charge that has been raised that removing the educational function from the Department of State will somehow make the Fulbright-Hays program more political.

During our hearings on this subject, both this year and in the past, we have heard repeated pleas from witnesses across the spectrum not to place the USIA in the State Department and combine it in that way, least it be tainted by political considerations—that is, the USIA.

I would again remind my friends that the word "propaganda" is not really appropriate for what our Government does.

I would invite all my colleagues to go right down the street to the old HEW building and to go into that building and see the actual operations of the Voice of America and to look at the displays pertaining to the operations of the USIA generally in the world.

This is an information agency and an increasingly fine information agency in part because of the dedicated efforts of one of my fellow Alabamians, Kenneth Giddens, and the equally dedicated commitments of the employees and of present Director Mr. Straus. I am confident that, even more than in the past the USIA shall gain credibility and respect around the world for being an objective information agency, telling the world the truth and the reality of the United States. That function is not by any means or in any sense the function of a propaganda agency.

The fact that there were witnesses who were unwilling for us to put the USIA into the Department of State because it would make USIA more political underlines the fact that the Department of State is, by its nature, a political organization. Its function is international politics.

The Fullbright-Hays program has operated well and it is the concern of our subcommittee, as has here been expressed, that it continue to do so. Among the recommendations which we did make was that the integrity of the educational and cultural programs be maintained. In my judgment, the plan here before us today does just that.

A number of steps have been taken in this plan to insure that this will be the case. They include: Elevating the person who will be responsible for educational and cultural affairs to Associate Director in ICA; requiring that the ICA Director "insure that the scholarly integrity and nonpolitical character of educational and cultural exchange activities vested in the Director are maintained"; requiring that the annual reports of the U.S. Advisory Commission on International Communication and Cultural Education Affairs include assessments of how well the integrity is maintained and of the attitudes of foreign scholars and governments on these programs.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HORTON. I yield 3 additional minutes to the gentleman from Alabama (Mr. BUCHANAN).

Mr. BUCHANAN. And last, but perhaps most important, retaining the Board of Foreign Scholarships.

As the Members know, the Board is charged with the responsibility of selecting students, scholars, teachers, and others to participate in the programs. The same people who have been providing this service in the past will provide it if the reorganization plan takes effect.

The real question here is whether the outstanding Fullbright-Hays program which has operated so well over so many years and which has been so beneficial, will continue to operate in this same responsible manner under Reorganization Plan No. 2. It is my considered judgment that it will. Why? Basically, the same people will be running it.

As I just mentioned, the Board of Foreign Scholarships will remain the same. The programs are administered abroad by USIA. These same people under ICA will provide the same function. Currently, USIA personnel serve on binational

commissions in countries abroad which work with this program. ICA personnel will continue to do so.

It is my hope that, rather than degrading the educational and cultural programs conducted by the United States, this reorganization plan will give additional emphasis to these programs. In my judgment, they are more important than ever and merit additional considerations.

Mr. Speaker, I have recently returned from Belgrade where I am a member of the U.S. delegation to the Belgrade followup conference on the Helsinki accords. In signing the accords, the United States committed itself to increased activities in areas of cultural and educational exchange.

We should increase such exchanges not only because we are committed to doing so, however, because such exchanges are in the best interest of the United States.

The peoples of the world and particularly behind the Iron Curtain are hungry for information about the United States. The USIA is one of the best instruments we had to convey the reality and the totality of the United States behind the Iron Curtain.

It is also one of the best means we have to reach millions of individuals in lesser developed countries where there is limited access to news sources, often little, if any electricity and few, if any, telephones.

This reorganization plan is not devised to save vast sums of money nor, in my judgment, should it. We are on the verge of a worldwide communications revolution. The United States has been a leader in so many developments. We ought to lead in this area as well.

Our subcommittee will continue to give close attention to the operations of the new agency and I would like to take this opportunity to assure those of my colleagues who are concerned about the Fulbright-Hays program that this particular program will continue to receive our closest scrutiny.

We are concerned that its integrity be maintained and we are committed to its maintenance.

Mr. Speaker, the United States has a story to tell the world about the kind of people we are, and I believe that story, once told, will help to create and expand friendships abroad and will contribute substantially to international understanding.

In my judgment this reorganization plan being considered here today will substantially augment our efforts toward that goal. I therefore urge my colleagues to vote against the resolution of disapproval and, by so doing, vote to approve Reorganization Plan No. 2.

Mr. BROOKS. Mr. Speaker, I yield 10 minutes to the distinguished gentleman from Florida (Mr. FASCELL).

Mr. FASCELL. Mr. Chairman, I rise in opposition to House Resolution 827 to disapprove Reorganization Plan No. 2 of 1977 relating to the U.S. Information Agency and the Bureau of Education and Cultural Affairs of the Department of State. I do so, both as a member of the Committee on Government Operations and as chairman of the Subcommittee on International Operations of the International Relations Committee, which earlier this year held extensive hearings on proposals to reorganize our public diplomacy programs. I am convinced that the organizational structure recommended by the President will provide a sound framework for strengthening our public diplomacy programs and for making our efforts more efficient and effective.

Mr. Chairman, the chairman of the Committee on Government Operations is to be commended for the dispatch with which he has handled this reorganization plan, coming as it did so late in the session. I believe that it is important that the House have this opportunity to discuss this plan, and I commend the gentleman from Texas for insuring that the House have this opportunity to debate the plan's merits.

The Committee on Government Operations report on the disapproval resolution quite accurately characterizes the primary objective of the reorganization plan when it states that, "efficiency rather than economy is the primary goal of the reorganization." This is a plan not directed fundamentally at reducing Government expenditures but at enhancing the management of the more than $320 million expended annually on public diplomacy programs. It is designed not only to consolidate diverse programs in a single agency, but in the words of the report, "to increase the independence, enhance the prestige, and thus expand the impact of the new agency's role in this vital field."

Both in the hearings of the International Operations Subcommittee and of the Government Operations Committee, a number of important issues emerged which continue to be of primary concern in any discussion of Reorganization Plan No. 2. Briefly, these issues are: First, the continuing integrity and independence of our education and cultural exchange programs; second, the integrity of the Voice of America; third, the relationship of the new agency to the Department of State and to the President; and fourth, the impact of the reorganization on employees. I would like to address myself briefly to each of these issues.

By far the single greatest cause for concern raised in connection with this reorganization plan has been its possible impact on the integrity and independence of our education and cultural exchange programs including the widely respected Fulbright-Hays program, which in the last academic year alone permitted almost 4,000 U.S. and foreign citizens to study, teach, or do research here or abroad. It was concern over this issue which led the Subcommittee on International Operations in a memorandum sent to the President on August 3, 1977, to stress the paramount importance of maintaining the integrity of our education and cultural programs, to urge continuance of an independent Board of Foreign Scholarships, and to recommend a strengthened role for the new agency's independent advisory commission in protecting the integrity and credibility of our exchange programs. Feeling as I do about the tremendous importance of these programs and convinced as I am about the absolute necessity for maintaining the program's scholarly integrity if it is to be effective, I very carefully reviewed the President's message to Congress, the reorganization plan which he submitted, and the amendments subsequently submitted as a response to congressional concern about the exchange program.

Having reviewed all these materials, I am convinced that the President has done all he can in the way of organizational safeguards to protect the integrity of this program. I do not believe that it is possible to totally prevent the application of political pressures to this or any other program no matter in which agency a program is placed. All that can be done is to put in as many safeguards as possible and to maintain vigorous congressional oversight of the program. President Carter and Congress have provided an adequate network of legal and structural safeguards, and I can assure the House that as long as I am chairman of the International Operations Subcommittee, we will make every effort possible to maintain the integrity which has characterized the Fulbright program in the past and which has made it so successful.

A second major source of concern about the reorganization plan relates to the independence and integrity of the Voice of America. There have been abuses of the Voice in the past, times when stories were killed or changed to suit the foreign policy needs of a particular moment. I think it is clear to this administration, at least, that such efforts are counterproductive, that they undermine the credibility of the Voice, are counter to the ethical basis of our political system, and in the long run simply do not work. Maintaining the integrity of the Voice of America was also a major concern of the Subcommittee on International Operations and we made the same kind of recommendations to the President about the Voice, which we made concerning our exchange programs. Here, too, I believe the President has gone as far as possible in his message, in the plan itself, and in subsequent amendments to safeguard the integrity of the Voice. Further protection can only be afforded by vigorous oversight by both Congress and the press and by the commonsense and goodwill of the principal officials of the executive branch. Both our subcommittee and other concerned committees of the Congress will continue to give this issue high priority and will urge the new advisory commission to develop means of more effectively monitoring efforts to interfere with the Voice's independence and to promptly advise Congress.

A third major concern over Reorganization Plan No. 2 has been the nature of the relationship which it envisions between the President and the Agency and the Secretary of State and the Agency. The Subcommittee on International Operations after 10 days of hearings reached the unanimous conclusion that the Bureau of Education and Cultural Affairs and the USIA be merged into a new independent agency which would work closely with the State Department, but have budgetary, personnel and administrative autonomy. We also urged that the Director of the new agency be

included in meetings of the National Security Council and the Cabinet.

Initially, the reorganization plan seemed to be ambiguous about these issues suggesting that the new agency would be subsidiary to the Department of State in ways, which I for one, considered to be completely unacceptable. However, materials subsequently submitted to the Committee on Government Operations clarified the intent of the plan. The submission of the Office of Management and Budget in this regard is summarized on page 7 of the committee's report. I believe that the plan as finally explained to the Government Operations Committee and as described in the committee's report (95–818) insures appropriate autonomy for the International Communication Agency and assigns to the Director the primary role he should play in advising the President, the National Security Council and the Secretary of State, on public diplomacy issues and programs.

One final major issue which has been discussed in connection with the reorganization plan has been that of employee rights. The President took note of the importance of this issue in his message to Congress accompanying the plan and the issue was raised by employee representatives in hearings before the Government Operations Committee. I have every reason to believe that the administration will faithfully carry out their responsibilities under the law for fair and equitable treatment of employees affected by the reorganization. This too, however, will be a matter of continuing concern to the Committee on International Relations as well as to other committees having jurisdiction in this area.

Mr. Chairman, this reorganization plan is not without its flaws, but in my opinion, it represents a reasonable and balanced approach to reorganizing our Nation's efforts to communicate effectively with the peoples of other nations. I am convinced that the plan contains maximum safeguards to protect against the misuse of either the Voice of America or our education and cultural exchange programs. I urge support for President Carter's Reorganization Plan No. 2 of 1977 and rejection of the resolution of disapproval.

Mr. THORNTON. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Arkansas.

Mr. THORNTON. Mr. Chairman, I thank the gentleman from Florida for yielding.

Mr. Chairman, I would just like to submit that the fact that this program has worked well and has done a great job for the people of this country for 30 years in which it has not been reorganized and combined with another agency would seem to me to indicate that those people who objected to the reorganization were right in suggesting that it not be reorganized.

Mr. FASCELL. I can understand the gentleman's opinion on that and I cannot disagree with him about it. The conclusion is not accurate of course. It does not follow as a matter of logic. Nevertheless, I can appreciate the gentleman's feeling.

Let me assure the Members that the galactic luster which is now appended to Fulbright-Hays Act and the stellar sheen which it has carried all these years will not be dimmed one iota when it is reorganized as it will be now under this reorganization plan.

What are the advantages? I will tell the Members.

As the distinguished gentleman from Alabama, who is the ranking minority member on the subcommittee which I chair, has pointed out, over the years we have been following this program very closely and we have heard all these arguments before. Before the reorganization plan came up we held extensive hearings in our own subcommittee on matters of substance contained in the reorganization plan before it got to this stage, so we have been following this very carefully.

As a matter of fact, the distinguished Senator made his views known at that time, as did the academic community.

But this is one of the problems. The program, as it is now in state, with all the clout that it has and carrying the names of the two distinguished gentlemen it now carries, has been really just kind of floating along, and the reason is because it is buried in a budget of $1.2 billion.

Mr. THORNTON. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Arkansas.

Mr. THORNTON. Mr. Chairman, I would like to suggest that what the gentleman has outlined, it seems to me, is a strong argument against reorganization on the basis that "if it is working, don't fix it. The program has worked well in the past."

Mr. FASCELL. Mr. Chairman, the point is we would like the program to be better. I submit to the gentleman from Arkansas that it has been very difficult to do better under the present administrative system.

The gentleman might be satisfied because the gentleman's distinguished colleague from Arkansas is obviously satisfied with the present system. But we hope that Fulbright-Hays is going to do better and not simply ride along at the same old levels.

I know I am not going to convince the gentleman, because the gentleman is committed to vote against the reorganization plan and I am committed to vote for the reorganization plan; but let me just say for the record that the USIA, as the distinguished gentleman from Alabama said, is not a propaganda agency. There are a lot of people in and out of Congress who do not understand the functions and purpose of the USIA. It is educational, and informational but it does not have a propaganda function in the generally understood adverse connotation of that word.

So I repeat that is not true, and it is not correct to say that the Voice of America is a propaganda agency. The U.S. Government has worked very hard to keep it independent and to protect its integrity. We have done that in this reorganization plan. We have raised the director of that agency to associate director for the same reason that we have made the director of education and cultural affairs an associate director; and that is to guarantee the Voice of America's integrity. Their job is to tell the news like it is, and to be a conduit for the explanation of U.S. foreign policy.

Finally, the programs at issue have been living together all of this time since they are administered in the field by one agency. I cannot see any reason to state, or even infer, that in some way there now would be some contamination because there is a merger of the Washington administrative units. That is a very unfair conclusion and a wrong statement to make with respect to the operations of either the USIA or its successor agency, the International Communication Agency.

Furthermore, USIA has been operating binational educational centers, which are quite separate and apart from Fulbright-Hays.Those centers are strictly educational. They have teachers, they have foreign students, and by and large those binational centers which are operated by the host country with U.S. cooperation—those binational centers with a binational board are some of the finest institutions to foster understanding and education for peoples of both countries involved. It is just unfair to suggest that, for some reason, because we are going to take the Washington level administration of the Bureau of Cultural Affairs in State and merge it into a new agency that in some way it is going to affect the operation in the field where that program has been operated in the field all of this time. That is just not a good conclusion, in my judgment.

The Subcommittee on International Relations has been all over the world in examining the operation of both the binational centers and the Fulbright-Hays scholarship program. I have found not the first scintilla of evidence from any country where the program is operating that in any way indicates that the program is being submerged; that in some way the program will be adversely affected or in some way their academic community is going to be tainted. That evidence simply does not exist.

So, I submit that while we should have reasonable concerns, what we need to do is what the gentleman from Arkansas has said, which is to maintain a continuing good program; see that it gets reasonably expanded; continue our oversight on it; make sure that it is administered at least as well as it has been administered in the past. I see that as no reason to vote against this reorganization plan when, admittedly, what it is going to do is increase efficiency. It may not save a lot of money because it will take some time by way of attrition to eliminate the duplications, but it is a good plan. I urge my colleagues to vote "no" on the resolution of disapproval which is pending and allow the plan to go into effect.

Mr. BROWN of California. Mr. Chairman, I rise in support of the President's proposed reorganization of the Federal Government's international communication, educational, cultural, and broadcasting activities. After 26 years of discussion, and nearly 50 reports and panels on this reorganization, we are at the point of decision on a plan which em-

bodies many of the recommendations made in the past.

But I see this reorganization as a starting point for change in our international cultural exchange and communication activities, and not as the culmination of past efforts. This organization will still be functioning under a statement of purpose issued by President Kennedy at the height of the cold war. This organization will still be prohibited from releasing its material within the United States, in a society that clamors for "government in the sunshine." Most importantly, this organization is being formed at the beginning of a new era in communications, at one of those crucial points of change in history where cooperation is replacing conflict, and yet it is still dominated by the politics of confrontation of the past. We still have much work to do.

Our society is entering an era of technological opportunity in communication that until a few years ago was only an image in the mind's eye of futurists, such as Arthur Clarke, and Buckminster Fuller. That era is now confronting us in the present and, as is usually the case with technological advances, confronting us before society has a chance to respond. As developed societies begin to leave the Mechanical Age and enter the Communications Age, less developed countries have only just begun to enter the age of industrialization and mechanization. As Professor Stonier of the University of Bradford in England states it, the developed countries are extending the human nervous system while the less developed countries are just learning to extend the human musculature. The technological gaps are still there and unless we respond in a more reasoned manner than we have in the past, the old conflicts will still be there also.

The Third World has begun to form its own news agency, claiming that the developed world has failed to respond to the Third World's information needs. Many countries are justifiably suspicious of our satellite communications capability and have shown their suspicion in lopsided votes in international conferences studying this issue. Some countries have threatened to close their doors to our news agencies, citing the bias of developed countries' reporting a need to control their own information dissemination. Our past communication and cultural policies have brought us to this present state. If we continue into the Communication Age with these same policies the situation will only get worse.

We must recognize the needs of the majority of the world's population and see their mutuality with our foreign policy goals and the potential of our massive information and communication industry. There are many tough questions to be asked. How does a country protect its culture and what are the basic human rights to impart and receive information and ideas? Does one country have the right to decide what will and will not be broadcast into another country without their approval? How do we best use our communication, cultural exchange programs, and information technology to assist other countries' development needs? What is in our best interest in the mutual exchange of information and culture?

The President has called for a new order in international communications, free from propaganda, free from covert activity, open and forthright, with integrity. He sees this new Agency laying a heavy emphasis on listening to others, a chance to demonstrate for this Nation a decent respect for the opinions of mankind. I applaud his vision and courage. We must now be equally bold to make the changes in law which will permit that vision to flower in the most humane and enabling manner we can as befits a great nation.

Mr. BROOKS. Mr. Chairman, I have no further requests for time.

Mr. HORTON. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 827

Resolved, That the House of Representatives does not favor the Reorganization Plan Numbered 2 transmitted to the Congress by the President on October 12, 1977.

Mr. BROOKS. Mr. Chairman, I move that the Committee do now rise and report the resolution back to the House, with the recommendation that the resolution be not agreed to.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. ROSTENKOWSKI) having assumed the chair, Mr. KILDEE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the resolution (H. Res. 827) to disapprove Reorganization Plan Numbered 2 of 1977, had directed him to report the resolution back to the House with the recommendation that the resolution be not agreed to.

The Clerk reported the resolution.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. THORNTON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 34, nays 357, not voting 43, as follows:

[Roll No. 749]

Burton, John	Koch	Teague
Chisholm	Krueger	Van Deerlin
Cleveland	Le Fante	Whalen
Cochran	McCloskey	White
Conyers	McDonald	Young, Alaska
Cunningham	McKay	
Dent	Moss	

The Clerk announced the following pairs:

On this vote:

Mr. McDonald for, with Mr. Jones of Tennessee against.

Until further notice:

Ms. Chisholm with Mrs. Smith of Nebraska.
Mr. Dent with Mr. Abdnor.
Mr. Biaggi with Mr. Goldwater.
Mr. Giaimo with Mr. Rousselot.
Mr. Teague with Mr. Ruppe.
Mr. White with Mr. Whalen.
Mr. Koch with Mr. Armstrong.
Mr. John Burton with Mr. Gilman.
Mr. Alexander with Mr. Beard of Tennessee.
Mr. Conyers with Mr. Broomfield.
Mr. Moss with Mr. Cleveland.
Mr. Jenkins with Mr. Kasten.
Mr. Rose with Mr. McCloskey.
Mr. Roberts with Mr. Cochran of Mississippi.
Mr. Le Fante with Mr. Kelly.
Mr. McKay with Mr. Cunningham.
Mr. St Germain with Mr. Young of Alaska.
Mr. Stratton with Mr. Quayle.
Mr. Van Deerlin with Mr. Fithian.
Mr. Badillo with Mr. Krueger.

Messrs. DICKS, ANDREWS of North Carolina, MARLENEE, NOLAN, RISENHOOVER, CHARLES WILSON of Texas, and HAGEDORN changed their vote from "yea" to "nay."

Mr. STEIGER changed his vote from "nay" to "yea."

So the resolution was rejected.

The result of the vote was announced as above recorded.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the resolution just under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

NATIONAL HEALTH PLANNING GUIDELINES

(Mr. ROGERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROGERS. Mr. Speaker, I know that many of my colleagues have been receiving expressions of concern from their constituents regarding the recently issued national health planning guidelines. I, myself, have received hundreds of letters from citizens who are concerned that the guidelines do not recognize the unique characteristics of the areas in which they live and mistakenly believe that hospitals will be forced to close as a result. These concerns are unnecessary and result from a misunderstanding about the nature and the impact of the guidelines.

The primary misunderstanding is that the guidelines will be used to force hospitals, particularly in rural areas, to close. There is nothing in the health planning act that requires or authorizes the Health Systems Agency, the State Health Planning and Development Agency, or HEW to close hospital services or facilities. The application of the guidelines may identify unneeded facilities in an area, but changes in existing services must be brought about voluntarily as the law is currently written. This fact seems to be widely misunderstood.

When the National Health Planning and Resource Development Act was being considered in Congress, there was much discussion about the need to develop a statement of national policy to guide the health planning agencies to be developed under the act as well as providers of health services. This resulted in a provision in Public Law 93–641 that required the Secretary of HEW within 18 months to publish national health planning guidelines.

The guidelines are to be a statement of national health policy and to consist of planning goals and resource standards. As such, the guidelines should set forth the direction in which the Nation should head in order to provide equal access to quality health care at a reasonable cost to its citizens.

The guidelines should thus provide a framework for health planning at the areawide and State levels. They should not be seen as mandatory set of standards that must be met by each community. Health plans should set forth goals that take into account and are consistent with the direction set forth in this national health policy. Deviation from such policy is acceptable to the extent that it is responsive to the unique needs and resources of an area. I continue to think that such guidelines are an important part of the planning program. They provide a point of reference for local planners. At the same time they relieve each local health planning agency from undertaking all of the expensive, time consuming, and duplicative research necessary to develop such standards.

While the previous administration had failed to implement this section of the law, the Carter administration on September 23, 1977 published draft guidelines for inpatient services. Other guidelines for ambulatory, long term, and other services will be published next year. The Subcommittee on Health and the Environment held oversight hearings on these guidelines on October 19. While I was very pleased to see that guidelines were finally published for public comment, I as well as other members of the subcommittee criticized the fact that the guidelines only deal with inpatient services; the fact that there was not adequate consultation with the groups such as Health Systems agencies, specialty societies, and the National Council on Health Planning and Development as required by law; and, the fact that the guidelines and the exception process outlined lacked the flexibility envisioned when the law was enacted.

Following the hearings, I met with the Undersecretary and other HEW officials to further explore these concerns. As a result of that meeting we were able to agree on the following:

First, the Department will make greater efforts to get input in process of developing the guidelines from the National Council and others.

Second, the exception process will be made more flexible in the final regulations. It seems reasonable to me, for example, that an HSA which can make the case that it has special characteristics that justify a goal or standard that differs from that specified in the guidelines should be able to establish a different goal or standard. The burden for making this justification should fall on the local planning agency, but if the justification is adequate it should be accepted by HEW.

In order to further describe and clarify the purpose and impact of the guidelines, I have asked the Secretary of the Department of Health, Education, and Welfare to write each Member of Congress. I hope that this will be helpful to my colleagues as they discuss or explain this portion of the law to their constituents.

Mr. FASCELL. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Florida (Mr. FASCELL).

Mr. FASCELL. Mr. Speaker, has the gentleman's subcommittee had an opportunity to review the problem on the allegations with respect to refusal of payment to those physicians or groups of physicians who have installed duplicative equipment, let us say for example a brain scanner, when the installation and acquisition of that equipment was not approved by the Regional Health Planning Agency?

Mr. ROGERS. When it is in an institution and not in a doctor's office?

Mr. FASCELL. I am talking about a related problem of refusal to pay on the Federal programs those physicians who have acquired duplicative equipment when it was not approved by the Regional Health Planning Agency.

That seems to be a growing problem. I wonder if the gentleman's subcommittee has addressed this problem yet in its hearings.

Mr. ROGERS. We have gone into the problem, but there is no current authority for the health planning agencies or the States to undertake such review, unless the State certificate of need law itself covers major medical equipment purchases in physician's offices so that there is no present mechanism for denying payment.

Mr. FASCELL. Mr. Speaker, if the gentleman will yield further, in other words, there is no basis now to deny payment

to a physician or a group of physicians who might by some chance have duplicative equipment.

Mr. ROGERS. That is right, unless authority is set forth in State law.

Mr. BEDELL. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I would be glad to yield.

Mr. BEDELL. Mr. Speaker, I take it from the gentleman's remarks that the gentleman agrees with the urgent need that is served by the hospitals in our small communities, that the gentleman would agree we do not offer any guidelines which would result in the closing of the hospitals which are so important, where one hospital serves a given community need; is that correct?

Mr. ROGERS. What we are trying to say here is that the guidelines are to be met where possible. There is nothing compulsory about it. This is the goal. In other words, it should be a goal to do away with beds that are not used, where it is expensive to keep that bed when it is not being used; but what we are saying is that the local planning group made up of local citizens are to look at their needs and see what those needs are and in doing so try to meet the guidelines; but if it does not meet the needs of that community, then that guideline should be modified.

Mr. BEDELL. By local, does the gentleman mean local community leadership?

Mr. ROGERS. I am talking about the health systems agencies in the health service areas, which may be made up of a number of counties.

Mr. BEDELL. Mr. Speaker, if the gentleman will yield further, I have a resolution which I have introduced which would help to say it is essential to Congress that we wish to preserve the services in the community where one hospital serves the needs of the individual community.

Mr. ROGERS. I think everyone would agree with that. However, if they are heavily overbedded, I would hope they take action to get rid of the excess beds or excess equipment.

Mr. BEDELL. I assume from the gentleman's remarks that the gentleman would be willing to go over this resolution with this Member and if it does what I have said, the gentleman would support it.

Mr. ROGERS. Certainly.

The SPEAKER. The time of the gentleman from Florida has expired.

(By unanimous consent, Mr. ROGERS was allowed to proceed for an additional 2 minutes.)

Mr. GRADISON. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Ohio.

Mr. GRADISON. Mr. Speaker, I am happy that the gentleman has given us reassurance with regard to the effect of the guidelines in not forcing the closing of existing institutions.

I am concerned in my own metropolitan area that these guidelines may be interpreted as making it difficult, if not impossible, to replace existing outmoded inefficient facilities with an equivalent number of beds, or even less beds than there are today, and taking into account that we are currently within our health planning area in excess of the 4.0 beds. I wonder if the gentleman could enlighten us on the intention of the planning act in this regard.

Mr. ROGERS. I think we do not want excess beds constructed; however, where the replacement of beds is involved, I would think the HSA in its planning would have to consider the need for the replacement. The approval is left to the local agencies and the State in issuing a certificate of need, whatever their judgment is would prevail.

Mr. GRADISON. Mr. Speaker, if the gentleman will yield further, does the gentleman see these guidelines as additional to the administration's initiative with respect to hospital cost containment, or a possible substitute for them?

Mr. ROGERS. This is for planning purposes, basically to prevent and help reduce excess facilities and services and to make sure we have adequate facilities where they are needed. That is separate and apart from the cost containment approach; however, it should have a positive effect on proper planning and also to help hold down costs.

Mr. COHEN. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Maine.

Mr. COHEN. Mr. Speaker, I would like to continue the colloquy of the gentleman from Florida whether a certificate of need is required to purchase equipment under existing law.

Mr. ROGERS. There is no such requirement.

Mr. SATTERFIELD. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Virginia.

Mr. SATTERFIELD. Is the gentleman saying that these guidelines will not be mandatory on the health system's agencies?

Mr. ROGERS. I am saying that the guidelines are simply guidelines. It is a goal to reach. Hopefully, they can be reached, and hopefully they will be adhered to. But, if there is an unusual circumstance in the community so that the guideline is not appropriate for that community, then the local HSA should be able to make that judgment.

Mr. SATTERFIELD. Is it not a fact that as a part of these guidelines the Secretary is saying that every health system's agency must conform in plan within 1 year, and conform to the guidelines within 4 years thereafter?

Mr. ROGERS. I think the gentleman will find that the guidelines have not yet been finalized.

Mr. SATTERFIELD. We are talking about proposed guidelines. Of course, we do not have final ones.

Mr. ROGERS. I am referring to the proposed guidelines, and I think the gentleman will receive a letter—all Members will receive a letter from the Secretary either today or tomorrow, which should assure Members that these are just guidelines. They are goals to be met.

Mr. SATTERFIELD. Will the gentleman yield further?

Mr. ROGERS. Certainly.

Mr. SATTERFIELD. Does the gentleman know whether the Secretary also is going to inform the Members of Congress why he failed to conform to section 1501 in proposing these guidelines?

Mr. ROGERS. We have asked him to do that to the committee, not in a letter to Members.

Mr. SATTERFIELD. I think the Members ought to know that he did not conform.

Mr. ROGERS. We will be glad to make that available to the gentleman from the committee.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Texas.

Mr. KAZEN. I am happy that the gentleman has made this thing clear, because, as he knows, and as he has just stated, we are getting letters from all over this country. I cannot imagine any agency of this Government trying to hold hearings on guidelines that propose to close or curtail services being performed by certain rural hospitals in this country. Actually, it not only affects rural hospitals, but also a lot of metropolitan hospitals because of some silly guideline that they be within 45 minutes' reach of another facility.

Mr. ROGERS. Yet, I think the gentleman would agree that good planning is needed to cut down health costs.

Mr. KAZEN. Will the gentleman reassure us that the guidelines that will be promulgated will be strictly voluntary on the part of health service agencies?

Mr. ROGERS. What we are saying is that we hope that these guidelines can be accepted, but where there are unusual circumstances in the community, the HSA has the right to vary from them.

Mr. KAZEN. What is an unusual circumstance?

Mr. ROGERS. I hope we can leave that to the HSA's, but we are trying to make it as clear as possible. We will follow this closely, and we will be glad to be in touch with the gentleman.

Mr. CARTER. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to my colleague from Kentucky.

Mr. CARTER. I thank the distinguished gentleman for yielding to me. It is my firm hope that the guidelines do not depart from the law which we write in the health system's agency, which would control an excessive number of beds. Certainly, it is true that the Secretary has no right to write guidelines which would have the force of law. Law is written here in this House, and I would hope that he would not attempt to subvert the legislation we have written.

Mr. ROGERS. I share that concern, and I think it is being made clear to the Secretary that the guidelines are as we intended.

Mr. CARTER. I thank the gentleman.

Mr. YOUNG of Texas. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Texas.

Mr. YOUNG of Texas. I am sure the gentleman understands as well as anybody that the curtailment of services, particularly those in rural hospitals, is going to weigh heavily on our ability to get doctors to go to these rural areas and

to stay there. In connection with the letter which the gentleman says will be reaching us from the Secretary, I would hope that the gentleman in the well would use his influence with the Secretary to have him extend the time for comments on these guidelines beyond December 9, so that it will give Members of the House an opportunity to contact our constituents, who are so grievously concerned about this matter and want an opportunity to be heard on it after we get the explanation from the Secretary.

Mr. ROGERS. Yes. As a matter of fact, he has extended it to December 9. He has already given one extension here. I think that if it is necessary, additional time could be requested.

Mr. YOUNG of Texas. My information is that on the 18th he extended the time to December 9, but they hired a private firm to tabulate the comments. So if my information is correct, the comments are cut off right now.

Mr. ROGERS. We will check into that. I am sure we will have comments until December 9, and we will ask that they be considered, because I think we have had a great outpouring of concern. They have already had a lot of comments. Hospitals have been heard from in many communities. I think we have already received a range of feelings from people. For that reason, I was concerned, because I think many were misinterpreting what we intended the guidelines to be. I think this is now being straightened out, and I believe that as soon as the gentleman reads the Secreatry's letter, which should be coming to the gentleman, the gentleman, too, will feel that the law will be adhered to.

Mr. YOUNG of Texas. I have not seen the Secretary's letter. I look forward to receiving it. But I hope the hospitals and the doctors will be satisfied with that.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

Mr. Speaker, I would like to first of all emphasize that this problem is not one which only pertains to rural areas. It also affects in a very significant way suburban and metropolitan health services, as well.

Second, I think the gentleman from Kentucky, Mr. CARTER, is absolutely correct in pointing out that the so-called guidelines go quite directly against the law that the Congress passed.

The third point I would like to make is that I find this entire discussion bizarre. I find it bizarre because here, the elected Congress of the United States, is crawling on bended knee, asking some unelected bureaucrat, who has never had the inconvenience of running for public office, to do what Congress said they should do in the first place.

Mr. ROGERS. I do not share the gentleman's feeling on that. I think it is a proper function. This is the way we expect them to function. We are now having an input. I realize the gentleman wants us to veto or not veto every action that the department may take. But I think we can always do that by a change in law. The gentleman can introduce a bill to veto an action at any time.

Mr. AMMERMAN. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Pennsylvania.

Mr. AMMERMAN. I thank the gentleman for yielding.

Mr. Speaker, I would hope that the Chairman would be aware of the fact that in many of the small counties which are appended to larger cities in these service areas there really is no effective voice. When the gentleman says that the local community is going to have this decision to make, that is often not the case. This gives rise to very great concern to me, because I have very many small communities in my district.

Mr. ROGERS. May I say to the gentleman that the groups are selected locally, they are local people, and before they do take action they must hold hearings and have an adequate input from the local areas which are affected by any decision.

Mr. AMMERMAN. If the gentleman will yield further, it has been my experience that the people who are on some of these groups, who have axes to grind, are from some of the hospitals. They all are not represented, and there is a very real problem.

Mr. ROGERS. Mr. Speaker, we will be glad to look at that when we reconsider the health planning law. However, it is true that the law in regard to HSA's provides that a portion of them would be providers, but a majority would be consumers, so we should have adequate input.

Mr. AMMERMAN. Mr. Speaker, I thank the gentleman.

RECESS

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the House stand in recess subject to the call of the Chair.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. MICHEL. Mr. Speaker, reserving the right to object, I take this time for the purpose of inquiring of the distinguished majority leader what the scenario would be following this proposed recess today. Also I would ask what program there would conceivably be for tomorrow and the balance of the week.

Many Members have inquired as to whether we will meet on Wednesday and the balance of the week, and have asked if there is any legislative business scheduled for next week. Would the distinguished majority leader enlighten us?

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the majority leader.

Mr. WRIGHT. Mr. Speaker, the purpose of the unanimous-consent request that we stand in recess subject to the call of the Chair is to permit the other body to complete action which is now in progress on the Labor-HEW appropriation bill. It is anticipated that then we might well conclude action on that bill, including some language which may find more general acceptance than any heretofore on the subject of limitations on abortions.

It is expected that the other body will conclude that action by perhaps 20 minutes before 5, or at the latest, perhaps 5 o'clock.

If the time permits, then we would expect to come back here and finish that business once and for all this evening. If that is done, then we believe we can finish our work for the week tomorrow.

Tomorrow we would come in at 10 o'clock, if we gain permission to do so. First, we would take up the question of appointing conferees on the social security bill; secondly, we would take up the supplemental appropriation bill, the matter involving the greatest controversy there being the proposed rescission of the B–1 bomber.

Then we would follow with whatever remains on the schedule. We would hope to conclude at a reasonably early hour tomorrow and then we would be finished for the week.

The SPEAKER. May the Chair say to the gentleman that the House also will consider a continuing resolution with regard to the District of Columbia.

Mr. WRIGHT. That is correct. I thank the Speaker for pointing that out.

Mr. MICHEL. Mr. Speaker, further reserving the right to object, that resolution involving only appropriations for the District of Columbia would be considered, assuming the HEW matter would be resolved later today?

The SPEAKER. The gentleman is correct.

Mr. MICHEL. Might I inquire further, Mr. Speaker, beyond tomorrow, if we are in a 3-day recess situation will we have a perfunctory session then on Friday and adjourn over to Tuesday next? Is that the plan?

The SPEAKER. The Chair would hope the pro forma sessions would be on Thursday and Mondays.

Mr. MICHEL. So, Mr. Speaker, we would meet then tomorrow and again on Thursday?

The SPEAKER. When the House completes the business this Thursday or Friday it would then meet next on Monday and then on the following Thursday.

Mr. MICHEL. And might I inquire further, that would continue, then, until what time in December?

The SPEAKER. That would continue until such time as the energy conference reports have been adopted by the Senate and are ready for the consideration of the House.

Mr. MICHEL. Mr. Speaker, further reserving the right to object, there has been a rumor to the effect that the target date is the 19th of December, which is just a few days before Christmas.

Will the Members get a little advance notice as to when we would reconvene to consider this so-called "energy package"? Might I also inquire of the majority leader, what would be his judgment as to when we would know for sure whether we are or are not going to

come back here on the 19th of December?

Mr. WRIGHT. Mr. Speaker, the Members would, of course, receive ample notice.

The SPEAKER. The Chair will respond to that question.

In the event that the conferees have come to a conclusion, it would take 3 to 5 days to write the reports, and then the reports would go to the Senate. Following adoption by the Senate, it would come to the House, and so all Members would have ample time to peruse the reports.

Mr. MICHEL. Mr. Speaker, what will happen if we do not reach any agreement? Do I assume then that we would allow the energy legislation to go over until next year,

Mr. WRIGHT. Mr. Speaker, we do not want to anticipate that contingency. We would like to anticipate success.

Mr. MICHEL. Mr. Speaker, might I also inquire, is it possible that we would consider the energy legislation right after Christmas eve?

Mr. WRIGHT. Mr. Speaker, all things are possible, but that is unlikely. I should think that the conferees will be proceeding vigorously.

I think that the newspapers may contain some information with respect to the actions of the conferees on the energy matter, and we know, as the Speaker has pointed out, that it would take about 3 days for the staff to make certain that it has everything in perfect order.

Then the other body would vote first, and then we would have ample notification. I should not think it would take the House any great length of time, after the other body had acted, to vote the bill up or down—and I should think it would be up.

Mr. MICHEL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. BAUMAN. Reserving the right to object, Mr. Speaker, the request for a recess to permit us to discuss, possibly later this evening, the HEW appropriation seems to me precipitous.

The language the other body will act upon is not known to us at this hour. It may or may not be known at 5 o'clock.

The proposed language which I understand has been offered in the other body is without a doubt the broadest and most liberal proabortion language that this Member has seen throughout 2 years of deliberation on the issue.

Mr. Speaker, it seems to me that it might be well for the House to have a chance overnight to see this language so as to enable those who have voted upon this issue a number of times to formulate their judgment in a more judicious manner than 1 hour's time may permit.

I am just wondering whether or not copies will be available for all of the Members so that they can make their own judgments.

I know that there is a strong desire on the part of the leadership to get this issue behind us once and for all, as the gentleman from Texas (Mr. WRIGHT), who has not supported the Hyde amendment, has said repeatedly. I can assure the gentleman that the desire is not going to go away, but perhaps he might extend to those who have voted in this House on numerous versions of this issue the courtesy of permitting us time to consider this matter overnight.

What is the rush? Why not bring up the other legislation scheduled now and take the abortion issue up tomorrow at 10 o'clock so that at least we can consider it?

The SPEAKER. The Chair will inform the gentleman that there is a problem requiring that this matter come back this evening since the other body will not be in session tomorrow.

If we take this up tonight, we will know by tomorrow whether we will have to deal with Labor-HEW on the continuing resolution for the District of Columbia. If the issue is voted down this evening, the House will have to come in with a continuing resolution. We would have to have a session so as to bring the continuing resolution for Labor-HEW up tomorrow in order that the Senate may act upon it. Otherwise there would be the possibility of sessions next week if we do not have a continuing resolution.

Therefore, to expedite the matter, we can find out exactly how the Members feel on this issue tonight and expedite the program for the remainder of the week and probably the remainder of the session.

Mr. BAUMAN. Further reserving the right to object, Mr. Speaker, I think that is a reasonable explanation of the parliamentary predicament in which we find ourselves.

Is my understanding correct that we will be back here at 5 o'clock or is it the expectation that we will be held here, if the other body continues to debate, until 7 or 8 or 9 or 10 or 11 o'clock?

Mr. MICHEL. If the gentleman will yield, Mr. Speaker, it is my understanding that in the other body currently they are voting on a substitute, for all practical purposes, for the original Hyde language. Assuming that that would be turned down, if they vote in the same pattern that they have in the last several weeks, there would then be an amendment offered by the Senator from North Carolina (Mr. HELMS) with the wording which I would prefer. If that is not adopted, the Brooke language would then be considered. The gentleman does have a copy of that, I believe, in his hand. This Member will certainly make sure that if that is the language we are eventually going to be voting on, there will be copies of it available at the desk.

Mr. BAUMAN. Further reserving the right to object, Mr. Speaker, is the answer to my question that we will be held here indefinitely this evening or is there some possibility of going over?

Mr. WRIGHT. If the gentleman will yield, Mr. Speaker, we will not hold the gentleman hostage.

It would be our intent that we would come back at a reasonable hour; and I believe the other body intends—and we will fulfill that intention—to pass upon this matter promptly and expeditiously.

We would not expect to remain here indefinitely and, as the gentleman says, not give the Members time to read that language.

As the gentleman says, he has wanted time to study it fully; and it can do no harm, out of courtesy to the gentleman and others who want to study that language, to give them that opportunity.

Mr. BAUMAN. Further reserving the right to object, Mr. Speaker, it is not the gentleman from Maryland who needs time to read it. I think it is the membership generally who have voted eight or nine times in favor of the right-to-life position who need the time. I think that if they change their vote now, they ought to know the magnitude and scope of the pro-abortion sellout involved in the language which the other body suggested.

In view of the Speaker's comments and out of courtesy to him, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. MICHEL. Further reserving the right to object, Mr. Speaker, may I ask one further question: Whether we do or do not meet before Christmas, is it my understanding that our return date for the 2d session of the 95th Congress would be January 19?

Mr. WRIGHT. The gentleman's understanding is the same as that of the majority leader.

Mr. MICHEL. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER. The House will stand in recess.

The Chair will state that the bells will be rung 15 minutes before the House will resume its session.

Accordingly (at 4 o'clock and 21 minutes p.m.), the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 5 o'clock and 35 minutes p.m.

MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment concurrent resolutions of the House of the following titles:

H. Con. Res. 397. Concurrent resolution correcting the enrollment of S. 1131;

H. Con. Res. 418. Concurrent resolution directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 8422; and

H. Con. Res. 419. Concurrent resolution directing the Clerk of the House of Representatives to make technical corrections in the enrollment of the bill (H.R. 7345).

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing

votes of the two Houses on the amendments of the Senate to the bill (H.R. 8422) entitled "An act to amend titles XVIII and XIX of the Social Security Act to provide payment for rural health clinic services, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1131) entitled "An act to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1316) entitled "An act to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973."

The message also announced that the Senate agreed to the House amendment to the Senate amendment numbered 82 with an amendment to the bill of the House (H.R. 7555) entitled "An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1978, and for other purposes."

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2328. An act to amend Private Law 95-21 to make a technical correction therein.

LABOR, AND HEALTH, EDUCATION, AND WELFARE APPROPRIATION ACT, 1978

Mr. FLOOD. Mr. Speaker, I move to take from the Speaker's desk the bill (H.R. 7555) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies for the fiscal year ending September 30, 1978, and for other purposes, with the amendment of the Senate to the amendment of the House to the amendment of the Senate No. 82, and disagree thereto.

The Clerk read the title of the bill.

The Clerk read the Senate amendment to the House amendment to the Senate amendment No. 82, as follows:

In lieu of the matter proposed to be inserted by the amendment of the House to the amendment of the Senate numbered 82, insert the following:

SEC. 209. None of the funds contained in this Act shall be used to perform abortions:

Except where the life of the mother would be endangered if the fetus were carried to term;

or except for such medical procedures necessary for the victims of rape or incest, when such rape or incest has been reported to a law enforcement agency or public health service or its equivalent;

or except in those instances where severe and long-lasting physical health damage to the mother would result if the pregnancy were carried to term.

Nor are payments prohibited for drugs or devices to prevent implantation of the fertilized ovum, or for medical procedures necessary for the termination of an ectopic pregnancy.

The Secretary shall promptly issue regulations and establish procedures to ensure that the provisions of this section are rigorously enforced.

PREFERENTIAL MOTION OFFERED BY MR. MAHON

Mr. MAHON. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. MAHON moves that the House concur in the amendment of the Senate to the amendment of the House to the amendment of the Senate numbered 82.

Mr. BAUMAN. Mr. Speaker, I reserve the right to ask for a division of the question at the appropriate time.

The SPEAKER. The motion is not subject to division.

Mr. BAUMAN. Is not the motion to recede and concur?

The SPEAKER. The motion is to concur.

Mr. BAUMAN. I am sorry. I did not so understand.

The SPEAKER. The gentleman from Pennsylvania is recognized for 1 hour.

Mr. FLOOD. Mr. Speaker, I yield myself 30 minutes and I yield 30 minutes to the gentleman from Illinois (Mr. MICHEL).

I now yield 5 minutes to the gentleman from Texas (Mr. MAHON), the chairman of the committee.

CALL OF THE HOUSE

Mr. BAUMAN. Mr. Speaker, I would like to move a call of the House in view of the importance of the question involved here.

The SPEAKER. The Chair so recognizes the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 750]

Abdnor	Davis	Martin
Addabbo	Dent	Moorhead, Pa.
Alexander	Derwinski	Moss
Ambro	Devine	Nichols
Andrews, N.C.	Diggs	Pritchard
Archer	Dingell	Quayle
Armstrong	Drinan	Roberts
Ashley	Duncan, Oreg.	Rogers
Badham	Fithian	Rose
Badillo	Fraser	Ruppe
Beard, Tenn.	Giaimo	Sarasin
Beilenson	Goldwater	Shuster
Biaggi	Harsha	Sikes
Bingham	Heckler	Smith, Nebr.
Bolling	Jenkins	St Germain
Broomfield	Johnson, Colo.	Staggers
Brown, Calif.	Jones, Tenn.	Symms
Burton, John	Kasten	Teague
Butler	Kelly	Udall
Byron	Kemp	Van Deerlin
Chisholm	Koch	Whalen
Clay	Krueger	White
Cleveland	Le Fante	Wiggins
Cochran	Long, Md.	Wilson, C. H.
Conyers	McCloskey	Wilson, Tex.
Cornwell	McDonald	
Cunningham	Madigan	

The SPEAKER pro tempore (Mr. HUGHES). On this rollcall 355 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

CONFERENCE REPORT ON S. 1316, ENDANGERED SPECIES ACT AUTHORIZATIONS

Mr. MURPHY of New York submitted the following conference report and statement on the Senate bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973:

CONFERENCE REPORT (H. REPT. No. 95-823)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1316) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

That section 6 of the Endangered Species Act of 1973 (16 U.S.C. 1535) is amended—

(1) by striking out the period at the end of subsection (c) and inserting in lieu thereof "; or", and by adding at the end of such subsection the following:

"that under the State program—

"(A) the requirements set forth in paragraphs (3), (4), and (5) of this subsection are complied with, and

"(B) plans are included under which immediate attention will be given to those resident species of fish and wildlife which are determined by the Secretary or the State agency to be endangered or threatened and which the Secretary and the State agency agree are most urgently in need of conservation programs; except that a cooperative agreement entered into with a State whose program is deemed adequate and active pursuant to subparagraph (A) and this subparagraph shall not affect the applicability of prohibitions set forth in or authorized pursuant to section 4(d) or section 9(a)(1) with respect to the taking of any resident endangered or threatened species."; and

(2) by amending subsection (i) to read as follows:

"(i) APPROPRIATIONS.—For the purposes of this section, there are authorized to be appropriated not to exceed the following sums:

"(1) $10,000,000 through the period ending September 30, 1977.

"(2) $16,000,000 for the period beginning October 1, 1977, and ending September 30, 1981.".

And the House agrees to the same.

MALCOLM WALLOP,
Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the Senate and the House at the conference on the disagreeing votes of the two Houses on the

amendment of the House to the bill (S. 1316) authorizing appropriations for fiscal years 1978, 1979, and 1980 to carry out State cooperative programs under the Endangered Species Act of 1973, submit the following joint statement to the Senate and the House in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The House amendment struck out all after the enacting clause and inserted a substitute text. The differences between the Senate bill and the House amendment are noted below, and the substitute agreed to in conference is discussed. Minor, technical and clarifying changes are not discussed.

REAUTHORIZATION OF THE SECTION 6 PROGRAM

Senate bill

The Senate bill is a simple extension of the State grant-in-aid program authorized under section 6 of the Endangered Species Act of 1973. A total of $12 million through fiscal year 1980 is provided for this purpose. Of this amount, $9 million is earmarked for the Secretary of the Interior and $3 million to the Secretary of Commerce.

House amendment

Paragraph (1) of the House amendment provides a total of $16 million through fiscal year 1981 for the section 6 program. No specific amount is made available to either the Secretary of the Interior or the Secretary of Commerce.

Conference report

The conferees agreed to adopt the House provision.

According to administration estimates, a $16 million authorization over a 4-fiscal-year period will best meet the States' projected funding needs for their endangered species conservation programs under section 6. In addition, a combined authorization for the Departments of Interior and Commerce will permit more flexibility in the expenditure of these funds.

The House and Senate conferees are dismayed that the Secretary of Commerce has not yet negotiated any cooperative agreements with the States for protecting threatened and endangered marine species under section 6. The Department of Commerce should intensify its effort in this regard to promote increased cooperation with State programs for the conservation of threatened or endangered species. In addition, the conferees urge the Office of Management and Budget to assure that sufficient funding is provided in the budget for the Department to initiate and maintain such programs.

QUALIFICATION BY THE STATES FOR FINANCIAL ASSISTANCE

Senate bill

No provision.

House amendment

The House amendment contains language to facilitate qualification by the States for financial assistance under section 6 of the Endangered Species Act.

Before a State may enter into a cooperative agreement with, and receive financial assistance from, the Federal Government pursuant to section 6, it must have the authority to conserve all resident species of fish and wildlife which the Secretary determines to be threatened or endangered. A number of State fish and wildlife agencies do not possess such broad authority and are, therefore, not eligible for these benefits. In certain instances, a State conservation agency may have authority only to protect certain categories of species, such as vertebrates, rather than all species. Under the House amendment such a State could qualify for cooperative agreement funds if it satisfies all other requirements set forth in the act and has plans to devote immediate attention to those species most urgently in need of conservation programs.

Conference report

The conferees wish to assure that adoption of the House language does not have the effect of withdrawing protection for species listed by the Secretary. Therefore, the conference committee has agreed to a modification which guarantees that applicable prohibitions set forth in or authorized pursuant to section 4(d) and 9(a)(1) of the Endangered Species Act with respect to the taking of resident endangered or threatened species remain in effect when a State enters into a cooperative agreement under the alternative language of the House amendment.

LABOR AND HEALTH, EDUCATION, AND WELFARE APPROPRIATION ACT, 1978

The SPEAKER pro tempore. The gentleman from Texas (Mr. MAHON) is recognized for 5 minutes.

Mr. MICHEL. Mr. Speaker, will the gentleman yield for a question.

Mr. MAHON. I yield to the gentleman from Illinois.

Mr. MICHEL. Mr. Speaker, does the chairman control the entire hour that he is allotted under the preferential motion?

Mr. FLOOD. Mr. Speaker, I had yielded 30 minutes to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, I thank the chairman.

Mr. MAHON. Mr. Speaker, the House has demonstrated its intense interest in the subject matter which is before us for discussion at this hour.

For 5 months on the $61 billion Labor-HEW bill we have been struggling to come to a resolution of the issue relating to abortion between the House and the Senate. Vote after vote has been taken.

The other body has been somewhat inflexible. The House of Representatives has been very inflexible and adamant in the maintenance of its position in support of the Hyde amendment. I myself have supported the Hyde amendment through several of these months which have elapsed since the bill passed the House.

Mr. Speaker, as I was saying, the other body has been adamant in its attitude; the House of Representatives has been adamant in its attitude, but for the legislative process to work we have to get together. It seems to me that about 5 months is sufficient time for us to hold up final action on this $61 billion bill which is so vital to health, education, and many other areas of interest to the Nation.

Over the weeks some slight flexibility has demonstrated itself in the House, and some slight flexibility has demonstrated itself among the Senate conferees. On November 3, we had a conference report; and I myself, in an effort to bring this matter to a conclusion, offered a preferential motion, as I have today. By a vote of 172 to 193, my motion lost; and the matter has remained in status quo since that time.

We have been working with the other body and with members of the staff of the other body, and we have now a new proposal to submit.

Let me read that proposal:

None of the funds contained in this act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.

Or except for such medical procedures necessary for the victims of rape or incest . . .

We add here for the first time the following language, and I will read this portion again:

or except for such medical procedures necessary for the victims of rape or incest . . .

And here is the new language:

when such rape or incest has been reported to a law enforcement agency or public health service or its equivalent.

That is an additional safeguard.

Then we present this further language: "Or except in those instances"—in other words, abortions cannot be provided under the medicaid program—"except in those instances where severe and long-lasting physical health"—not mental health—"long-lasting physical health damage to the mother would result if the pregnancy were carried to term."

This seems to me not to be too unreasonable a proposal for the solution of this controversial problem.

The SPEAKER pro tempore. The time of the gentleman from Texas (Mr. MAHON) has expired.

Mr. FLOOD. Mr. Speaker, I yield 2 additional minutes to the gentleman from Texas.

Mr. MAHON. Mr. Speaker, each one of us knows that the President is opposed to abortions under most conditions and that the Secretary of HEW is also opposed.

Note the final language here is as follows:

The Secretary shall promptly issue regulations and establish procedures to insure that the provisions of this section are rigorously enforced.

So in that kind of an atmosphere at HEW and with that kind of language in the law, it would seem to be logical that regulations would be established and procedures promulgated which would carry out the spirit of this proposal.

Now it could be said that the language should include: "when such rape or incest has been promptly reported to a law enforcement agency," and so forth. But we were not able to secure that concession.

The Senate within the last 2 hours has voted three times on some of the issues involved here. The Senate first voted on the Hyde amendment, and the Senate has been stronger for its position than the House has been for its position, in regard to these issues. As I say, the Sen-

ate voted on the Hyde amendment this afternoon by a vote of 42 to 20 and rejected the Hyde amendment, an amendment which I have supported, but it was rejected again by that 2-to-1 vote.

Then the proposal was made in the other body that the reporting of rape had to be prompt. Well, it seems to me that the Secretary could promulgate regulations which would require a prompt reporting. But, at any rate, in the other body this afternoon the word "promptly" was presented as an amendment but it was voted down 42 to 23.

Then the substitute proposal, which is the proposal I have here, which was not just a product of the other body, but a product of the Members of the House who have been working on this issue, was offered.

The SPEAKER. The time of the gentleman has again expired.

Mr. MAHON. Mr. Speaker, I would ask the gentleman from Pennsylvania (Mr. FLOOD) if I could have 1 additional minute?

Mr. FLOOD. Mr. Speaker, I yield 1 additional minute to the gentleman from Texas (Mr. MAHON).

Mr. MAHON. And then on this language here the other body voted 44 to 21, for the language which has been read to you here today.

I hope that we can settle this issue once and for all for this fiscal year. I urge the Members to join together in voting for this compromise. It does not suit me and does not suit anybody in the House perfectly, or in the Senate, but it is the best that we can work out. It seems to me that we should delay no longer taking final action on this highly important bill which involves every congressional district in America. I do sincerely trust that the Members will be able to vote for this legislation in an effort to resolve a problem which has been most difficult for all of us.

Mr. MICHEL. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I agree with the chairman of the Committee on Appropriations, the gentleman from Texas (Mr. MAHON) that this is a very, very difficult decision for all of us. This has been a very hard and difficult 5 months in trying to work out some compromise language. I can sympathize and I can understand the position of the chairman, but regretfully, I must rise and oppose the compromise language suggested by our colleagues on the other side of the Hill. I appreciate their attempt to narrow the differences between us. Nevertheless the degree of subjective determinations which are permitted by the Senate amendments are still too great for us to accept.

Furthermore, I believe that under this language it is still possible for abortion to be used as a convenient means of birth control, if the right doctor is found.

Specifically, my disagreement with the suggested language is with the physical health section and the section dealing with rape and incest.

With respect to the physical health language, even though the physical damage to the mother must now be both "severe" and "long-lasting" the meaning of these terms are not defined. Therefore, there remains significant latitude for doctors to apply liberal and permissive interpretations to the degree and duration of "damage" required. The term "damage" itself is not defined. In any case, earlier language presented by the Senate required that the health damage to the mother be permanent before abortion be allowed. The current language is a far departure from that approach.

The rape and incest section is also riddled with ambiguity. For example, medical procedures (including abortion) may be undertaken when an act of rape or incest has been reported to a law enforcement agency or public health service or its equivalent. Who are members of "equivalent" law enforcement agencies? May rape victims report to warehouse guards, Pinkerton detectives or the Keystone Cops? What are the equivalent public health agencies? Do they include the American Cancer Society or Planned Parenthood?

I have more serious reservations with any provision which allows abortions for victims of rape or incest. As I have stated previously it is my opinion that the language is unnecessary.

First, testimony from law enforcement officials indicates that inclusion of the rape-incest language would, in their opinion, induce individuals to file false rape reports in order to be eligible for Federal abortions funds. This would not only result in perjured reports, but also would raise havoc with the judicial system in investigating and processing these false reports.

Second, although it is true that the House amendment would not provide funds for abortions resulting from rape or incest, it would not prevent contemporaneous medical treatment which may prevent fertilization or implantation. That is, as long as treatment of rape or invest victims is prompt (that is, before the fact of pregnancy is still established) funds would be provided.

For these reasons, I believe that the compromise language offered by the Senate should be rejected.

Mr. FLOOD. Mr. Speaker, I yield 5 minutes to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, I had not wanted to get into this debate. I do not think there are many Members who can be absolutely certain of the rightness of their own position on this particular matter. I am not so certain as to want to get into the middle of a debate like this.

It seems to me, however, that the time has come when the House is going to have to yield to commonsense. Each of us in the interest of the legislative process itself may have to yield just a bit. It is one of those times when we should heed the admonition of Benjamin Franklin that each of us doubt just a little his own infallibility.

I do not for one moment disparage the sincerity or the depth of conviction held by people on either side. It is not surprising that Members holding strong convictions have had a hard time arriving at language that they can mutually embrace. Since the very fundamental question of when life itself begins could not be agreed upon by St. Thomas Aquinas and St. Augustine, it is little wonder that Members of this body find difficulty in reconciling their disparate views with any set of words. Perhaps there are not enough words in Webster's Dictionary to put together the kind of language that would be acceptable to everyone here.

I do not believe in abortion. I do not suppose there are any—if there are, there are very few—Members of this House who would be in favor of Government-subsidized abortion on demand. This language does not provide for that, and that is not the issue.

By the same token, I just do not believe that there are very many, if any, Members of this House who would be so cruel and so crass and so unfeeling that they would condemn a poor woman to death or to lifelong physical disability for want of response on the part of the Federal Government when she is in genuine need of medical treatment.

I believe that the conferees have done as well as they could. I believe that this language presently before us comes as near as any language could come to recognizing the sincere and deeply held convictions on both sides of this question. I urge my colleagues to support this language.

Bear in mind that what is at stake here is not just the linguistic preference of a few Members. What is at stake here is not simply who wins and who loses in a nebulous argument with words. What also is at stake here is $61 billion worth of vital Federal programs, which are held hostage to our intractible quarreling over phrases. These include public health programs, help for the elderly, training programs for young people who do not have any marketable skills so that they can find jobs, the whole gamut of secondary and higher educational services, educational loans for needy students. All these programs are awaiting the resolution of this problem.

We have been almost like Kipling's description of old men who he said:

Peck out, dissect and extrude to the mind
The flacid tissues of long dead issues
Offensive to God and mankind,
Like vultures over an ox
That the army has left behind.

We could go on forever debating like the medieval theologians over how many angels can stand on a head of a pin. But the time has come for action. Clearly, this is as good as our draftsmen can come up with. Clearly, it says what most of us want to say. Those who oppose this language do not oppose the principle it expresses. They do not oppose the right of a woman to get help if she cannot afford it and if she was going to die or to suffer severe and long-lasting physical debility without that help. They do not really oppose the right of some young person, the victim of rape or of incest, to gain timely treatment, or of a woman to be relieved of an ectopic pregnancy. And these are the only situations in which this language would permit assistance. It really is quite restrictive.

No, the opponents do not really oppose the principles which the language expresses. They fall back on the assumption that some physician is going to act in bad faith and to certify falsely. Well, my colleagues, if we were to assume that with respect to every law that is passed, we could not pass many laws.

I believe this is the best we can do under the circumstances. It is not perfect. It does not satisfy me completely. Perhaps it does not satisfy any of us completely, but I do not think we can do much better if we debate different sets of words until doomsday, and so I urge all of us in the name of legislative responsibility to vote for this language and free these vital health and education programs from the incumbrance of our disagreements which for the better part of a year have held them in a state of legislative limbo.

Mr. MICHEL. Mr. Speaker, I yield 5 minutes to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, I think it is interesting that the majority leader should refer to the Saints of the Church, Thomas Aquinas and Augustine. I doubt seriously if either of these gentlemen were elected to this House that they would be members of the majority leader's caucus. I also doubt if they would be a member of the minority caucus. Undoubtedly they would be independents, since they were saintly men. Now, none of us here have yet been certified as saintly men or women. That lies for the future to decide; but the issue is something more than flacid tissue, as the misplaced eloquence of the majority leader suggested. I say again, the issue is life itself.

I know the mood of the House and I know the temptation in all our deliberations when it is late in a session to slack the fight and abhor the battle. We might as well decide to get on with it once and for all we are told by our elders. It is all right for us to be kept here until Christmas Eve to decide the question of energy policy, an issue which will be with us for 40 to 50 years, but it is not seemly to prolong this issue. Act tonight, we are told, once and for all. A continuing resolution is not enough. The majority leader will keep us here until Christmas, the anniversary of the greatest birth of all, to solve energy but the right to life cannot be placed on that same plain, he says. He is once again wrong.

What is the basic objective of those who have fought for the right to life in these 2 years we have supported the amendment of the gentleman from Illinois (Mr. HYDE) and its variations. What is that objective? It is to save the lives of unborn human beings. We know that 300,000 babies each year on the average have been murdered with taxpayers funds. I know that phrase, "murder," disturbs the emotions of some, but these children have been killed by the use of federally-financed abortions and that must be faced.

We seek to stop that. The Supreme Court of the United States has surprisingly upheld our position as constitutional; they reaffirmed the right of representatives of the people to limit expenditures of funds.

And so, tonight we have before us an amendment which is broad in its scope, broader in this gentleman's opinion than any before we have faced. I said that a few weeks ago about another amendment, and I think this can be said again tonight. Read its provisions. It is very broad. It does allow for fraudulent representations to cause abortions. It allows liberal physicians who are in favor of abortion and profit from abortions, and make a career out of running abortion mills, to make these decisions and certify that they will allow these children to die. And, it allows the Secretary to issue future regulations and procedures that we know nothing about. Perhaps they will or will not be strict, although it says, "rigorously enforced."

So, the real issue here tonight is, how many of these little American citizens we are going to be able to save out of the 300,000 the taxpayers are paying to kill. We hear a lot of concern here expressed about child abuse. I was on television a few weeks ago with a doctor from North Carolina who runs one of these abortion mills. He was talking about the horrible child abuse he has seen. I pointed out that the ultimate child abuse we all know is death.

So, I think those of us concerned about the right to life can stop the ultimate child abuse. We can have a continuing resolution if this motion fails, and I hope it will fail. But, mark my words: Those of us who stood with this, a majority of 80 and 22 on the latest vote, mark my words: I have said it before, and I am not preaching at all, I am just telling the Members a political fact; the issue will not leave us. This is not a threat; it is a fact. We are going to have to deal with the right-to-lifers who cut across all party lines and all political divisions; Jewish, Christian, Protestant, Catholic, no particular formal religion, they are going to be at your congressional office door, and they are going to be out campaigning because this fundamental issue has stirred America and will remain with us.

I say, put aside the 200-year tradition of this House of caving in when the time gets late. Place this issue on the plane where it ought to be considered and let us vote against this language tonight. And should it possibly pass, God forbid, I call upon the President of the United States, supported by the Secretary of HEW, to stand by the words they have so eloquently repeated over and over, that they oppose federally financed abortion, and to veto this bill.

I urge defeat of the motion.

Mr. FLOOD. Mr. Speaker, I yield 2 minutes to the gentleman from Washington (Mr. BONKER).

Mr. BONKER. Mr. Speaker, I am personally opposed to abortion, as many Members here are, and I have voted consistently, without exception, in favor of the Hyde amendment. On November 3 I felt that we were as close to a compromise as we could possibly get, but I personally could not accept the loophole found in the phrase dealing with rape and incest. Many of us interpreted that as too open-ended.

I discussed this with a few Members that evening, frustrated as everyone here is over the continuing deadlock we have on this issue, and I felt that if we could somehow come to grips with the provision relating to rape we could possibly break the deadlock. Since that time, we have come up with language which accomplishes a reasonable compromise.

It takes us away from continuing our attempt to define rape, but instead approaches the issue by establishing a workable reporting requirement. I think that this is the greatest deterrent to fraud that we could possibly have, a reporting requirement that will have the victim going into a proper agency and filling out the forms before she qualifies for an abortion.

I am convinced that some allowance needs to be made for those women in extreme circumstances whose life or physical health are in jeopardy. I am also concerned that a provision be made that would encourage women who are the victims of rape or incest to report such tragic circumstances. The amendment recognizes the extreme reluctance of many women and teenage girls to report rape incidents to the police and establishes an alternative reporting procedure to designated public health agencies.

The intent is to insure that innocent victims of rape will receive treatment with a minimum of difficulty, but that sufficient steps have been taken by the victims to demonstrate the fact of the rape. A beneficial side effect is that victims of rape will be encouraged to report to rape centers and public health agencies where they can receive counseling about medical treatment and law enforcement.

The clause dealing with rape cannot be both an open door to abortion on demand and a closed door to legitimate victims of rape. Yet I have heard both arguments advanced against this language. It is, in fact, a door which a woman must think about opening and must be willing to walk through and say, "I have been raped." I do not think there is anybody in this body who can deny that this is a significant and difficult act for a woman.

Mr. Speaker, I move that we concur in this language.

Mr. MICHEL. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. HYDE).

Mr. HYDE. Mr. Speaker, if I may briefly reply to the distinguished majority leader, there has been some slight progress in medical science since the time of Augustine, which I believe was the fourth century, and Aquinas, which I believe was the 12th century. And as to speculating as to how many angels can dance on the head of a pin, that is an interesting question, but I do not think it is to be compared with the problem of human life to be thrown away in a plastic bag in a hospital or in an abortion mill. I think the two things are quite distinct.

This language is a good-faith effort to compromise. I salute and commend and appreciate the efforts of everybody who has tried to work this out. Having said that, I cannot accept it. Personally, I reject it out of hand, and I want to tell the Members why.

First of all, on the rape or incest, it does not say forced rape. In the rape of an 18-year-old girl or a 17-year-old girl, depending upon what the statutory age is in a given State, she would get her abortion. If she becomes pregnant, she gets an abortion. There is no requirement of force, or anything else. Statutory rape is covered. She gets an abortion.

Secondly, there is no time for reporting. A woman 6 months pregnant goes in, talks to the Public Health Service receptionist, says, "I was raped 6 months ago in the hallway of my building. I do not know who the assailant is." She has complied with the mandate of this amendment. She gets an abortion. It opens the door to very questionable practices. I should think this agency, HEW, which has enough problems in terms of alleged questionable payouts would be very concerned about this. The same facility can take the report that performs the abortion—the Public Health Service or its equivalent, whatever that means.

Under the present law—and, remember, the present law is what I support—there is treatment for rape or incest victims, at least during the first month following the occurrence.

The second part of this proposal concerning health provides no accountability. The medical condition does not have to be preexisting. No medical records would exist to verify that the patient had this condition. There is no record of the condition after the abortion because the doctor cures the condition with the abortion. That is a Catch 22. The condition has arisen because of the abortion, and in the doctors judgment it is serious, it is long lasting. We have cured it because of the abortion. There is no way to verify it. We are trading a human life for a migraine headache. We are trading a human life for a doctor's judgment call on what is going to be characterized as serious and long lasting. I think the tradeoff is very unequal, and I think the physicians who want to abuse this will be able to do so with impunity.

Under existing law, no one has died as a result of the so-called Hyde amendment, despite the media event which occurred within the last month or so, concerning the unfortunate Texas woman who died following a Mexican abortion.

But as was shown in the press the other day—and that is just what it was, a media event—she was not denied an abortion. She did not want an abortion in Texas; she wanted to conceal the fact of pregnancy by going to Mexico for her abortion.

There was a memorial service held for that lady here on the Capitol steps. There have been no memorial services held for the unborn children who have been killed as a result of these abortion procedures.

Let me suggest to the Members, if they support this amendment, that they are confusing the curing function of a doctor with the killing function of a doctor. I do not view doctors as anything less than healers. They should not be executioners. If we do not know when human life begins, I suggest we ought to study the question, because the medical books bristle with evidence that human life begins at the moment of conception. So when we kill a human life in this way—and that is what abortion does—we are killing a human life because it is inconvenient or for some other reason.

The mayor and citizens of Buchenwald walked through the old crematoriums after the war, and they said, "We didn't know. We didn't know." But there is no excuse for us not to know what we are talking about.

We are talking about human life, not angels dancing on the head of a pin. We are talking about innocent, inconvenient human lives. If this society cannot find ways to handle the human problems of unwanted pregnancies without resorting to abortion, then we are seriously deficient.

Mr. Speaker, I hope the Members will reject this amendment and tell the Senate, "We like the law the way it is. We don't like your changes."

Mr. FLOOD. Mr. Speaker, I yield 1 minute to the gentleman from Hawaii (Mr. HEFTEL).

Mr. HEFTEL. Mr. Speaker, I have the greatest respect for the right to life, and I have devoted many years of my life to the cause of defending that right to life.

Today I am not certain that we are talking about the right to life. We are talking about the use of Federal funds that are appropriate when individuals have a need for medical care within the realm of their own ability to pay.

Mr. Speaker, if we want to talk about Federal funds, there are at least 5 million people, including young girls and children—perhaps 3 million or 4 million females—whose needs are funded by Federal payments for medical care. Thus Federal funds on the one hand may be provided in one instance, but they may not be provided in another instance.

Mr. MICHEL. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, the majority leader made mention of $61 billion of Federal funds that are at stake here, and according to the last statistics available, $45 to $50 million is what is really at issue in the 300,000 abortions that were performed at Government expense before the enactment of the Hyde amendment.

We must make a decision here today as to whether or not we will delay for another day the consideration of this issue or whether we will come to grips with it now. It is a very difficult decision for every Member of this House. As I said earlier, it is a decision that must, in the end, be up to each Member's own conscience.

I am going to support this compromise language. I know that it gives me serious problems, because when I argued with the Members of the Senate and the conferees, I was always in support of the Hyde amendment, and I was trying to restrain the Senate juggernaut as much as I could.

Reference has been made to what impact the "Right to Life" people or those who feel strongly about life, as all of us do, may have on this issue and what the repercussions may be at some future date. If this entire House membership is renewed next year, that does not eliminate the fact that there is only one-third of the other body whose seats will be renewable.

As I look at those Senate votes as they have come in one after another—2 to 1, and again 2 to 1—I must infer that at this point somebody has got to give. I do not want to give.

Some of my colleagues on the subcommittee cannot give because of the tremendous pressures they have at home, and I realize that. But a few of us have got to give in order to compromise and reach an agreement. It is disturbing to me to have to say that, but we must give. The Senate has backed down from its original position.

I wish we would have had in this amendment the words "forced rape," as the gentleman from Illinois (Mr. HYDE) said, or the term "prompt treatment," I would hope that in view of the last sentence in the Senate language, that "The Secretary shall promptly issue regulations and establish procedures to ensure that the provisions of this section are rigorously enforced," if Secretary Califano is against abortion on demand or the President is against abortion on demand, within 30 days this administration ought to be able to come up with a rule and with regulations that do draw a distinct line very tightly, a line just as the one we are talking about here.

It is incumbent upon them to do so; and if we have to engage in a little dialog to make legislative history here, it seems to me we ought to do that, then. The administration will have an opportunity to get these rules and regulations out, and I would say further that by the time we have our hearings next year, there are enough statisticians down there so that when they come before our committee and tell us how many abortions were performed at public expense; for whom they were performed, for teenagers, married people, black, white, Chicanos. I want all the statistics.

If we are demanding today that in order to get a rebate on a fuel bill, we require people to put all those things down, whether or not they are white, black, yellow, and to what age group they belong, the same thing can be done for this issue. Then, when we come to bring this bill up next year, we are going to have something solid to base a decision upon.

Today we hear all sorts of things. I have to take the word of the police or of the sheriffs when they say, "There will be wholesale charges that we have had rape here and that we just cannot cope with it."

I am not altogether sure that that is why I initially, several weeks ago, offered this language to report it to a law-enforcement agency to put a little restraint on it. Somebody is going to be

rather reluctant to really report it if it really did happen; or if it did not happen, there is no good reason to publicly disclose it.

Therefore, Mr. Speaker, I think there are some restraints here. As much as I would like to have them more stringent, I am going to have to support this language. The Senate has made their language tighter. Not tight enough but tighter. And with the additional requirement in the language that the Secretary of Health, Education, and Welfare issue regulations to strictly enforce this language and our intent, I believe that funding of abortion on demand is prohibited to the extent humanly possible.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Illinois.

Mr. BAUMAN. Mr. Speaker, the point has been raised in debate here about the meaning of the language "Public Health Service or its equivalent" so far as reporting incidents of rape or incest is concerned.

Is it the gentleman's understanding that any person seeking an abortion could go to a federally financed or partially federally financed abortion clinic and there certify the pregnacy was the result of rape and thus obtain an abortion?

Mr. MICHEL. Again, in the rules and regulations that will be promulgated downtown, I would hope that they would make it very clear that we do not intend this and that whenever rules come out of the Department, they will be based on this general feeling, from the kind of dialogue that takes place in this House, and reflect what we have in mind.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. MICHEL) has expired.

Mr. MICHEL. Mr. Speaker, I yield myself 2 additional minutes.

The SPEAKER. pro tempore. The gentleman from Illinois (Mr. MICHEL) is recognized for 2 additional minutes.

Mr. MICHEL. Mr. Speaker, I think it should be clear that we do not intend that this simply be an opening of the floodgates for abortion on demand. Whether it is a Public Health Service or whatever, it has to report to the Department of Health, Education, and Welfare, just as a law-enforcement agency would have to report it.

Mr. BAUMAN. Mr. Speaker, if the gentleman will yield further, anyone can see the obvious conflict that exists in a medicaid-financed abortion clinic, which makes most of its money from performing abortions, having the right to certify that these pregnancies were a result of rape or incest. Obviously, it would be almost an automatic act by people who have a patent conflict of interest and wish to perform the abortion and be paid. That certainly should not be the intent of the conferees.

Mr. MICHEL. No, it should not. I would sincerely hope that they would be getting the message downtown and that lines would be drawn accordingly.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Speaker, I heard the gentleman from Illinois (Mr. MICHEL) say that next year, when we get this matter back, he would be willing to give assurance to the House that he would have reliable statistics with respect to the incidence of abortion.

I would only urge the gentleman that, in reading a New York Times article about the death of the woman who went to Mexico for an abortion, the Center for Disease Control in Atlanta first reported her death to have resulted from the ban on medicaid abortions when apparently that was not the case at all.

I would hope that the Center for Disease Control is not the genesis of most of the statistics which we might get next year since their information on the Mexico situation was misleading at best and a cover-up at worst.

Mr. MICHEL. The folks downtown have plenty of ways of gathering statistics, and I think we can put enough heat on them to do it validly.

Mrs. SCHROEDER. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER.. Mr. Speaker, I think that one of the things that has not been pointed out is that when we talk about a conflict of interest, one matter we should keep in mind is that if they do not perform an abortion, there will be a delivery, in which case there would be higher charges than there would be for an abortion.

I think it is difficult to say that they would be trying to encourage abortions as to make money because really in the way of a conflict of interest it would be to their advantage to have them go full term.

Mr. MICHEL. Mr. Speaker, I yield 3 minutes to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Speaker, there are just two points that I would like to address here. We have heard about the politics and the ending of abortions. Just to take the smaller question first, although it may not seem so to all of us here, I ran twice in my district and the same right-to-life opponent, a very fine man in my district, received of the 206,000 and some votes cast, precisely 1,453. I do not think that anybody here ought to think of this in the way of heavy votes because I do not believe that it is. I think it would be terrible to put the lives and sufferings of people in the balance against a false presumption.

The second thing I would like to address is the hope that was expressed by our distinguished colleague from Maryland of ending abortions. Nothing in the whole history of the human race has ever ended abortions, you merely displace them.

I was in Chile some years ago, or many years ago, 40 years ago, maybe, and in going through a hospital in Chile, I asked the manager, the head of the hospital services for the nation, in Santiago, in the head hospital—

How does it happen you have so many women? In Bellevue Hospital in New York City our men's wards are much more full.

He said,

Thirty-five percent of all of the beds in the hospitals in Chile, all over the nation, are filled today with women who are dying or recovering from hemorrhaging or infections for self-induced abortions.

Now you will not stop it. You may not have what Chile has in the sense of self-induced abortions, but you may have back alley abortions. I think that I have described on the floor of this House the tragedy to a family in my State that was involved in such a thing, with the mother held as an accessory for the murder of her teenage daughter.

We must think of the lives that are blasted, ruined and destroyed. That is what is at stake here, Members of the House, and, Mr. Speaker, not just a political question and not the hope of ending something which is a tragedy no matter how you look at it.

Mr. Speaker, I yield back the balance of my time.

Mr. FLOOD. Mr. Speaker, I yield 2 minutes to the gentleman from Missouri (Mr. VOLKMER).

Mr. VOLKMER. Mr. Speaker, and Members of the House, I personally believe we should make it very clear that on this language that we are voting on there rests the basic question of whether the taxpayers will pay for abortions or not. A vote against it is a vote that the taxpayers will not pay for it.

I think that is the clear cut issue.

I agree with the other speakers who have basically said that this is not a political question but that it is a matter of principle, and to some of us it is a principle that cannot be compromised. It is basically a principle of life.

I too recognize that there are those who disagree and who take the opposite viewpoint, and I recognize that they, too, believe in the principle that there should be no restriction on abortions.

I recognize that. But what bothers me here is to see those who waffle on the issue to find excuses to vote one way or another when there is no compromise. It is basically an issue of whether taxpayers pay for abortion or whether taxpayers do not pay for abortion. Let us vote on that issue and let us decide that issue.

I too, if this language is adopted, shall call upon the President to veto the bill because of his prior commitments to the policy that no taxpayers' money be used to pay for abortions.

Mr. OBERSTAR. Mr. Speaker will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Speaker, I thank the gentleman for yielding.

As our distinguished majority leader so eloquently said, the time has come to take a stand, but that sword cuts two ways. It cuts against the grain of those advocating this language which very clearly permits abortions. If one is opposed to abortions, he must oppose this language.

Mr. FLOOD. Mr. Speaker, I yield to the gentlewoman from Maryland (Mrs. SPELLMAN) for a question.

Mrs. SPELLMAN. Mr. Speaker, I would like to ask a question of the chairman.

There has been considerable concern evidenced regarding the language, the very comprehensive language here in section 209. The Subcommittee on Compensation and Employee Benefits is having inquiries from health insurance carriers and from HEW employees. The Federal insurance programs, of course, are subsidized with Federal funds and the insurance programs of HEW employees are being paid for substantially with Federal funds.

Therefore this language which says:

None of the funds contained in this Act shall be used to perform abortions . . .

is language that is under careful scrutiny at the moment.

Can the chairman provide assurance to the health insurance carriers and to the employees of HEW that the language here in section 209 will not affect them?

Mr. FLOOD. Of course, as the gentlewoman says, the issue is currently being studied by the lawyers at HEW and Civil Service Commission. This matter, as the gentlewoman well knows, is very complicated by the fact that employees pay a portion of the health insurance premium.

The language in the Labor-HEW bill is vague. There is no question about that. I am not sure I can give a definite answer, but certainly we do not intend to tell the employees how to spend their money. I am sure about that.

Mrs. SPELLMAN. I see. Then we are not saying to health insurance carriers the moneys they get are Federal moneys and coming from this act and therefore may not be used for this purpose.

Mr. FLOOD. Our intention is very clear. I have said that before.

Mrs. SPELLMAN. I thank the gentleman from Pennsylvania.

Mr. FLOOD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in opposition to the motion to concur in the Senate amendment. I think the Members could have guessed that. We are here tonight only because time is of the essence. Time is what controls us now. The clock over the head of the Speaker. In the back of the room there are some calendars.

In essence, it is not the laws of man nor the laws of God, but that pagan god time is of the essence tonight, or so it seems.

No one in this Chamber wants to settle this labor-HEW appropriation bill more than I do. I hope Members know that. This bill has been tied up by the abortion issue since last August. All the money differences have been resolved completely, but the bill has not been enacted because of this one amendment.

Now—to use a moth-eaten phrase the hour is late, the Members are tired, and they are tired of hearing about the issue of Federal funds for abortion.

But despite all of that, I am not ready to agree to just any language in order to clear this bill for the President's signature. I saw this latest Senate proposal a couple hours ago; but you need only minutes to realize that it is very similar to the language the Senate has proposed before. The words are slightly different; but it reflects the original Senate position, make no mistake about that.

If there has been any attempt to compromise in this latest Senate proposal, it is stated in very vague language which would allow a variety of interpretations. In any case, if compromise is the word to use under these circumstances, it is not really apparent to me.

The Senate proposal refers to victims of rape or incest having to report to a public health service. What is meant by public health service? Is it a hospital, a community health center, a clinic, a doctor, a paramedic? It is just not clear what is meant by that phrase.

Now, another vague reference is this phrase—"severe and long-lasting physical health damage." My, what does that mean? Cancer? Renal disease? That is one thing. But what about cataracts of the eye? Now that is something else.

You see, my problem with the latest Senate proposal is that it might be interpreted in a way that will allow Federal payments for abortions for any reason.

There is simply no way of preventing abuse in the interpretation of this language which may result in the use of Federal funds to pay for abortion on demand.

The House has voted on this seven times. It has been sent to the House seven times. The latest Senate proposal is to accomplish what purpose? It is vague. Time is of the essence; apparently not the law—that is what we are being told tonight. Pontius Pilate was an amateur by comparison.

Mr. Speaker, I urge that we stay with the House position, and vote against this motion.

Mr. SMITH of Iowa. Mr. Speaker, it has been almost 6 months since the House passed the HEW and Labor Appropriations bill providing funding for 130 Federal programs affecting virtually every citizen in the United States. We long ago agreed with the Senate on the funding levels but the entire bill has been held up over an argument concerning the conditions under which medicaid should pay for abortions.

Almost no one is against the Government paying for abortions under some circumstances. Also, almost no one is for paying for abortions as a planned preferred and expensive substitute for other birth control methods. So the argument is over the conditions under which they should be paid, and attempts by some to apply a super simplistic analysis of whether one is for or against abortions for poor women are missing the issues.

I do not think funding for 130 programs should be held up while these guidelines are being determined. The proper method for settling such an issue would be to pass a separate bill on medicaid in which further guidelines are developed and I have always voted against holding this deviation from that procedure. However, a substantial majority have voted several times that they want guidelines included as a part of this bill. Under those circumstances, we should try to agree on language which actually has enough support so that the matter will be considered as settled and can be readily agreed to next year instead of again holding up funding for these important programs. I have not seen any news articles which made this important point. The legislative process is complicated and apparently most of those describing the controversy do not fully appreciate the difference between an authorization and an appropriations bill.

Such a solution had been pretty well agreed upon last year and it was hoped that the same language would be agreed upon this year without delaying the bill. However, a new administration, a new Attorney General's ruling, and other circumstances encouraged some to want to rehash the whole matter again. Now after 6 months, language is today proposed which is very similar to the intent of the provisions of the bill and report adopted last year. Congress has changed little since last year and in my opinion this language almost represents majority opinion concerning the conditions under which abortions should be paid under medicaid. The proposed language is similar to what had been agreed upon in the conference committee a month ago; but when the Senate conferees presented it to the Senate they made changes which assured that even if it passed, the same arguments and delays would resume on next year's bill. I suppose some of the Senators thought they could secure approval just because the House and Senate were about to go into a 3-week nonlegislative period and that they could use a tactical advantage to force the majority to agree to a minority point of view. If it had been approved, the victory for those who favored it would have been short and it would have assured a far more strenuous effort next year to more than reverse it. In my opinion, it would have been a temporary solution and constituted throwing away the chance to arrive at a long-term agreement toward which we have been progressing in our costly time-consuming negotiations during the past several months.

While the language provided in this amendment today still does not come as close to representing majority opinion as it could, it is close. In my opinion, the Senate made a mistake in not changing it slightly to coincide with previous agreed language and by so doing, they risk losing the whole amendment. However, I believe it is language which the majority could logically next year recognize as representing a majority opinion, it does represent a reasonable effort to present to the House a chance to vote on language which the majority can support, and by presenting it, conferees will have complied with the reformed rules of the House under which conferees are deemed to be agents of the House who must negotiate within the instructions given by the House rather than using their position to force a minority view upon the House by procedural means. I do not like continuing resolutions under

which agencies are rationed too tightly and I do not want to hold up funding for these important programs any longer. While I believe better language could be found, I am going to vote yea today.

Mrs. SCHROEDER. Mr. Speaker, I think allowing medical procedures in cases of rape and incest is more than reasonable. I would like to share two cases that came across my desk today. They are very similar to the many cases I hear about daily. I think they show the great danger there is in this body deciding all abortions should be banned.

The articles follow:

Hon. PATRICIA SCHROEDER,
U.S. House of Representatives, House Office Building, Washington, D.C.

DEAR MS. SCHROEDER: I am the recent victim of a pregnancy caused by rape. Here is my story:

On the night of September 19, 1977, an unknown man broke into my home while my mother, who was visiting from Virginia, my two young children, and I were sleeping. He awakened me, told me that I must do all that he asked without making any noise, or he would have his accomplice harm my children. He then raped me and escaped.

I immediately reported the incident to the police. With the support of the police, my friends and family, I was able to handle the experience without undue trauma. Three weeks later, however, I found that I was pregnant. The objectivity I had been able to maintain to that point disintegrated. Although I have always believed all women should have the option of abortion if they thought it best in their situation, I have never considered abortion an option for me. But I had never been raped.

I am a program coordinator for the Child Abuse Prevention Council of the Monterey Peninsula, and suddenly I was faced with having to consider the ultimate child abuse. I had submitted to the humiliation of rape in order to protect my children, and now I had to decide whether or not to abort another of my children. I went through emotional agony trying to decide between an abortion or keeping the baby within me. Finally, I realized that I could not give this child the ideal in utero environment because of my emotional state. I would resent his/her presence in my body every moment. As a single parent (I am in the process of a divorce), I do not have the financial or emotional resources to bear or support another child, particularly an unwanted child. On October 20, 1977, I had an abortion.

Before my husband and I separated in June 1977, I had been a homemaker. I started working in August and had not been able to save enough money to pay for the abortion. Fortunately, I had Medi-Caid coverage. And fortunately, I live in California where abortions are still covered by Medi-Caid.

My heart goes out to those women who have had the experience of becoming pregnant by a rapist, but who are not as fortunate as I. The confusion, fear, and trauma of a rape is enormous. In addition, an unwanted and perhaps despised child is conceived. Nothing in life can affect a woman more personally. And yet, it has all been forced upon her against her will. To deny a woman an abortion because she is unable to afford one is adding the ultimate indignity—forcing her to carry a child she had no responsibility for creating. Because she is poor.

If you could step into my shoes for just a short while, if you could feel my tears and outrage, Medi-Caid abortions for rape or incest would not be a debated issue. If I were the wife, or daughter, or sister of the legislators, how would they vote? Please use your influence to make the abortion legislation fair to all our nation's women.

Sincerely,

——— ———.

The second case was described to me in a letter from Rocky Mountain Planned Parenthood:

A case in point came to my attention last week. A 13 year old child who had been seduced by her 26 year old teacher came to our clinic for counseling. She knew little if anything about sex and didn't understand what was happening to her. The resulting pregnancy terrified her and she tried to hide the situation from her mother who had threatened once to put her in a "home" if she didn't "behave." The teacher left town. Her mother found out about the pregnancy and was very concerned and supportive. She took her daughter to a physician who recommended abortion because of the relative immaturity of the girl's body. He felt that she would probably miscarry in the fifth or sixth month, or else the baby would be delivered by caesarean. He also felt that the baby might be underweight and malnourished at birth, and its mother injured physically and emotionally.

This young girl did not want to have the baby; she still plays with dolls and worries about dates. If she had been unable to secure a safe, legal abortion, her life may have been ruined. To force this child to have a child would have been the ultimate cruelty.

Mr. Speaker, I hope the Members will ponder these cases before voting.

Mr. NEAL. Mr. Speaker, I have been listening carefully for some months now to the debate on the question of Federal funds for abortion. A number of thoughts have occurred to me which I would like to share with my colleagues.

Central to any discussion of abortion is the question of when life begins. The arguments of my distinguished colleague from Illinois, Mr. HYDE, when this matter was last debated, centered on the premise that life begins with conception. If I accepted that postulate, I, too, would feel compelled to work to end abortion—whenever and however possible. But that very question has never been resolved in my mind.

In considering Mr. HYDE's comments further, I began to wonder, "What are the opinions of various religious leaders in the United States on this issue?" I did some research into the matter, studying the statements of some of the denominations most prevalent in North Carolina's Fifth Congressional District. I was struck by the fact that even our churches, for the most part, have been unwilling to say to their members, "This is when life begins. At this point, what before had the potential for human life, suddenly is human life."

The answer to the question, then, is not agreed upon even by our spiritual leaders. I certainly do not think the Government should be in the business of making such moral decisions, but by denying medicaid funds for abortion we are, in effect, making that very same judgment for many citizens of the United States. We are eliminating the choice, and by that, denying the women affected the right to choose an abortion which the Supreme Court has ruled is included in the right to privacy.

Frankly, I am surprised at some of my colleagues for their position on this issue. Many of them in the past have been among the most articulate and effective Members in advocating less Government interference in the lives of our citizens. I share their concern in this area. And yet, they now would have the Federal Government make this decision for poor women, and on a question which has divided even our most respected spiritual leaders.

I would like to share with my colleagues some of the statements from religious organizations which are active in North Carolina. First of all, because it illustrates so well the basic point which concerns me, I would like to quote from the "Proposal for Action" adopted by the Eighth General Synod of the United Church of Christ in 1971:

Although a form of life exists in the sperm and the unfertilized ovum, a new kind of life emerges at the moment of their union. Many regard conception (up to 72 hours after coitus), others implantation (7 days), as the beginning of an inviolable life. But while such life is human in origin and potentially human in character, the integration of bodily functions and the possibility of social interaction do not appear until later. Alternative candidates for the beginning of significantly human life are the final fixing of the genetic codes (3 weeks), the first central nervous system activity (8 weeks), brain development and cardiac activity (12 weeks). Some time after the twelfth week "quickening" occurs: that is, the mother can feel the arm and leg movements of the fetus. "Viability" in the present stage of technology begins between the 20th and 28th week, and the fetus has a chance for survival outside the womb.

The Pilot Mountain Baptist Association in my own Fifth Congressional District had these comments in February of 1974:

Abortion in most cases is the choice of the lesser of two evils. Abortion generally testifies to the violence, the excessiveness and the growing permissiveness of our time and society. Although sometimes permissible, it should never be done frivolously or in haste and is always mournfully regrettable. . . .

There must be a wholesome balancing of rights, wherein the mother, the father, the fetus and our society are given due and deliberate consideration (recognizing that under some circumstances abortion may be an agonizing necessity.)

The Southern Baptist Convention also went on record in June of last year:

. . . we call on Southern Baptists and all citizens of the nation to work to change those attitudes and conditions which encourage many people to turn to abortion as a means of birth control . . . we also affirm our conviction about the limited role of government in dealing with matters relating to abortion, and support the right of expectant mothers to the full range of medical services and personal counseling for the preservation of life and health.

The Episcopal Church—at its 65th General Convention—stated:

That the position of this Church, stated at the 62nd General Convention of the Church in Seattle in 1967 which declared support for the "termination of pregnancy" particularly in those cases where "the physical or mental health of the mother is threatened seriously, or where there is substantial rea-

son to believe that the child would be born badly deformed in mind or body, or where the pregnancy has resulted from rape or incest," is reaffirmed. Termination of pregnancy for these reasons is permissible.

The Presbyterian Church of the United States passed the following resolution in June of 1970:

Induced abortion is the willful destruction of the fetus. Therefore, the decision to terminate a pregnancy should never be made lightly or in haste.

The willful termination of pregnancy by medical means on the considered decision of a pregnant woman may on occasion be morally justifiable. Possible justifying circumstances would include medical indications of physical or mental deformity, conception as a result of rape or incest, conditions under which the physical or mental health of either mother or child would be gravely threatened, or the socio-economic condition of the family. The procedure should be performed only by licensed physicians under optimal conditions and with appropriate medical consultation and ministerial counseling, preferably by her own Minister.

Medical intervention should be made available to all who desire and qualify for it, not just to those who can afford preferential treatment.

In 1976 the General Conference of the United Methodist Church resolved that:

Our belief in the sanctity of unborn human life makes us reluctant to approve abortion. But we are equally bound to respect the sacredness of the life and well-being of the mother, for whom devastating damage may result from an unacceptable pregnancy . . . We support the legal option of abortion under proper medical procedures . . . a decision concerning abortion should be made after thorough and thoughtful consideration by the parties involved with medical and pastoral counsel.

And in June of 1970 the Lutheran Church in America said:

Since the fetus is the organic beginning of human life, the termination of its development is always a serious matter. Nevertheless, a qualitative distinction must be made between its claims and the rights of a responsible person made in God's image who is in living relationships with God and other human beings . . . On the basis of the evangelical ethic, a woman or couple may decide responsibly to seek an abortion.

Mr. Speaker, regretfully, I urge my colleagues to accept this compromise. Let us not put this Congress in the position of making further medical decisions—as well as moral decisions—for the poor women of the United States.

The SPEAKER. Without objection, the previous question is ordered on the preferential motion of the gentleman from Texas (Mr. MAHON).

There was no objection.

The SPEAKER. The question is on the preferential motion.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 183, nays 205, not voting 46, as follows:

[Roll No. 751]

NOT VOTING—46

Abdnor	Cunningham	Le Fante
Alexander	Dent	McDonald
Armstrong	Dickinson	Quayle
Badham	Diggs	Roberts
Badillo	Duncan, Oreg.	Rose
Beard, Tenn.	Eckhardt	Ruppe
Biaggi	Fithian	Sarasin
Bingham	Giaimo	Sikes
Bolling	Goldwater	Smith, Nebr.
Broomfield	Harrington	St Germain
Burton, John	Jenkins	Teague
Butler	Jones, Tenn.	Van Deerlin
Chisholm	Kasten	Whalen
Cleveland	Kelly	White
Cochran	Koch	
Conyers	Krueger	

The Clerk announced the following pairs:

On this vote:

Mr. Jones of Tennessee for, with Mr. McDonald against.

Mr. Diggs for, with Mr. Biaggi against.

Mr. Harrington for, with Mr. Sikes against.

Mr. Bolling for, with Mr. St Germain against.

Ms. Chisholm for, with Mr. Roberts against.

Mr. Koch for, with Mr. Le Fante against.

Mr. Conyers for, with Mr. Jenkins against.

Mr. Bingham for, with Mr. Armstrong against.

Mr. Eckhardt for, with Mr. Kelly against.

Mr. Butler for, with Mr. Fithian against.

Mr. Sarasin for, with Mr. Abdnor against.

Mr. John Burton for, with Mr. Quayle against.

Mr. Badillo for, with Mr. Kasten against.

Mr. Rose for, with Mr. Cunningham against.

Mr. Cleveland for, with Mr. Beard of Tennessee against.

Mr. Van Deerlin for, with Mrs. Smith of Nebraska against.

Mr. Duncan of Oregon for, with Mr. Goldwater against.

Until further notice:

Mr. Dent with Mr. Badham.

Mr. Alexander with Mr. Broomfield.

Mr. Teague with Mr. Cochran of Mississippi.

Mr. Krueger with Mr. Ruppe.

Mr. Giaimo with Mr. Whalen.

Mr. White with Mr. Dickinson.

So the preferential motion was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the motion offered by the gentleman from Pennsylvania (Mr. FLOOD) to disagree to the Senate amendment to the House amendment to Senate amendment No. 82.

The motion was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FLOOD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the motion just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like the Members to know that when the House adjourns, it will adjourn to meet tomorrow at 12 o'clock noon.

We had anticipated that we were coming in at 10 o'clock tomorrow, but since we have business tomorrow and will meet on Thursday, the House will meet tomorrow at noon.

DOMESTIC VIOLENCE

(Mrs. BOGGS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOGGS. Mr. Speaker, as many of our colleagues in this House know, the issue of family violence—violence between husband and wife, between teenagers, and parents against children, and against the elderly—has been receiving increasing attention from local community groups as well as from the news media.

In my own district, the YWCA is coordinating a counseling program for battered women, bringing together the skills and assistance of a wide variety of public agencies and private groups.

During the National Women's Conference in Houston skills workshops were conducted on a wide variety of topics, including domestic violence. The participants in the workshops on family violence were drawn from all over this country, and the vast majority of these women are working in their own communities to establish programs to assist the victims of battering.

A common theme throughout the 2 days of domestic violence workshops was the need of local community groups for information and technical assistance as well as the need for financial assistance. Groups working on domestic violence are springing up all over the Nation—and many of them are needlessly reinventing the wheel in terms of organization and programs.

During the past year I am also sure that many of you have received requests from your constituents for assistance in obtaining Federal grants and technical assistance in establishing local programs and shelters for victims of family violence. I am happy to report that the existing Federal programs are making a real effort to be responsive to these grassroots community efforts. LEAA has set aside $1 million in fiscal 1978 for family violence programs; local groups have also turned to ACTION and CETA for help. In the research area, the National Institutes of Mental Health has funded several studies which are providing the concrete data needed.

Right now the most pressing need regarding domestic violence is a systematic coordination of programs at the Federal level so that local applicants can make sense of the system; another crying need is for support in terms of technical assistance and grant moneys. For this reason NEWTON STEERS and I have jointly sponsored the domestic violence prevention and treatment program, H.R. 7927; another bill with a different approach has been introduced by our colleague BARBARA MIKULSKI.

Since the introduction of these bills we have been inundated with calls and letters from all over the country—from women's groups, from church organizations, from local elected officials, from community mental health centers, from law enforcement officials, and from victims of family violence themselves.

During the hearings planned on this legislation, I feel certain it will become apparent to the entire Nation that domestic violence is an urgent problem deserving our closest attention at the Federal, State, and local levels.

RADIOACTIVE MATERIALS THREATEN HUNDREDS

(Mr. ALLEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALLEN. Mr. Speaker, let me quote as follows:

> Deaths in future generations due to cancer and genetic effects resulting from the radon from uranium required to fuel a single reactor for one year can run into hundreds.—Dr. Walter H. Jordan, Former Assistant Director, Oak Ridge National Laboratory.

What price will the people of America have to pay for the electricity generated by nuclear reactors—not just in money that will run into the hundreds of billions of dollars invested, the interest thereon, and for skyrocketing prices for nuclear fuel that is now controlled by international cartels—but in deaths due to cancer and genetic effects resulting from radon and the many other poisonous emissions from the uranium required to fuel the increasing number of nuclear generators constructed, and continuing to be built, throughout the United States?

On Tuesday last, there came to my attention, as your Congressman, certain unnerving and startling evidence of gross errors made by members of the Atomic Safety and Licensing Board in the amount of dangerous and poisonous emissions from nuclear reactors—errors of such enormous magnitude as to stagger the imagination.

This was revealed in a report, and projection of deaths, made by one of the top and most respected nuclear scientists in the Nation, in just the past 2 months.

I refer to Dr. Walter H. Jordan, for many years the Assistant Director of the Oak Ridge National Laboratory, and who is generally regarded by his professional colleagues as one of the foremost authorities in this field.

In an official report, dated September 21, 1977, which is now on file with the Nuclear Regulatory Commission, Dr. Jordan made the flat and unequivocal statement that the amount of radioactive materials emitted into the atmosphere and environment, "released as gas, liquid, or solid as a consequence of operating a reference powerplant for 1 year," to wit: Rn-222, has been grossly underestimated and in error in all of the supposedly scientific calculations relied on, and assumed to be correct by the Atomic Safety and Licensing Board of the Nuclear Regulatory Commission.

The emission of Rn-222, for example, which had previously been figured and stated 74.5 curies, Dr. Jordan said, "would be 100,000 times greater!" The exclamation mark was added by Dr. Jordan, in finding such an enormous error and unbelievable understatement of such emissions by the Nuclear Regulatory Commission, in passing on the safety of uranium-fueled reactors.

Think about it. Not double or triple, but the correct amount of such poisonous emission is "100,000 times greater" than previously assumed to be correct by those serving on the Atomic Safety and Licensing Board Panel, according to Dr. Walter H. Jordan, whose calculations have not been successfully challenged to this date.

Dr. Jordan concludes with this unnerving statement:

> Since the radon continues to seep from the tailings pile for a very long time, the total dose to people over all future generations could become very large. Deaths in future generations due to cancer and genetic effects resulting from the radon from the uranium required to fuel a single reactor for one year can run into hundreds. (See Pohl, Search, Vol. 7 No. 8, Aug. 1976.) It is very difficult to argue that deaths to future generations are unimportant. But it can be shown that the number is insignificant compared to those due to the radon contribution in natural background.

Not being a nuclear scientist, I cannot comprehend the full significance of Dr. Jordan's conclusion. He said that "deaths in future generations can run into hundreds." But he does not say how many hundreds, or over what span of time. So his grim prediction is very fuzzy, to say the least. As I said, I am not a physicist or nuclear scientist, but I do recall something about geometry and geometric progression.

Thus, if Dr. Jordan is only partially correct, and instead of hundreds (plural) dying, only 100 in future generations die of cancer and genetic effects resulting from radon from the uranium required to fuel a single reactor for 1 year; the number who would die from the radon emissions of two generators for 2 years would be 400; and the number who would die from three reactors operating 3 years would be 900. Ten such nuclear reactors operating for 10 years, based on this assumption, would cause 10,000 deaths; and 100 reactors operating for the next 25 years would cause 2,500,000 deaths from

radon resulting in cancer and genetic effects over whatever timespan Dr. Jordan was projecting in his dire prediction.

Of course, if the deaths to future generations from cancer and genetic effects from the radon from the uranium required to fuel a single reactor for 1 year can run into the hundreds (plural), as Dr. Jordan states, and not just 100, as used in my sample illustration, and if the number of nuclear plants continues to increase to many hundreds, or even a 1,000, then the deaths to future generations from cancer and genetic effects would multiply in geometric progression to hundreds of millions of people who would die, if Dr. Jordan is anywhere at all near correct in his calculations and prediction.

I can only conclude that if Dr. Jordan considers this vast number of additional deaths from cancer and genetic effects as "insignificant," as stated in his report, his concern for "future generations" must be colored, if not blinded, by the fact that it is he and his colleagues of the Nuclear Regulatory Commission who have advocated and approved the construction of more and more nuclear plants to generate electricity, notwithstanding their knowledge as nuclear scientists of the inherent danger to the lives and safety of those now living, and to generations yet unborn.

But whatever the true facts may be, I feel that this report in the files of the Nuclear Regulatory Commission, and the information contained therein, should no longer be withheld from the public, for the people are entitled to know.

We can only pray that the leaders of our Nation will consider all of the facts carefully, in the very difficult decisions they must make in their search for alternative and renewable sources of energy, and that they and all of us will be led by divine providence in making the right decisions, for the safety and welfare of all mankind.

FREE TRADE MYTH

(Mr. NICHOLS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. NICHOLS. Mr. Speaker, last year the Alabama textile industry lost more than 3,000 jobs amounting to nearly $50 million in payrolls. Many of these jobs were lost not because of a decline in demand for Alabama textiles and garments but due to unfair competition from foreign produced products.

In recent weeks we have read a great deal about the Tokyo round of international tariff negotiations and what the outcome will mean for American industry. For the RECORD I would like to submit this article entitled "Free Trade Myth" by Mr. Donald Comer, Jr., chairman of the board of Avondale Mills. I believe the article summarizes the problems faced by American manufacturers and why our trade representatives must not buckle to the pressure of our foreign competitors.

FREE TRADE MYTH

(By Donald Comer, Jr.)

Several years ago the Japanese people were rioting because Japanese television sets were being sold in New York City $200 cheaper than they could be bought in Tokyo. This certainly had all the earmarks of a dumping procedure being used to penetrate the American market.

Today we are reading the news that Zenith Radio and Television Corporation is moving one-half of its television production facilities from Pennsylvania to Taiwan and Mexico. American competitors began moving their manufacturing facilities offshore to low-wage countries five or more years ago. As a result, American workers are left with the minor job of assembling imported parts. Zenith, the last hold out, is being forced into overseas manufacturing in order to stay in business. This is a situation that at a critical time could lead to a cartel control action similar to the one we were faced with when OPEC nations knew they were in the driver's seat as a major supplier of our energy requirements. The Zenith action eliminates five thousand American jobs. It is receiving a lot of publicity because it happens at a time when the country is very much concerned with unemployment figures.

One official, reporting to the President, stated profoundly; "It is to the nation's advantage for industry to switch from products where they're at a competitive disadvantage to those where they have a competitive advantage." There are millions of Americans looking for such opportunities day and night; some eager to enter business—some in highly successful businesses; others in business who are trying desperately to find a profitable item to replace current losses. There are many more people and countries around the world looking for chances to develop situations in which they have a competitive advantage in our market. They have the help of low interest loans from The World Bank and in some cases direct financial aid from our government.

Unfortunately for Americans, most of the situations described by the official relate either to:

A. Items that employ relatively few people (where style and ingenuity continue to enjoy well-paid popularity around the world).

B. Farming, where we are competitive in world markets (but not suffering for additional production).

C. The airplane and weapons manufacturing industry, where we have a competitive advantage because they are heavily subsidized by our government, which pays the extremely high cost of research and development of this highly sophisticated industry. At this time we don't believe there is a need for additional production and certainly hope not. Any major change would probably be one of distribution and not expansion.

Americans initiated the choice of a controlled economy at the bottom of the depression in the early 1930's. Today we regulate our minimum wage, our interest rates, use of our national resources, health standards, product performance and hundreds of other programs that add more cost to everything we produce. We hope most of these programs have contributed to a better life in America. But there is no way we can continue to absorb these additional costs to the production of life's necessities in this country and at the same time allow dumping from unregulated sources into our market or unrestrained imports from low-wage countries. Free trade can be practiced in free and unregulated markets or in markets where everyone is working under the same regulations, such as our American market. But there is no such thing as free trade in the world markets as they exist today. Each nation, no matter how it is labeled, seems to have a trade policy that is tailored to its benefit. Trade among nations is beneficial to all concerned and should be encouraged. We should share our markets with undeveloped and less fortunate neighbors, but not to the point where we become dependent on foreign sources for life's necessities and obliterate basic American industries. The millions of jobs they supply are the lifeblood of our economic survival. An unemployed American is not only a heavy drain on the economy but a poor customer for American-made as well as imported merchandise.

A TRIBUTE TO BIRD SUMNER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. MCDADE) is recognized for 10 minutes.

Mr. MCDADE. Mr. Speaker, recently the Robert Packer Hospital in Sayre, Pa., dedicated their new Guthrie Clinic, a significant forward step in making the Robert Packer Hospital an even more powerful force in the drive for better health care in northeastern Pennsylvania. At that ceremony, appropriate notice was taken of the many contributions of the former chairman of the board of trustees at Packer. Mr. Bird Sumner. That recognition took the form of the redesignation of the former clinic building as the Bird Sumner Administration Building. In doing so the friends and official family of the Robert Packer Hospital have recognized the tremendous accomplishments of one of its greatest supporters.

Bird Sumner, the 20th chairman of the board of trustees of the Robert Packer Hospital and the Robert Packer Hospital School of Nursing, passed away quietly on May 17 after an extended illness.

During Mr. Sumner's 23 years as a member of the board of trustees, he provided outstanding leadership during periods when the hospital faced many and varied challenges. As the years passed, decision which increased the services of the hospital were first challenged, then analyzed, but always enthusiastically supported by Mr. Sumner. His ability and willingness to face problems squarely and deal with them decisively has made an impact on the growth and development of this medical center which will be felt by generations yet unborn. Mr. Sumner dedicated his life to the betterment of health care for everyone and supported this ideal by giving untiringly and unselfishly of his time, services, and resources.

In November 1966, he was elected president and later chairman of the board, a position in which he assumed the leadership of the building fund drive for the Patterson Education Building. The completion of the medical center's new multimillion dollar hospital facility was spearheaded by Mr. Sumner's total commitment and dedication to excellence in patient care.

Born and educated in East Smithfield, Pa., he graduated from Sayre High School and the Wharton School of Business of the University of Pennsylvania. He served as a member, director and

organizer of many valley business firms, and in 1967 was honored as the valley's outstanding civic leader. During his 41 year insurance career, he became a chartered property casualty underwriter, and until his death was president of Bird Summer Agency, Athens, Pa.

Mr. Sumner, the loving and concerned husband of Helen, the devoted father of Beth, Sylvia, and Gary, an outstanding civic, church, community and fraternal leader, will be deeply missed by everyone touched by his life.

TRUTH-IN-LENDING SIMPLIFICATION BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 5 minutes.

Mr. CORCORAN of Illinois. Mr. Speaker, today I have joined my colleague. GARRY BROWN of Michigan, in cosponsoring a bill to simplify and improve the Truth-in-Lending Act. The need for improvement and simplification of the Truth-in-Lending Act, which became law in 1968, has been well documented by several congressional and agency studies, most notably the third report of the Committee on Government Operations, entitled the "Truth-in-Lending Act: Federal Banking Agency Enforcement and the Need for Statutory Reform."

Simplification of truth in lending means, first, benefits to consumers by reduction in the amount and complexity of information on the disclosure statement so that what is provided is more meaningful; second, benefits to creditors by making the content of the regulations which describe requirements for lenders more succinct, thereby facilitating compliance; third, better judicial enforcement by reducing litigation, especially where suits are based on technical violations which cause no actual injury; and fourth, better and easier administrative enforcement, including a reduction in the cost of that enforcement. All these goals must be pursued.

I noted recently that several of the agencies responsible for truth-in-lending enforcement issued a joint notice of proposed statement of enforcement policy. This inter-agency coordination is commendable; however, this joint statement contains reference to one of the continuing truth-in-lending problems, that of having to deal with both substantive and hypertechnical violations. It states, "It is administratively impossible to fashion an appropriate remedy for every type of violation." This is one area in which congressional action to simplify the act can contribute greatly.

The key points of the Brown-Corcoran bill are:

Substantial simplification of the disclosures required on a truth-in-lending form, limiting the provisions to those that actually affect comparative credit shopping.

Limit on creditors' civil liability to only major substantive violations of the Truth-in-Lending Act.

Enhanced administrative enforcement through civil penalties and cease and desist orders by agencies, including clarification of the authority to require restitution in cases no more than 1 year old.

Provisions for creditors to correct errors in truth-in-lending statements within 30 days of discovery, with restitution of overchargers.

Provisions for the Federal Reserve Board to issue model forms and clauses, protection for creditors from liability for reliance on such forms and clauses or Federal Reserve Board interpretations, and a limitation on civil liability in cases of substantial compliance. I hope that this bill will receive quick action by the House Banking, Finance, and Urban Affairs Committee in order that it might solve some of the serious problems caused by the Truth-in-Lending Act.

SECRETARY ADAMS' DECISION ON LOCATION OF AMTRAK HEAVY EQUIPMENT REPAIR FACILITY BASED ON FACTS, NOT POLITICS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Delaware (Mr. EVANS) is recognized for 5 minutes.

Mr. EVANS of Delaware. Mr. Speaker, on November 2, I brought to the attention of the House, the pending decision by Secretary of Transportation Brock Adams regarding the location of the Amtrak heavy equipment repair facility for the Northeast Corridor. At that time, I, along with other Members of the House from the Delaware Valley area expressed concern regarding the political implications of the decision which faced the Secretary, namely, to locate the facility in Wilmington, Del., or build a new facility in Readville, Mass.

I am pleased to inform the House that the Secretary of Transportation, in a November 21 news conference indicated that no new facility would be built in Readville, thus insuring a continuing operation in Wilmington. For the past several months, 700 families have anxiously awaited that decision, and I can tell you that because of the Secretary's announcement, their Thanksgiving was far more enjoyable than any had expected it to be.

As I said before, I was confident that if the decision was made on merit and not politics, Wilmington would come out ahead. That decision has been made, and it has obviously been made on the basis of the facts. I want to commend both President Carter and Secretary Adams for this courageous decision, and I also want to express my deep gratitude to the many Members of Congress, including Congresmen BAUMAN, EDGAR, FLORIO, HUGHES, KOSTMAYER, LEDERER, SCHULZE, and SHUSTER for their help and assistance in this matter which affects the entire Delaware-Pennsylvania-New Jersey-Maryland region. My special thanks also go out to the entire Pennsylvania delegation for their very effective letter to the Secretary on this crucial matter.

I am convinced that the bipartisan effort by all of us on this matter brought to public light this crucial decision and insured that it was made on the basis of facts and not politics.

PROBLEMS OF VIETNAM-ERA VETERANS

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, I have become increasingly concerned with the many problems our Vietnam-era veterans are having in utilizing the benefits that were promised to them. I have received many letters from men and women who have served in the various service branches who advise me that they did not know of the benefits they were entitled to, or for various reasons, were unable to take advantage of them in the time limits established.

I realize, of course, that we cannot extend benefits indefinitely, but I do feel that we should offer these veterans every opportunity to use them. I am specifically referring to the delimiting date for using the GI bill. It is unfortunate that the major tool to help the veteran get ahead has a deadline, but, as the Veterans' Affairs Committee has pointed out, it would be too costly to change this. So today I am proposing a bill that would establish a low-interest loan program for veterans who, for whatever reason, were unable to take advantage of the GI bill. Since the loans would have to be repaid, cost would not be a factor. Loans do now exist for veterans within the delimiting period and my bill would extend it to those who have passed this date.

The rate of the loan would be the same as the lowest prevailing rates for Federal educational loans available from HEW, which is currently 7 percent. The terms for repayment would be negotiated, but the limit would be 10 years and the terms would be based on the veteran's assets and income.

Those eligible for this loan program would be veterans who served from August 4, 1964, to May 7, 1975, and, of course, did not use up their GI bill. There would be a formula to determine the amount of the loan, and a veteran could be eligible for a loan for a maximum of 45 months. If a veteran has not used any of his GI bill, he would be entitled to a loan for the entire period times the rate he would be entitled to based on dependents. For those who had used part of their GI bill, their loan would be for 45 months times the appropriate rate minus the amount which had already been used. In this way, no veteran would be eligible for more than he would have received if his delimiting date had not expired.

The official dates of the Vietnam conflict were 1964–75, so these dates are used to be sure to include anyone who served during this conflict. These men and women who served in America's most unpopular war deserve an extra helping hand as they find themselves unable to locate employment because of our current economic situation. This loan

program will give them an extra opportunity to achieve their goals. This is the least we can do for those who willingly gave so much for their country.

TEXAS VOTERS CONDUCT EFT MARKET SURVEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, for more than a year I have pointed out that many financial institutions across the country are rushing into electronic funds transfer systems, the so-called electronic banking or cashless society, without conducting market surveys to determine whether or not consumers want this new type of banking.

As chairman of the Consumer Affairs Subcommittee, I have found that there is little interest in EFTS and, in fact, many consumers are deeply concerned about the security, privacy, and consumer protection of EFTS.

For those financial institutions that have not done market surveys, they should look closely at the results of a vote on a constitutional amendment in Texas earlier this month. The voters of that State rejected by a 62 to 38 percent margin a proposed constitutional amendment that would have allowed banks to have off-premise EFT facilities. In commenting about the outcome of the vote, Samuel Kimberlin, Jr., executive vice president, Texas Bankers Association, noted that, "If people did not vote for EFT, they are not going to use it." The financial community has hailed EFT as the greatest invention since sliced bread and Monday night football, but while consumers still love tasty sandwiches and Dandy Don and his friends, they have shown no interest in EFT.

The Texas vote should cause many financial institutions to take a closer look at EFT before spending millions of dollars on a program that will not work.

FOUNTAIN SUBCOMMITTEE INVESTIGATES MANAGEMENT OF FEDERAL HEALTH RESEARCH GRANTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. FOUNTAIN) is recognized for 5 minutes.

Mr. FOUNTAIN. Mr. Speaker, questions have been raised recently about the manner in which universities and other institutions that receive Federal grants and contracts for the support of research are supervising the expenditure of these funds. In this connection, recent investigations made by Federal auditors in response to specific complaints have documented the misuse of research money, as well as poor accountability practices, at a number of institutions including Harvard and Georgetown Universities and the Eppley Institute.

Mr. Speaker, I find these reports very disturbing. The Intergovernmental Relations and Human Resources Subcommittee, which I chair, studied the administration of NIH's health research programs very intensively during the 1960's and made a series of recommendations for improving efficiency and accountability in this very important area. The recent audit disclosures are particularly disturbing because they suggest that the management reforms instituted as a result of the subcommittee's work may not have endured.

In order to determine the extent of this problem, the subcommittee plans to follow up on its earlier work. This will involve both a review of Federal agency management practices and the role of recipient institutions in assuring that Federal funds are used properly for their intended purposes. In this latter connection, I have asked the Comptroller General and the Director of the HEW Audit Agency to work closely with the subcommittee in the design of institutional audits. Our study of NIH grant management, I should note, is actually an extension of the subcommittee's ongoing review of the national cancer program.

Mr. Speaker, the November 25 issue of the prestigious publication Science contains a very informative and perceptive article by Deborah Shapley on the subject of research management in universities and other institutions that receive Federal support. I am appending her article for the information of my colleagues:

RESEARCH MANAGEMENT SCANDALS PROVOKE QUERIES IN WASHINGTON

The world of federal grants and contracts to universities, hospitals, and other research institutions, long thought to be self-regulating, is coming under intense scrutiny in Washington these days. An increasing number of government agencies, from Congress' General Accounting Office (GAO) to various elements of the Department of Health, Education, and Welfare, including the National Institutes of Health (NIH), are looking at how government research funds are actually spent at recipient institutions. The activities under examination range from out-and-out fraud to routine fudging of accounts, a practice that violates federal rules but that seems, nonetheless, to be common.

So, more and more congressional staffers and Executive Branch officials are learning the not-too-thrilling details of "time and effort reporting" and "monthly certification" and other features of the current system of managing federal funds for science. Rules and practice, however, diverge often enough that one official likens such study to "playing with Jello." But he and other officials, such as Representative L. H. Fountain (D-N.C.), are deeply concerned that this morass may conceal violations of peer review, not to mention strict accounting procedures.

Fountain's alarm is an important bellwether, because, as chairman of a Government Operations Committee subcommittee, he launched in the 1960's one of the most thorough and probing investigations Congress has ever made of how research moneys, particularly those of the NIH, are spent. His committee found considerable waste and mismanagement at that time and developed revised procedures aimed at cleaning things up. But recently Fountain told Science, "I am concerned that the reforms we accomplished in the 1960's may not have endured." The subcommittee's belief that granting institutions, together with government audits, have been adequately policing the system "may be illusory." Fountain says his staff is undertaking a major follow-up of its earlier work.

The issue has surfaced in the last year in Washington largely because of two incidents. One occurred at Harvard (Science, 23 September) and involved Phin Cohen, an assistant professor of nutrition who alleged that he had been made to sign blank forms vouching for how his NIH grant moneys had been spent, while the Department of Nutrition at the School of Public Health filled them in with unrelated items and forwarded them to the government. Not only did NIH investigators find the Cohen allegations true, but they found serious accounting problems in two other Harvard grants that they examined. NIH asked Harvard to pay back $132,349 to compensate for misspending on all the grants. HEW auditors are now beginning an audit of all federal funds—which total some $400 million—Harvard receives.

The second incident, which may have aroused the Secretary of HEW, involved the Eppley Institute in Omaha, Nebraska, which has received more than $18 million in funds from the National Cancer Institute to test chemicals for carcinogenicity. According to GAO investigators, whose report is about to be published, between 1973 and 1976 Eppley's contracts with NCI have been extended without using normal procedures. For example, some 11 projects, some of which had already begun, were approved with only a verbal say-so from NCI. Moreover, some 50,000 laboratory animals, bred at a cost of $1.75 apiece, turned out not to be employed in Eppley's research and apparently were destroyed. Finally, some of the equipment, materials, and animals the government paid for were used for Eppley's industrial research contracts according to GAO. The Eppley situation has suggested to several observers that some bending of the rules has been overlooked by NCI officials, because Eppley's director is Philippe Shubick, a member of the President's National Cancer Advisory Board, which has oversight responsibilities for the NCI.

[Eppley's Associate Director, Phillip Issenberg, told Science that Eppley had always "done what we were told to do by NCI" in renewing its contract. As for the 11 projects, "We did not have the good sense to put their response in writing." The misuse of equipment was minimal, he said, and the animals destroyed for good reasons. But he admitted that Eppley could have been more careful in having bred 78,000 animals of which only 27,000 were used in experiments. Eppley's NCI contract is currently up for renewal.]

It should be noted that no one is alleging—even in the most serious cases discovered so far—that scientists are using federal grant and contract moneys to buy mink coats, yachts, or private jets. But a number of important officials and groups are asking whether research funds are actually used the way that Congress and the Executive Branch think they are. Among the current inquiries are the following:

Representative Fountain's Subcommittee on Intergovernmental Relations and Human Resources plans to follow up its earlier investigation by looking at, in Fountain's words, "the quality and effectiveness of research grant administration, including peer review," for the research supported by NIH, HEW, the Department of Agriculture, and the National Science Foundation. Fountain says he will hold hearings "in the first half" of 1978, but he has already asked the GAO to gather information on grant and contract management practices in the course of its other investigations of university and research institution matters. GAO, also at Fountain's request, is beginning an examination of how research funds have been spent

at a single school, in this case the University of Rochester Medical Center. Fountain happened to pick Rochester because it receives support from several federal agencies and because recent federal audits of the school appeared inadequate.

In an unusual move, HEW Secretary Joseph Califano has ordered the HEW Audit Agency to review all NCI contract awards, a review which is now under way and which is also of interest to the Fountain subcommittee, because it has been reviewing NCI's programs.

Califano also issued a directive on 18 May "aimed at eliminating waste, abuse, and mismanagement" from HEW's vast grant and contracts budget which totals $7 billion. The directive followed some ad hoc investigations by the office of the assistant secretary for management. It includes NIH which has only $2 billion of HEW's total grants and contracts budget.

The directive requires even, quarterly distribution of funds to end the "bunching" of funds distribution in the last month of the fiscal year, stricter accounting on sole source contracts, more training for contract officers, and other changes in departmental procedures.

The GAO has just published a self-initiated review of the adequacy of HEW's audits, including its auditing of research money. High-level HEW and NIH officials all rely on HEW's auditors to inform them of what is really going on out in the research institutions where the money is spent. But it is obvious, as GAO has concluded, that HEW's group of auditors is inadequate to the task. According to previously published GAO figures, HEW in fiscal 1976, had only 937 auditors to ferret out problems in the spending of a departmental budget of $128 billion.[1] (The Department of Defense, by comparison, has more than 6200 auditors looking after expenditures of $93 billion.) One question the new GAO study has asked is whether the types of audits performed in the past by HEW have been likely to turn up the sort of problems that have come to light at Harvard and Eppley. The answer seems to be that the auditors have been so busy looking at systemwide aspects of an institution's accounting that they rarely learn the fate of moneys awarded to a single investigator, such as Phin Cohen.

The Office of Management and Budget (OMB) of the White House has been reviewing the inconsistencies in the rules which different federal agencies promulgate in requiring accounting for their money from colleges, universities, and other research institutions. OMB is reviewing suggestions from HEW as well as the universities, represented by a committee of the National Association of College and University Business Officers (NACUBO).

Finally, NIH's 13-member internal investigative unit, bearing the innocuous title of Division of Management Survey and Review (DMSR) continues to look into allegations (received from higher-ups, program officers, and even anonymous letters) of wrongdoing and fraud in the spending of NIH money. The DMSR was the group that investigated the Harvard scandal. It also made a major investigation of another scandal in which a scientist, Leonard Hayflick, allegedly sold human cell cultures developed with federal support to other groups and institutions at a profit of $67,000, and he also held sales contracts potentially worth $1 million (*Science*, 9 April 1976).

[1] HEW supplements its own audit staff by contracting out for an additional 2000 man-years of work every year. This brings its total audit staff capability to approximately 3000, which is still half of the number of auditors available to the Defense Department.

Like any police file, many DMSR reports (which are available under the Freedom of Information Act) make for chilling reading. Others obviously exonerate researchers or their institutions from charges. But the range of problems which the DMSR turns up is probably significant.

One case involved the American Institutes for Research (AIR), in Washington, D.C., a nonprofit organization that does behavioral and social science research. An AIR single investigator was responsible for a 5-year grant totaling some $200,000 from the National Institute of Mental Health for work on abortion and unwanted children. He also received support from the National Institute of Child Health and Human Development and the Ford Foundation. According to the DMSR report, the investigator falsified invoices to the government to payments for consultants for the project who were in Czechoslovakia and who allegedly would be persecuted by their government if they were paid directly.

But instead of forwarding the payments to the consultants, the investigator deposited them in bank accounts in Prague, Geneva, Bethesda, Maryland, and Washington, D.C., until they totaled more than $100,000 and had earned approximately $12,000 in interest. DMSR, as it does in such cases, referred the matter to law enforcement authorities and the Internal Revenue Service.

Now, 2 years after the first DMSR report on the matter, the investigator has convinced the authorities that the consultants really existed and did work on the study. The U.S. District Court of the District of Columbia has approved a trust agreement for the disposal of the money to any Czechs who can be proved to have earned it. AIR, which discovered the problem in the first place and brought it to the government's attention, also fired the investigator.

Another case involved two researchers at Brandeis University who got a grant from the National Institute of General Medical Sciences. Afterwards, the DMSR alleged, the researchers departed for Israel, and apparently took with them some $6000 worth of equipment bought with NIGMS funds. The DMSR recommended that the cost of the equipment and part of their salaries be repaid to the government.

Other DMSR reports discuss situations in which institutions submitted identical applications to different parts of NIH, or investigators charged their salaries to the wrong accounts, and other cases caused as much by snarled red tape as by deliberate intent to monkey with the system.

RECORDS ROUTINELY FALSIFIED

One question which officials in the GAO, HEW Audit Agency, and DMSR are asking themselves these days is how typical are cases of outright fraud. Admits the Deputy Director of NIH, Thomas E. Malone, "I personally don't know what's going on out there. I have to rely on the reports we get from our auditors. I don't have personal knowledge of widespread abuse," Malone told Science. "But if there is a belief that there is widespread abuse then the burden is on us to get to the truth of the matter."

But while searching for the truth about fraud, officials may stumble on a less glamorous, but probably very common practice, namely, the "pooling" of funds from different grant and contract accounts, and charging of salaries, equipment, and materials to whatever account has plenty of money at any given time. In audits and other federal reports, the practice shows up in a variety of guises: as "late fund transfers," poor "time and effort reporting," or "inaccurate monthly certification." There seems to be some consensus among government auditors and investigators that this practice is widespread, violates federal guidelines, and involves, ultimately, the spending of taxpayers' money for other than the originally intended purposes. As such, the problem of pooling may become as big an issue as the Harvard or Eppley incidents in the forthcoming Washington investigations.

What happens is this. A researcher applies for a grant—often for several grants—and accompanies each proposal with specific statements about the staff time, equipment, and percentage of his or her own time that will be allocated to the project. The grant application is reviewed by the researcher's peers on the same assumption, namely, that the project is a discrete entity and will be performed as stated in the project plan. An OMB regulation—known to the cognoscenti as FMC 73-8J-7(d)—requires that the investigator certify after the fact, on a monthly basis, how the money was actually spent. There is also a requirement that the institution which employs the researcher file annual reports of expenditures containing similar information. And in the vast majority of cases, the investigator, and his institution, certify that the money was spent in accord with the original research plan. So the system runs along, ostensibly smoothly, with everything properly accounted for.

But what sometimes really happens is that the scientist is juggling his time among several different grants and contracts, not to mention teaching, administration, travel, and in some cases, patient care. So are his colleagues, technicians, and students. The result is that his own operation, as well as the larger entity in which he works—be it his laboratory, department, school, or hospital—resembles a many-ringed circus, with myriad activities going on simultaneously.

The financing of and accounting for these activities is equally complex, and even obscure. Money starts and stops coming in to the department, or laboratory, at irregular intervals. Some accounts are fat with extra funds; others are lean considering the work they are supposed to support. Sometimes a project's funds arrive at the university right when the work begins; often, however, the funds arrive months after work has started.

So the scientist, if he also acts as the administrator of several such grants and contracts, or his department head, or his departmental business officer, resorts to the practice of charging salaries, supplies, equipment, and other things to whichever accounts seem most convenient at the time. This is done, people say, regardless of whether the costs were incurred for the account charged.

Finally, to make life simple again, the scientist, or the business officer, or whoever handles the accounts, certifies to the government in the monthly statements (which are meant to be signed by someone with direct knowledge of the project's progress but often are not) that the money is being spent in accordance with the original project plan. This then, is the practice called pooling by which institutions gain some freedom from government accounting rules but still keep relations with their federal sponsors running swimmingly.

Following up on descriptions of this practice by government auditors and investigators—who generally referred to it as their biggest problem and even claimed it might occur in 50 to 70 percent of *all* government research grants and contracts—*Science* contacted three senior principal investigators. One was the director of a major university laboratory; another had participated in biomedical work at two prominent university teaching hospitals. A third was a history professor at a leading East Coast institution. All of them admitted that such pooling and shuffling of funds among accounts was common practice. One even ventured that some-

times as a result, a project can be so deprived of money that the work it was to support never gets done!

LAWBREAKING OR NEEDED LEEWAY?

Opinions on the significance of this practice vary depending on whom one talks to. A high OMB official was angry on learning that both auditors and scientists say the practice is widespread. "Any false certification to the federal government about the expenditure of federal funds is inexcusable," he said. "That amounts to making false claims to the government for funds, and there are statutes that punish it." But he admitted that the certification rule, FMC 73-8J-7(d), leaves enforcement up to the agency that sponsors the research.

By contrast, a veteran program officer at NIH defended aspects of the practice as it applies to grants. He noted the long belief on the part of researchers, and of some people in government, that a grant is a gift, and that strings attached to how grant money should be spent should be loose.

This official warned that "business-oriented officers" in NIH, however, might not be sympathetic to such practices.

Fountain, while not commenting on pooling as such, stated that any application of funds for purposes other than the approved project undermines peer review. He told Science:

"There is an important basic connection between the peer review process for selecting research projects and the proper use of research funds within grantee institutions. If grant money is spent for purposes that are outside the approved project, the integrity of the peer review process is undermined and further, unsuccessful grant applicants may not have received equitable treatment."

A third, and highly significant reaction was that of the principal investigators themselves, who complained bitterly that they were teachers and thinkers, not CPA's. "There is an enormous mismatch between federal policy and university habits here," explained one. "We in universities can't say whether we have spent twenty-two and one-half percent of our time on this or that. Yet the government is trying to buy research the way it buys missiles, or the way you buy safety pins or diapers."

Federal auditors are well aware of this attitude, and say they have been hearing such protests for 10 years and more. Says one experienced audit official: "There has never really been a meeting of minds between the federal government and the academic community, the professional staff who manage the funds, as to what . . . they commit themselves to provide in return for research support. The academic community looks upon the effort to identify the amounts of effort spent on each contract and grant as so much unwanted interference."

It is doubtless true that there are some time-honored questions here concerning proper accountability relationships between the federal government and academic science. But in coming months, it looks as though Congress and some "business-oriented" executives of the federal government will be looking at the question of accountability in its most literal sense.

PARTY TO CHEER DISABLED AND NEEDY CHILDREN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 5 minutes.

Mr. ADDABBO. Mr. Speaker, for years one of the New York area's most beloved newspaper columnists has been sponsoring a Thanksgiving party for homeless, handicapped, and needy children. This year, New York News columnist Walter Kaner celebrated his 25th annual party for the needy tots. Everyone had a good time, as usual, and no one enjoyed the good deed more than Walter. To me, he expresses much of what is good about New York, and I would think my colleagues would benefit from reading about him. I insert the newspaper article of November 20 into the RECORD.

PARTY TO CHEER DISABLED AND NEEDY CHILDREN

Some 700 homeless, handicapped and needy children are happily looking forward to this Tuesday when they will attend the 25th annual Thanksgiving party sponsored by News columnist Walter Kaner.

The party will be held from Noon to 4 p.m. at Antun's in Queens Village for youngsters from more than 20 hospitals, orphanages and health and welfare agencies in a five-county area.

The youngsters, many in wheelchairs and on crutches, will be presented with toys, party hats, games, balloons, comic books and other gifts. In addition the children will be treated to hot dogs, hamburgers, soft drinks, ice cream, cotton candy, fruit and cookies.

Long Island business firms are helping making it a joyous day for the children by donating the gifts and refreshments.

During the party the youngsters will be entertained with a two hour show featuring popular children's performers. Two bands will also provide continuous music.

On hand to entertain the youngsters will be television clown Ronald McDonald; "Cowboy Joe" Phillips of Lake Ronkonkoma with his gun tricks and performing dogs; "The Magic Clown" portrayed by Doug Anderson, Garden City magacian; Jay Green, juggler and unicyclist: "Pete the Tramp" played by Peter Kazlaukas of Glendale; and clowns from the Shriners Kismet Temple in New Hyde Park.

A jovial Santa Claus, in the person of Lucky Squires of Ridgewood, will welcome the youngsters and present them with gifts. Music will be provided by Dinney Dinofer and the Noblemen Orchestra and Vince Mondi and his one-man band.

The ballroom will be decorated with a colorful Thanksgiving setting by Gertz Department Store and a large Christmas tree decorated by Frank Lazzaro of Richmond Hill will be on display.

Mrs. Beverly Weintraub of Floral Park is serving as party chairlady, as she has for more than 20 years. Assisting her are Saul Saveth of Bayside, Billie Eliot of Rego Park, Mary Winters of Cedarhurst, Betty Banks of Jackson Heights and Dan Hofmann of Antun's staff.

Approximately 100 volunteers, including members of the Knights of Pythias, Montessori Lodge, and students from Archbishop Malloy High School, will assist at the party. Volunteers will be at Antun's tomorrow night preparing for the party and setting up a floor-to-ceiling display of toys.

During the past 25 years, Kaner has entertained more than 57,000 children at his parties. The columnist, who also states a summer outing to Rockaways Playland amusement park, has been cited by more than 25 organizations for his efforts in behalf of children.

Among those contributing toys for the party are the Ideal Toy Co. of Hollis, Aurora Plastics of Hempstead, the N. Telephone Co., Retail Food Clerk's Union. Local 1500: International Production, Service and Sales Employees Union, Uneeda Doll Co. and Mego Toys.

Comic books and children's books are being donated by the Marvel Comics Group and Dell Publishing Co. while balloons, buttons and novelties are being provided by Columbia Advertising of Jamaica and the Toy Balloon Company. Party hats are being contributed by the B C Advertising Corp. of Hewlett.

Pathmark Supermarkets, the Royal Lancer Restaurant, Lake Success, and Marathon Enterprises and Concourse Provisions are providing hot dogs and hamburgers for the party with soft drinks donated by Pepsi-Cola Metropolitan Bottling Co. of Long Island City.

Ice cream is being provided by the Sedutto Ice Cream Co., Staten Island with potato chips and pretzels donated by the Lorenz-Schneider Co., New Hyde Park. Candy is being supplied by Barrinini Candy Co. and Irving Schlein of Jamaica Estates with the ITT Continental Baking Co. contributing Twinkies and party novelties.

Andrew Woskiwiak of Howard Beach will be present with his cotton candy machine, there will be bubble gum of the kinds donated by James Pasta of Woodhaven and party goods and favors donated by Thermo-Form Plastics.

Also contributing to help stage the party are Jerry Fox of Pathmark Supermarkets, Stanley Shapiro of the Royal Lancer Restaurant, Robert Roberts of Flushing, the King Broder Talent Agency, Sidney Spielfogel of Inter-State Cigar Corp. and Frank and John Antun who donate the party site facilities.

Music for the party is provided through courtesy of the Music Performance Trust Fund of Local 802, American Federation of Musicians.

LEGISLATION TO CREATE THE INDIAN PEAKS WILDERNESS AREA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado (Mr. WIRTH) is recognized for 5 minutes.

Mr. WIRTH. Mr. Speaker, on November 8, 1977, I introduced the following bill which I wish to include in the RECORD for the purpose of informing my colleagues as to its substance.

H.R. 10068

A bill to create the Indian Peaks Wilderness Area in the Arapaho and Roosevelt National Forests in Colorado and to authorize the Secretary of the Interior to study the feasibility of revising the boundaries of the Rocky Mountain National Park

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That an area of land within the Arapaho and Roosevelt National Forests in Colorado comprising approximately seventy-four thousand eight hundred and fifty acres (as generally depicted on a map entitled "Proposed Indian Peaks Wilderness Area and Proposed Study Area Boundaries for Rocky Mountain National Park", dated July 17, 1977) is hereby designated for purposes of the Wilderness Act (16 U.S.C. 1131-1136) as a wilderness area and shall be known as the Indian Peaks Wilderness Area.

SEC. 2. The Congress finds and declares that it is in the national interest that the Indian Peaks area be designated as wilderness within the National Wilderness Preservation System, in order to preserve this area as an enduring resource of wilderness which shall be managed to promote and perpetuate the wilderness character of the land and its specific multiple values for watershed preservation, wildlife habitat protection, scenic and historic preservation, scientific research and educational use primitive recreation, solitude, physical and mental challenge, and inspiration for the benefit of all of the Ameri-

can people of present and future generations.

SEC. 3. As soon as practicable after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Indian Peaks Wilderness Area with the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives and such description shall have the same force and effect as if included in this Act, except that correction of any clerical or typographical errors in such map and description may be made. Such map and description and the map referred to in the first section of the Act shall be on file and made available for public inspection in the office of the Chief of the Forest Service of the Department of Agriculture.

SEC. 4. The Indian Peaks Wilderness Area shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

SEC. 5. (a) The Secretary of the Interior (hereinafter referred to in this section as the "Secretary") shall make a comprehensive study evaluating the feasibility and desirability of revising the boundaries of Rocky Mountain National Park to include the Indian Peaks Wilderness established by the first section of this Act and all or part of additional areas designated as "park study" on the map described in the first section of this Act.

(b) The Secretary shall submit to the President and Congress no later than two years after the date of enactment of this Act a report of his findings and recommendations accompanied by—

(1) a plan for the administration of the park study area, including the Indian Peaks Wilderness, indicating proposed boundaries, access or other roads, visitor facilities if any, and proposed management options applicable to the area and their impact on the factors listed in subsection (c) of this section;

(2) a statement of the estimated Federal cost for acquisition, development, and operation of such area;

(3) a coordinated study plan developed after consultations with the Forest Service of the Department of Agriculture regarding compatible management of adjacent Federal lands including assessment of offsite transportation, economic, and social impacts on landowners and local governments; and

(4) proposed legislation for establishment of such revised park boundaries.

(c) Both the Secretary's findings and conclusions regarding revision of the boundaries of Rocky Mountain National Park and the plan for administering that area shall be developed after consultations with the Forest Service of the Department of Agriculture, and with State and local political subdivisions which may be affected, and shall take into consideration, at a minimum, the following:

(1) environmental preservation of the area;

(2) State and local economies;

(3) the natural, historical, cultural, scenic, and geologic environment;

(4) the management and protection of fish and wildlife habitats and resources;

(5) the management of timber, grazing, mineral, and other commercial activities;

(6) the occupancy of existing homesites, campsites, commercial and public recreation enterprises, and other privately owned properties and their future development;

(7) the environmental impact on counties and local communities; and

(8) the interrelation between recreation areas, wilderness areas, forest and parklands.

(d) There are hereby authorized to be appropriated not more than $100,000 in the fiscal year ending September 30, 1979, and $100,000 in the fiscal year ending September 30, 1980, to carry out the provisions of this section. The Secretary may use up to 10 per centum of the funds authorized to be appropriated to support local participation in the preparation of the study and plan.

A TRIBUTE TO SENATOR JOHN L. McCLELLAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey, (Mr. RODINO) is recognized for 5 minutes.

Mr. RODINO. Mr. Speaker, in the House and of course in the other body, and on both sides of the aisle, the passing of Senator McCLELLAN has left a deep, shared sense of loss.

The Senator from Arkansas and I, of course, could differ profoundly on many issues of common concern, but the Senator was always a man of grace, a man of wisdom, and a man of decency.

It was my privilege to work very closely with the Senator on numerous occasions and I had come to regard our relationship as a special one and in many ways a very personal one. Mr. Speaker, the Senator's impact on the development of Federal statutory law, of course, is enormous and will continue to be felt in the years ahead. But it is the personal loss, the loss of a decent gentleman that we mourn today.

To Senator McCLELLAN's wife and to his family, I wish to extend my deepest personal sympathies.

CONVEYANCE OF TITLE AND OWNERSHIP OF CERTAIN NATIONAL FOREST LANDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wyoming (Mr. RONCALIO) is recognized for 5 minutes.

Mr. RONCALIO. Mr. Speaker, in 1949, Ben Boschetto, Sr., purchased a small parcel of land in the Hoback Canyon, Sublette County, Wyo.; and began to make improvements on that land. He paid taxes on the entire 3 acres and when his son, Ben Boschetto, Jr., inherited the land, he in turn continued payment of those taxes on a full 3 acres.

Ben Boschetto, Jr., had the land surveyed in 1974 and learned, for the first time, that the legal description of ownership only covers 0.42 acres; and the balance of that property belongs to the U.S. Forest Service. Prior to learning of the legal description, his father had constructed a fence surrounding the 1.27 acres of land with improvements on it.

Today I am introducing a bill which would direct the Secretary of Agriculture to sell to Mr. Boschetto the remaining 2.58 acres not legally owned by him, but which he has improved and on which he has paid taxes.

Mr. Boschetto is willing to pay a reasonable sum to have title to the land, and I ask my colleagues to look favorably on this legislation so that he can finally be allowed to acquire this property. He has tried to do so administratively, but attempts have failed.

THE STATUS OF THE CONGRESSIONAL BUDGET FOR FISCAL YEAR 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. GIAIMO) is recognized for 5 minutes.

Mr. GIAIMO. Mr. Speaker, as called for in the Congressional Budget Act, the House Budget Committee has notified the Speaker of the House on the status of the fiscal year 1978 congressional budget. A copy of my letter to the Speaker and the committee's report are attached at the end of these remarks. I would like to inform my colleagues of the House how the Congress stands with regard to the budget resolution it adopted on September 15.

Since my previous report to the House on November 15, the Office of Management and Budget has released its reestimates of spending for fiscal year 1978. This revision takes into account the most recent information on the economy as it affects the spending rate of Federal programs as well as data made available at the close of fiscal year 1977. Upon receipt of this information from OMB, the CBO and the Budget Committees reviewed these reestimates and have now made the necessary adjustments to the current level of spending.

Therefore, the current level for budget authority, $485 billion, reflects an increase of about $1.3 billion since my last report to the House. This amount is approximately $15 billion less than the appropriate level for budget authority as specified in the second resolution. With regard to outlays, the net effect of reestimates has been a decrease of about $3 billion, resulting in the current level of $454.7 billion. This leaves a margin of $3.5 billion within the outlay limit of the second budget resolution.

Thank you, Mr. Speaker.

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE BUDGET,
Washington, D.C., November 29, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedures which it had adopted in connection with its responsibilities under Sec. 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending. I am herewith transmitting the status report under H. Con. Res. 341, the Second Budget Resolution for fiscal year 1978. This report reflects the resolution of September 15, 1977, estimates of budget authority, outlays and revenues revised through November 28, 1977, and all completed action on spending and revenues measures as of close of legislative business, November 4, 1977.

Sincerely,

ROBERT N. GIAIMO,
Chairman.

REPORT TO THE SPEAKER OF THE U.S. HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1978 CONGRESSIONAL BUDGET ADOPTED IN H. CON. RES. 341—REFLECTING COMPLETED ACTION AS OF NOVEMBER 28, 1977

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate level	500,100	458,250	397,000
Current level	485,148	454,727	398,068
Amount remaining	14,952	3,523	1,068

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $14,952 million for fiscal year 1978, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 341 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $3,523 million for fiscal year 1978, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 341 to be exceeded.

REVENUES

Any measure that would result in a revenue loss exceeding $1,068 million for fiscal year 1978, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 341.

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., November 23, 1977.

Hon. ROBERT N. GIAIMO,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for these items contained in the most recently agreed to concurrent resolution on the 1978 budget.

This report revises my last report, as of November 4, 1977, to reflect reestimates recently developed from review of the 1977 actual budget outcome and the President's November budget revisions. These reestimates result in a net increase in budget authority or $1,286 million and a net decrease of $3,066 million in outlays. The report has also been adjusted to show changes in the status of eleven bills signed into public law since November 4.

[In millions of dollars]

	Budget authority	Outlays	Revenues
1. Enacted	426,381	412,838	398,068

REINTRODUCTION OF CONCURRENT RESOLUTION TO ASSURE EQUAL ACCESS TO QUALITY HEALTH CARE IN RURAL AREAS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

Mr. BEDELL. Mr. Speaker, I am today reintroducing, with 38 cosponsors, my concurrent resolution expressing the sense of the Congress that HEW's recently published proposed National Guidelines for Health Planning should not be allowed to close small, rural hospitals.

On September 23, the Department of Health, Education, and Welfare published some proposals for national health planning guidelines in the Federal Register and since that time I have received more than 4,000 letters objecting to them. The hospital administrators in my district, as well as the Health Systems Agency for my area, have told me that implementation of these guidelines could result in numerous hospital closings, and I believe the social cost of this would be unacceptable.

Specifically, the guidelines mandate several standards that a local Health Systems Agency must meet in preparing a health plan for its region of the country which I believe are unrealistic for many small communities. The guidelines propose, among other things, a bed occupancy rate of at least 80 percent; 500 annual deliveries by an obstetrical unit; and less than 4 beds per 1,000 population. At present, there are only a few hospitals in my district which meet these standards, and it is my understanding that many other areas of the country would also have trouble meeting them.

HEW has told me that, under present law, they have no real means of enforcing the proposed guidelines, should they be implemented. Yet, the HSA in my area tells me that while this statement is technically correct, it does not reveal the whole story. In the future when a hospital wants to replace deteriorating equipment, an HSA could deny permission on the basis that the proposed expenditure was not within the bounds required by the HEW guidelines. Subsequently, I am told, if the hospital went ahead and purchased the equipment anyway, HEW is permitted by current law to

withold depreciation reimbursements, which come from medicare-medicaid funds, for that particular piece of equipment. Many small hospitals would be dependent on this money, and would not be able to afford the quipment without it and if they could not have the equipment, they would be forced to give up the service rendered by that equipment. When I asked HEW about this, they did not deny it.

Clearly such a development could seriously jeopardize the proper functioning of a hospital. I cannot see the sense of such a plan if it would cause the closure of the only hospital providing primary care service for a local community, yet it seems that under these proposed guidelines, such an occurrence is a distinct possibility. Surely this would contradict our Nation's effort—as stated in these guidelines themselves—to provide equal access to quality health care at a reasonable cost for populations in rural areas.

Mr. Speaker, I think one of the fundamental problems with these guidelines is that they were prepared in extreme haste and have not been properly thought out. Under the law, the Secretary of HEW is required to consult with the National Council on Health Planning and Development, various federally supported health planning agencies, health provider organizations and others in issuing these guidelines. This was not done prior to the release of the guidelines on September 23.

Furthermore, the original intent of the National Health Planning and Resources Development Act of 1974 (P.L. 93-641), which these guidelines are supposed to implement—was to permit localities to make their own health plans. These guidelines, however, force localities to make their plans on a national basis and what started out as bottom-up planning, would now be changed to a top-down system if these guidelines are allowed to go into effect.

Finally, I would hope that my colleagues would be aware of the fact that what Congress originally intended as planning device is now being altered into a cost-containment tool—before the Congress has an opportunity to fully debate the hospital cost containment legislation that will come up next year. I do not believe that the best interests of the American people are served by such end-run tactics by the executive branch.

Mr. Speaker, I am terribly concerned that these proposed HEW guidelines for health planning may inadvertently jeopardize the quality of health care in rural America, and as a result I would welcome as many cosponsors as possible on this resolution.

The text of the resolution follows:

H. Con. Res. 411

Concurrent resolution to assure equal access to quality health care for populations located in rural areas

Whereas the Notice of Proposed Rulemaking regarding National Guidelines for Health Planning filed by the Secretary of Health, Education, and Welfare on September 22, 1977 (42 Fed. Reg. 48502-48505), has generated great public concern that the guidelines would impose unfeasible performance requirements upon small, rural hospitals, ultimately forcing many of those hospitals to close;

Whereas many small, rural hospitals provide local communities with medical care of a kind and a quality that are not readily available at less accessible metropolitan hospitals; and

Whereas equal access to quality health care at a reasonable cost for populations in rural areas is a priority of the Federal Government: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that the Secretary of Health, Education, and Welfare should not include in the National Guidelines for Health Planning any guidelines which would directly or indirectly cause the closing of any small, rural hospital which is the only hospital providing primary care services to a local community.

ARLINGTON, TEX., IS HOST

(Mr. MILFORD asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. MILFORD. Mr. Speaker, it gives me great pride and pleasure to publicly commend the Arlington Jaycees, the Texas Bowling Center Association, and the Texas Association for Retarded Citizens, who have joined together to host the Kennedy Foundation Special Olympics Bowling Tournament for the State of Texas. The tournament will be held in Arlington, Tex., on December 9 and 10, and it will draw more than 800 mentally retarded citizens together for 2 days of sport and competition.

The purpose of this competition is to provide, through the development and display of personal skills, a building of self-confidence and self-reliance for each of the participants. This is a great step toward helping these people to become more useful and productive members of society.

The city of Arlington has passed a resolution designating December 9 and 10 as Special Olympics Weekend in Arlington, Tex., and I wish to join with them in recognizing this fine program and the great value it brings to the hundreds of mentally retarded citizens involved. I include the resolution in the Record, as follows:

Whereas, the mentally retarded citizens of Texas comprise a significant part of the population; and

Whereas, these mentally retarded citizens are entitled to the right and opportunity to build self-confidence and experience in competition within their peer groups; and

Whereas, the demonstration of personal skills with personal recognition helps, through training and development, the social and psychological awareness of each individual toward more useful and productive citizenship; and

Whereas, the Texas Association for Retarded Citizens, Texas Bowling Center Association and the Arlington Jaycees are committed to these philosophies, striving to fulfill these needs through the December 9th and 10th, 1977 Kennedy Foundations Special Olympics Program; and

Whereas, Special Olympics provides the necessary factors of competitive experience, training and self expression which enhance the skills and growth of the mentally retarded as individuals.

Now therefore be it resolved that the United States House of Representatives does applaud and commend all the efforts of the Texas Association for Retarded Citizens, Texas Bowling Centers Association and the Arlington Jaycees in their operation of Special Olympics in Arlington, Texas; and

Be it further resolved that December 9th and 10th, 1977, be named Special Olympics Weekend in Arlington, Texas for all citizens, officials, dignitaries and participants of the Special Olympics events to be held on that weekend.

RUSSIA CAUGHT WITH HAND IN COOKIE JAR

(Mr. SIKES asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, the action of Somalia in expelling Russian military personnel provides the United States with an unparalleled opportunity to improve relations with Somalia. The courageous step taken by President Siad's government opens the door for the Western powers to assert new leadership throughout the Red Sea, Persian Gulf, and Indian Ocean areas. The naval base at Berbera on the point of Africa is one of the most strategic locations in the entire area. With the Russian influence strongly diminished, the United States will be derelict if we do not move quickly to take advantage of the potential there.

I commend the Somali Government for its courage in closing the door to Russian manipulation in that country and for enabling the Western powers to enjoy closer relations with Somalia. The Somali action provides the Western powers with the best break they have enjoyed since the Russians were expelled from Egypt. I have urged the U.S. Government to move immediately and take full advantage of the opportunity.

In simple terms, Russia got caught with their hands in the cookie jar. They have been giving support to the new Marxist government in Ethiopia which kicked out U.S. personnel. The Somalis have resented this because the Ethiopians are their longtime enemy and Somalia is backing insurgents who are seeking to gain control of the Ogaden province in Ethiopia. The Ogaden formerly was a part of Somalia. Russian support for the Ethiopians was more than the Somalis were willing to swallow. Let us hope the U.S. recognizes the necessity to act. Berbera is badly needed by the West.

LAUREL HILL, ET AL.

(Mr. SIKES asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. SIKES. Mr. Speaker, from the November 23 issue of the Pensacola Journal Sports Writer, Robert Robinson, comes an intriguing article, "Now, They Know It's Laurel Hill, Not 'Laurel Who?' "

It refers to a small town in Okaloosa County, Fla., which has just won the 1977 Florida State volleyball champion-

ship trophy. Here is what Mr. Robinson said:

Hear ye! Hear ye! The name is not "Laurel Who?" as most people, attending last Saturday's state volleyball tournament at the University of Tampa, may have thought to themselves.

The name is Laurel Hill.

You know, the little Okaloosa County town which lies just north of Crestview and houses the "big" 1977 Florida state high school volleyball championship trophy.

Laurel Hill, not Laurel Who.

Coach Betty Howard and the Laurel Hill girl's volleyball team put the town on the map this past weekend by winning the Class A state championship, 15–5, 15–6, over Tampa Prep High School in Laurel Hill's second year of interscholastic competition.

Plaudits for Okaloosa County schools do not stop there. Choctawhatchee High School in Fort Walton Beach has just won first place in Florida class AAAA football rating. The head coach of the Choctawhatchee High School Indians is Eddie Feely. They won by defeating Tate High School from Escambia County. In this contest, both were northwest Florida schools which had won over competition from larger schools throughout the State.

There is still more. There is musical excellence as well:

Choctawhatchee and Fort Walton Beach high schools bands have been extended invitations to perform during the halftime shows at major college bowl games.

Fort Walton, under the direction of Ernest Hebson, is headed for the Rose Bowl game in Pasadena, Calif.

Choctaw band director Jimmy Jones said Tuesday his "Style Marchers" received invites to the Cotton, Orange, Rose and Sugar Bowl games, but refused them because Choctawhatchee is playing in the state high school playoffs.

The Style Marchers, however, have accepted an invitation to the Cherry Blossom Festival and parade in Washington, D.C., next spring. The trip also will include a stop in Toronto, Ont., Can.

Choctaw performed at halftime of a New Orleans Saints National Football League game at the Superdome in New Orleans, La., earlier this season.

A CLEANUP OF AN NBC DEMAGOGIC DOCUMENTARY

(Mr. MILFORD asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MILFORD. Mr. Speaker, I realize that the real "in thing" these days is for the press to lambast people that work in Government. One simply cannot write a news item or broadcast a story without lashing out at the "stupid" politicians or the "lazy" bureaucrats.

With the Sullivan decision, several years ago, the press no longer has to concern itself about staying within the truth when writing or broadcasting news items dealing with "persons in the public eye." That makes politicians and Government officials open game, because they virtually have no protection under libel and slander laws.

In recent years, during a period when our society has been becoming more complex on a daily basis, our citizens have been turning increasingly to television as a sole source for news information. The average TV news item is about 40 seconds in length and almost never exceeds 3 minutes. Obviously no complex subject can be covered or examined with any degree of intelligence in such a short amount of time.

When TV networks cannot avoid facing extremely complex subjects, they resort to a longer news item and call it a documentary Subjects receiving the documentary treatment in newscasts may receive up to 5 minutes of air time.

During the evenings of November 2, 3, and 4, 1977, "NBC News" aired three of these documentaries dealing with the very complex subject of "air safety." In essence, the documentaries were demagogic criticisms of the Federal Aviation Agency backed up by out-of-context quotes from various air safety experts. Gross amounts of factual information were totally ignored by the authors of the so-called documentaries.

While the CONGRESSIONAL RECORD does not have the same number of readers as NBC has viewers, I feel it important that the real truth be known concerning the junk that was broadcast by NBC.

At my direction, statements made during the NBC broadcast have been researched. If the statement was false, misleading, or otherwise in error, the truth was then outlined together with references. This will allow any serious researcher to verify the accuracy of this critique.

The false or misleading statements from the NBC broadcast and the critique is herewith enclosed for the RECORD:

ANALYSIS OF NBC SEGMENT 3 BROADCAST REGARDING THE FEDERAL AVIATION ADMINISTRATION, AIRED NOV. 2–4, 1977

The American record of air safety is the finest in the world—that fact cannot be disputed. The credit belongs to a number of groups, including aircraft manufacturers, the airlines, trade associations and professional groups, consumer groups, labor organizations, the travelling public, the Congress, and the FAA. Each has contributed meaningfully to aviation safety and, at one time or another, has been right when others have been wrong. Through the dedication and persistence of all, and out of a mutually shared concern, the cause of aviation safety has been greatly advanced and continues to achieve even higher levels.

It is important that the American public's confidence in their air transportation system not be undermined. Aviation growth in the United States shows a present high level of confidence in the safety of the system—a confidence fully justified by the system's performance. Also important is the confidence of the American public in the government's concern for their welfare. Similarly, we believe it important that unjustified charges given wide distribution not result in political solutions to technological problems. Last, it is important that the reputations of the men and women who are the FAA should not be scarred by an inaccurate portrayal of their capabilities and by allegations which call into question their sincerity and devotion to the advancement of air safety. For these reasons, the FAA would like to provide information not included in the NBC News presentation of November 2–4, 1977 that we believe far more accurately documents the current state of aviation safety.

Objective journalism is a valuable tool for ensuring effective government and the FAA encourages constructive criticism. The FAA is fully cognizant that significant gains in aviation safety have emanated from constructive criticism offered by concerned observers. The FAA recognizes, however, that errors can occur in even the most conscientious news reporting. This is particularly true when the subject is as technologically complex as aviation safety. In fact, the FAA believes it is not realistic to attempt to deal with as many phases of aviation safety, as were recently addressed by NBC News, in the short period of time allotted. The resulting product, as the NBC telecast so aptly demonstrates, tends to be misleading, inaccurate, and incomplete.

To address the various representations made during the NBC News telecast, the FAA has separated the program into topical segments and set forth below the major points it would offer in rebuttal. The FAA notes that many of these points were made to the NBC News team during the period the show was being prepared but for reasons undisclosed to the FAA were deleted from the program. The FAA finds this deletion of relevant facts to be particularly disturbing because it made its facilities and personnel available to NBC News for the express purpose of giving NBC News the necessary insight to accurately report on this complex subject. Should any person or organization desire further information than is set forth below, the FAA is ready to provide it.

1. Statement: "You're going on a plane trip. Maybe you're worried the flight will be late, or the airline will lose your suitcase. Should you be worried about a safe flight? Yes, you should." "[I]f you fly very often, you've nearly crashed more than once and never even knew it." (November 2; Ms. Ellerbee).

Response: On January 13, 1977, the Chairman of the National Transportation Safety Board, an independent government agency whose responsibility is to promote transportation safety, stated that United States civil aviation, including both air carriers and general aviation, achieved a generally excellent safety record in 1976. The Chairman further observed that air carriers recorded the lowest accident total in commercial aviation history and the fewest fatalities in more than 20 years. "Aviation's 1976 record is especially heartening because it represents further improvement on a good year in 1975. It also continues downward trends in several accident rates which suggests significant safety progress over a number of years." This statement and numerous supporting statistics are contained in an NTSB safety information press release dated January 13, 1977.

The domestic scheduled airlines are the safest mode of transportation today, and the FAA is continuing to develop and implement safety measures to make further gains in the future. NBC offered no statistical support for its bold allegation that if you fly very often you've nearly crashed more than once. Available statistics clearly refute the NBC statement. These statistics indicate not only the remarkable safety record for domestic scheduled air carriers but also the unlikely probability of a passenger on a domestic scheduled air carrier ever being involved in an accident. For example, the following table, from a January 13, 1977 press release by the National Transportation Safety Board, shows a progressive improvement in safety with respect to United States air carriers and illustrates the very low percentage of accidents and fatalities both per hours flown and per miles flown. For example, between 1966 and 1976, the total accident rate per 100,000 aircraft hours flown declined by almost seventy percent (1.469 versus 0.436) and the total accident rate per million aircraft miles flown declined by more than seventy-five percent (0.042 versus 0.010).

ACCIDENTS, ACCIDENT RATES, AND FATALITIES U.S. AIR CARRIERS (CERTIFICATED ROUTE, SUPPLEMENTAL, AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT) 1966-76

Year	Accidents		Fatalities				Hours flown	Miles flown (thousands)[1]	Accident rates			
									Per 100,000 aircraft-hours flown		Per 1,000,000 aircraft-miles flown	
	Total	Fatalities	Passengers	Crew	Other	Total			Total	Fatalities	Total	Fatalities
1966	75	8	137	27	108	272	5,104,984	1,768,458	$1.469	$0.157	$0.042	$0.00
1967	70	12	229	39	18	286	6,868,842	2,179,739	1.193	.204	.032	.00
1968	71	[2]15	306	37	6	349	6,404,260	2,498,848	1.109	.203	.028	.00
1969	63	[2]10	132	22	4	158	6,740,199	2,736,596	.935	.134	.023	.00
1970	55	8	118	24	4	246	6,470,351	2,684,552	.850	.124	.020	.00
1971	48	[2]8	174	23	6	203	6,386,662	2,660,731	.752	.094	.018	.00
1972	50	8	160	17	13	190	6,302,160	2,619,043	.793	.127	.019	.00
1973	43	9	200	26	1	227	6,504,819	2,646,669	.661	.138	.016	.00
1974	47	9	421	46	0	467	5,978,480	2,464,295	.769	.134	.019	.00
1975[3]	45	3	113	11	0	124	6,040,841	2,477,764	.745	.050	.018	.00
1976 prel	28	9	39	6	0	45	6,130,000	2,536,000	.457	.065	.011	.00

[1] Nonrevenue miles of the supplemental air carriers are not reported.
[2] Includes midair collisions nonfatal to air carrier occupants, excluded in fatal accident rates 1968—2, 1969—1, 1971—2).
[3] Beginning in 1975, accidents involving commercial operators of large aircraft are included.
Note: Sabotage accident occurring Sept. 8, 1974 is included in all computations except rates.

A comparison between air transportation and other modes of transportation clearly indicates how safe travel by air carrier is.

FATALITY RATES PER 100,000,000 PASSENGER MILES

Year	Domestic scheduled air carriers	Railroad passenger trains	Buses	Passenger automobiles and taxis
1949-51	1.26	0.36	0.21	2.87
1959-61	.67	.10	.18	2.20
1972-75	.11	.19	.20	1.57

Fatality statistics for various modes of travel also depict that the scheduled airlines are among the smallest contributors to fatalities.

Mode	Fatalities in 1975	Fatalities in 1976
U.S. scheduled air carriers (all occupants)	122	42
Commercial buses (occupants)	80	100
School buses (occupants)	50	60
Rail/highway grade crossing	1,345	1,126
Water transport drownings	978	1,100
Motorcycle (riders)	2,800	3,000
Collision with pedacycle	1,000	900
Passenger cars (occupants)	27,000	27,400

Viewed from another perspective, the total number of fatalities for U.S. scheduled air carriers for the entire year of 1976 amounted to only 6 percent of the total number of motor vehicle deaths estimated by the National Safety Council to have resulted from the three days of the Labor Day Holiday.

It is also noteworthy that during the entire year of 1976, U.S. supplemental air carriers had no fatal accidents.

2. Statement: "Captain Power Waters' views are shared by many pilots, but because they fear reprisal, they are seldom willing to speak in front of a camera." (November 2; Ms. Ellerbee).

Response: If this statement is intended to imply that the FAA would seek reprisal against a pilot for criticizing the FAA, we could not disagree more. There is no basis for such an accusation either in fact or in theory. The FAA has not noted any reluctance on the part of individual pilots or such organizations as the Air Line Pilots Association to clearly enunciate their views, pro and con, concerning aviation safety. The FAA routinely receives comments from individual pilots and their associations in all rulemaking that impacts pilots. Similarly, the FAA reviews numerous letters from pilots and their associations dealing with suggestions for improving the system. The FAA encourages participation of its people at gatherings of pilots and we find that a frank exchange of views usually occurs. Simply stated, the FAA has never noticed any timidity on the part of pilots or their associations to publicly disagree with the FAA, nor do we believe they should feel constrained in expressing their views.

3. Statement: "The FAA's been criticized for not hiring enough air traffic controllers."

Response: NBC has not indicated who has criticized the FAA nor has it offered any data in support of the statement. There will always be individuals or organizations whose parochial interests are enhanced by alleging that more people are needed to do a job. The FAA is, however, committed to employing only those numbers of individuals necessary to adequately fulfill its role; it is opposed to inefficient employment practices. For that reason, the FAA has conducted careful studies to ascertain proper staffing for different functions within the agency and has developed a staffing standard which enables it to objectively determine staffing needs throughout the air traffic system.

At the end of each fiscal year, every air traffic control field facility submits its source data for the 90th percentile day (37th busiest day) of the fiscal year just ended. The source data includes the number of aircraft handled each hour of the day for each center sector and terminal radar complex and the average flight time for each sector. The computerized staffing standard is applied to each facility's source data adjusted to the traffic forecasted for the budget year. The resultant printout is reviewed by the facility and the regional office, and any nonstandard staffing requirements are noted. The combined staffing requirements of facilities form the basis for the air traffic budget submission. The staffing requirements are reviewed, as part of the budget review process, by FAA top management, the Office of the Secretary of Transportation, the Office of Management and Budget, and the House and Senate Appropriations Committees.

Applying the FAA standard to FY 1977 activity levels yields a staffing requirement of 11,137 positions in the centers and 11,670 in the towers. (These figures include air traffic controllers and all professional support personnel). Our authorized staffing for FY 1977 was 11,348 positions for centers and 11,708 for towers. Actual on-board staffing is normally about 2 percent below the authorized. On-board staffing at the end of the year was 10,981 in the centers and 11,385 in the towers which is in line with the total number prescribed by our staffing standard.

Overall, in each of the fiscal years, 1975–1977, the employment levels of professional positions at the centers and towers combined have been at or between 97 and 98 percent of the levels authorized by Congress.

4. Statement: "O'Hare Airport is the busiest in the world, but the chance is one-in-two our plane is being handled by a controller who has not finished his training. At other airports, the chance of this situation occurring is one-in-four." (November 2; Ms. Ellerbee).

Response: The FAA never permits aircraft to be handled by unqualified controllers. Any controller that handles traffic has had hundreds of hours of simulated training before ever handling actual traffic. It is true that after the simulated training these controllers are permitted to handle actual traffic under the direct, on the spot, supervision of a controller that has a substantial amount of actual experience at that particular facility. This raises an important fact; even if a controller has had years of actual experience, when that controller moves to a different facility, the controller receives "training" as to the actual operations of the new facility.

FAA has a comprehensive training program for controllers which begins with approximately sixteen weeks of pass/fail academic training at the FAA Academy. If an individual successfully completes the Academy training, the individual is placed in a facility where that person receives both classroom and on-the-job training. The assignments are progressively responsible, and the individual receives direct "over the shoulder" supervision by a fully proficient controller until checked out and certified at performing a given function. Once the ability to perform a given function has been satisfactorily demonstrated and the individual so certified, that person is permitted to perform the function under more general supervision.

For example, prior to even entering the radar training phase, the controller must correctly perform live control duties as part of an operational team for approximately one or two years. The assignment to radar training is an acknowledgement by the supervisor that the demonstrated control proficiency of the controller is satisfactory, and that normal progression to full journeyman status can be achieved.

When radar training is finally authorized, the Air Traffic Training Handbook provides very specific instructions which must be complied with by the instructor controller. The instructor must be properly qualified for the type of control to be exercised; he is not permitted to perform collateral duties which might infringe upon exercising close and alert supervision during this training period. The instructor must also ensure that the complexity of the traffic situations encountered during the testing phase is compatible with the specialist's ability. Our entire work force has been trained in this manner, and the FAA can attest to the safest air traffic control system in the world.

The "journeyman" level for a controller is the highest grade level which a non-supervisory controller can attain in a facility. Any controller below the journeyman level is a "developmental" controller. The fact that a controller is not a journeyman does not in any way mean that he is an inexperienced

employee. For example, a controller may be a journeyman controller at a low level facility and may have controlled traffic for many years. But if that controller is reassigned to a higher level facility, he then becomes a "developmental" controller, notwithstanding his many years of experience, until he is "checked out" on all positions and equipment at the new facility and promoted to the journeyman level for that facility. Even if a controller has been checked out on all positions and equipment, and has demonstrated full capabilities in all phases of air traffic control, he is still "developmental" until promoted to the journeyman level.

In short, a controller's training is over a period of years before he is eligible for journeyman status. The average training time before an en route controller is checked out and certified on all positions and equipment is 4.34 years; for terminal controllers it is 2.9 years. With regard to finishing their training, as with pilots and many other professions, journeyman controllers continually undergo recurrent training within their facilities.

5. Statement: "At many U.S. airports, those in Los Angeles, Boston, New York and Washington, to name a few, once the plane gets up enough speed to get off the ground, the pilot will have to make the plane quiet for the people who live near the airport. He does it by reducing power after take-off. It may be dangerous, but local laws require pilots to fly this way, and the FAA allows it." (November 2; Ms. Ellerbee). "You pull the power back until the airplane almost falls out of the sky, and climbs on a hot day with a full load, like about maybe 600 feet a minute, where normally it's 1500 to 2000 feet a minute. But you got to pull the power back so you don't bother the neighbors around the airport." (Captain Waters). "The agency, FAA, apparently has more concern, in some instances for—for the local concern on noise abatement then they do about the safety of the airplane." (Mr. Leyden).

The FAA's primary role is aviation safety. The FAA's concern with noise abatement is substantial but always necessarily secondary to safety. As FAA Administrator Bond stated, in a portion of his interview with NBC which the network omitted from its presentation, "[o]ur first priority is always safety, and if there is a compromise between noise and safety, we must always choose safety, which is not only safety of passengers in flight, of course, but on the ground as well."

Noise abatement procedures are safe. The noise abatement departure procedures in use today call for a reduction in power only after reaching a safe airspeed configuration, and a safe altitude, approximately 1000 feet above the ground. This power reduction provides a climb gradient with more than adequate safety margins built into it. The transition from a rate of climb of 1500 to 2000 feet per minute to the 600 feet per minute rate of climb is fully within the pilot's control. A 600 feet per minute rate of climb is not unsafe.

The air carriers and the Air Transport Association have worked with the FAA's expert personnel to develop takeoff noise abatement procedures. The individual air carriers place these procedures in their company manuals and at this point they are reviewed by the FAA to ensure that they are safe. The procedures are sufficiently flexible as to allow the pilots to adjust for abnormal operating conditions. When individual airports propose noise abatement procedures, these are likewise reviewed by the FAA from the standpoint of safety. The FAA is unaware of any noise abatement procedure in effect today which is unsafe.

One interesting note on this subject is that in a May 1977 Executive Board Committee Recommendation of the Air Line Pilots Association, which recommended adoption of a standardized takeoff procedure similar to but different from the ATA version, the view was expressed that ". . . the guidelines provided by the ATA to airlines have not been sufficiently clear to allow the airlines to achieve maximum *economic benefit* and maximum *noise relief* to those exposed to aircraft noise. . . ." (Emphasis supplied.) Hence, ALPA's decision to propose a substitute standard noise abatement procedure was not generated by a perceived safety deficiency but out of expressed concern for maximizing economic benefit and noise relief.

6. Statement: "Now our pilot can worry about hitting another airplane. Every year there are more than 2,000 reported near misses, and every year 10,000 planes are added to the system. What is the pilot supposed to do?" (November 2; Ms. Ellerbee) "The FAA says, a concept that came out some 40 years ago, that you will see and be seen. And if you look out the window you will not run into another plane, you just will not do this." (Mr. Leyden)

Response: The FAA is unaware of the basis for NBC's statistics of over 2,000 reported near misses a year. The information available to FAA contradicts this statement. But, no matter how low the number might be, the FAA is attempting to cut it further.

Anyone (pilots, safety inspectors, passengers, etc.) may initiate a request for an evaluation by the FAA of a suspected near mid-air collision incident. During the four year period from January 1, 1973, to June 30, 1977, on the average 301 near mid-air collisions were reported and investigated by the FAA's Flight Standard Service annually. Each report is investigated by a Flight Standards inspector who gathers and reviews all material information concerning the alleged incident from witnesses or other sources. To give some idea of the relationship of these statistics to the toal system, focus on the fact that in 1976, FAA air traffic control towers handled 97,200,000 IFR and VFR operations and FAA air traffic control centers handled 25,300,000 IFR aircraft.

Of the 301 average annual reports, the FAA's investigation disclosed that 68 posed no hazard. In a "no hazard" finding, a determination is made that the direction and altitude of the aircraft would have made a mid-air collision improbable regardless of whether evasive action was taken. Insufficient information was available to determine whether a hazard may have been present in 12 of the remaining cases.

Of the remaining 221 incidents, 171 were classified as potential near mid-air collisions which means that an incident would probably have resulted in a collision if no action had been taken by either pilot. As to the other 50, these were classified as critical which means that collision avoidance was due to chance rather than an act on the part of the pilot.

During the 12 month period from July 1, 1976, to June 30, 1977, 1,624 near mid-air collision reports were received by NASA under the FAA/NASA Aviation Safety Reporting System (ASRS). The ASRS reports furnished to FAA are anonymous and cannot be investigated by FAA. As a result, they may or may not represent reliable data upon which to form conclusions as to the number of near misses that have actually occurred. Moreover, the FAA does have the sense that some of these reports are duplicative of those filed with the FAA.

The concept of "see and avoid" referenced by NBC news is only one of the system's requirements used to avoid mid-air collisions. It requires that vigilance shall be maintained by each person operating an aircraft so as to see and avoid other aircraft. To enhance the ability to see and avoid, aircraft may not operate at a rate of speed greater than 250 knots below 10,000 feet. This restriction on speed, coupled with the requirement that appropriate weather conditions exist before Visual Flight Rule (VFR) aircraft are permitted to operate, helps assure that the "see and avoid" concept works. Additionally, above 3,000 feet, special rules govern VFR aircraft operations. The purpose of these rules is to provide altitude separation between uncontrolled aircraft as well as between Instrument Flight Rules (IFR) aircraft and uncontrolled aircraft. More specifically, depending upon the direction of flight, different flight levels are prescribed.

To operate above 12,500 feet, with rare exceptions, all aircraft must have an altitude encoding transponder which apprises the en route controller of aircraft position and altitude thereby enabling him to provide traffic advisories and vector aircraft as necessary. Above 18,000 feet, all aircraft are under positive control.

The FAA has also established Terminal Control Areas at 21 of the large hub airports. All aircraft operating within a TCA are provided separation by air traffic control. At more than 100 other airports, the FAA has established Terminal Radar Service Areas (TRSA) in which a VFR aircraft pilot is provided separation from other participating VFR aircraft and all IFR aircraft unless he specifically does not desire the service. VFR aircraft are urged to avail themselves of this service and over 90% of arriving VFR aircraft and over 80% of departing VFR aircraft do participate.

The FAA also has aggressive educational and briefing programs designed to impress upon pilots their responsibilities in the national airspace system and to encourage general aviation aircraft to avoid airspace occupied by high performance aircraft. TCAs, TRSAs and, where appropriate in the interest of safety, high performance aircraft arrival routes are published in the Airman Information Manual or on VFR navigational charts.

Thus, while it is true that the see and avoid concept is a basic element of the air traffic control system, the connotation in the telecast is misleading to those unfamiliar with other elements of the system.

Near mid-air collisions are a source of concern to the FAA and we have undertaken aggressive programs to minimize their possibility both through R&D projects to develop better instrumentation and hardware, and through air traffic control procedures. The FAA is at this time initiating the development of a Beacon-Based Collision Avoidance System (BCAS) which will provide reliable data on potential threats to the pilot within and without surveillance coverage, will be compatible with the existing and planned air traffic control system, and will use as a base equipment the existing ATCRBS transponders. A BCAS equipped aircraft will be able to identify and react to any aircraft equipped with an ATCRBS transponder and an altitude encoder. The BCAS development program has received the unanimous endorsement of the user community and is the result of a long arduous search for a viable solution to collision avoidance.

7. Statement: "Airliners are required to carry equipment that shows the ground radar controller where the plane is. But most small planes do not have this equipment, and the FAA does not require them to, even though they may be sharing airspace with a jet carrying 300 people." (November 2; Ms. Ellerbee).

Response: This statement is a good illustration of the kind of distortion that derives from inattention to detail. To comprehend the subject matter, it is necessary to understand the way in which the air traffic control system is structured. All aircraft, large and small, operating above 12,500 feet are

required to possess an altitude encoding transponder. The majority of large passenger-carrying aircraft operate below 12,500 feet normally only during the takeoff and landing phases of their operation. Air carrier aircraft descent below a 12,500 foot level would generally take place within 30 miles of the primary airport; this is the normal control area of a terminal. This 30 mile distance is within the optimum performance capabilities of terminal radar systems which display both primary and secondary radar returns. Thus, within this 30 mile distance aircraft without transponders are identifiable by primary radar which permits the controller to provide traffic advisories when he notes a possible conflict.

Transponder equipped aircraft are automatically tracked by our present Automated Radar Terminal Systems (ARTS III) and non-transponder equipped aircraft are displayed. ARTS III A, an enhancement to ARTS III, planned for installation beginning early next year, will provide automatic tracking for non-transponder equipped aircraft. Moreover, as noted in the response portion of item number 6, a whole system of air traffic procedures is designed to provide separation of aircraft whether controlled or not.

This is but a brief sketch of the rational basis upon which the FAA has based its decision not to require transponder equipment on all aircraft. More detail could be provided but perhaps it suffices to note that even the current level usage of transponders was vigorously opposed by the users of the system and that the lack of need for transponders in areas where they are not currently required was supported by many of the users. In this regard, we would quote from a summary of the users' comments contained in the preamble to the rule requiring transponders.

"Numerous comments of a general nature were received stating that the cost of the proposed rule changes could not be justified by the benefits therefrom. These general comments stated that requiring improved transponders and associated automatic pressure altitude reporting equipment in the specified airspace goes beyond the point of diminishing returns, is not justified by near midair collision statistics, conflicts unnecessarily with the FAA's statutory duty to encourage the development of aviation, and will be unnecessarily damaging to the less sophisticated segments of general aviation that now use posiitve control airspace, all without a corresponding significant benefit to air traffic control system safety or efficiency. While certain of these comments conceded that automatic altitude reporting had some value in heavily used airspace around airports, nearly all of these comments stated that the traffic volume in en route airspace, particularly in the western part of the United States, is far less than that needed to justify the required use of such equipment by all users of that airspace."

(Amendment 91–16, 38 F. R. 14672, June 4, 1973)

8. Statement: "Instrument landing systems are navigation aids that guide a pilot to the ground in bad weather. But according to a survey by the Airline Pilots Association, 75 percent of all the runways used by scheduled airlines in this country have no instrument landing system and no approach lights. More than half the U.S. airports used by scheduled airlines have no radar and 40 percent don't even have a tower. But 100 percent have passengers and bad weather." (November 2; Ms. Ellerbee). "If the FAA was really interested in passengers getting from A to B safely, they wouldn't allow passengers to land at airports without an instrument landing system, or a control tower, or approach lights. FAA is there to keep things safe, they don't." (Mr. Leyden).

Response: Ms. Ellerbee stated that "Langhorne Bond, the head of the FAA says it is safe for airlines to use airports without that equipment." Part of Mr. Bond's response was then televised: "Because the record demonstrates that there is no safety risk involved in that. There is no such thing as perfectly assured safety. But the risk involved is very slight. We wouldn't permit it if we thought it were unsafe." However, NBC deemed it advisable to cut off Mr. Bond's reply at the very place where he indicated a further explanation was needed: "You must go on and say the rest of the story and that is, if the weather is bad or if the visual conditions are not perfect or even good for the airports of that condition, we won't permit it. Our rules shut down operations when conditions are marginal much more early than they do with airports that are equipped with instrument landing systems or approach lights or flashing lights or runway center line lighting, or whatever. We have a carefully graduated set of minimums that allow more and more weather and marginal flying conditions depending on the instrumentation of the airport. And obviously in a case that you cite where it's a small airport and there are very few movements per day, we'd only allow operation if weather is relatively good, when visual assurance is a good substitute for the use of instruments."

Equally important, although the FAA does not necessarily dispute the statistics quoted, they can be misleading. There are 488 airports served by the scheduled airlines 321 of which are served by a total of 461 full ILS systems. These 321 airports enplane 98 percent of all scheduled airline passengers. A total of 554 ILS systems are presently installed and commissioned in the U.S. An additional 16 ILS systems will be commissioned by the end of this fiscal year. Another 84 full ILS's are in various stages of the procurement/production cycle.

It is not essential that each runway be ILS-equipped. The visibility minima for non-ILS runways are higher than those established for ILS runways. If the visibility is such that a non-ILS runway cannot be used, then flights are assigned to the ILS runway (available at the great majority of airports) or the flight is directed to an alternate airport. It also must be noted that all runways cannot accept an ILS for various reasons such as obstructions or operating restrictions.

With respect to control towers, those air carrier airports not served by tower are low activity airports. Nevertheless, the airlines are required by FAA to provide each flight operating to or from a non-tower airport with traffic information by means of radio communications. In addition, although an airport may not have an air traffic control tower, it may have a flight service station which may provide various services to aircraft, including traffic advisories.

As to the discussion concerning approach lights, more than 90 percent of the ILS runways are equipped with approach light systems and many non-ILS systems are also so equipped. If the non-ILS runways do not have approach light systems, then higher visibility minima are established. The practice of authorizing lower minima based on improved ground navigation aids, lighting aids, and airborne equipment is sound and establishes an equivalent level of safety between ILS and non-ILS instrument approach procedures.

Regarding the statement concerning the lack of radar at many U.S. airports, it should be noted that more than 96 percent of all scheduled airlines depart and arrive under terminal radar coverage. The remaining 3.8 percent operate into low activity airports averaging about 3 air carrier flights per day. Separation of aircraft is provided by use of manual air traffic control procedures which utilize distance and altitude. Manual procedures are the basic form of air traffic control and are safe.

Any evaluation of the statistics cited by Ms. Ellerbee must take into account the fact that the FAA is continually upgrading and adding to the equipment already in use throughout the national airspace system. Moreover, consideration must be given not only to the amount of time necessary to upgrade or install equipment but also to the cost involved. For example, to install and maintain an ILS system on all those runways which do not currently have them, would cost nearly $3 billion over the 15 year life of an ILS system.

It should be stressed that aircraft procedures are tailored to the specific circumstance. Requirements differ if landing aids are not present at an airport; those differing requirements are prescribed by the FAA to assure that safety is maintained. By way of analogy, consider the case of a paved versus an unpaved road. Almost without question, there would be a substantial difference in safety for an automobile to be driven 55 miles per hour down both roads. However, the speed limit on the unpaved road would, in all likelihood, be significantly less, thereby providing the requisite degree of safety through the use of a procedure tailored to a particular need. In simple terms, this is what the FAA does when requiring different procedures for airports without certain aids than for other airports.

9. Statement: "But is the FAA responsible for this good [safety] record? Many aviation experts say flying is as safe as it is because most airlines have safety rules tougher than the FAA's. Because most controllers and pilots do their jobs well, even in adverse situations. Because most planes are sound mechanically, and kept that way. And these critics think the U.S. has built a safe record not because of, but in spite of the Federal Aviation Administration." (November 2.)

Response: Most of the airline safety regulations that have been adopted by the FAA emanated within the FAA and were not as a result of recommendations from external sectors. A great many of these were adopted over the strenuous objections of various segments of the aviation industry. We believe the FAA, while it cannot take nor does it seek complete credit for the existing airline safety record, nevertheless has played a major role in compiling this enviable airline safety record. For example, when jet transports were first introduced into airline service in late 1958, the FAA imposed additional operational restrictions, required extensive flight crew training programs, and demanded more precise piloting performance than was previously required. From the first day of jet transport operations, FAA inspectors have certificated every single airline pilot in the operation of jet airplanes. The above requirements were made over strenuous opposition by both the airline industry and the pilots.

The FAA's safety rules provide for stringent standards that airlines must follow which recognize, pursuant to section 601(b) of the Federal Aviation Act of 1958, "the duty resting upon air carriers to perform their services with the highest possible degree of safety...." FAA prescribes high safety standards which the airlines must meet; standards which when complied will result in a safe operation. If, as stated, most of the airlines "have safety rules tougher than the FAA's," one would logically have to question the need for the FAA's aggressive enforcement program.

The FAA agrees that the controllers and pilots "do their jobs well." To suggest that controllers perform well but not the FAA is incredulous since controllers are an essential part of the FAA. FAA controllers perform well

because the intense training program which they undergo progressively screens out those individuals, as described in our response to statement 4, who are not fully capable of advancing to the journeyman controller level. Also, our training system not only provides comprehensive skills and knowledge to those who are progressing toward the journeyman level but requires journeyman controllers to undertake continuous refresher training.

With respect to U.S. airline pilots, each must meet, on a continuing basis, stringent medical qualifications prescribed by the FAA. They must hold a pilot certificate from the FAA which requires extensive aeronautical knowledge and flight experience. Their proficiency in performing various flight maneuvers is assured by FAA imposed requirements. Their airline's training program for pilots is approved and monitored by the FAA. And, the FAA through enroute inspections monitors cockpit discipline and adherence to FAA regulations.

The FAA strongly disagrees with the implication that the FAA has nothing to do with the sound mechanical condition of the U.S. fleet. All aircraft used by the scheduled airlines are certificated by the FAA which means that they meet high design and performance standards prescribed by the FAA. If unanticipated problems with the aircraft later become apparent, the FAA requires their correction by Airworthiness Directives. The FAA also requires the airlines to have comprehensive maintenance programs to assure that aircraft are kept in good condition, and we continually monitor those programs. The airline mechanics who work on aircraft are licensed by the FAA and the airline's training programs to assure their continuing proficiency are approved and monitored by the FAA.

There is a further telling point. U.S. certification of an aircraft by the FAA is considered of a high enough order by other nations that many seek to have their aircraft certified by the FAA knowing it would aid substantially in selling those aircraft. Also, FAA technical assistance is requested by countries throughout the world, and foreign nationals are frequently trained by the FAA at their government's request. The respect given by foreign civil aviation organizations to FAA standards and the expertise of its employees demonstrates that the FAA is perceived, at least by them, as a highly proficient organization.

10. Statement: "March 1977. Tenerife, the Canary Islands. A Pan Am jumbo jet is struck by a Dutch jet. That happens on the runway. Sixty-seven people crawl out of the wreckage of the Pan Am plane. Could more people on that plane have survived? Ten years before Tenerife, the FAA was already working on ways to keep fuel from exploding in a crash, ways to inert the fuel. Three years before Tenerife, the FAA thought a system was ready and proposed a rule to require all the airlines to carry it. But the industry objected, saying it weighed too much and it cost too much. The FAA agreed, and put the system back in research and development.

But could a fuel inerting system have been put in airplanes right then, three years before Tenerife; Robert Auburn was the head of that project at the FAA." (November 3; Ms. Ellerbee).

"The system, at that time, had reached the stage of development and—and—we had enough information about its capabilities. Yes, I think it could have been adopted at that point, yes." (Mr. Auburn).

"Auburn thinks the system might have saved lives at Tenerife. So do experts at the Airline Pilots Association, the National Transportation Safety Board, and the Flight Safety Foundation. But it's a loose point. The FAA says the system is still not ready. It is still in research and development." (November 3; Ms. Ellerbee).

Response: The critical fact overlooked by NBC is that fuel inerting systems do not provide protection where the fuel tanks are ruptured. At Tenerife, because of the impact of the accident, the fuel tanks were ruptured. Therefore, there is no correlation between the availability of a fuel inerting system and the tragic loss of life at Tenerife. The reference that the FAA was working on "ways to keep the fuel from exploding in a crash, ways to inert the fuel" ten years before the Tenerife accident is misleading. With respect to preventing post crash fires, the FAA has been conducting research in three areas: jelled fuels, anti-misting and fuel inerting.

Ten years prior to the Tenerife accident, there had been a developmental effort in the area of jelled fuels. Those jelled fuels, it was anticipated, would provide protection when a fuel tank was ruptured by limiting fuel spillage and aeration. However, it was determined that aircraft and engine fuel systems were simply not compatible with jelled fuel and the project was concluded.

The knowledge gained during this development activity led to the development of a fuel additive in 1975 that would preclude a fine mist from forming when the fuel is released from ruptured fuel tanks. Preventing the forming of a fine mist may keep the large fireball from forming in a crash situation, thereby reducing the flash effect. Unfortunately, the same chemical action which prevents fuel misting from occurring when tanks are ruptured also greatly inhibits the vaporization needed for combustion in the aircraft engines. The anti-misting technique has been tested using relatively small quantities of modified fuels in simulated crashes and shows promise of success. Large-scale testing is now being planned and the development of techniques to remove the additive prior to delivery to the engines is being undertaken. We expect completion of this engine compatibility study by the third quarter of 1979. A mechanical "shearing" device for the aircraft fuel system must be developed before widespread use of anti-misting additives is feasible. It is anticipated that when anti-misting is developed to its full potential, a major reduction in the fuel fire hazard will result. The cost of this program from prototype to completion from FY 78 to FY 80 will be in the vicinity of $3.5 million.

With respect to fuel inerting systems, the FAA, in April 1974, considered requiring a liquid nitrogen system on board aircraft to supply gaseous nitrogen in intact fuel tank and vent systems to replace the air and reduce the explosive risks due to sparks or lightning strikes. However the weight, cost, and logistics problems of the liquid system precluded its operational use. Subsequently, a project to develop an on-board nitrogen inerting system, using engine bleed air, was initiated, and testing of the initial engineering prototype has just been completed. The results are expected to be reported in January 1978.

Our comments here are simply intended to demonstrate the misleading nature of the allegation, and are not in any way intended to downplay or minimize the valid concern about the hazards of post-crash fires. We recognize the severity of the problem and are diligently working on a feasible solution. Unfortunately, pinpointing a problem is only part of the process in defining a solution. Consider, for example, medical research. No one will dispute the dedication of the thousands of medical experts who are striving to find solutions to health problems that have plagued mankind for years; but the answers to these problems are often elusive. The same problem often exists in trying to find technological solutions to complex aviation problems: the questions may be easy to ask but the answers are not easy to find. We understand the concern of those who wish that today's ideas could have been yesterday's realities. The FAA shares that wish. We only hope these same individuals will some day appreciate the limitations and obstacles to be overcome in turning such ideas into reality.

11. Statement: [Clip of a test crash] "That test crash was done by the FAA at its lab near Atlantic City, New Jersey. Critics of the FAA say this is the place where government scientists and engineers keep reinventing the wheel. One aviation expert calls the research and development program a hobby shop." (November 3; Ms. Ellerbee).

Response: In this instance, it appears that NBC has allowed itself to substitute labels for substantive comment. NAFEC provides an operating environment to test the products FAA will require in the system. Concomitantly, NAFE, allows the FAA to conduct the necessary tests and evaluations of all new systems, improvements, or modifications to existing systems; developing quick fixes to overcome specialized problems that arise in the field; and provide support for the automation capabilities in the Air Route Traffic Control Center and Terminal areas. Equally important is its role in carrying out the testing of aircraft safety and emission developments upon which regulatory actions can be based.

Examples of work performed at NAFEC include: assimilation, test and evaluation of all hardware and software for the implementation of the entire enroute automation system; the test and evaluation of all improvements to the enroute and terminal automation systems such as radar tracking, Minimum Safe Altitude Warning System, conflict alert; improved ATCRBS antennas; area navigation simulations and tests, Instrument Landing System improvements, notably in antenna configuration; and new airport lighting and marking configurations.

The facilities and capabilities available at NAFEC make it the principal civil aviation experimental center in the world. Its products assist FAA immeasurably in providing the safest and most efficient air traffic control system in the world. The FAA invites any interested party to visit NAFEC. We are confident that such a visit will readily dispel any thought that NAFEC is a "hobby shop."

12. Statement: "Management at the FAA says it doesn't know of a better airborne solution to the problem of mid-air collisions than B–CAS. [Beacon Collision Avoidance System] But other sources at the FAA say this system is a lot of trouble in congested areas, such as near an airport, where the chances for a mid-air collision are the greatest." (November 3; Ms. Ellerbee)

Response: The system NBC saw demonstrated was an active-BCAS. There is no dispute that performance of active-BCAS degrades in high traffic densities. What NBC failed to perceive is that the background material provided to it also included materials on a passive-BCAS under development by FAA that will provide for high performance levels in high density areas. This development effort was ignored in the presentation. Also totally ignored was the conflict alert capability which is operational in all Air Route Traffic Control Centers and is undergoing operational testing in the Houston terminal area. Conflict alert provides the controller with a visual and audio alarm when two or more aircraft are moving into positions which could result in a conflict. This capability will be provided in all ARTS terminals early in 1978.

The FAA readily admits the solution to the mid-air collision problem is a complex one. The FAA continues to seek a viable and cost-effective solution. The FAA believes its current effort, which is in effect a combination of the passive and active-BCAS, is that solution.

13. Statement: "The FAA is also studying cabin fires. There are rules about how flame resistant cabin materials have to be, but even materials that won't flame may give off poisonous smoke and gas. People have been killed by this and it continues to happen. Last April a Southern Airways jet crashed in Georgia. NBC news has learned that autopsies showed some of the 70 people who died, died from smoke and gas from cabin materials. And some of the twenty-four survivors have told investigators stories about cabin materials melting and dripping on their heads. But the FAA has no rules regarding heat, smoke, or toxic gas. The agency has been working on making these rules since the early 70's and admits that it will be at least three or four more years before there are any rules." (November 3; Ms. Ellerbee)

Response: The FAA has a very active program to improve the safety of cabin materials under post crash fire conditions. The work includes development of testing methods and actual testing to permit the identification of acceptable materials and to provide a mathematical model in order to allow a designer to assess the orientation and usage of a candidate material. The FAA's goal is to develop a combined hazard index that will correlate fire, smoke, and toxicity standards. The difficulty in reaching a solution results from the interrelationship of fire, smoke, and toxicity; for example, a process intended to decrease flammability could increase levels of smoke and toxicity.

Additionally, two related notices of proposed rulemaking and one advanced notice of proposed rulemaking dealing with flammability, smoke and toxic gas, respectively have been issued. The comments received indicate these characteristics cannot be treated separately. The FAA agrees and issued, in July 1977, a notice of hearings to be held on compartment interior materials in transport category airplanes, from November 14–16, 1977, in Washington, D.C. There was extensive participation by both U.S. and foreign aviation specialists.

In early October the FAA awarded a contract to develop, during a two-year study, a method to rank, according to its combustion hazards, each material used in airlines. The new method would compare the flammability, smoke and toxic gas characteristics of a burning material with physiological tolerances and establish a combined hazard index that could be used in aircraft cabin design.

The FAA also has full-scale fire testing of a wide-body jet fuselage underway at NAFEC. The test is being conducted in three phases and is part of our continuing program to improve passenger survival in aircraft accidents involving fire. The first phase is intended to measure heat, smoke, and gases within the cabin under varying degrees of fire and wind velocities. The second phase is devoted to evaluating interior emergency lighting systems, and the third will involve testing cabin materials for flammability, smoke and toxic gas emissions.

The melting and dripping of plastic materials are intrinsic to the properties of these materials when they are exposed to intense heat. NASA has been experimenting with advanced cabin structural type materials which char when exposed to intense heat or fire. When these materials are developed and approved for installation in aircraft, this particular problem should be resolved.

In view of the complex interrelationships involved, three to four years of additional research is a reasonable estimate of the time it will take to complete a practical, cost effective standard that provides a significant improvement in reducing flammability, smoke and toxicity of interior cabin materials.

14. Statement: "Many pilots, controllers, and airport managers say the best way to get the agency to move is to have a crash. They say the FAA substitutes bandaids for preventive action. And, they say, the bigger the crash, the bigger the bandaid." (November 3; Ms. Ellerbee).

Response: Such comments reflect a lack of comprehension of the FAA's ongoing safety program designed to prevent accidents. Certainly however, it is true that while the FAA is continually seeking ways to prevent accidents, in many cases, previously unknown circumstances only become apparent during an accident investigation which then provides clues for the problem's resolution.

Comments such as those chosen for airing by NBC ignore the great gains that have been made in accident prevention since they are not as spectacular or "news worthy" as showing burning aircraft or discussing mid-air collisions. To say that the best way to get FAA action is to have a crash ignores, for example, the significant improvements made in modern generation aircraft designs and operating capabilities which substantially enhance aviation safety by preventing accidents.

15. Statement: "The Ground Proximity Warning Device was available before the crash near Dulles [on December 1, 1974]. But it was not the result of FAA research and development. The device was developed by private industry in only four years at a cost of only $250 thousand. But it took 93 deaths, and congressional pressure before the FAA made the device required equipment in all airliners." (November 3; Ms. Ellerbee).

Response: On November 2, 1977, a United States District Court issued its findings in a lawsuit brought by the widows of the deceased pilot and co-pilot of the aircraft involved in the crash at Dulles to which NBC refers. The court clearly recognized what NBC ignored. The United States District Court found the pilots involved to be negligent and stated: "The transcript further reveals that at 1108.21, a full minute prior to impact, the altitude alert horn sounded. This was an indication that the aircraft was 500 feet above terrain. It sounded again at 1108.57 and 1109.14. Apparently it was ignored by the entire crew. Nor did any member of the crew, as required by TWA training procedures, verbally notice the sounding." The equipment necessary to prevent this accident was already required and onboard the TWA aircraft that crashed at Dulles.

Long before the Dulles accident, the FAA on April 18, 1973, issued an advanced notice of proposed rulemaking that would have required a Ground Proximity Warning System (GPWS) to be installed on airline aircraft. After reviewing the comments received and after further monitoring of the development of the equipment, FAA issued another notice on September 12, 1974, which proposed more specific requirements for installation of GPWS. Although the Ground Proximity Warning Device referred to was not a product of FAA research and development efforts, it was one of several candidate systems which FAA was evaluating at the time of the Dulles crash. Thus, it is clear that the GPWS was contemplated as being part of the FAA regulatory plan long before the TWA crash.

The device had not been required prior to the crash due to problems associated with its use. The most notable problem was that of false alarms. The device was susceptible to "sounding off" under conditions other than close proximity to the ground, which was disconcerting to pilots. As a result there was significant objection among pilots to its implementation.

On December 18, 1974, a final rule was adopted requiring the system to be installed by December 1, 1975. This date had to be extended to allow even further refinement of the system as the large number of false warnings threatened to destroy pilot confidence. Unless equipment has the confidence of the user, it will be of little value. If equipment is required before it can be carefully determined that it will be reliable, the resulting loss of confidence due to failure may not even be overcome by correction of the equipment's deficiencies. Equally important, to imply that the simple addition of equipment would prevent an accident ignores the need to use and rely on that equipment.

In this respect, it must also be noted that, while the rulemaking efforts for GPWS were underway, the FAA, in March 1973, urged all airlines to modify their radar altimeters to provide an automatic aural warning that would alert pilots when an aircraft was within 500 feet of the ground. The TWA airplane involved in the Dulles accident had this equipment installed and the aural warning sounded at 500 feet above the terrain at least twice before the impact and, as the Court found, in sufficient time for the pilot to have taken corrective actions.

16. Statement: "Rod Dennis is an inventor, an engineer and a pilot. In 1967, Dennis developed a theory about what caused two airline crashes in Cincinnati. Dennis linked the crashes to an instrument called the barometric altimeter. The control tower takes the barometric readings, and by radio gives it to the pilot to help him compute his altitude. But, if the tower is in a dry mass of air and the plane, a few miles away, is in wet air, it can cause the barometric altimeter in the cockpit to be inaccurate. Because of that said Dennis, the pilot may think he is higher off the ground than he really is and he may keep on thinking so until he crashes." (November 4; Ms. Ellerbee)

Response. Mr. Dennis' interview implied that a barometric setting given by a facility could be the barometric pressure of dry air when in fact the aircraft is traversing a moist environment some distance from the facility. He concludes that the moist/dry air difference could cause sufficient altimeter error for the aircraft to descend into the terrain. Mr. Dennis is correct in the conclusion that moist (wet) air weighs less than dry air. However, he grossly exaggerated the effect of humidity on density altitude; i.e., at an altitude of 1000 feet, dry air pressure would indicate on an altimeter less than 20 feet lower than the moist (wet) air pressure indication. The terminal area procedures have a sufficient safe altitude margin to compensate for a nonstandard atmosphere. In addition, all airline turbine-powered airplanes are equipped with radar altimeters which measure precise heights above the ground.

17. Statement: "They told me—now this is going to be sort of like a wrench in the work, see—don't tell anybody about it, let us find you, we don't want to disturb the status quo of the accidents of the past that we caused by this, because it would be a can of worms for us." (November 4; Mr. Dennis)

"We asked Dennis what he thought that meant." (Ms. Ellerbee)

"That enterprising attorneys would jump out, reopen the cases, and come back with suits against the government for giving wrong information to the pilot causing the accident." (Mr. Dennis).

"The FAA agrees with Dennis' theory that the barometric altimeter can cause problems, but denies telling him to be quiet because of potential lawsuits. And the FAA still has no solution to the problems with the barometric altimeter. Critics of the FAA say Rod Dennis' story is not an isolated example, but part of a pattern of an agency that makes mistakes, then tries to ignore them or cover up." (Ms. Ellerbee)

Response: The allegations of a cover up are absurd on their face. Mr. Dennis himself states in the telecast that "They sent—immediately sent wires to all the weather bureaus throughout the nation in which they told them to be care—be aware of the phenomena of moisture on approach with a

dry tower, which would cause the altimeter problem to exist." It is totally inconsistent for Mr. Dennis to state in the first instance that the FAA immediately sent out telegrams while alleging that the FAA attempted to keep this matter quiet. Additionally, the FAA employee with whom Mr. Dennis met, states that not only did he not ask Mr. Dennis to "be quiet because of potential lawsuits," but that he referred Mr. Dennis to another agency, the Civil Aeronautics Board, whose responsibility it was, at that time, to analyze any pertinent data relative to aircraft accidents and to determine probable cause. An agency attempting to cover up a problem and keep it quiet would certainly not refer the matter to another agency which would be responsible for determining if that problem had caused an accident.

18. Statement: "[c]ritics point to the FAA actions in the international search for a new landing system, microwave equipment that would enable planes to make controlled instrument landings in all conditions. Only one system will be chosen and it is intended to be used worldwide. Millions of dollars have and will be spent, and the choices come down to the system designed by the FAA, shown here, or the system designed by the British. It is supposed to be a friendly, scientific search for the safest possible system. But the British say the FAA has cheated." (November 4; Ms. Ellerbee).

"But what are the ramifications of these errors? Lincoln Laboratories says its integrity is in question because of the FAA. In London, British aviation authorities are extremely upset. A source who was looking into the situation for the White House is concerned relations with a friendly country have been damaged. And a group of congressmen is challenging the FAA actions in this matter." (Ms. Ellerbee).

Response: While we will not dispute that FAA errors have occurred in the context of the MLS program, we nevertheless believe that the allegation that "the FAA has cheated" lacks foundation. As the Honorable Dale Milford, Chairman, House Subcommittee on Transportation, Aviation and Weather, stated at a Congressional Hearing on September 27, 1977: "I believe I was the first Congressman to begin examining, in detail, the Doppler—TRSB argument. And over the past two years I have looked at it longer and harder perhaps than any other member of Congress. During this period of time I have found no evidence of foul play by either the FAA technicians or scientists nor those from Great Britain."

The following letter from Chairman Milford to the Honorable Olin E. Teague, Chairman, Committee on Science and Technology, provides additional insight concerning the MLS problem:

COMMITTEE ON SCIENCE AND TECHNOLOGY,
Washington, D.C., November 3, 1977.

Hon. OLIN E. TEAGUE,
Rayburn House Office Building,
Washington, D.C.

DEAR MR. CHAIRMAN: As you know, the microwave landing system (MLS) controversy has been the subject of considerable interest to the Subcommittee over the past year.

During that period of time, the Subcommittee has been very reluctant to officially speak out on the issue for fear of upsetting the international decision-making process.

Unfortunately, some persons have sought to take advantage of this situation by attempting to drive a wedge between the Subcommittee Members. By making certain blatant and false statements about the U.S. MLS program and MIT's Lincoln Laboratory, these persons hoped to create confusion in the Subcommittee and delay in the international process. Heretofore, their success has been premised on the fact that little or no response to their allegations would be forthcoming because of the complexity of the issues and delicacy of international negotiations.

I believe that we can no longer countenance such activities. It is time for the Subcommittee to unite and to respond to these false allegations directed toward American programs and institutions. I would therefore call to your attention the enclosed letter which I have just received from the MIT Lincoln Laboratory.

This letter is a response to allegations being circulated by a U.K. commercial firm lobbyist—allegations which have been intended to discredit the AWOP decision and the work of Lincoln Labs.

In short, Lincoln indicates that there has always been an open invitation for any interested party to visit the laboratory and use the programs, that in fact the U.K. availed themselves of this opportunity on at least two occasions, that twenty-two reports describing the simulation techniques and results have been distributed to the U.K., and that the entire TRSB computer tape and documentation was given to the CAA in September, 1977.

I think it is necessary to bear in mind that Lincoln was requested to perform the MLS simulations because of its highly regarded expertise and integrity and that AWOP considered the work of the laboratory to be reliable and extremely helpful.

The Massachusetts Institute of Technology and the Lincoln Laboratory have enjoyed a long history of world respect for their contribution to aviation electronics.

It is a travesty to allow their reputation to be wrongfully and viciously slandered.

The Subcommittee, as a responsible agent of Congress, should do everything in its power to ensure that this situation is rectified.

I strongly urge that you devote your attention to this matter and to the enclosed document.

Sincerely,

DALE MILFORD,
Chairman, Subcommittee on Transportation, Aviation and Weather.

The following statement, extracted from the "Aviation Daily" (November 8, 1977, page 45), sheds additional light on the NBC statements: "A new FAA attitude towards cooperation with the U.K. on selection of an international microwave landing system has drawn praise from the U.K. Civil Aviation Authority. 'It would not be good if the International Civil Aviation Organization does not select a standard system at the world meeting in April,' M. F. Whitney, CAA representative to the ICAO panel that studies MLS choices, told The DAILY. 'But Langhorne Bond's statements to a congressional subcommittee in late September on his willingness for FAA to perform comparative field tests of the two MLS systems and freely exchange information leads me to believe there is chance of an agreement between FAA and the CAA on the better system before the world meeting' he said."

In sum, the development of an MLS is a complex undertaking involving thousands of details. Human errors do occur; however, the FAA has never knowingly attempted to mislead anyone as to the viability of the TRSB MLS program. The FAA has taken the lead in attempting to achieve an international agreement on the version of the MLS to be employed worldwide thereby contributing to a higher level of aviation safety for all air travelers.

19. Statement: "This is the wreckage of an Eastern Airlines plane that crashed in New York in 1975. An FAA source says the Agency took money from other safety programs in order to develop microwave equipment. He says one of the projects dropped was the study of windshear, the sudden change in speed and direction of the wind. And, he says, that money was not put back until after 113 people died in this crash caused by windshear."

Response: This statement is incorrect. The FAA has continuously funded the development of a wind and windshear detection system since 1972—well before the June 1975 accident at JFK Airport. No funds were diverted from the windshear program to the MLS program.

An initial windshear system has been developed and is currently being used at Dulles International Airport to study low-level windshear conditions and their causes in an active airport environment.

GENERAL LEAVE

Mr. STEERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special order on November 30, 1977, by the gentleman from New York, Mr. WYDLER.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. WHITE (at the request of Mr. WRIGHT) for November 29 and 30, on account of official business.

Mrs. CHISHOLM (at the request of Mr. WRIGHT) for this week, on account of a necessary absence.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. STEERS) to revise and extend their remarks and include extraneous material:)

Mr. HAMMERSCHMIDT, for 60 minutes Thursday, December 1.

Mr. ASHBROOK, for 20 minutes, today.

Mr. WYDLER, for 30 minutes Wednesday, November 30.

Mr. MICHEL, for 5 minutes, today.

Mr. MCDADE, for 10 minutes, today.

Mr. CORCORAN of Illinois, for 5 minutes, today.

Mr. EVANS of Delaware, for 5 minutes, today.

(The following Members (at the request of Mr. WHITLEY), to revise and extend their remarks, and to include extraneous matter:)

Mr. GONZALEZ, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. DODD, for 5 minutes today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. FOUNTAIN, for 5 minutes, today.

Mr. ADDABBO, for 5 minutes, today.

Mr. TEAGUE, for 5 minutes, today.

Mr. WIRTH, for 5 minutes, today.

Mr. STOKES, for 5 minutes, today.

Mr. RODINO, for 5 minutes, today.

Mr. RONCALIO, for 5 minutes, today.
Mr. GIAIMO, for 5 minutes, today.
Mr. BEDELL, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MILFORD, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $2,093.

Mr. MILFORD, in the extension of remarks in five instances.

(The following Members (at the request of Mr. STEERS) and to include extraneous material:)

Mr. ARCHER in two instances.
Mr. SYMMS in four instances.
Mr. DERWINSKI in three instances.
Mr. WHITEHURST in two instances.
Mr. CARTER.
Mr. PRESSLER.
Mr. EVANS of Delaware in two instances.
Mr. BADHAM.
Mr. DON H. CLAUSEN.
Mr. TAYLOR.
Mr. ASHBROOK in four instances.
Mr. GRASSLEY.
Mr. SKUBITZ.
Mr. BOB WILSON in five instances.
Mr. LAGOMARSINO.
Mr. MICHEL in two instances.
Mr. BROWN of Michigan.
Mr. COHEN.
Mr. HANSEN in six instances.
Mr. WYLIE.
Mr. RUDD.
Mr. GOODLING.
Mr. THONE.
Mr. GILMAN.

(The following Members (at the request of Mr. WHITLEY) and to include extraneous matter:)

Mr. FRASER in six instances.
Mr. ANNUNZIO in six instances.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. BROWN of California in 10 instances.
Mr. FISHER in 10 instances.
Mr. DINGELL.
Mr. IRELAND.
Mr. MINETA in two instances.
Mr. BAUCUS in three instances.
Mr. MAZZOLI in three instances.
Mr. ADDABBO.
Mr. CORRADA.
Mr. HAMILTON in two instances.
Mr. WIRTH in two instances.
Mrs. SCHROEDER.
Mr. NATCHER.
Mr. MOTTL.
Ms. OAKAR in two instances.
Mr. AUCOIN in two instances.
Mr. EILBERG in five instances.
Mr. WOLFF in two instances.
Mr. MURTHA.
Mr. FORD of Michigan.
Mr. KOSTMAYER in two instances.
Mrs. MEYNER in two instances.
Mr. BRADEMAS in 10 instances.
Mr. DOWNEY.
Mr. HUBBARD.
Mr. MOORHEAD of Pennsylvania in two instances.
Mr. OBERSTAR in two instances.
Mr. DELLUMS.
Mr. POAGE in two instances.
Mr. JOHNSON of California.
Mr. PATTERSON of California.
Mr. GAYDOS.
Mr. AMBRO.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 2328. An act to amend Private Law 95–21 to make a technical correction therein; to the Committee on Interior and Insular Affairs.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1131. An act to authorize appropriations for Nuclear Regulatory Commission for the fiscal year 1978, and for other purposes.

THE LATE HONORABLE JOHN L. McCLELLAN

The SPEAKER. The Chair recognizes the gentleman from Texas (Mr. MAHON).

Mr. MAHON. Mr. Speaker, I offer a privileged resolution.

The Clerk read the resolution, as follows:

H. RES. 918

Resolved, That the House has heard with profound sorrow of the death of the Honorable JOHN L. MCCLELLAN, a Senator of the United States from the State of Arkansas.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased Senator.

Resolved, That a committee of four Members be appointed on the part of the House to join the committee appointed on the part of the Senate to attend the funeral.

The resolutions were agreed to.

The SPEAKER. The Chair appoints as members of the funeral committee the following Members on the part of the House: Mr. HAMMERSCHMIDT, Mr. ALEXANDER, Mr. THORNTON, and Mr. TUCKER.

The Clerk will report the remaining resolution.

The Clerk read as follows:

Resolved, That as a further mark of respect to the memory of the deceased, the House do now adjourn.

The resolution was agreed to.

ADJOURNMENT

Accordingly (at 7 o'clock and 18 minutes p.m.), the House adjourned until tomorrow, Wednesday, November 30, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2724. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken for the Army Reserve, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

2725. A letter from the Deputy Assistant Secretary of Defense (Management Systems), transmitting revisions to the selected acquisition reports and SAR summary tables for the quarter ended September 30, 1977, pursuant to section 811(a) of Public Law 94–106; to the Committee on Armed Services.

2726. A letter from the Executive Secretary to the Department of Health, Education, and Welfare, transmitting a proposed final regulation governing grants to institutions of higher education under the higher education personnel training program, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

2727. A letter from Executive Secretary to the Department of Health, Education, and Welfare, transmitting proposed final regulations for career education and career development programs, pursuant to section 431 (d) of the General Education Provisions Act; to the Committee on Education and Labor.

2728. A letter from the Acting Executive Secretary to the Department of Health, Education, and Welfare, transmitting proposed final regulations for student consumer information services, pursuant to section 431(d) of the General Education Provisions Act; to the Committee on Education and Labor.

2729. A letter from the Director of ACTION, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2730. A letter from the Comptroller General of the United States, transmitting a list of reports issued or released by the General Accounting Office during October 1977, pursuant to section 234 of the Legislative Reorganization Act of 1970; to the Committee on Government Operations.

2731. A letter from the Comptroller General of the United States, transmitting a report on the examination of financial statements of the Government Printing Office as of September 30, 1976 (FOD–77–5, November 25, 1977), pursuant to 44 U.S.C. 309(c); to the Committee on Government Operations.

2732. A letter from the Comptroller General of the United States, transmitting a report on the Transfer Income Model and its uses within the Federal Government to analyze welfare programs (PAD–78–14, November 25, 1977); to the Committee on Government Operations.

2733. A letter from the Acting Deputy Assistant Secretary of Agriculture and the Acting Assistant Secretary of the Interior, transmitting notice of their intention to publish proposed final regulations governing fees for livestock grazing on Federal lands in the Western States, pursuant to section 401(a) of the Federal Land Policy and Management Act of 1976; to the Committee on Interior and Insular Affairs.

2734. A letter from the Chief Commissioner, U.S. Court of Claims, transmitting a report on the allowance of the attorney expense claim in docket No. F–15, Davis, Wright, Todd, Riese & Jones, pursuant to section 20 of the Alaska Native Claims Settlement Act; to the Committee on Interior and Insular Affairs.

2735. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the United Kingdom to transfer certain U.S.-origin military equipment to Denmark, pursuant to section 3 of the Arms Export Control Act; to the Committee on International Relations.

2736. A letter from the Acting Assistant Administrator for Legislative Affairs, Agency for International Development, Department of State, transmitting a report on the international disaster assistance program for the quarter ended September 30, 1977, pursuant to section 492 of the Foreign Assistance Act of 1961, as amended; to the Committee on International Relations.

2737. A letter from the Acting Assistant Administrator for Legislative Affairs, Agency for International Development, Department of State, transmitting the second semiannual report on participation by small business in procurement programs of the Agency, pursuant to section 602 of Public Law 94–329; to the Committee on International Relations.

2738. A letter from the Chairman, Securities and Exchange Commission, transmitting the report of the Advisory Committee on Corporate Disclosure; to the Committee on Interstate and Foreign Commerce.

2739. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the fee provisions of the U.S. patent and trademark laws; to the Committee on the Judiciary.

2740. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting reports concerning visa petitions approved according certain beneficiaries third and sixth preference classification, pursuant to section 204 (d) of the Immigration and Nationality Act, as amended (79 Stat. 915); to the Committee on the Judiciary.

2741. A letter from the Chairman, Administrative Conference of the United States, transmitting a report on legislative veto of administrative regulations, pursuant to 5 U.S.C. 575; to the Committee on the Judiciary.

2742. A letter from the Administrator of General Services, transmitting a prospectus proposing a succeeding lease for space currently occupied at the Ford Building, 555 West 57th Street, New York, N.Y.; to the Committee on Public Works and Transportation.

2743. A letter from the Under Secretary of Defense (Research and Engineering), transmitting a report on Department of Defense procurement from small and other business firms for October 1976 to May 1977, pursuant to section 10 (d) of the Small Business Act, as amended; to the Committee on Small Business.

2744. A letter from the Chairman, Federal Election Commission, transmitting a copy of correspondence sent to the Office of Management and Budget, pursuant to section 310(d)(1) of the Federal Election Campaign Act, as amended; jointly, to the Committees on Appropriations, and House Administration.

2745. A letter from the Assistant Administrator for Planning and Management, U.S. Environmental Protection Agency, transmitting a report on the number of employees in each General Schedule grade employed by EPA on September 30, 1976, and September 30, 1977, pursuant to section 1310 of the Supplemental Appropriations Act of 1952; jointly, to the Committees on Appropriations, and Post Office and Civil Service.

2746. A letter from the Comptroller General of the United States, transmitting a report on Air Force maintenance depots (LCD–78–403, November 23, 1977); jointly, to the Committees on Government Operations, and Armed Services.

2747. A letter from the Comptroller General of the United States, transmitting a report on the Defense Department's consideration of West Germany's Leopard as the Army's new main battle tank (PSAD–78–1, November 28, 1977); jointly, to the Committees on Government Operations, and Armed Services.

2748. A letter from the Comptroller General of the United States, transmitting a followup report on the five Federal service academies (FPCD–77–78, November 25, 1977); jointly, to the Committees on Government Operations, Armed Services, and Merchant Marine and Fisheries.

2749. A letter from the Comptroller General of the United States, transmitting a report on uranium enrichment policies and operations (EMD-77-64, November 18, 1977); jointly, to the Committee on Government Operations, Interior and Insular Affairs, and Science and Technology.

2750. A letter from the Secretary of Commerce, transmitting the annual report for calendar year 1976 on ocean dumping research, pursuant to section 201 of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended; jointly, to the Committees on Merchant Marine and Fisheries, and Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. YOUNG of Texas: Committee on Rules. House Resolution 916. Resolution providing for the consideration of the bill (S. 1340) to authorize appropriations to the Energy Research and Development Administration for energy research, development, demonstration, and related programs in accordance with section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, as amended, and for other purposes (Rept. No. 95–821). Referred to the House Calendar.

Mr. SISK: Committee on Rules. House Resolution 917. Resolution providing for the consideration of the joint resolution (H.J. Res. 662) making further continuing appropriations for the fiscal year 1978, and for other purposes (Rept. No. 95–822). Referred to the House Calendar.

Mr. MAHON: Committee on Appropriations. House Joint Resolution 662. Joint resolution making further continuing appropriations for the fiscal year 1978, and for other purposes (Rept. No. 95–824). Referred to the Committee of the Whole House on the State of the Union.

Mr. MURPHY of New York: Committee of conference. Conference report on S. 1316 (Rept. No. 95–823). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of California (for himself Mr. HARRINGTON, and Mr. TSONGAS):

H.A. 10121. A bill to amend title 38 of the United States Code in order to provide for the payment of service pensions to veterans of World War I and for certain surviving spouses and certain children; to the Committee on Veterans' Affairs.

By Mr. ANDREWS of North Dakota (for himself and Mr. MURPHY of New York):

H.R. 10122. A bill to amend the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 to provide persons who own farm operations and businesses with more equitable compensation when they are displaced from such farm operations and businesses by the Federal Government: to the Committee on Public Works and Transportation.

By Mr. BAFALIS (for himself, Mr. BENJAMIN, Mr. BYRON, Mr. CHAPPELL, Mr. COUGHLIN, Mr. EILBERG, Mr. KELLY, Mr. MARRIOTT, Mr. MURPHY of New York, Mr. O'BRIEN, Mr. ROONEY, and Mr. SYMMS):

H.R. 10123. A bill to amend the Internal Revenue Code of 1954 to eliminate the adjusted gross income limitation on the credit for the elderly, to increase the amount of such credit, and for other purposes; to the Committee on Ways and Means.

By Mr. BEDELL (for himself, Mr. BROWN of California, Mr. CONABLE, Mr. CONTE, Mr. CORCORAN of Illinois, Mr. CORNELL, Mr. DEVINE, Mr. DODD, Mr. DORNAN, Mr. EDGAR, Mr. HARRINGTON, Mr. HYDE, Ms. KEYS, Mr. KILDEE, Mr. LEACH, Mr. LLOYD of California, Mr. MAZZOLI, Mr. MCHUGH, Mr. OTTINGER, Mr. PEASE, Mr. PRITCHARD, Mrs. SCHROEDER, Mr. STEERS, Mr. ULLMAN, and Mr. VAN DEERLIN):

H.R. 10124. A bill to amend title 18, United States Code, to prohibit Members of the Congress from mailing or otherwise using official congressional stationery for any purpose other than official congressional business; to the Committee on the Judiciary.

By Mr. BROWN of Michigan (for himself and Mr. CORCORAN of Illinois):

H.R. 10125. A bill to simplify and improve the Truth in Lending Act, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mrs. BURKE of California (for herself Mrs. SCHROEDER, Mr. LEHMAN, Mrs. SPELLMAN, Mr. GILMAN, Mr. CORCORAN of Illinois, Mr. NIX, Mr. SOLARZ, Mr. METCALFE, Mr. RYAN, Mr. DICKS, and Mr. CLAY):

H.R. 10126. A bill to amend title 5, United States Code, to establish a program to increase part-time career empoyment within the civil service; to the Committee on Post Office and Civil Service.

By Mr. CARTER:

H.R. 10127. A bill to amend section 111 of title 23, United States Code, relating to agreements for the use of and access to the rights-of-way of the Interstate System; to the Committee on Public Works and Transportation.

By Mr. CORNWELL:

H.R. 10128. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. CORRADA:

H.R. 10129. A bill to provide more effectively for the use of interpreters in courts of the United States, and for other purposes; to the Committee on the Judiciary.

H.R. 10130. A bill to amend title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954 to provide social security coverage for work performed in prison industries and other services performed for remuneration by inmates of penal institutions; to the Committee on Ways and Means.

By Mr. CORRADA (for himself, Mr. BADILLO, Mr. HORTON, Mr. DE LA GARZA, Mr. ROE, Mr. MOORHEAD of Pennsylvania, and Mr. DE LUGO):

H.R. 10131. A bill to provide Federal assistance to the Commonwealth of Puerto Rico for the construction of a youth recreation center in honor of Roberto Clemente; jointly, to the Committees on Government Operations and Interior and Insular Affairs.

By Mr. HEFTEL:

H.R. 10132. A bill to amend the Small Business Act to provide graduated amounts of loan guarantees to minority small business concerns with respect to loans for the acquisition of the construction, conversion, or expansion of certain broadcast or cable facilities, and to amend the Internal Revenue Code of 1954 to provide for the nonrecognition of gain on certain sales and exchanges of broadcast or cable facilities involving small business concerns; jointly, to the Committees on Small Business and Ways and Means.

By Mr. HYDE (for himself, Mr. BAUCUS, Mr. BURGENER, Mr. COLLINS of Texas, Mr. CORCORAN of Illinois, Mr. FRENZEL, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LENT, Mr. MCCLORY, Mr. MURPHY of Pennsylvania, Mr. MURPHY of New York, Mr. ROBINSON, and Mr. ROUSSELOT):

H.R. 10133. A bill to amend title 18, United States Code, relating to the production of false documents or papers of the United States, and the use of false information in obtaining official documents and papers of the United States, involving an element of identification; to the Committee on the Judiciary.

By Mr. HYDE (for himself and Mr. BENJAMIN):

H.R. 10134. A bill to provide procedures for calling constitutional conventions for proposing amendments to the Constitution of the United States, on application of the legislatures of two-thirds of the States, pursuant to article V of the Constitution; to the Committee on the Judiciary.

By Mr. HYDE (for himself, Mr. LUNDINE, Mr. SKELTON, and Mr. MILLER of Ohio):

H.R. 10135. A bill to have an inscription and appropriate medals, ribbons, and tributes placed upon the crypt at the National Cemetery at Arlington, Va., reserved for an American soldier who lost his life in Southeast Asia during the Vietnam era, and whose identity is unknown; to the Committee on Veterans' Affairs.

By Mr. KEMP (for himself, Mr. ARCHER, Mr. BURKE of Florida, Mr. DEL CLAWSON, Mr. COUGHLIN, Mr. DAN DANIEL, Mr. GRADISON, Mr. HAMMERSCHMIDT, Mr. HARSHA, Mr. KELLY, Mr. MADIGAN, Mr. MICHAEL O. MYERS, Mr. REGULA, Mr. ROBINSON, Mr. SHUSTER, Mr. STANTON, Mr. STEERS, Mr. STEIGER, and Mr. TAYLOR):

H.R. 10136. A bill to provide for permanent tax rate reductions for individuals and businesses; to the Committee on Ways and Means.

By Mr. LEHMAN:

H.R. 10137. A bill to amend title 5 of the United States Code to make war orphans, children of disabled veterans, and spouses, mothers, and children of members of the armed forces missing in action or captured, eligible for preference in civil service competitive appointments; to the Committee on Post Office and Civil Service.

By Mr. LOTT (for himself and Mr. LIVINGSTON):

H.R. 10138. A bill to amend title XI of the Merchant Marine Act, 1936, to permit the guarantee of obligations for financing fishing vessels in an amount not exceeding 87½ percent of the actual or depreciated actual cost of each vessel; to the Committee on Merchant Marine and Fisheries.

By Mr. MATHIS:

H.R. 10139. A bill to effect certain reorganization of the Federal Government to strengthen Federal programs and policies for combating international and domestic terrorism; jointly, to the Committees on International Relations, the Judiciary, and Public Works and Transportation.

By Mr. MATHIS (for himself, Mr. EVANS of Georgia, Mr. GINN, Mr. BRINKLEY, and Mr. BARNARD):

H.R. 10140. A bill to provide parity to farmers and to prevent interruptions in the supply of food to American consumers; to the Committee on Agriculture.

By Ms. OAKAR (for herself, Mr. ASHBROOK, Mr. CORRADA, Mr. COUGHLIN, Mr. DINGELL, Mr. EILBERG, Mr. GUYER, Mr. LEDERER, Mr. MCHUGH, Mr. MARKS, Mr. MURPHY of Illinois, Mr. PEPPER, Mr. ROBINSON, Mr. ROE, Mr. STOKES, and Mr. BOB WILSON):

H.R. 10141. A bill to require that the Hungarian Crown of Saint Stephen and other relics of the Hungarian royalty remain in the custody of the U.S. Government and that they not be transported out of the United States, unless the Congress provides otherwise by legislation; to the Committee on International Relations.

By Mr. OBERSTAR:

H.R. 10142. A bill to amend the Federal Reserve Act to direct the Federal Open Market Committee to regulate the extension of the money supply to achieve steady growth rates of money, to reduce the rate of inflation, and to encourage continued growth of the economy; to the Committee on Banking, Finance and Urban Affairs.

H.R. 10143. A bill to amend the Railroad Retirement Act of 1974 to permit certain voluntary military service to be counted toward the years-of-service requirement for benefits under such act; to the Committee on Interstate and Foreign Commerce.

By Mr. RINALDO:

H.R. 10144. A bill to delay for 6 months the effective date of the increase in the hospital deductible for 1978 under part A of the medicare program; to the Committee on Ways and Means.

By Mrs. SPELLMAN (for herself, Mr. AKAKA, Mr. BOWEN, Mr. BUCHANAN, Mr. CAPUTO, Mr. DERRICK, Mr. DOWNEY, Mr. EDWARDS of California, Mr. GILMAN, Mr. HARRINGTON, Mr. HARRIS, Mr. HYDE, Mr. LOTT, Mr. MCFALL, Mr. MINETA, Mr. MIKVA, Mr. NOWAK, Mr. PATTERSON of California, Mr. PATTISON of New York, Mr. ROE, Mr. THOMPSON, Mr. TREEN, and Mr. TRIBLE):

H.R. 10145. A bill to assist cities and States by amending section 5136 of the Revised Statutes, as amended, with respect to the authority of national banks to underwrite and deal in securities issued by State and local governments, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DOWNEY:

H.R. 10146. A bill to provide policies, methods, and criteria for the acquisition of property and services by executive agencies; to the Committee on Government Operations.

H.R. 10147. A bill to exempt companies which are engaged in investing in new business securities from the provisions of the Investment Company Act of 1940; to the Committee on Interstate and Foreign Commerce.

H.R. 10148. A bill to amend the Internal Revenue Code of 1954 to increase the corporate surtax exemption, to provide for the deferral of gain from the sale or exchange of certain stock, and for other purposes; to the Committee on Ways and Means.

H.R. 10149. A bill to establish a national corporation to finance, through loan guaranties and loans, high-risk efforts which seek to develop and demonstrate technologies to meet critical national needs and which are unable to secure adequate funds through existing sources, to strengthen and insure congressional participation in the continuing review of Government operations and activities, and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs, Science and Technology, and Rules.

By Mr. GONZALEZ:

H.R. 10150. A bill to amend title 38, United States Code, to establish a loan program to provide educational assistance to Vietnam-era veterans and their eligible dependents who were unable to complete a program of education before the expiration of their eligibility for benefits under the GI bill, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. SMITH of Iowa (for himself, Mr. CHARLES WILSON of Texas, Mr. BAUMAN, Mr. CORNELL, Mr. TREEN, Mr. BADILLO, Mr. KAZEN, Mr. BROYHILL, Mr. HOWARD, Mr. MARLENEE, Mr. GLICKMAN, Mr. WEAVER, Mr. HUGHES, Mr. CORNWELL, Mr. CARTER, and Mr. ABDNOR):

H.R. 10151. A bill to amend the Rural Development Act of 1972 to require that loan guarantees from the Farmers Home Administration be no less favorable to borrowers than those offered by the Department of Housing and Urban Development; to the Committee on Agriculture.

By Mr SMITH of Iowa (for himself, Mr. NOLAN, Mr. JONES of Tennessee, Mr. MITCHELL of Maryland, Mr. ENGLISH, Mr. MCCORMACK, Mr. LAGOMARSINO, Mr. CORRADA, Mr. WATKINS, Mr. LAFALCE, Mr. BURGENER, Mr. MOSS, Mr. BLOUIN, Mr. BALDUS, Mrs. LLOYD of Tennessee, Mr. SIMON, Mr. BEVILL, Mr. MURTHA, Mr. GRASSLEY, and Mr. MATHIS):

H.R. 10152. A bill to amend the Rural Development Act of 1972 to require that loan guarantees from the Farmers Home Administration be no less favorable to borrowers than those offered by the Department of Housing and Urban Development; to the Committee on Agriculture.

By Mr. THONE:

H.R. 10153. A bill to insure the quality of imported meat; to the Committee on Agriculture.

By Mr. TUCKER:

H.R. 10154. A bill to provide that reimbursements shall not be required of any provider of medical services with respect to payments made under the medicare program to such provider, if such payments were certified as correct by an agent of the Federal Government and the provider acted in good faith in applying for such payments; to the Committee on Ways and Means.

By Mr. MAHON:

H.J. Res. 662. Joint resolution making further continuing appropriations for the fiscal year 1978, and for other purposes; to the Committee on Appropriations

By Mr. MITCHELL of New York:

H.J. Res. 663. Joint resolution memorializing Dr. Mahlon Loomis; to the Committee on Post Office and Civil Service.

By Mr. RYAN:

H.J. Res. 664. Joint resolution to postpone until December 31, 1978, the effective date of the final regulations developed pursuant to the proposed regulations published in the Federal Register dated August 25, 1977 (43 C.F.R. 426), relating to Federal reclamation law, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BEDELL (for himself, Mr. GUYER, Mr. LEACH, Mr. KRUEGER, Mr. PATTISON of New York, Mr. ENGLISH, Mr. BALDUS, Mr. GUDGER, Mr. RUPPE, Mr. HALL, Mr. QUIE, Mr. CAVANAUGH, Mr. PRESSLER, Mr. BEVILL, and Mr. WHITLEY):

H. Con. Res. 420. Concurrent resolution to assure equal access to quality health care for populations located in rural areas; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. DODD (for himself, Mr. GILMAN, Mr. PEPPER, Mr. ZEFERETTI, Mr. BOLAND, Mr. BONIOR, Mr. THOMPSON, Mr. LE FANTE, Mr. YOUNG of Missouri, Mr. REUSS, Mr. GUYER, Mr. KETCHUM, Mr. CORMAN, Mr. MOAKLEY, Mr. MARKS, Mr. HYDE, Mr. CORNWELL, Mr. CORRADA, Mr. KILDEE, Mr. FLOOD, Mr. CONTE, Mr. EDGAR, Mr. KREBS, Mr. WAXMAN, and Mr Mr. ERLENBORN):

H. Res. 919. Resolution; congratulations to the peoples of Egypt and Israel; to the Committee on International Relations.

By Mr. FITHIAN (for himself, Ms. MIKULSKI, Mr. NOLAN, and Mr. DENT):

H. Res. 920. Resolution to require Amtrak, the Urban Mass Transportation Administration, and ConRail to purchase domestic steel and steel products; to the Committee on Government Operations.

By Mr. SMITH of Iowa:

H. Res. 921. Resolution to provide funds for the further expenses of the investigations and studies of the Committee on Small Business; to the Committee on House Administration.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CORRADA:

H.R. 10155. A bill for the relief of Elvira Giambartolomei de Guzman, M.D.; to the Committee on the Judiciary.

By Mr. FLOWERS:

H.R. 10156. A bill for the relief of Chin-Pao Shao; to the Committee on the Judiciary.

By Mr. KETCHUM:

H.R. 10157. A bill for the relief of Kern Painting and Sandblasting, Inc.; to the Committee on the Judiciary.

By Mr. LAGOMARSINO:

H.R. 10158. A bill for the relief of Policarpo Polla Garcia; to the Committee on the Judiciary.

By Ms. MIKULSKI:

H.R. 10159. A bill for the relief of Adolfo Streit; to the Committee on the Judiciary.

By Mr. RONCALIO:

H.R. 10160. A bill to provide for the conveyance of title and ownership to 2.58 acres within the Bridger-Teton National Forest, Wyo., to Ben Boschetto, Jr.; to the Committee on Interior and Insular Affairs.

By Mr. ST GERMAIN:

H.R. 10161. A bill for the relief of Eastern Telephone Supply and Manufacturing, Inc.; to the Committee on Ways and Means.

By Mr. WRIGHT:

H.R. 10162. A bill for the relief of Calvin Graham; to the Committee on the Judiciary.

By Mr. YATRON:

H. Con. Res. 421. Concurrent resolution commending the members of Billard Barbells softball team of Reading, Pa., for their contribution to amateur sports in winning the 1977 U.S. Amateur Softball Association Championships; to the Committee on Post Office and Civil Service.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

347. By Mr. QUILLEN: Petition of Dr. Joe Chambers, Erwin, Tenn., relative to repeal of the withholding tax law; to the Committee on Ways and Means.

348. Also, petition of Mr. Frank Gentry, Erwin, Tenn., relative to repeal of the withholding tax law; to the Committee on Ways and Means.

349. Also, petition of Mr. Jim McMackin, Erwin, Tenn., relative to repeal of the withholding tax law; to the Committee on Ways and Means.

350. Also, petition of R. E. Moore, Erwin, Tenn., relative to repeal of the withholding tax law; to the Committee on Ways and Means.

351. Also, petition of Mr. L. Kent Roller, Erwin, Tenn., relative to repeal of the withholding tax law; to the Committee on Ways and Means.

352. By the SPEAKER: Petition of the board of governors, Nashville Area Chamber of Commerce, Tennessee, relative to national security and military preparedness; to the Committee on International Relations.

353. Also, petition of the Commission of Ex-Residents of Portuguese Decolonized Territories, New Bedford, Mass., relative to waiving immigration restrictions; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

S. 1340

By Mr. TEAGUE:

(Amendment in the nature of a substitute.)

Amend the title by striking "Energy Research and Development Administration" and insert in lieu thereof "Department of Energy."

Amend the enacting clause by striking "ERDA" and inserting in lieu thereof "Department of Energy."

Strike all after the enacting clause and insert the following:

SEC. 2. In accordance with section 261 of the Atomic Energy Act of 1954 (42 U.S.C. 2017), section 305 of the Energy Reorganization Act of 1974 (42 U.S.C. 5875), and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5915), there is hereby authorized to be appropriated to the Department of Energy, for energy research, development and demonstration, and related activities, the sum of $6,081,445,000.

TITLE I—ENERGY RESEARCH, DEVELOPMENT, AND DEMONSTRATION, AND RELATED ACTIVITIES

OPERATING EXPENSES

SEC. 101. For "Operating expenses", for the following programs, a sum of dollars equal to the total of the following amounts:

Fossil Energy Development

(1) Coal:

(A) Coal liquefaction, $107,000,000.

(B) High Btu gasification (coal)), $51,-200,000.

(C) Low Btu gasification (coal)), $73,-900,000.

(D) Advanced power systems, $25,500,000.

(E) Direct combustion (coal)), $65,200,000.

(F) Advanced research and supporting technology, $50,000,000: *Provided*, That of those funds authorized, funds as may be necessary are hereby authorized for the following purpose: The Secretary of Energy shall conduct a feasibility study of the technology and the commercial applications of the process of fine grinding of coal and dry vegetable residues for the purpose of preparing these substances as clean burning fuels.

(G) Demonstration plants and major test facilities (coal)), $60,900,000.

(H) Magnetohydrodynamics, $70,800,000: *Provided*, That at least 5 percent of the amount appropriated for magnetohydrodynamics shall be expended for closed cycle technology.

(2) Petroleum and natural gas:

(A) Enhanced oil recovery, $46,100,000.

(B) Enchanced gas recovery, $30,000,000.

(C) Drilling, exploration and offshore technology, $7,600,000.

(D) Processing and utilization, $1,400,000.

(3) Oil shale and in situ technology:

(A) Oil shale, $28,000,000.

(B) in situ coal gasification, $19,000,000.

Solar Energy Development

(4) Thermal applications, $104,700,000, including $94,400,000 for heating and cooling of buildings.

(5) Fuels from biomas, $20,500,000; and under such rules and regulations as he may establish, the Department of Energy is authorized to guarantee a loan or loans for the demonstration of a 50 MW wood-fueled power generating facility.

(6) Other Solar Energy Programs, $219,-700,000, including $7,000,000 for a parallel design work for small community applications.

Geothermal Energy Development

(7) Engineering research and development $15,500,000.

(8) Resource exploration and assessment, $17,600,000.

(9) Hydrothermal technology applications, $28,000,00.

(10) Advanced technology applications, $24,300,000.

(11) Utilization experiments, $16,000,000.

(12) Environmental control and institutional studies, $8,100,000.

(13) Low head hydroelectric program, $15,000,000.

Conservation Research and Development

(14) Electric energy systems and energy storage:

(A) Electric energy systems, $36,800,000.

(B) Energy storage systems, $48,500,000.

(15) End use conservation and technologies to improve efficiency:

(A) Industrial energy conservation, $38,-000,000.

(B) Buildings and community systems, $59,500,000: *Provided*, That $2,000,000 of such sum are hereby authorized for a research and development program in residential gas and oil furnaces.

(C) Transportation energy conservation, $87,000,000, of which $1,000,000 shall be available to the Alternative Fuels Utilization Program for study of automotive utilization of alcohol fuels and blends: *Provided*, That, of those funds authorized for the Alternative Fuel Utilization Program, funds as may be necessary are hereby authorized for the Department of Energy to conduct studies to determine the feasibility of utilizing existing distillery facilities or other types of refineries including but not limited to sugar refineries, in the implementation of programs to extend the supply of gasoline by means of a mixture of gasoline and alcohol.

(D) Improved conversion efficiency, $69,-700,000.

(16) Energy extension service, $8,000,000.

(17) Small grants for appropriate technology, $8,000,000.

Environment and Safety Research and Development.

(18) Environmental and Safety Research and Development:

(A) Overview and Assessment, $50,010,000.

(B) Environmental Research, $143,970,000.

(C) Life Sciences Research, $38,113,000.

(D) Decontamination and Decommissioning, $19,000,000.

Nuclear Research and Development

(19) Magnetic fusion, $207,900,000.

(20) Fuel cycle research and development, $363,885,000, including $20,000,000 for international spent fuel disposition, pursuant to section 107 and including $13,000,000 for research, development, assessment, evaluation, and other activities at the Barnwell Nuclear Fuels Plant related to alternative fuel cycle technologies, safeguard systems, spent fuel storage and waste management, except that none of the authorized funds may be used for operations of the plant to process spent fuel from reactors.

(21) Liquid metal fast breeder reactor, $333,300,000: *Provided*, That $5,000,000 of such sums are hereby authorized for research and development on means to reduce the ability to divert plutonium from its intended purposes and to increase the detectability of plutonium if it should be so diverted.

(22) Nuclear research and applications, $228,829,000.

(23) Light water reactor safety facilities, $24,000,000.

(24) High energy physics, nuclear physics, and basic energy sciences, $413,394,000.

(25) Nuclear materials security and safeguards, $40,106,000.

(26) Uranium enrichment, $989,185,000.

All Other Programs, $444,604,000, including—

(27) (i) Not more than $1,000,000 for the Water Resources Council to carry out the provisions of section 13 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5912);

(ii) Funds to carry out the provisions of section 11 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42

U.S.C. 5910), in the amount of $500,000 for the Council on Environmental Quality; and

(iii) Program management and support:

(a) Program direction, $222,900,000.

(b) Institutional relations, $34,179,000, including funds to reimburse the National Bureau of Standards for costs incurred in carrying out the provisions of section 14 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5913), as amended and including $1,800,000, is authorized to be appropriated pursuant to this paragraph (iii) for financial awards by the Department of Energy to independent inventors for the purpose of carrying out section 14 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5913) as amended.

(c) Supporting activities, $37,460,000.

(d) International cooperation, $5,000,000.

Prior Year Authorizations

(28) The sum of $40,000,000 which represents the portion of the appropriations heretofore made in the total amount of $56,000,000 for project 76–1–a (clean boiler fuel demonstration plant (A–E) and long-lead procurement) which remains unobligated and is no longer needed is hereby authorized to be made available instead, in addition to any amounts appropriated for the purposes involved pursuant to this Act for the low Btu gasification program.

PLANT AND CAPITAL EQUIPMENT

SEC. 102. (a) For "Plant and capital equipment", including construction, acquisition, or modification of facilities, including land acquisition; and acquisition and fabrication of capital equipment not related to construction, a sum of dollars equal to the total of the following amounts:

(1) Conservation Research and Development:

(A) Project 78–1–a, high bay addition, Los Alamos Scientific Laboratory, New Mexico, $800,000.

(2) Fossil Energy Development:

(A) Project 78–2–a, analytical research, chemistry and coal carbonization laboratory, Pittsburgh Energy Research Center, Pennsylvania, $6,600,000.

(B) Project 78–2–b, modifications and additions to Energy Research Centers, various locations, $3,000,000.

(C) Projects 78–2–c, low Btu fuel gas small industrial demonstration plants, sites undetermined (A–E and long-lead procurement only), $6,000,000.

(D) Project 78–2–d, solvent refined coal demonstration plant, site undetermined (total estimated cost is $300,000,000 including the Federal share thereof), $30,000,000.

(3) Magnetic Fusion:

(A) Project 78–3–a, a mirror fusion test facility, Lawrence Livermore Laboratory, California, $94,200,000.

(B) Project 78–3–b, fusion materials irradiation test facility, Hanford Engineering Development Laboratory, Washington (A–E and long-lead procurement), $14,400,000.

(4) Fuel Cycle Research and Development:

(A) Project 78–5–a, facilities for the national waste terminal storage program, site undetermined (land acquisition, A–E and long-lead procurement), $10,000,000.

(B) Project 78–5–b, liquid metal fast breeder reactor integrated prototype equipment test facility, Oak Ridge National Laboratory, Oak Ridge, Tennessee (A–E and long-lead procurement only), $3,000,000.

(C) Project 78–5–c, advanced isotope separation facility, site undetermined (A–E only), $3,500,000.

(5) Liquid Metal Fast Breeder Reactor:

(A) Project 78–6–a, modifications to reactors, $8,700,000.

(B) Project 78–6–b, safeguards and security upgrading, Idaho Falls, Idaho and Chicago, Illinois, $4,935,000.

(C) Project 78–6–c, safety research experimental facility, Idaho National Engineering Laboratory, Idaho (A–E, long-lead procurement and limited construction only), $20,100,000.

(D) Project 78–6–d, experimental breeder reactor II modification, Idaho Falls, Idaho (A–E and selected long-lead procurement only), $3,100,000.

(E) Project 78–6–e, modifications to facilities, Liquid Metal Engineering Center, Santa Susanna, California (A–E only), $4,000,000.

(F) Project 78–6–j, fuels and materials examination facility, Hanford Engineering Development Laboratory, Washington, $134,800,000.

(G) Project 78–7–a, modifications to utility system 300 area, Hanford Engineering Development Laboratory, Washington, $3,600,000.

(H) Project 78–7–b, test reactor area steam distribution system upgrade, Idaho National Engineering Laboratory, Idaho, $1,100,000.

(6) Light Water Reactor Safety Facilities:

(A) Project 78–8–a, upgrade Test Area North hot shop facility, Idaho National Engineering Laboratory, Idaho, $3,400,000.

(7) Environmental Research and Development:

(A) Project 78–9–a, modifications and additions to biomedical and environmental research facilities, various locations, $6,000,000.

(8) High Energy Physics:

(A) Project 78–10–a, accelerator improvements and modifications, various locations, $4,500,000.

(B) Project 78–10–b, proton-proton intersecting storage accelerator facility, Brookhaven National Laboratory, $10,500,000.

(C) Project 78–11–a, master substation reliability and capacity improvements, Stanford Linear Accelerator Center, California, $1,700,000.

(9) Nuclear Physics:

(A) Project 78–12–a, accelerator and reactor improvements and modifications, various locations, $1,900,000.

(B) Project 78–12–b, high intensity uranium beams, Lawrence Berkeley Laboratory, California, $6,000,000.

(10) Basic Energy Sciences:

(A) Project 78–13–a, national synchrotron light source, Brookhaven National Laboratory, New York, $24,000,000.

(B) Project 78–13–b, combustion research facility, Sandia Laboratories, Livermore, California, $9,400,000.

(11) Uranium Enrichment:

(A) Project 78–14–a, centrifuge facilities modifications, various locations, $30,000,000.

(B) Project 78–14–b, process control modifications, plants, various locations, $17,400,000.

(C) Project 78–15–a, water system improvements, gaseous diffusion plant, Paducah, Kentucky, $4,500,000.

(12) Program Management and Support:

(A) Project 78–1–b, chiller modifications for energy conservation, Bendix Plant, Kansas City, Missouri, $830,000.

(B) Project 78–1–c, process waste heat utilization, gaseous diffusion plant, Paducah, Kentucky, $5,700,000.

(C) Projects 78–19–a, program support facility, Argonne National Laboratory, Illinois (A–E and long-lead procurement only), $5,000,000.

(13) Project 78–21, General Plant Projects, $44,265,000.

(14) Project 78–22, Construction Planning and Design, $10,000,000.

(15) Capital Equipment Not Related to Construction:

(A) Conservation research and development, $8,670,000.

(B) Fossil energy development, $5,500,000.

(C) Solar energy development, $7,900,000.

(D) Geothermal energy development, $2,500,000.

(E) Magnetic fusion, $27,600,000.

(F) Fuel cycle research and development, $25,300,000.

(G) Liquid metal fast breeder reactor, $35,650,000.

(H) Nuclear research and applications, $18,595,000.

(I) Light water reactor safety facilities, $800,000.

(J) High energy physics, nuclear physics, and basic energy sciences, $61,300,000.

(K) Nuclear materials, security and safeguards, $2,794,000.

(L) Uranium enrichment, $19,000,000.

(M) Environmental research and development, $19,025,000.

(N) Program management and support, $4,955,000.

CHANGES TO PRIOR YEAR AUTHORIZATIONS

(b)(1) There is authorized an additional sum of $100,000,000 for the process equipment modifications, gaseous diffusion plants (project 71–1–f), authorized by section 101(b)(1) of Public Law 91–273 (for a total project authorization of $920,000,000).

(2) There is authorized an additional sum of $42,700,000 for the cascade uprating program, gaseous diffusion plants (project 74–1–g), authorized by section 101(b)(1) of Public Law 93–60 (for a total project authorization of $460,000,000).

(3) There is authorized an additional sum of $30,000,000 for the high Btu synthetic pipeline gas demonstration plant (project 76–1–b) authorized by section 101(b)(1) of Public Law 94–187 (for a total project authorization of $55,000,000).

(4) There is authorized an additional sum of $131,250,000 for the low Btu fuel gas demonstration plant (projects 76–1–c) authorized by section 101(b)(1) of Public Law 94–187 (for a total project authorization of $150,000,000).

(5) There is authorized an additional sum of $41,000,000 for the ten megawatt central receiver solar thermal powerplant, Barstow, California (project 76–2–b), authorized by section 101(b)(2) of Public Law 94–187 (for a total project authorization of $47,250,000): Provided, That if the solar electrical generating facility hereby supported contributes electricity to a distribution network serving the public on a commercial basis and if any Federal monetary contribution is included in the rate base for the purpose of computing return on capital investment to such utilities, that portion of the capital costs derived from Federal funds and included in the rate base shall be recovered with interest from the revenues of the solar facility.

(6) There is authorized an additional sum of $24,000,000 for the Tokamak fusion test reactor, Princeton Plasma Physics Laboratory, Plainsboro, New Jersey (project 76–5–a), authorized by section 101(b)(5) of Public Law 94–187 (for a total project authorization of $238,600,000).

(7) There is authorized an additional sum of $1,750,000 for the conversion of existing steamplants to coal capability, gaseous diffusion plants and Feed Materials Production Center, Fernald, Ohio (project 76–8–e), authorized by section 101(b)(8) of Public Law 94–187 (for a total project authorization of $15,250,000).

(8) There is authorized an additional sum of $107,630,000 for the enriched uranium production facilities, gas centrifuge (project 76–8–g), authorized by section 101(b)(8) of Public Law 94–187 (for a total project authorization of $362,630,000).

(9) There is authorized an additional sum of $5,500,000 for the MHD component development and integration facility (project 77–1–d) authorized by Public Law 94–373 (for a total project authorization of $13,200,000).

(10) There is authorized an additional sum of $5,000,000 for the high performance fuel laboratory, Richland, Washington (A–E only) (project 77–4–c) (for a total project authorization of $6,500,000).

(11) There is authorized an additional sum of $23,000,000 for the fuel storage facility, Richland, Washington (project 77–4–d) (for a total project authorization of $30,000,000).

(12) There is authorized an additional $3,200,000 for the 14 Mev intense neutron source facility, Los Alamos Scientific Laboratory, New Mexico (project 76–5–b) authorized by Public Law 94–187 (for a total project authorization of $25,300,000).

SEC. 103. Public Law 93–276, as amended, is further amended by rescinding therefrom authorization for project 75–5–g, molten salt breeder reactor (preliminary planning preparatory to possible future demonstration project), $1,500,000, except for any funds heretofore obligated.

SEC. 104(a). Notwithstanding any other provision of law, jurisdiction over matters transferred to the Department of Energy from the Energy Research and Development Administration which on the effective date of such transfer were required by law, regulation, or administrative order to be made on the record after an opportunity for an agency hearing may be assigned to the Federal Energy Regulatory Commission or retained by the Secretary at his discretion.

(b) Notwithstanding any other provision of law, the Secretary of Energy shall not be required to delegate to the Administrator of the Energy Information Administration any energy research, development, and demonstration function vested in the Secretary, pursuant to the Atomic Energy Act, the Federal Nonnuclear Energy Research and Development Act, the Geothermal Research, Development and Demonstration Act, the Electric and Hybrid Vehicle Research, Development and Demonstration Act, the Solar Heating and Cooling Demonstration Act, the Solar Energy Research, Development and Demonstration Act, and the Energy Reorganization Act. Additionally, the Secretary may utilize the capabilities of the Energy Information Administration as he deems appropriate for the conduct of such programs.

(c) As part of the Department of Energy's responsibility to keep the Congress fully and currently informed, the Secretary shall make the following reports:

(i) any proposal by the Secretary of the Department of Energy to terminate or make major changes in activities of the Government-owned and contractor-operated facilities, the national laboratories, energy research centers and the operations offices managing such laboratories, shall not be implemented until the Secretary transmits the proposal, together with all pertinent data, to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, and waits a period of thirty calendar days (not including any day on which either House of Congress is not in session because of an adjournment of more than three calendar days to a day certain) from the date on which such report is received by such committees; and

(ii) by January 31, 1978, the Secretary shall file a full and complete report on each such proposal which he has implemented, as described in the preceding paragraph, and any major program structure change with the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

SEC. 105. (a) The Secretary of Energy shall prepare and submit to the Congress within one year after the date of the enactment of this Act a study which considers the available options, including, but not limited to—

(1) Federal technical and financial aid in support of decommissioning high level waste disposal operations at the Western New York Nuclear Service Center;

(2) Federal operation of the Western New York Nuclear Service Center for the purposes of decommissioning existing facilities and disposing of existing high level wastes, including a demonstration program for the solidification of high level wastes for permanent burial;

(3) permanent Federal ownership of and responsibility for all or part of the Western New York Nuclear Service Center, and Federal receipt of the license from the present co-licensees; and

(4) use of the Western New York Nuclear Service Center for other purposes.

(b) Preparation of such study shall be in cooperation with the Nuclear Regulatory Commission and other Federal agencies, the State of New York, the industrial participants, and the public, and the Secretary of Energy shall conduct informational public hearings (in lieu of any formal administrative hearings) prior to completion of the study. The study shall recommend allocation of existing and future responsibilities among the Federal Government, the State of New York, and present industrial participants in the Western New York Nuclear Service Center.

(c) Ninety days prior to submission of the study to the Congress the Secretary of Energy shall release the proposed study for comments by interested parties, and such comments as are received shall be submitted as attachments to the final study submitted to the Congress.

(d) Nothing in this section shall be construed as intending to commit the Federal Government to any new assistance or participation in the Western New York Nuclear Service Center, nor as relieving any party of any duties or responsibilities under any law, regulation, or contract to provide for the safe storage of nuclear waste.

(e) For the purpose of carrying out the provisions of this section, there is included in subsection 101(20) of this Act authorization of appropriations in the amount of $1,000,000.

SEC. 106. (a) The Department of Energy shall conduct a study of the Barnwell Nuclear Fuel Plant located in South Carolina to determine if that facility may be utilized in support of the nonproliferation objectives of the United States.

(b) The study required under subsection (a) shall—

(1) include an evaluation of the multinational and international management options available for utilizing the Barnwell facility;

(2) include an evaluation of how Barnwell facility might be used to contribute to the INFCE, including preliminary studies on siting and design for adjacent facilities to the Barnwell Separations Plant to solidify liquid waste and mixed-oxide evolving from the chemical separations process (these preliminary efforts being consistent with similiar efforts undertaken as part of the INFCE);

(3) include an evaluation of a possible role for the IAEA in utilization of Barnwell facility for international non-proliferation programs;

(4) include an evaluation of the means by which the Barnwell facility could be used in demonstration of improved safeguards equipment and proceedings.

(5) include an evaluation of how the Barnwell facility can be used to complement the U.S.-approved research and development program at the Japanese Tokai Mura Reprocessing Plant, and non-proliferation research activities to be undertaken at the British Windscale Reprocessing Plant; and

(6) include an evaluation of whether and how the Barnwell facility might be transferred to the Federal Government.

(c) In carrying out the study required under subsection (a) due consideration shall be given to the impact which the effective and efficient use of resources and the independence of resource supply can have in assuring our national security objectives.

(d) The study shall be completed and a report submitted to the Congress not later than six months after the date that funds are appropriated for carrying out the purposes of this section. In addition, the report shall include recommendations and funding requirements to implement recommended programs resulting from such study.

(e) For the purpose of carrying out the provisions of this section, there is included in subsection 101(20) of this Act an authorization of appropriations in the amount of 1,000,000.

SEC. 107. The Department of Energy is hereby authorized to undertake studies, in cooperation with other nations, on a multinational or international basis designed to determine the general feasibility of expanding capacity of existing spent fuel storage facilities; to enter into agreements, subject to the consent of the Congress (by joint or concurrent resolution or legislation hereafter enacted), with other nations or groups of nations, for providing appropriate support to increase international or multinational spent fuel storage capacity; to conduct studies on the feasibility of establishing regional storage sites; and to conduct studies on international transportation and storage systems. For the purpose of carrying out the provisions of this section, there is included in subsection 101(20) of this Act authorization of appropriations in the amount of $20,000,000: *Provided*, notwithstanding any other provision of law, that none of the funds made available to the Secretary of Energy under any other authorization or appropriation Act shall be used, directly or indirectly, for the repurchase, transportation or storage of any foreign spent nuclear fuel (including any nuclear fuel irradiated in any nuclear power reactor located outside of the United States and operated by any foreign legal entity, government or nongovernment, regardless of the legal ownership or control of the fuel or the reactor, and regardless of the origin or licensing of the fuel or the reactor, but not including fuel irradiated in a research reactor, and not including fuel irradiated in a power reactor if the President determines that (1) use of funds for repurchase, transportation or storage of such fuel is required by an emergency situation, (2) it is in the interest of the common defense and security of the United States to take such action, and (3) he notifies the Congress of the determination and action, with a detailed explanation and justification thereof, as soon as possible) unless the President formally notifies, with the report information specified herein, the Committee on Energy and Natural Resources of the Senate and the Committee on Science and Technology of the House of Representatives of such use of funds thirty calendar days, during such time as either House of Congress is in session, before the commitment, expenditure, or obligation of such funds: and provided further, notwithstanding any other provision of law, that none of the funds appropriated pursuant to this Act or any other funds made available to the Secretary of Energy under any other authorization or appropriation Act shall be used, directly or indirectly, for the repurchase, transportation, or storage of any such foreign spent nuclear fuel for storage or other disposition, interim or permanent, in the United States, unless the use of the funds for that specific purpose has been (1) previously and expressly authorized by Congress in legislation hereafter enacted, (2) previously and expressly authorized by a concurrent resolution, or (3) the President submits a plan for such use, with the report information specified herein, 30 days during which the Congress is in continuous session, as defined in the Impoundment Control Act of 1974, prior to such use and neither House of Congress approves a resolution of disapproval of the plan prior to the expiration of the aforementioned thirty day period. If such a resolution of disapproval has been introduced, but has not been reported by the Committee on or before the twentieth day after transmission of the Presidential message, a privileged motion shall be in order in

the respective body to discharge the Committee from further consideration of the resolution and to provide for its immediate consideration, using the procedures specified for consideration of an impoundment resolution in section 1017 of the Impoundment Control Act of 1974 (31 U.S.C. 1407). Any report or plan proposed under this proviso shall include information and any supporting documentation thereof relating to policy objectives, technical description and discussion, geographic information, cost data, justification and projections, legal and regulatory considerations, environmental impact information and any related bilateral or international agreements, arrangements or understandings; and provided further that nothing contained in this Section shall be construed in any Executive Branch action, administrative proceeding, regulatory proceeding, or legal proceeding as being intended to delay, modify, or reverse the Memorandum and Order of the Nuclear Regulatory Commission of June 28, 1977 for the issuance of License No. XSNM-845 to the agent-applicant for the Government of India and the subsequent export thereby licensed of the special nuclear material to be used as fuel for the Tarapur Atomic Power Station or any other Order of the Nuclear Regulatory Commission to issue a license for the export of special nuclear material and subsequent exports thereby licensed, or any consideration by the Nuclear Regulatory Commission of a license application for the export of special nuclear material.

TITLE II—GENERAL PROVISIONS

SEC. 201. Title I of the Energy Reorganization Act of 1974 is amended by adding at the end thereof the following new section:

"PROVISIONS APPLICABLE TO ANNUAL AUTHORIZATION ACTS

"SEC. 111. (a) All appropriations made to the Energy Research and Development Administration or the Administrator shall, except as otherwise provided by law, be subject to annual authorization in accordance with section 261 of the Atomic Energy Act of 1954, section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and section 305 of this Act. The provisions of this section shall apply with respect to appropriations made pursuant to the Act providing such authorization (hereinafter in this section referred to as 'annual authorizing Acts').

"(b)(1) Funds appropriated pursuant to an annual authorization Act for 'Operating expenses' may be used for—

"(A) the construction or acquisition of any facilities, or major items of equipment, which may be required at locations other than installations of the Administration, for the performance of research, development, and demonstration activities, and

"(B) grants to any organization for purchase or construction of research facilities. No such funds shall be used under this subsection for the acquisition of land. Fee title to all such facilities and items of equipment shall be vested in the United States, unless the Administrator or his designee determines in writing that the research, development, and demonstration authorized by such Act would best be implemented by permitting fee title or any other property interest to be vested in an entity other than the United States; but before approving the vesting of such title or interest in such entity, the Administrator shall (i) transmit such determination, together with all pertinent data, to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate and (ii) wait a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain), unless prior to the expiration of such period each such committee has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

"(2) No funds shall be used under paragraph (1) for any facility or major item of equipment, including collateral equipment, if the estimated cost to the Federal Government exceeds $5,000,000 in the case of such a facility or $2,000,000 in the case of such an item of equipment, unless such facility or item has been previously authorized by the appropriate committees of the House of Representatives and the Senate, or the Administrator—

"(A) transmit to the appropriate committees of the House of Representatives and the Senate a report on such facility or item showing its nature, purpose, and estimated cost, and

"(B) waits a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain), unless prior to the expiration of such period each such committee has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

"(c)(1) Not to exceed 1 per centum of all funds appropriated pursuant to any annual authorization Act for 'Operating expenses' may be used by the Administrator to construct, expand, or modify laboratories and other facilities, including the acquisition of land, at any location under the control of the Administrator, if the Administrator determines that (A) such action would be necessary because of changes in the national programs authorized to be funded by such Act or because of new scientific or engineering developments, and (B) deferral of such action until the enactment of the next authorization Act would be inconsistent with the policies established by Congress for the Administration.

"(2) No funds may be obligated for expenditure or expended under paragraph (1) for activities described in such paragraph unless—

"(A) a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after the Administrator has transmitted to the appropriate committees of the House of Representatives and the Senate a written report containing a full and complete statement concerning (i) the nature of the construction, expansion, or modification involved, (ii) the cost thereof, including the cost of any real estate action pertaining thereto, and (iii) the reason why such construction, expansion, or modification is necessary and in the national interest, or

"(B) each such committee before the expiration of such period has transmitted to the Administrator a written notice to the effect that such committee has no objection to the proposed action:

except that this paragraph shall not apply to any project the estimated total cost of which does not exceed $50,000.

"(d)(1) Except as otherwise provided in the authorization Act involved—

"(A) no amount appropriated pursuant to any annual authorization Act may be used for any program in excess of the amount actually authorized for that particular program by such Act, and

"(B) no amount appropriated pursuant to any annual authorization Act may be used for any program which has been presented to, or requested of the Congress,

unless (i) a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after the receipt by the appropriate committee of the House of Representatives and the Senate of notice given by the Administrator containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action, or (ii) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

"(2) Notwithstanding any other provision of this section or the authorization Act involved, the aggregate amount available for use within the categories of coal, petroleum and natural gas, oil shale, solar, geothermal, nuclear energy (non-weapons), environment and safety, and conservation from sums appropriated pursuant to an annual authorization Act may not, as a result of reprogramming, be decreased by more than 10 per centum of the total of the sums appropriated pursuant to such Act for those categories.

"(e) Subject to the applicable requirements and limitations of this section and the authorization Act involved, when so specified in an appropriation Act, amounts appropriated pursuant to any annual authorization Act for 'Operating expenses' or for 'Plant and capital equipment' may be merged with any other amounts appropriated for like purposes pursuant to any other Act authorizing appropriation for the Administration: *Provided*, That no such amounts appropriated for 'plant and capital equipment' may be merged with amounts appropriated for 'operating expenses.'

"(f) When so specified in an appropriation Act, amounts appropriated pursuant to any annual authorization Act for 'Operating expenses' or for 'Plant and capital equipment' may remain available until expended.

"(g) The Administrator is authorized to perform construction design services for any administration construction project whenever (1) such construction project has been included in a proposed authorization bill transmitted to the Congress by the Administration, and (2) the Administration determines that the project is of such urgency in order to meet the needs of national defense or protection of life and property or health and safety that construction of the project should be initiated promptly upon enactment of legislation appropriating funds for its construction.

"(h) When so specified in appropriation Acts, any moneys received by the Administration may be retained and used for operating expenses, and may remain available until expended, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484); except that—

"(1) this subsection shall not apply with respect to sums received from disposal of property under the Atomic Energy Community Act of 1955 or the Strategic and Critical Materials Stockpiling Act, as amended, or with respect to fees received for tests or investigations under the Act of May 16, 1910, as amended (42 U.S.C. 2301; 50 U.S.C. 98h; 30 U.S.C. 7); and

"(2) revenues received by the Administration from the enrichment of uranium shall (when so specified) be retained and used for the specific purpose of offsetting costs incurred by the Administration in providing uranium enrichment service activities.

"(i) When so specified in an appropriation Act, transfers of sums from the 'Operating expenses' appropriation made pursuant to an annual authorization Act may be made to other agencies of the Government for the performance of the work for which the appropriation is made, and in such cases the sums so transferred may be merged with the appropriations to which they are transferred.".

SEC. 202. (a) The Secretary of Energy is authorized to start any project set forth in section 102(a) (1) through (12) only if at the time the project is started the then currently estimated cost does not exceed by more than 25 per centum the estimated cost set forth for that project; and the total cost of any such project shall not exceed the estimated cost set forth for that project by more than 25 per centum (if such estimated cost was $5,000,000 or more) unless and until appropriations covering such excess are authorized.

(b) The Secretary of Energy is authorized to start any project under section 102(a)(13) only if the maximum currently estimated cost of such project does not exceed $750,000 and the then maximum currently estimated cost of any building included in the project does not exceed $300,000 and the total cost of all projects undertaken under such section shall not exceed the estimated cost set forth in such section by more than 10 per centum.

SEC. 203. The Secretary of Energy, in cooperation with the Secretary of State, shall report to the Committees on Science and Technology and International Relations of the House of Representatives and the Committees on Energy and Natural Resources and Foreign Relations of the Senate, within six months after the date of the enactment of this Act, on the effects of the April 20, 1977, message from the President of the United States, "Establishing for the United States a Strong and Effective Nuclear Non-Proliferation Policy", on nuclear research and development cooperative agreements. This report shall include impacts of the message and related initiatives through the promulgation, repeal, or modification of Executive orders, Presidential proclamations, treaties, other international agreements, and other pertinent documents of the President, the Executive Office of the President, the administrative agencies, and the departments, on cooperation between the United States and any other nation in the research, development, demonstration, and commercialization of all nuclear fission and nuclear fusion technologies. After the initial report, the Administrator shall report to such Committees on each subsequent major related initiative.

SEC. 204. (a) In carrying out the programs for which funds are authorized by this Act, the Secretary of Energy shall provide a realistic and adequate opportunity for small business concerns to participate in such programs to the optimum extent feasible consistent with the size and nature of the projects and activities involved.

(b) At least once every six months, or upon request, the Secretary of Energy shall submit to the appropriate committees of the House of Representatives and the Senate a full report on the actions taken in carrying out subsection (a) during the preceding six months, including the extent to which small business concerns are participating in the programs involved and in projects and activities of various types and sizes within each such program, and indicating the steps currently being taken to assure such participation in the future.

SEC. 205. (a) Section 91 of chapter 9 of the Atomic Energy Community Act of 1955 is amended—

(1) by striking out subsection a. and inserting in lieu thereof the following:

"a. From the date of transfer of any municipal installations to a governmental or other entity at or for the community, the Administrator is authorized, for a period of ten years, to make annual assistance payments of just and reasonable sums to the State, county, or local entity having jurisdiction to collect property taxes or to the entity receiving the installation transferred hereunder: *Provided, however,* That with respect to the cities of Oak Ridge, Tennessee, and Richland, Washington, the Richland School District, the Los Alamos School Board, and the county of Los Alamos, New Mexico, the Administrator is authorized to continue to make assistance payments of just and reasonable sums after expiration of such ten-year period: *Provided further,* That the Administrator is also authorized to make payments of just and reasonable sums to Anderson County and Roane County, Tennessee. In determining the amount and recipient of such payments the Administrator shall consider—

"(1) the approximate real property taxes and assessments for local improvements which would be paid to the governmental entity upon property within the community if such property were not exempt from taxation by reason of Federal ownership;

"(2) the maintaining of municipal services at a level which will not impede the recruitment or retention of personnel essential to the Energy Research and Development Administration programs;

"(3) the fiscal problems peculiar to the governmental entity by reason of the construction at the community as a single-purpose national defense installation under emergency conditions;

"(4) the municipal services and other burdens imposed on the governmental or other entities at the community by the United States in its operations in the project area; and

"(5) the tax revenues and sources available to the governmental entity, its efforts and diligence in collection of taxes, assessment of property, and the efficiency of its operations."; and

(2) by striking out subsection d. and inserting in lieu thereof the following:

"d. With respect to any entity not less than six months prior to the expiration of the ten-year period referred to in subsection a. (or not less than six months prior to June 30, 1979, in the case of the cities of Oak Ridge, Tennessee, and Richland, Washington, and the Richland School District; or not less than six months prior to June 30, 1986, in the case of Anderson County and Roane County, Tennessee, and the Los Alamos School Board; and not less than six months prior to June 30, 1987, in the case of the county of Los Alamos, New Mexico), the Administrator shall present to the appropriate committees of the House of Representatives and the Senate recommendations as to the need for any further assistance payments to such entity.".

(b) Chapter 9 of such Act is further amended by striking out section 94 and inserting in lieu thereof the following:

"SEC. 94. CONTRACTS.—The Administrator is authorized, without regard to section 3679 of the Revised Statutes, to enter into a contract with any governmental or other entity to which payments are authorized to be made pursuant to section 91, obligating the Administrator to make such entity the payments directed or authorized to be made by section 91: Provided, however, That the term of such contracts, in the case of the cities of Oak Ridge, Tennessee, and Richland, Washington, and the Richland School District, shall not extend beyond June 30, 1979; and in the case of the Los Alamos School Board shall not extend beyond June 30, 1986; and in the case of the county of Los Alamos, New Mexico, shall not extend beyond June 30, 1987.".

SEC. 206. (a) Section 6 of the Federal Nonnuclear Energy Research and Development Act of 1974 is amended by adding at the end thereof the following new subsection:

"(c) Based upon the comprehensive plan developed under subsection (a), the Administrator shall develop and transmit to the Congress, on or before September 1, 1978, a comprehensive environment and safety program to insure the full consideration and evaluation of all environmental, health, and safety impacts of each element, program, or initiative contained in the nuclear and nonnuclear energy research, development, and demonstration plans.".

(b) Section 15(a) of such Act is amended—

(1) by striking out "and" at the end of paragraph (2),

(2) by striking out the comma at the end of paragraph (3) and inserting in lieu thereof "; and", and

(3) by inserting after paragraph (3) the following new paragraph;

"(4) a detailed description of the environmental and safety research, development, and demonstration activities carried out and in progress including the procedures adopted to mitigate undesirable environmental and safety impacts,".

SEC. 207. (a) Section (7a) of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906) is amended—

(1) by striking out "and" after the semicolon at the end of paragraph (5),

(2) by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and", and

(3) by adding at the end thereof the following new paragraph:

"(7) Federal loan guarantees and commitments thereof as provided in section 19.".

(b) The Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5901, et seq.) is further amended by adding at the end thereof the following new section:

"LOAN GUARANTEES FOR ALTERNATIVE FUEL DEMONSTRATION FACILITIES

"SEC. 19. (a) It is the purpose of this section—

"(1) to assure adequate Federal support to foster a demonstration program to produce alternative fuels from coal, oil shale, biomass, and other domestic resources;

"(2) to authorize assistance, through loan guarantees under subsection (b) and (y) for construction and startup and related costs, to demonstration facilities for the conversion of domestic coal, oil shale, biomass, and other domestic resources into alternative fuels; and

"(3) to gather information about the technological economic, environmental, and social costs, benefits, and impacts of such demonstration facilities.

"(b)(1) Except as provided in paragraph (5) of this subsection and subsection (y) of this section the Administrator is authorized, in accordance with such rules and regulations as he shall prescribe after consultation with the Secretary of the Treasury, to guarantee and to make commitments to guarantee, in such manner and subject to such conditions (not inconsistent with the provisions of this Act as he deems appropriate, the payment of interest on, and the principal balance of, bonds, debentures, notes, and other obligations issued by, or on behalf of, any borrower for the purpose of financing the construction and startup costs of demonstration facilities for the conversion of domestic coal, oil shale, biomass, and other domestic resources into alternative fuels: Provided, That no loan guarantee for a full sized oil shale facility shall be provided under this section until after successful demonstration of a modular facility producing between six and ten thousand barrels per day, taking into account such considerations as water usage, environmental effects, waste disposal, labor conditions, health and safety, and the socioeconomic impacts on local communities: Provided further, That no loan guarantee shall be available under this subsection for the manufacture of component parts for demonstration facilities eligible for assistance under this subsection.

"(2) An applicant for any financial assistance under this section shall provide information to the Administrator in such form and with such content as the Administrator deems necessary.

"(3) Prior to issuing any guarantee under this section the Administrator shall obtain the concurrence of the Secretary of the Treasury with respect to the timing, interest rate, and substantial terms and conditions of such guarantee. The Secretary of the Treasury shall insure to the maximum extent feasible that the timing, interest rate, and substantial terms and conditions of such guarantee will have the minimum possible impact on the capital markets of the United States, taking into account other Federal direct and indirect securities activities.

"(4) The full faith and credit of the United States is pledged to the payment of all guarantees issued under this section with respect to principal and interest.

"(5)(A) The Administrator is authorized, in the case of a facility for the conversion of oil shale to alternative fuels which is determined by the Administrator pursuant to the proviso in paragraph (1)(A) of this subsection, to be constructed at a modular size, to enter into a cooperative agreement with the applicant in accordance with section 8 of this Act and the other provisions of this Act to share the estimated total design and construction costs, plus operation and maintenance costs, of such modular facility. The Federal share shall not exceed 75 per centum of such costs. All receipts for the sale of any products produced during the operation of the facility shall be used to offset the costs incurred in the operation and maintenance of the facility. The provisions of subsections (d), (e), (k), (m), (p), (s), (t), (u), (v), (w), and (x) shall apply to any such modular facility. The provisions of this section shall apply to any loan guarantee for such modular facility.

"(B) After successful demonstration of the modular facility, as determined by the Administrator, the facility is eligible for financial assistance under this section for purposes of expansion to a full sized facility and the applicant may purchase the Federal interest in the modular facility as represented by the Federal share thereof by means of (i) a cash payment to the United States, or (ii) a share of the product or sales resulting from such expanded operation, as determined by the Administrator. If expansion of such facility is determined not to be warranted by the Administrator, he may, at the option of the applicant, dispose of the modular facility to the applicant at not less than fair market value, as determined by the Administrator as of the date of the disposal, or otherwise dispose of it, in accordance with applicable provisions of law, and distribute the net proceeds thereof, after expenses of such disposal, to the applicant in proportion to the applicant's share of the costs of such facility.

"(6) To the extent possible, loan guarantees shall be issued on the basis of competitive bidding among guarantee applicants in a particular technology area.

"(c) The Administrator, with due regard for the need for competition, shall guarantee or make a commitment to guarantee any obligation under subsection (b) or (y) only if—

"(1) the Administrator is satisfied that the financial assistance applied for is necessary to encourage financial participation;

"(2) the amount guaranteed to any borrower at any time does not exceed—

"(A) an amount equal to 75 per centum of the project cost of the demonstration facility as estimated at the time the guarantee is issued, which cost shall not include amounts expended for facilities and equipment used in the extraction of a mineral other than coal or shale, and in the case of coal only to the extent that the Administrator determines that the coal is to be converted to alternative fuel; and

"(B) an amount equal to 60 per centum of that portion of the actual total project cost of any demonstration facility which exceeds the project cost of such facility as estimated at the time the loan guarantee is issued;

"(3) the Administrator has determined that there will be a continued reasonable assurance of full repayment;

"(4) the obligation is subject to the condition that it not be subordinated to any other financing;

"(5) the Administrator has determined, taking into consideration all reasonably available forms of assistance under this section and other Federal and State statutes, that the impacts resulting from the proposed demonstration facility have been fully evaluated by the borrower, the Administrator, and the Governor of the affected State, and that effective steps have been taken or will be taken in a timely manner to finance community planning and development costs resulting from such facility under this section, under other provisions of law, or by other means;

"(6) the maximum maturity of the obligation does not exceed twenty years, or 90 per centum of the projected useful economic life of the physical assets of the demonstration facility covered by the guarantee, whichever is less, as determined by the Administrator;

"(7) the Administrator has determined that, in the case of any demonstration or modular facility planned to be located on Indian lands, the appropriate Indian tribe, with the approval of the Secretary of the Interior, has given written consent to such location;

"(8) the obligation provides for the orderly and ratable retirement of the obligation and includes sinking fund provisions, installment payment provisions or other methods of payments and reserves as may be reasonably required by the Administrator. Prior to approving any repayment schedule the Administrator may consider the date on which operating revenues are anticipated to be generated by the project. To the maximum extent possible repayment or provision therefor shall be required to be made in equal payments payable at equal intervals; and

"(9) the obligation provides that the Administrator shall, after a period of not less than ten years from issuance of the obligation, taking into consideration whether the Government's needs for information to be derived from the project have been substantially met and whether the project is capable of commercial operation, determine the feasibility and advisability of terminating the Federal participation in the project. In the event that such determination is positive, the Administrator shall notify the borrower and provide the borrower with not less than two nor more than three years in which to find alternative financing. At the expiration of the designated period of time, if the borrower has been unable to secure alternative financeneray and give due consideration to views, comments, and recommendations received: ing, the Administrator is authorized to collect from the borrower an additional fee of 1 per centum per annum on the remaining obligation to which the Federal guarantee applies.

"(d) Prior to submitting a report to Congress pursuant to subsection (m) of this section on each guarantee and cooperative agreement, the Administrator shall request from the Attorney General and the Chairman of the Federal Trade Commission written views, comments, and recommendations concerning the impact of such guarantee or commitment or agreement on competition and concentration in the production or *Provided*, That if either official, within sixty days after receipt of such request or at any time prior to the Administrator submitting such report to Congress, recommends against making such guarantee or commitment or agreement, the proposed guarantee or commitment or agreement shall be referred to the President, and the Administrator shall not do so unless the President determines in writing that such guarantee or commitment or agreement is in the national interest.

"(e)(1) As soon as the Administrator knows the geographic location of a proposed facility for which a guarantee or a commitment to guarantee or cooperative agreement is sought under this section, he shall inform the Governor of the State, and officials of each political subdivision and Indian tribe, as appropriate, in which the facility would be located or which would be impacted by such facility. The Administrator shall not guarantee or make a commitment to guarantee or enter into a cooperative agreement under subsection (b) or subsection (y) of this section, if the Governor of the State in which the proposed facility would be located recommends that such action not be taken, unless the Administrator finds that there is an overriding natural interest in taking such action in order to achieve the purpose of this section.

If the Administrator decides to guarantee or make a commitment to guarantee or enter into a cooperative agreement despite a Governor's recommendation not to take such action, the Administrator shall communicate, in writing, to the Governor reasons for not concurring with such recommendation. This Administrator's decision, pursuant to this subsection, shall be final unless determined upon judicial review initiated by the Governor to be unlawful by the reviewing court pursuant to 5 U.S.C. 706(2) (A) through (D). Such review shall take place in the United States court of appeals for the circuit in which the State involved is located, upon application made within ninety days from the date of such decision. The Administrator shall, by regulation, establish procedures for review of, and comment on, the proposed facility by States, local political subdivisions, and Indian tribes which may be impacted by such facility, and the general public.

"(2) The Administrator shall review and approve the plans of the applicant for the construction and operation of any demonstration and related facilities constructed or to be constructed with assistance under this section. Such plans and the actual construction shall include such monitoring and other data-gathering costs associated with such facility as are required by the comprehensive plan and program under this section. The Administrator shall determine the estimated total cost of such demonstration facility, including, but not limited to, construction costs, startup costs, costs to political subdivisions and Indian tribe by such facility, and cost of any water storage facilities needed in connection with such demonstration facility, and determine who shall pay such costs. Such determination shall not be binding upon the States, political subdivisions or Indian tribes.

"(3) There is hereby established a panel to advise the Administrator on matters relating to the program authorized by this section, including, but not limited to, the impact of the demonstration facilities on communities and States and Indian tribes, the environmental and health and safety effects of such facilities, and the means, measures, and planning for preventing or mitigating such impacts, and other matters relating to the development of alternative fuels and other energy sources under this section. The panel shall

include such Governors or their designees as shall be designated by the Chairman of the National Governors Conference, Representatives of Indian tribes, industry, environmental organizations and the general public shall be appointed by the Administrator. The Chairman of the panel shall be selected by the Administrator. No person shall be appointed to the panel who has a financial interest in any applicant applying for assistance under this section. Members of the panel shall serve without compensation. The provisions of section 106(e) of the Energy Reorganziation Act of 1974 (42 U.S.C. 5816 (e)) shall apply to the panel.

"(f) Except in accordance with reasonable terms and conditions contained in the written contract of guarantee, no guarantee issued or commitment to guarantee made under this section shall be terminated, canceled, or otherwise revoked. Such a guarantee or commitment shall be conclusive evidence that the underlying obligation is in compliance with the provisions of this section and that such obligation has been approved and is legal as to principal, interest, and other terms. Subject to the conditions of the guarantee or commitment to guarantee, such a guarantee shall be incontestable in the hands of the holder of the guaranteed obligation, except as to fraud or material misrepresentation on the part of the holder.

"(g)(1) If there is a default by the borrower, as defined in regulation promulgated by the Administrator and in the guarantee contract, the holder of the obligation shall have the right to demand payment of the unpaid amount from the Administrator. Within such period as may be specified in the guarantee or related agreements, the Administrator shall pay to the holder of the obligation the unpaid interest on, and unpaid principal of the guaranteed obligation as to which the borrower has defaulted, unless the Administrator finds that there was no default by the borrower in the payment of interest or principal or that such default has been remedied. Nothing in this section shall be construed to preclude any forebearance by the holder of the obligation for the benefit of the borrower which may be agreed upon by the parties to the guaranteed obligation and approved by the Administrator.

"(2) If the Administrator makes a payment under paragraph (1) of this subsection, the Administrator shall be subrogated to the rights of the recipient of such payment (and such subrogation shall be expressly set forth in the guarantee or related agreements), including the authority to complete, maintain, operate, lease, or otherwise dispose of any property acquired pursuant to such guarantee or related agreements, or any other property of the borrower (of a value equal to the amount of such payment) to the extent that the guarantee applies to amounts in excess of the estimated project cost under subsection (c)(2)(B), without regard to the provisions of the Federal Property and Administrative Service Act of 1949, as amended, except section 207 of that Act (40 U.S.C. 488), or any other law, or to permit the borrower, pursuant to an agreement with the Administrator, to continue to pursue the purposes of the demonstration facility if the Administrator determines that this is in the public interest. The rights of the Administrator with respect to any property acquired pursuant to such guarantee or related agreements, shall be superior to the rights of any other person with respect to such property.

"(3) In the event of a default on any guarantee under this section, the Administrator shall notify the Attorney General, who shall take such action as may be appropriate to recover the amounts of any payments made under paragraph (1) including any payment of principal and interest under subsection (h) from such assets of the defaulting borrower as are associated with the demonstration facility, or from any other security included in the terms of the guarantee.

"(4) For purposes of this section, patents, including any inventions for which a waiver was made by the Administrator under Section 9 of this Act, and technology resulting from the demonstration facility, shall be treated as project assets of such facility. The guarantee agreement shall include such detailed terms and conditions as the Administrator deems appropriate to protect the interests of the United States in the case of default and to have available all the patents and technology necessary for any person selected, including, but not limited to the Administrator, to complete and operate the defaulting project. Furthermore, the guarantee agreement shall contain a provision specifying that patents, technology, and other proprietary rights which are necessary for the completion or operation of the demonstration facility shall be available to the United States and its designees on equitable terms, including due consideration to the amount of the United States default payments. Inventions made or conceived in the course of or under such guarantee, title to which is vested in the United States under this Act, shall not be treated as project assets of such facility for disposal purposes under this subsection, unless the Administrator determines in writing that it is in the best interests of the United States to do so.

"(h) With respect to any obligation guaranteed under this section, the Administrator is authorized to enter into a contract to pay, and to pay, holders of the obligations, for and on behalf of the borrowres, from the fund established by this section, the principal and interest payments which become due and payable on the unpaid balance of such obligation if the Administrator finds that—

"(1) the borrower is unable to meet such payments and is not in default; it is in the public interest to permit the borrower to continue to pursue the purposes of such demonstration facility; and the probable net benefit to the Federal Government in paying such principal and interest will be greater than that which would result in the event of a default;

"(2) the amount of such payment which the Administrator is authorized to pay shall be no greater than the amount of principal and interest which the borrower is obligated to pay under the loan agreement; and

"(3) the borrower agrees to reimburse the Administrator for such payment on terms and conditions, including interest, which are satisfactory to the Administrator.

"(i) Regulations required by this section shall be issued within one hundred and eighty days after enactment of this section, except as provided in subsection (t) of this section. All regulations under this section and any amendments thereto shall be issued in accordance with section 553 of title 5, of the United States Code.

"(j) The Administrator shall charge and collect fees for guarantees of obligations authorized by subsection (b)(1), in amounts which (1) are sufficient in the judgment of the Administrator to cover the applicable administrative costs, and (2) reflect the percentage of projects costs guaranteed. In no event shall the fee be less than 1 per centum per annum of the outstanding indebtedness covered by the guarantee. Nothing in this subsection shall be construed to apply to community planning and development assistance pursuant to subsection (k) of this section.

"(k)(1) In accordance with such rules and regulations as the Administrator in consultation with the Secretary of the Treasury shall prescribe, and subject to such terms and conditions as he deems appropriate, the Administrator is authorized, for the purpose of financing essential community development and planning which directly result from, or are necessitated by, one or more demonstration facilities assisted under this section to—

"(A) guarantee and make commitments to guarantee the payment of interest on, and the principal balance of obligations for such financing issued by eligible States, political subdivisions, or Indian tribes,

"(B) guarantee and make commitments to guarantee the payment of taxes imposed on such demonstration facilities by eligible non-Federal taxing authorities which taxes are earmarked by such authorities to support the payment of interest and principal on obligations for such financing, and

"(C) require that the applicant for assistance for a demonstration facility under this section advance sums to eligible States, political subdivisions, and Indian tribes to pay for the financing of such development and planning: *Provided*, That the State, political subdivision, or Indian tribe agrees to provide tax abatement credits over the life of the facilities for such payments by such applicant.

"(2) Prior to issuing any guarantee under this subsection, the Administrator shall obtain the concurrence of the Secretary of the Treasury with respect to the timing, interest rate, and substantial terms and conditions of such guarantee. The Secretary of the Treasury shall insure to the maximum extent feasible that the timing, interest rate, and substantial terms and conditions of such guarantee will have the minimum possible impact on the capital markets of the United States, taking into account other Federal direct and indirect securities activities.

"(3) In the event of any default by the borrower in the payment of taxes guaranteed by the Administrator under this subsection, the Administrator shall pay out of the fund established by this section such taxes at the time or times they may fall due, and shall have by reason of such payment a claim against the borrower for all sums paid plus interest.

"(4) If after consultation with the State, political subdivision, or Indian tribe, the Administrator finds that the financial assistance programs of paragraph (1) of this subsection will not result in sufficient funds to carry out the purposes of this subsection, then the Administrator may—

"(A) make direct loans to the eligible States, political subdivisions, or Indian tribes for such purposes: Provided, that such loans shall be made on such reasonable terms and conditions as the Administrator shall prescribe: Provided further, That the Administrator may waive repayment of all or part of a loan made under this paragraph, including interest, if the State or political subdivision or Indian tribe involved demonstrates to the satisfaction of the Administrator that due to a change in circumstances there will be net adverse impacts resulting from such demonstration facility that would probably cause such State, subdivision, or tribe to default on the loan; or

"(B) require that any community development and planning costs which are associated with, or result from, such demonstration facility and which are determined by the Administrator to be appropriate for such inclusion shall be included in the total costs of the demonstration facility.

"(5) The Administrator is further authorized to make grants to States, political subdivisions, or Indian tribes for studying and planning for the potential economic, environmental, and social consequences of demonstration facilities, and for establishing related management expertise.

"(6) At any time the Administrator may, with the concurrence of the Secretary of the Treasury, redeem, in whole or in part, out of the fund established by this section, the debt obligations guaranteed or the debt obligations for which tax payments are guaranteed under this subsection.

"(7) When one or more States, political subdivisions, or Indian tribes would be eligible for assistance under this subsection, but for the fact that construction and operation of the demonstration facilities occurs outside its jurisdiction, the Administrator is authorized to provide, to the greatest extent possible, arrangements for equitable sharing of such assistance.

"(8) Such amounts as may be necessary for direct loans and grants pursuant to this subsection shall be available as provided in annual authorization Acts.

"(9) The Administrator, if appropriate, shall provide assistance in the financing of up to 100 per centum of the costs of the required community development and planning pursuant to this subsection.

"(10) In carrying out the provisions of this subsection, the Administrator shall provide that title to any facility receiving financial assistance under this subsection shall vest in the applicable State, political subdivision, or Indian tribe, as appropriate, and in the case of default by the borrower on a loan guarantee such facility shall not be considered a project asset for the purposes of subsection (g) of this section.

"(l)(1) The Administrator is directed to submit a report to the Congress within one hundred and eighty days after the enactment of this section setting forth his recommendations on the best opportunities to implement a program of Federal financial assistance with the objective of demonstrating production and conservation of energy. Such report shall be updated and submitted to Congress at least annually and shall include specific comments and recommendations by the Secretary of the Treasury on the methods and procedures set forth in subparagraph (B)(viii) of this subsection, including their adequacy, and changes necessary to satisfy the objectives stated in this subsection. This report shall include—

"(A) a study of the purchase of commitment to purchase by the Federal Government, for the use by the United States, of all or a portion of the products of any alternative fuel facilities constructed pursuant to this program as a direct or an alternate form of Federal assistance, which assistance, if recommended, shall be carried out pursuant to section 7(a)(4) of this Act; and

"(B) a comprehensive plan and program to acquire information and evaluate the environmental, economic, social, and technological impacts of the demonstration program under this section. In preparing such a comprehensive plan and program, the Administrator shall consult with the Environmental Protection Agency, the Federal Energy Administration, the Department of Housing and Urban Development, the Department of the Interior, the Department of Agriculture, and the Department of the Treasury, and shall include therein, but not be limited to, the following.

"(i) information about potential demonstration facilities proposed in the program under this section;

"(ii) any significant adverse impacts which may result from any activity included in the program;

"(iii) the extent to which it is feasible to commercialize the technologies as they affect different regions of the Nation;

"(iv) proposed regulations required to carry out the purposes of this section;

"(v) a list of Federal agencies, governmental entities, and other persons that will be consulted or utilized to implement the program;

"(vi) the methods and procedures by which the information gathered under the program will be analyzed and disseminated;

"(vii) a plan for the study and monitoring of the health effects of such facilities on workers and other persons, including, but not limited to, any carcinogenic effect of alternative fuels; and

"(viii) the methods and procedures to insure that (I) the use of the Federal assistance for demonstration facilities is kept to the minimum level necessary for the information objectives of this section, (II) the impact of loan guarantees on the capital markets of the United States is minimized, taking into account other Federal direct and indirect securities activities, and any economic sectors which may be negatively impacted as a result of the reduction of capital by the placement of guaranteed loans, and (III) the granting of Federal loan guarantees under this Act does not impede movement toward improvement in the climate for attracting private capital to develop alternative fuels without continued direct Federal incentives.

"(2) The Administrator shall annually submit a detailed report to the Congress concerning—

"(A) the actions taken or not taken by the Administrator under this section during the preceding fiscal year, and including, but not limited to (i) a discussion of the status of each demonstration facility and related facilities financed under this section, including progress made in the development of such facilities, and the expected or actual production from each such facility, including byproduct production therefrom, and the distribution of such products and byproducts, (ii) a detailed statement of the financial conditions of each such demonstration facility, (iii) data concerning the environmental, community, and health and safety impacts of each such facility and the actions taken or planned to prevent or mitigate such imports, (iv) the administrative and other costs incurred by the Administrator and other Federal agencies in carrying out this program, and (v) such other data as may be helpful in keeping Congress and the public fully and currently informed about the program authorized by this section; and

"(B) The activities of the funds referred to in subsection (n) of this section during the preceding fiscal year, including a statement of the amount and source of fees or other moneys, property, or assets deposited notes or other obligations issued by the Administrator, and such other data as may be appropriate.

"(3) The annual report required by this subsection shall be a part of the annual report required by section 15 of this Act, except that the matters required to be reported by this subsection shall be clearly set out and identified in such annual reports. Such reports and the one-hundred-and-eighty-day report required in paragraph (1) of this subsection shall be transmitted to the Speaker of the House of Representatives and the House Committee on Science and Technology and to the President of the Senate and the Committee on Energy and Natural Resources of the Senate.

"(m) Prior to issuing any guarantee or commitment to guarantee or cooperative agreement pursuant to subsection (b) or subsection (y) of this section, the Administrator shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a full and complete report on the proposed demonstration facility and such guarantee, agreement, or contract. Such guarantee, commitment to guarantee, cooperative agreement, or contract shall not be finalized under the authority granted by this section prior to the expiration of ninety calendar days (not including any day on which either House of Congress is not in session because of an adjournment of more than three calendar days to a day certain) from the date on which such report is received by such committees: *Provided*, That, where the cost of a demonstration facility to be assisted with a guarantee or cooperative agreement pursuant to subsection (b) or subsection (y) of this section exceeds $50,000,000 such guarantee or commitment to guarantee or cooperative agreement shall not be finalized unless (1) the making of such guarantee or commitment or agreement is specifically authorized by legislation hereafter enacted by the Congress or (2) both Houses pass a resolution stating in substance that the Congress favors the making of such guarantee or commitment or agreement.

"(n)(1) There is hereby created within the Treasury a separate fund (hereafter in this section called the 'fund') which shall be available to the Administrator without fiscal year limitation as a revolving fund for the purpose of carrying out the program authorized by subsection (b)(1) and subsections (g), (h), (k), and (y) of this section.

"(2) There are hereby authorized to be appropriated to the fund for administrative expenses from time to time such amounts as may be necessary to carry out the purposes of the applicable provisions of this section, including, but not limited to, the payments of interest and principal and the payment of interest differentials and redemption of debt. All amounts received by the Administrator as interest payments or repayments of principal on loans which are guaranteed under this section, fees, and any other moneys, property, or assets derived by him from operations under this section shall be deposited in the fund.

"(3) All payments on obligations, appropriate expenses (including reimbursements to other Government accounts), and repayments pursuant to operations of the Administrator under this section shall be paid from the fund subject to appropriations. If at any time the Administrator determines that moneys in the fund exceed the present and reasonably foreseeable future requirements of the fund, such excess shall be transferred to the general fund of the Treasury.

"(4) If at any time the moneys available in the fund are insufficient to enable the Administrator to discharge his responsibilities as authorized by subsections (b)(1), (g), (h), and (y) of this section, the Administrator shall issue to the Secretary of the Treasury notes or other obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions as may be prescribed by the Secretary of the Treasury. Redemption of such notes or obligations shall be made by the Administrator from appropriations or other moneys available under paragraph (2) of this subsection for loan guarantees authorized by subsection (b)(1) and subsections (g), (h), (k), and (y) of this section. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall be not less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the notes or other obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection.

"(5) The provisions of this subsection do not apply to direct loans or planning grants made under subsection (k) of this section.

"(o) For the purposes of this section, the term—

"(1) 'State' means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, any territory or possession of the United States,

"(2) 'United States' means the several States, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa,

"(3) 'borrower' or 'applicant' shall include any individual, firm, corporation, company, partnership, association, society, trust, joint venture, joint stock company, or other non-Federal entity, and

"(4) 'biomass' shall include, but is not limited to, animal and timber waste, municipal and industrial waste, sewage sludge, and oceanic and terrestrial crops.

"(p)(1) An applicant seeking a guarantee or cooperative agreement under subsection (b) or subsection (y) of this section must be a citizen or national of the United States. A corporation, partnership, firm, or association shall not be deemed to be a citizen or national of the United States unless the Administrator determines that it satisfactorily meets all the requirements of section 802 of title 46, United States Code, for determining such citizenship, except that the provisions in subsection (a) of such section 802 concerning (A) the citizenship of officers or directors of a corporation, and (B) the interest required to be owned in the case of a corporation, association, or partnership operating a vessel in the coastwise trade, shall not be applicable.

"(2) The Administrator, in consultation with the Secretary of State, may waive such requirements in the case of a corporation, partnership, firm, or association, controlling interest in which is owned by citizens of countries which are participants in the International Energy Agreement.

"(q) No part of the program authorized by this section shall be transferred to any other agency or authority, except pursuant to Act of Congress enacted after the date of enactment of this section.

"(r) Inventions made or conceived in the course of or under a guarantee authorized by this section shall be subject to the title and waiver requirements and conditions of section 9 of this Act.

"(s) Nothing in this section shall be construed as affecting the obligations of any person receiving financial assistance pursuant to this section to comply with Federal and State environmental, land use, water, and health and safety laws and regulations or to obtain applicable Federal and State permits, licenses, and certificates.

"(t) The information maintained by the Administrator under this section shall be made available to the public subject to the provision of section 552 of title 5, United States Code, and section 1905 of title 18, United States Code, and to other Government agencies in a manner that will facilitate its dissemination: *Provided*, That upon a showing satisfactory to the Administrator by any person that any information, or portion thereof obtained under this section by the Administrator directly or indirectly from such person would, if made public, divulge (1) trade secrets or (2) other proprietary information of such person, the Administrator shall not disclose such information and disclosure thereof shall be punishable under section 1905 of title 18, United States Code: *Provided further*, That the Administrator shall, upon request, provide such information to (A) any delegate of the Administrator for the purpose of carrying out this Act, and (B) the Attorney General, the Secretary of Agriculture, the Secretary of the Interior, the Federal Trade Commission, the Federal Energy Administration, the Environmental Protection Agency, the Federal Power Commission, the General Accounting Office, other Federal agencies, or heads of other Federal agencies, when necessary to carry out their duties and responsibilities under this and other statutes, but such agencies and agency heads shall not release such information to the public. This section is not authority to withhold information from Congress, or from any committee of Congress upon request of the Chairman. For the purposes of this subsection, the term 'person' shall include the borrower.

"(u) Notwithstanding any other provision of this section, the authority provided in this section to make guarantees or commitments to guarantee or enter into cooperative agreements under subsection (b)(1) or subsection (y), to make guarantees or commitments to guarantees, or to make loans or grants, under subsection (k), to make contracts under subsection (h), and to use fees and receipts collected under subsections (b), (l), and (y) of this section, and the authorities provided under subsection (n) of this section shall be effective only to the extent provided, without fiscal year limitation, in appropriation Acts enacted after the date of enactment of this section.

"(v) No person in the United States shall on the grounds of race, color, religion, national origin, or sex, be excluded from participation in, be denied benefits of, or be subjected to discrimination under any program or activity funded in whole or in part with assistance made available under this section: *Provided*. That Indian tribes are exempt from the operation of this subsection: *Provided further*. That such exemption shall be limited to the planning and provision of public facilities which are located on reservations and which are provided for members of the affected Indian tribes as the primary beneficiaries.

"(w) In carrying out his functions under this section, the Administrator shall provide a realistic and adequate opportunity for small business concerns to participate in the program to the optimum extent feasible consistent with the size and nature of each project.

"(x)(1)(A) Recipients of financial assistance under this section shall keep such records and other pertinent documents, as the Administrator shall prescribe by regulation, including, but not limited to, records which fully disclose the disposition of the proceeds of such assistance, the cost of any facility, the total cost of the provision of public facilities for which assistance was used and such other records as the Administrator may require to facilitate an effective audit. The Administrator and the Comptroller General of the United States, or their duly authorized representatives shall have access, for the purpose of audit, to such records and other pertinent documents.

"(B) Within 6 months after the date of enactment of this section and at 6-month intervals thereafter, the Comptroller General of the United States shall make an audit of recipients of financial assistance under this section. The Comptroller General may prescribe such regulations as he deems necessary to carry out this subparagraph.

"(2) All laborers and mechanics employed by contractors or subcontractors in the performance of construction work financed in whole or in part with assistance under this section shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a-5). The Secretary of Labor shall have, with respect to such labor standards, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267) and section 2 of the Act of June 13, 1934, as amended (48 Stat. 948; 40 U.S.C. 276(c)).

"(y)(1) The Administrator is authorized in accordance with such rules and regulations as he shall prescribe after consultation with the Secretary of the Treasury, to guarantee and to make commitments to guarantee the payment of interest on, and the principal balance of, bonds, debentures, notes and other obligations issued by or on behalf of any borrower for the purpose of (A) financing the construction and startup costs of demonstration facilities for the conversion of municipal or industrial waste, sewage sludge, or other municipal organic wastes into synthetic fuels, and (B) financing the construction and startup costs of demonstration facilities to generate desirable forms of energy (including synthetic fuels) from municipal or industrial waste, sewage sludge, or other municipal organic waste. With respect to a guarantee or a commitment to guarantee authorized by this subsection; the following subsections of this section shall not apply: (b)(1), (b)(5), (c)(2), (c)(5), (c)(6), (c)(7), (c)(8), (c)(9), (e)(3), (j) (k), and (q).

"(2) In the case where the Administrator seeks to guarantee or to make commitments to guarantee as provided by this subsection he is authorized to incur an outstanding indebtedness which at no time shall exceed $300,000,000.

"(3) The Administrator shall apply the following provisions thereto:

"(A) With respect to any demonstration facility for the conversion of solid waste (as the term is defined in the Resources Conservation and Recovery Act (42 U.S.C. 6903)), the Administrator, prior to issuing any guarantee under this section, must be in receipt of a certification from the Administrator of the Environmental Protection Agency and any appropriate State or areawide solid waste management planning agency that the proposed application for a guarantee is consistent with any applicable suggested guidelines published pursuant to section 1008(a) of the Resources Conservation and Recovery Act, and any applicable State or regional solid waste management plan.

"(B) The amount guaranteed shall not exceed 75 per centum of the total cost of the commercial demonstration facility, as determined by the Administrator: *Provided*, That the amount guaranteed may not exceed 90 per centum of the total cost of the commercial demonstration facility during the period of construction and startup.

"(C) The maximum maturity of the obligation shall not exceed thirty years, or 90 per centum of the projected useful economic life of the physical assets of the commercial demonstration facility covered by the guarantee, whichever is less, as determined by the Administrator.

"(D) The Administrator shall charge and collect fees for guarantees of obligations in amounts sufficient in the judgment of the Administrator to cover the applicable administrative costs and probable losses on guaranteed obligations, but in any event not to exceed 1 per centum per annum of the outstanding indebtedness covered by the guarantee.

"(E) No part of the program authorized by this section shall be transferred to any other agency or authority, except pursuant to Act of Congress enacted after the date of enactment of this section: *Provided*, That project agreements entered into pursuant to this section for any commercial demonstration facility for the conversion or bioconversion of solid waste (as that term is defined in the Resource Conservation and Recovery Act) shall be administered in accordance with the May 7, 1976, Interagency Agreement between the Environmental Protection Agency and the Energy Research and Development Administration on the Development of Energy From Solid Wastes, and provided specifically that in accordance with this agreement (1) for those energy-related projects of mutual interest, planning will be conducted jointly by the Environmental Pro-

tection Agency and the Energy Research and Development Administration, following which project responsibility will be assigned to one agency; (ii) energy-related projects for recovery of synthetic fuels or other forms of energy from solid waste shall be the responsibility of the Energy Research and Development Administration; and (iii) the Environmental Protection Agency shall retain responsibility for the environmental, economic, and institutional aspects of solid waste projects and for assurance that such projects are consistent with any applicable suggested guidelines pursuant to section 1008 of the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6901 et seq.), as amended, and any applicable State or regional solid waste-management plan.

"(F) With respect to any obligation which is issued after the enactment of this section by, or in behalf of, any State, political subdivision, or Indian tribe and which is either guaranteed under, or supported by taxes levied by said issuer which are guaranteed under, this section, the interest paid on such obligation and received by the purchaser thereof (or the purchaser's successor in interest) shall be included in gross income for the purpose of chapter 1 of the Internal Revenue Code of 1954, as amended: *Provided*, That the Administrator shall pay to such issuer out of the fund established by this section such portion of the interest on such obligations, as determined by the Secretary of the Treasury to be appropriate after taking into account current market yields (i) on obligations of said issuer, if any, and (ii) on other obligations with similar terms and conditions the interest on which is not so included in gross income for purposes of chapter 1 of such Code, and in accordance with, such terms and conditions as the Secretary of the Treasury shall require.".

SEC. 208. (a) The Secretary of Energy shall—

(1) initiate and conduct an "application and system design study", cooperatively with appropriate Federal agencies, to determine the potential for the use of solar photovoltaic systems at specific Federal installations; and this study shall—

(A) include an analysis of those sites that are currently cost-effective for solar photovoltaic energy systems, using life-cycle costing techniques, as well as those which would be cost-effective at expected future market prices;

(B) identify potential sites and uses of solar photovoltaic energy systems at the following agencies as well as any others which the Secretary of Energy deems necessary:

(i) the Department of Defense;

(ii) the Department of Transportation (including the United States Coast Guard, the Federal Aviation Administration, and the Federal Highway Administration);

(iii) the Department of Commerce;

(iv) the Department of Agriculture; and

(v) the Department of the Interior;

(C) provide a preliminary report to Congress within nine months following the enactment of this Act;

(D) include the presentation of a detailed plan for the implementation of solar photovoltaic energy systems for power generation at specific sites in Federal government agencies to Congress within twelve months following the enactment of this Act;

(2) initiate and conduct a study of the options available to the Federal government to provide for the adequate growth of the solar photovoltaic industry and to include such possible incentives as government funding, loan guarantees, tax incentives, the operation of pilot plants or production lines and other incentives deemed worthy of consideration by the Secretary of Energy. A preliminary report shall be submitted to Congress within six months following the enactment of this Act;

(3) initiate and conduct a study involving the prospects for applications of solar photovoltaic energy systems for power generation in foreign countries, particularly lesser developed countries, and the potential for the exportation of these energy systems. This study shall involve the cooperation of the Department of State and the Department of Commerce, as well as other Federal agencies which the Secretary of Energy deems appropriate. A final report shall be submitted to the Congress, as well as a preliminary report within twelve months of the enactment of this Act; and

(4) be authorized to acquire up to an additional 4.0 megawatts (peak) of solar photovoltaic energy systems. The sum of $13,000,000 is hereby authorized to be appropriated (in addition to any other amounts authorized by this Act to be appropriated) for the fiscal year ending September 30, 1978, and for delivery in the following twelve months. Such sums shall remain available until expended. The solar photovoltaic energy systems acquired shall be available for use for power generation by Federal agencies, provided that no procurement takes place until their application on Federal sites is determined to be life cycle cost effective.

(b) For technology development, particularly for engineering design and development of the manufacturing process of solar photovoltaic energy systems (primarily for the implementation of automated processes and other cost reducing production technologies), the sum of $6,000,000 is hereby authorized by this Act to be appropriated for the fiscal year ending September 30, 1978.

SEC. 209. (a) Nothing in this title shall apply with respect to any authorization or appropriation for any military application of nuclear energy, for research and development in support of the Armed Forces, or for the common defense and security of the United States.

(b)(1) The term "military application" means any activity authorized or permitted by chapter 9 of the Atomic Energy Act of 1954, as amended (Public Law 83-703, as amended; 42 U.S.C. 2121, 2122).

(2) The term "research and development," as used in this section, is defined by section 11 *x* of the Atomic Energy Act of 1954, as amended (Public Law 83-703, as amended; 42 U.S.C. 2014).

(3) The term "common defense and security" means the common defense and security of the United States as used in the Atomic Energy Act of 1954, as amended (Public Law 83-703, as amended).

SEC. 210. (a) In order to provide economic farm units to qualifying farmers whose land is economically infeasible to reclaim from damages resulting from the Teton flood of June 5, 1976, and who are unable to find suitable replacement land for their flood damage farm, and in order to restore the economic and agricultural base of the flood damaged region, there is hereby transferred 5,955 acres of land, hereinafter described, in the State of Idaho presently under the jurisdiction of the Department of Energy, to the Secretary of the Interior who, acting through the Bureau of Reclamation, shall make such lands available for sale to qualifying farmers according to the terms hereafter provided.

(b) As used in this section, the term:

(1) "Teton flood" means the flood resulting from the collapse of Teton Dam of the Lower Teton Division of the Teton Basin Federal Reclamation Project on June 5, 1976.

(2) "Department of Energy" means those public and acquired lands in the State of Idaho identified as sections numbered fourteen (14), twenty-three (23), twenty-four (24), twenty-five (25), and thirty-six (36), in township six (6) north, or range thirty-three (33) east of the Boise meridian; sections numbered nineteen (19), thirty (30), and thirty-one (31) in township six (6) north, of range thirty-four (34) east of the Boise meridian; and the southeast quarter, the south half of the northeast quarter, the east half of the southwest quarter and the southeast quarter of the northwest quarter, of section numbered eight (8) and the south half of the north half of section numbered nine (9) in township five (5) north, of range thirty-four (34) east of the Boise meridan, all situated in the county of Jefferson and State of Idaho ,and containing 5,955 acres, more or less, which would be transferred for the purposes of this Act.

(3) "Qualifying farmer" means the resident, owner-operator of a farm who resides in the immediate locality, whose livelihood is derived from his farming operation and whose land was damaged due to the collapse of the Teton Dam on June 5, 1976, to the extent that in the opinion of the Secretary of the Interior, it is not economically feasible to reclaim such land so that it produces an income commensurate with that earned prior to the Teton flood.

(4) "Irrigable land" means farm land that is suitable for irrigated agriculture and has been certified as irrigable by the Secretary of the Interior.

(c) For a period of not more than five years after transfer to the Bureau of Reclamation, the land heretofore described shall be available for purchase by those who, on or before October 1, 1978, are determined to be qualifying farmers pursuant to regulations issued in accordance with subsection (f) of this section by the Secretary of the Interior.

(d) Department of Energy lands as described in subsection (b)(2) of this section shall be certified as irrigable by the Secretary of the Interior, and lands so certified shall be made available in a manner to be prescribed by the Secretary for purchase by qualifying farmers at its current fair market value as determined by a board of appraisers composed of a Federal appraiser, a State appraiser, and one appraiser from the disaster region: *Provided*, That irrigable land transferred to a single ownership shall not exceed 160 acres of class I land as defined by the Secretary or the equivalent thereof in other land classes as determined by the Secretary. The United States through the Secretary, shall convey fee simple title of the Department of Energy land to the qualifying farmer. The cost of developing the replacement land for farming shall be borne by the qualifying farmer who purchases the land.

(e) Any part of the Department of Energy land remaining in the possession of the Bureau of Reclamation at the end of the five year period, except land needed for public rights-of-way, as determined by the Secretary, shall be returned to the Department of Energy.

(f) Within ninety days after the enactment of this Act the Secretary shall prescribe and publish in the Federal Register such rules and regulations as may be necessary and proper to carry out the provision of this section.

(g) Full recovery for the loss of all or part of flood-damaged farms shall be obtained by owners pursuant to the Teton Dam Disaster Assistance Act of 1976, Public Law 94-400, 90 Stat. 1211, and the Supplemental Appropriation Act of 1976, Public Law 94-438, 90 Stat. 1415.

(h) There is hereby authorized to be appropriated such sums as may be necessary for the purposes of administration of this section.

TITLE III—AUTOMOTIVE PROPULSION RESEARCH AND DEVELOPMENT

SHORT TITLE

SEC. 301. This title may be cited as the "Automotive Propulsion Research and Development Act of 1977".

FINDINGS AND PURPOSE

SEC. 302. (a) The Congress finds that—

(1) existing automobile propulsion systems, on the average, fall short of meeting the long-term goals of the Nation with re-

spect to environmental protection, and energy conservation;

(2) advanced alternatives to existing automobile propulsion systems could, with sufficient research and development effort, meet these long-term goals, and have the potential to be mass produced at reasonable cost; and advanced automobile propulsion systems could operate with significantly less adverse environmental impact and fuel consumption than existing automobiles, while meeting all of the other requirements of Federal law;

(3) insufficient resources are being devoted to both research on and development of advanced automobile propulsion system technology;

(4) an expanded research and development effort with respect to advance automobile propulsion system technology would complement and stimulate corresponding efforts by the private sector and would encourage automobile manufacturers to consider seriously the incorporation of such advanced technology into automobiles and automobile components; and

(5) the Nation's energy and environmental problems are urgent, and therefore advanced automobile propulsion system technology should be developed, tested, demonstrated, and prepared for manufacture within the shortest practicable time.

(b) It is therefore the purpose of the Congress, in this title, to—

(1) (A) direct the Department of Energy to make contracts and grants for research and development leading to the development of advanced automobile propulsion systems within 5 years of the date of enactment of this Act, or within the shortest practicable time consistent with appropriate research and development techniques, and (B) evaluate and disseminate information with respect to advanced automobile propulsion system technology;

(2) preserve, enhance, and facilitate competition in research, development, and production with respect to existing and alternative automobile propulsion systems; and

(3) supplement, but neither supplant nor duplicate, the automotive propulsion system research and development efforts of private industry.

DEFINITIONS

SEC. 303. As used in this title, the term—

(1) "advanced automobile propulsion system" means an energy conversion system, including engine and drive train, which utilizes advanced technology and is suitable for use in advanced automobile;

(2) "developer" means any person engaged in whole or in part in research or other efforts directed toward the development of advanced automobile technology;

(3) "fuel" means any energy source capable of propelling an automobile;

(4) "fuel economy" refers to the average distance traveled in representative driving conditions by an automobile per unit of fuel consumed, as determined by the Administrator of the Environmental Protection Agency in accordance with test procedures which shall be established by rule and shall require that fuel economy tests be conducted in conjunction with the exhaust emissions tests mandated by section 206 of the Clean Air Act (42 U.S.C. 1857f–5);

(5) "intermodal adaptability" refers to any characteristics of an automobile which enable it to be operated or carried, or which facilitate its operation or carriage, by or on an alternative mode or other system of transportation;

(6) "reliability" refers to (A) the average time and distance over which normal automobile operation can be expected without significant repair or replacement of parts, and (B) the ease of diagnosis and repair of an automobile, its systems, and parts in the event of failure during use or damage from an accident;

(7) "safety" refers to the performance of an automotive propulsion system or equipment in such a manner that the public is protected against unreasonable risk of accident and against unreasonable risk of death or bodily injury in case of accident; and

(8) "State" means any State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, or any other territory or possession of the United States.

DUTIES OF THE ADMINISTRATOR

SEC. 304. (a) The Secretary of Energy shall establish, within the Department of Energy, a program to insure the development of advanced automobile propulsion systems within 5 years after the date of enactment of this Act, or within the shortest practicable time, consistent with appropriate research and development technique. In conducting such program, the Secretary of Energy shall—

(1) establish and conduct new projects and accelerate existing projects which may contribute to the development of advanced automobile propulsion systems;

(2) give priority attention to the development of advanced propulsion systems with appropriate attention to those advanced propulsion systems which are flexible in the type of fuel used; and

(3) insure that research and development under this title supplements, but neither supplants nor duplicates, the automotive research and development efforts of private industry.

(b) The Secretary of Energy shall, in fulfilling his responsibilities under this title, make contracts and grants with any Federal agency, laboratory, university, nonprofit organization, industrial organization, public or private agency, institution, organization, corporation, partnership, or individual for research and development leading to advanced automobile propulsion systems which are likely to help meet the Nation's long-term goals with respect to fuel economy, environmental protection, and other objectives.

(c) In providing financial assistance under this title, the Secretary of Energy shall give full consideration to the capabilities of Federal laboratories, except that not more than 60 per centum of the funds appropriated pursuant to the authorization under section 312 shall be directly expended in Federal laboratories. In accordance with section 307, such laboratories shall be available for testing components and subsystems which, in the Secretary of Energy's judgment, is likely to contribute to the development of advanced automobile propulsion systems.

(d) The Secretary of Energy shall conduct evaluations, arrange for tests, and disseminate information pursuant to section 307 and submit reports required under section 310.

(e) The Department of Energy shall intensify research in key basic science areas in which the lack of knowledge limits development of advanced automobile propulsion systems.

(f) (1) The Secretary of Energy shall insure that the conduct of the program as defined in subsection (a) of this section—

(A) supplements the automotive propulsion system research and development efforts of industry;

(B) is not formulated in a manner that will supplant private industry research and development or displace or lessen industry's research and development; and

(C) avoids duplication of private research and development.

(2) To that end, the Secretary of Energy shall issue administrative regulations, within 60 days after the date of the enactment of this Act, which shall specify procedures, standards, and criteria for the timely review for compliance of each new contract, grant, Department of Energy project, or other agency project funded or to be funded under the authority of this Act. Such regulations shall require that the Secretary of Energy or his designee shall certify that each such contract, grant, or project satisfies the requirement of this subsection, and shall include in such certification a discussion of the relationship of any related or comparable industry research and development, in terms of this subsection, to the proposed research and development under the authority of this Act. The discussion hall also address related issues, such as cost sharing and patent rights.

(3) Such certifications shall be available to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and natural Resources of the Senate. The Provisions of chapter 5 of title 5, United States Code, shall not apply to such certifications and no court shall have any jurisdiction to review the preparation or adequacy of such certifications; but section 553 of title 5, United States Code, and section 17 of the Federal Nonnuclear Energy Research and Development Act of 1974, as amended, shall apply to public disclosure of such certifications.

(4) The Secretary of Energy also shall include in the report required by section 310 (a) of this Act a detailed discussion of how each research and development contract, grant, or project funded under the authority of this Act satisfies the requirement of this subsection.

(5) Further, the Secretary of Energy in each annual budget submission to the Congress, or amendment thereto, for the programs authorized by this Act shall describe how each identified research and development effort in such submission satisfies the requirements of this subsection.

(6) The provisions and requirements of this subsection shall not apply with respect to any contract, grant, or project which was entered into, made, or formally approved and initiated prior to the enactment of this Act, or with respect to any renewal or extension thereof.

DUTIES OF THE SECRETARY OF TRANSPORTATION

SEC. 305. The Secretary of Transportation, in furtherance of the purposes of this title, shall evaluate the extent to which the automobile industry utilizes advanced automotive technology which is or could be made available to it. The Secretary of Transportation shall submit a report to the Congress each year on the results of such evaluation including any appropriate recommendations which may encourage the utilization of advanced automobile technology by the automobile industry.

COORDINATION AND CONSULTATION

SEC. 306. (a) The Secretary of Energy shall have overall management responsibility for carrying out the program under section 304. In carrying out such program, the Secretary of Energy, consistent with such overall management responsibility—

(1) shall utilize the expertise of the Department of Transportation to the extent deemed appropriate by the Secretary of Energy; and

(2) may utilize any other Federal agency (except as provided in paragraph (1)) in accordnace with subsection (c) in carrying out any activities under this title, to the extent that the Secretary of Energy determines that any such agency has capabilities which would allow such agency to contribute to the purposes of this title.

(b) The Secretary of Transportation, whenever the expertise of the Department of Transportation is utilized in accordance with subsection (a), may exercise the powers granted to the Secretary of Energy under subsection (c) and shall enter into contracts and make grants for such purpose, subject to

the overall management responsibility of the Secretary of Energy.

(c) The Secretary of Energy may, in accordance with subsection (a), obtain the assistance of any department, agency, or instrumentality of the executive branch of the Federal Government upon written request, on a reimbursable basis or otherwise and with the consent of such department, agency or instrumentality. Each such request shall identify the assistance the Secretary of Energy deems necessary to carry out any duty under this title.

(d) The Secretary of Energy shall consult with the Administrator of the Environmental Protection Agency and the Secretary of Transportation, and shall establish procedures for periodic consultation with representatives of science, industry, and such other groups as may have special expertise in the area of automobile propulsion system research, development, and technology. The Secretary of Energy may establish such advisory panels as he deems appropriate to review and make recommendations with respect to applications for funding under this title.

(e) Nothing contained in this title shall be construed to reduce in any way the responsibilities of the Secretary of Energy for automative research, development, and demonstration under the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et seq.) and the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5901 et seq.).

EVALUATION, TESTING, AND INFORMATION DISSEMINATION

SEC. 307.(a) The Secretary of Energy shall, for the purposes of performing his responsibilities under this title, consider any reasonable new or improved technology, a description of which is submitted to the Secretary of Energy in writing, which could lead or contribute to the development of advanced automobile propulsion system technology.

(b) The Administrator of the Environmental Protection Agency shall test, or cause to be tested, in a facility subject to Environmental Protection Agency supervision, each advanced automobile propulsion system in an appropriately modified production vehicle equipped with such a system developed in whole or in part with Federal financial assistance under this title, or referred to the Administrator of the Environmental Protection Agency for such purpose by the Secretary of Energy, to determine whether such vehicle complies with any exhaust emission standards or any other requirements promulgated or reasonably expected to be promulgated under any provision of the Clean Air Act (42 U.S.C. 1857 et seq.), the Noise Control Act of 1972 (42 U.S.C. 4901 et seq.), or any other provision of Federal law administered by the Administrator of the Environmental Protection Agency. In conjunction with any test for compliance with exhaust emission standards under this section, the Administrator of the Environmental Protection Agency shall also conduct tests to determine the fuel economy of such vehicle. The Administrator of the Environmental Protection Agency shall submit all test data and the results of such tests to the Secretary of Energy.

(c) The Secretary of Energy shall collect, analyze, and disseminate to developers information, data, and materials that may be relevant to the development of advanced automobile propulsion system technology.

PATENTS

SEC. 308. Section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5908) shall apply to any contract (including any assignment, substitution of parties, or subcontract thereunder) or grant, entered into, made, or issued by the Secretary of Energy under this title.

COMPTROLLER GENERAL AUDIT AND EXAMINATION

SEC. 309. Section 306 of the Energy Reorganization Act of 1974 (42 U.S.C. 5876) shall appy with respect to the authority of the Comptroller General to have access to and rights of examination of books, documents, papers, and records of recipients of financial assistance under this title; except that for the purposes of this title, the term "contract" (as used in section 166 of the Atomic Energy Act (42 U.S.C. 2206), insofar as it relates to such section 306) means "contract or grant."

REPORTS

SEC. 310. (a) As a separate part of the annual report submitted under section 15(a) of the Federal Nonnuclear Energy Research and Development Act of 1974 with respect to the comprehensive plan and program then in effect under section 6 (a) and (b) of such Act, the Secretary of Energy shall submit to Congress an annual report of activities under this title. Such report shall include—

(1) a current comprehensive program definition for implementing this title;

(2) an evaluation of the state of automobile propulsion system research and development in the United States;

(3) the number and amount of contracts and grants made under this title;

(4) an analysis of the progress made in developing advanced automobile propulsion system technology; and

(5) suggestions for improvements in advanced automobile propulsion system research and development, including recommendations for legislation.

(b) The Secretary of Energy shall conduct a survey of developers, lending institutions, and other appropriate persons or institutions and shall otherwise make a study for the purpose of determining whether, and under what conditions, research, development, demonstration, and commercial availability of advanced automobile propulsion system technology may be aided by the guarantee of financial obligations by the Federal Government. The Secretary of Energy shall report the results of such survey and study to the Congress within 1 year after the date of enactment of this Act. Such report shall include an examination of those stages of advanced automobile propulsion system technology research, development, demonstration, and commercialization for which financial obligation guarantees may be useful or appropriate and shall contain such legislative recommendations as may be necessary.

AMENDMENT OF THE NATIONAL AERONAUTICS AND SPACE ACT

SEC. 311. (a) Section 102 of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451) is amended by redesignating subsection (e) as subsection (f), and by inserting immediately after subsection (d) the following new subsection:

"(e) The Congress declares that the general welfare of the United States requires that the unique competence in scientific and engineering systems of the National Aeronautics and Space Administration also be directed toward the development of advanced automobile propulsion systems. Such development shall be conducted so as to contribute to the development and shall be conducted so as to contribute to the achievement of the purposes set forth in section 302(b) of the Automotive Propulsion Research and Development Act of 1977.".

(b) The subsection of section 102 of such Act redesignated as subsection (f) by subsection (a) of this section is amended by striking out "and (d)" and inserting in lieu thereof "(d), and (e)".

AUTHORIZATION FOR APPROPRIATION

SEC. 312. There is authorized to be appropriated to carry out the purposes of this title, in addition to any amounts made available for such purposes pursuant to title I of this Act, the sum of $12,500,000 for the fiscal year ending September 30, 1978.

TITLE IV—ESTABLISHMENT OF FINANCIAL SUPPORT PROGRAM FOR MUNICIPAL WASTE REPROCESSING DEMONSTRATION FACILITIES

SEC. 401. The Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5901 et seq.), as amended by section 207 of this Act, is further amended by adding at the end thereof the following new section:

"FINANCIAL SUPPORT PROGRAM FOR MUNICIPAL WASTE REPROCESSING DEMONSTRATION FACILITIES

"SEC. 20. (a) It is the purpose of this section—

"(1) to assure adequate Federal support to foster a program to demonstrate municipal waste reprocessing for the production of fuel and energy intensive products; and

"(2) to gather information about the technological, economic, environmental, and social costs, benefits, and impacts of such demonstration facilities.

"(b)(1) The Administrator is authorized and directed, to the extent provided in appropriation Acts, to establish such a demonstration program by making grants, contracts, price supports, and cooperative agreements pursuant to this Act or any combination thereof for the establishment of municipal waste reprocessing demonstration facilities. For the purpose of this section municipal waste shall include but not be limited to municipal solid waste, sewage sludge, and other municipal organic wastes.

"(2) The aggregate amount of funds available for grants, contracts, price supports, and cooperative agreements for municipal waste reprocessing demonstration facilities shall not exceed $20,000,000 in the fiscal year ending September 30, 1978.

"(3) For purposes of this section the term 'municipal' shall include any city, town, borough, county, parish, district, or other public body created by or pursuant to State law.

"(4) Municipal waste reprocessing demonstration facilities established under this section shall be owned or operated (or both owned and operated) by the municipality and shall involve the recovery of energy or energy intensive products. Such facilities may be established by any public or private entity, by contract or otherwise, as may be determined by the local government which will own or operate (or both own and operate) such facilities and to which financial support is provided. The Federal share for any such facility to which this section applies shall not exceed 75 per centum of the cost of such facility, and not more than $40,000,000 in Federal funds under this section may be used for the construction of any one facility.

"(5) The Administrator shall promulgate such regulations as he deems necessary, pursuant to section 7(a)(4) and section 7(c)(1) and (6) of this Act, for purposes of establishing a price support program for revenue producing products of municipal waste reprocessing demonstration facilities.

"(c)(1) The Administrator shall consult with the Environmental Protection Agency to assure that the provisions of section 8004 of the Resource Conservation and Recovery Act of 1976 (Public Law 94–580) are applied in carrying out this section.

"(2) Any energy-related research, development, or demonstration project for the conversion (including bioconversion) of municipal waste carried out by the Energy Research and Development Administration pursuant to this or any other Act shall be administered in accordance with the May 7, 1976, Interagency Agreement between the Environ-

mental Protection Agency and the Energy Research and Development Administration on the development of energy from solid wastes; and specifically, in accordance with such Agreement (A) for those energy-related projects of mutual interest, planning will be conducted jointly by the Environmental Protection Agency and the Energy Research and Development Administration, following which project responsibility will be assigned to one agency; (B) energy-related aspects of projects for recovery of fuels or energy intensive products from municipal waste as defined in this section shall be the responsibility of the Energy Research and Development Administration including energy-related economic and institutional aspects; and (C) the Environmental Protection Agency shall retain responsibility for the environmental and other economic and institutional aspects of solid waste projects and for assurance that such projects are consistent with any applicable suggested guidelines published pursuant to section 1008 of the Resource Conservation and Recovery Act of 1976 (Public Law 94–580), and any applicable State or regional waste management plan.

"(d)(1) The Administrator shall establish such guidelines as he deems necessary for purposes of obtaining pertinent information from municipalities receiving funding under this section. These guidelines shall include but not be limited to methods of assessment and evaluation of projects authorized under this section. Such assessments and evaluations shall be presented by the Administrator to the House Committee on Science and Technology and the Senate Committee on Energy and Natural Resources upon the request of either such committee.

"(2) The Administrator shall annually submit a report to the Congress concerning the actions taken or not taken by the Administrator under this section during the preceding fiscal year, and including but not limited to (A) a discussion of the status of each demonstration facility and related facilities financed under this section, including progress made in the development of such facilities, and the expected or actual production from each such facility including byproduct production therefrom, and the distribution of such products and byproducts, (B) a statement of the financial condition of each such demonstration facility, (C) data concerning the environmental, community, and health and safety impacts of each such facility and the actions taken or planned to prevent or mitigate such impacts, (D) the administrative and other costs incurred by the Administrator and other Federal agencies in carrying out this program, and (E) such other data as may be helpful in keeping Congress and the public fully and currently informed about the program authorized by this section.

"(3) The annual reports required by this subsection shall be a part of the annual report required by section 15 of this Act, except that the matters required to be reported by this subsection shall be clearly set out and identified in such annual reports. Such reports shall be transmitted to the Speaker of the House of Representatives and the House Committee on Science and Technology and to the President of the Senate and the Senate Committee on Energy and Natural Resources.

"(e) No part of the program authorized by this section shall be transferred to any other agency or authority, except pursuant to Act of Congress enacted after the date of the enactment of this section.

"(f) Nothing in this section shall be construed as abrogating any obligations of any municipality receiving financial assistance pursuant to this section to comply with Federal and State environmental, land use, water, and health and safety laws and regulations or to obtain applicable Federal and State permits, licenses, and certificates.".

TITLE V—AMENDMENTS TO THE GEOTHERMAL ENERGY RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACT

SEC. 501. As used in this title—

(1) the term "Act" means the Geothermal Energy Research, Development, and Demonstration Act of 1974 (88 Stat. 1079); and

(2) the term "Administrator" means the Administrator of the Energy Research and Development Administration.

SEC. 502. Section 101(b) of the Act is amended—

(1) by striking out subparagraph (E) of paragraph (1) and inserting in lieu thereof the following:

"(E) the Assistant Administrator of the Energy Research and Development Administration for Solar, Geothermal, and Advanced Energy Systems;";

(2) by striking out the period at the end of paragraph (1) and inserting in lieu thereof a semicolon;

(3) by adding at the end of paragraph (1) the following new subparagraphs:

"(G) an Assistant Administrator of the Environmental Protection Agency;

"(H) an Assistant Secretary of Treasury; and

"(I) an Assistant Secretary of Agriculture."; and

(4) by striking out "one member of the Project" in paragraph (2) and inserting in lieu thereof "the Assistant Administrator of the Energy Research and Development Administration for Solar, Geothermal, and Advanced Energy Systems".

SEC. 503. Section 103(b)(4) of the Act is amended by inserting the phrase "or administrative regulations" after "legislation", and by inserting, "environmental and taxing" after "leasing".

SEC. 504. Section 105(e)(3) of the Act is amended by striking out the period and inserting in lieu thereof "or such assistance would not be adequate to satisfy the goals and requirements of the demonstration program under this section.".

SEC. 505. Section 201(b) of the Act is amended by striking out "or" at the end of paragraph (3), by striking out the period at the end of paragraph (4) and inserting in lieu thereof "; or ", and by adding at the end thereof the following new paragraph:

"(5) construction and operation of a new commercial, agricultural, or industrial structure or facility or modification and operation of an existing commercial, agricultural, or industrial structure or facility, when geothermal hot water or steam is to be used within or by such structure or facility, or modification thereto, for the purposes of space heating or cooling, industrial or agricultural processes, onsite generation of electricity for use other than for sale or resale in commerce, other commercial applications, or combinations of applications separately eligible under this title for loan guarantee assistance.".

SEC. 506. Section 201(b)(4) of the Act is amended by striking out "from" and inserting in lieu thereof "using".

SEC. 507. Section 201 (c) of the Act is amended by adding at the end thereof the following new sentence: "In the case of a guaranty for the purposes specified in subsection (b)(5), the aggregate cost of the project shall be deemed to be that portion of the total cost of construction and operation which is directly related to the utilization of geohermal energy within the structure or facility in question, except that the aggregate cost of the project with respect to which the loan is made may be the total cost including construction and operation in cases where the facility or structure has been located near a geothermal energy resource predominantly for the purpose of utilizing geothermal energy, or as determined by the Administrator the economic viability of the project is substantially dependent upon the performance of the geothermal reservoir.".

SEC. 508. Section 201(e) of the Act is amended—

(1) by striking out "$25,000,000" and inserting in lieu thereof $100,000,000: *Provided*, That in the case of a guaranty under subsection (b)(5), the amount of the guaranty for any loan for a project shall not exceed $50,000,000";

(2) by striking out "$50,000,000" and inserting in lieu thereof "$200,000,000"; and

(3) by inserting before the period at the end thereof the following: ", unless the Administrator determines in writing that a guaranty in excess of these amounts is in the national interest. Any such determination shall be submitted to the Speaker of the House and the Committee on Science and Technology of the House of Representatives, and to the President of the Senate and the Committee on Energy and Natural Resources of the Senate, accompanied by a full and complete report on the proposed project and guaranty. The proposed guaranty or commitment to guarantee shall not be finalized under authority granted by this Act prior to the expiration of thirty calendar days (not including any date on which either House of Congress is not in session) from the date on which such report is received by the Speaker of the House and the President of the Senate: *Provided*, That such guaranty or commitment to guarantee shall not be finalized if prior to the close of such thirty-day period either House passes a resolution stating in substance that such House does not favor the making of such guaranty or commitment to guarantee."

SEC. 509. Section 201 of the Act is further amended by adding at the end thereof the following new subsections:

"(g) With respect to any guaranty which is issued after the enactment of this subsection by, or in behalf of, any State, political subdivision, or Indian tribe and which is either guaranteed under, or supported by taxes levied by said issuer which are guaranteed under this title, and for which the interest paid on such obligation and received by the purchaser thereof is included in gross income for the purposes of chapter 1 of the Internal Revenue Code of 1954, as amended, the Administrator shall pay to such issuer out of the fund established by this title such portion of the interest on such obligations, as determined by the Administrator, in consultation with the Secretary of the Treasury, to be appropriated after taking into account current market yields (1) on obligations of such issuer, if any, or (2) on other obligations with similar terms and conditions, the interest on which is not so included in gross income for purposes of chapter 1 of said Code, and in accordance with such terms and conditions as the Administrator shall require in consultation with the Secretary of the Treasury.

"(h) The full faith and credit of the United States is pledged to the payment of all guaranties issued under this title with respect to principal and interest.

"(i) The Administrator shall charge and collect fees for guaranties in amounts sufficient in his judgment to cover applicable administrative costs and probable losses on guaranteed obligations, but in any event not to exceed 1 per centum per annum of the outstanding indebtedness covered by each guaranty. Fees collected under this subsection shall be deposited in the fund established by this title.

"(j) The Secretary of the Treasury shall insure to the maximum extent feasible that the timing, interest rate, and substantial

terms and conditions of any guaranty exceeding $25,000,000 will have the minimum possible impact on the capital markets of the United States, taking into account other Federal direct and indirect commercial securities activities.".

SEC. 510. Section 202 of the Act is amended to read as follows:

"DEFAULT; PAYMENT OF INTEREST

"Sec. 202. (a) If there is a default by the borrower, as defined in regulations promulgated by the Administrator and set forth in the guarantee contract, the holder of the obligation shall have the right to demand payment of the unpaid amount from the Administrator. Within such period as may be specified in the guarantee or related agreements, the Administrator shall pay to the holder of the obligation the unpaid interest on, and unpaid principal of the guaranteed obligation as to which the borrower has defaulted, unless the Administrator finds that there was no default by the borrower in the payment of interest or principal or that such default has been remedied. Nothing in this section shall be construed to preclude any forebearance by the holder of the obligation for the benefit of the borrower which may be agreed upon by the parties to the guaranteed obligation and approved by the Administrator.

"(b) If the Administrator makes a payment under subsection (a) of this subsection, the Administrator shall be subrogated to the rights of the recipient of such payment as specified in the guarantee or related agreements including, where appropriate, the authority (notwithstanding any other provision of law) to complete, maintain, operate, lease, or otherwise dispose of any property acquired pursuant to such guarantee or related agreements, or to permit the borrower, pursuant to an agreement with the Administrator, to continue to pursue the purposes of the project if the Administrator determines this to be in the public interest. The rights of the Administrator with respect to any property acquired pursuant to such guarantee or related agreements, shall be superior to the rights of any other person with respect to such property.

"(c) In the event of a default on any guarantee under this title, the Administrator shall notify the Attorney General, who shall take such action as may be appropriate to recover the amounts of any payments made under subsection (a), including any payment of principal and interest under subsection (d), from such assets of the defaulting borrower as are associated with the project, or from any other security included in the terms of the guarantee.

"(d) With respect to any obligation guaranteed under this title, the Administrator is authorized to enter into a contract to pay, and to pay, holders of the obligation, for and on behalf of the borrower, from the Geothermal Resources Development Fund, the principal and interest payments which become due and payable on the unpaid balance of such obligation if the Administrator finds that—

"(1) the borrower is unable to meet such payments and is not in default; it is in the public interest to permit the borrower to continue to pursue the purposes of such project; and the probable net benefit to the Federal Government in paying such principal and interest will be greater than that which would result in the event of a default;

"(2) the amount of such payment which the Administrator is authorized to pay shall be no greater than the amount of principal and interest which the borrower is obligated to pay under the loan agreement; and

"(3) the borrower agrees to reimburse the Administrator for such payment on terms and conditions, including interest, which are satisfactory to the Administrator.".

SEC. 511. Section 204 of the Act is amended by redesignating subsection (c) as subsection (d) and inserting after subsection (b) the following new subsection (c):

"(c) If at any time the moneys available in the fund are insufficient to enable the Administrator to discharge his responsibilities under this title, he shall issue to the Secretary of the Treasury notes or other obligations in such forms and denominations bearing such maturities, and subject to such terms and conditions, as may be prescribed by the Secretary of the Treasury. This borrowing authority shall be effective only to such extent or in such amounts as are specified in appropriation Acts. Such authorizations may be without fiscal year limitations. Redemption of such notes or obligations shall be made by the Administrator from appropriations or other moneys available under this section. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall not be less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the notes or other obligations. The Secretary of the Treasury shall purchase any notes or other obligations issued hereunder and for that purpose he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under that Act are extended to include any purchase of such notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States.".

SEC. 512. Title II of the Act is further amended by adding at the end thereof the following new section:

"COMMUNITY IMPACT ASSISTANCE

"SEC. 205. (a) The Administrator, for any project which has a guarantee under this title of not less than $50,000,000 and which will have an intended operating life of not less than five years to satisfy the purposes under this title for which the guarantee has been made, shall endeavor to insure that, taking into consideration appropriate local community action and all reasonaby available forms of assistance under this section and other Federal and State statutes, that the impacts resulting from the proposed project have been fully evaluated by the borrower, the Administrator, and the Governor of the affected State, and that effective steps have been taken or will be taken in a timely manner to finance community planning and development costs resulting from such project under this section, if applicable under other provisions of law, or by other means. When the project will be located on leased Federal lands, the Administrator shall specifically review State and local actions under section 9(a) of the Mineral Leasing Act Amendments of 1976 (Public Law 94-377) and insure that any funds made available to the State pursuant to such section 9(a) are used to finance such planning and development costs before any Federal assistance under subsection (c) of this section is considered or authorized.

"(b) The Administrator, for projects not included under subsection (a), may in his discretion consider the community impacts which may result from such projects, and may take such actions, under authority directly available to him under other statutes or in coordination with other Federal agencies or the State, as he considers necessary and appropriate to insure timely and effective planning and financing for such community impacts.

"(c)(1) In order to discharge his responsibilities under subsection (a), and in accordance with such rules and regulations as the Administrator in consultation with the Secretary of the Treasury shall prescribe, and subject to such terms and conditions as he deems appropriate, the Administrator is authorized, for the purposes of financing essential community development and planning which directly result from, or are necessitated by, a project under subsection (a), to—

"(A) guarantee and make commitments to guarantee the payment of interest on, and the principal balance of, obligations for such financing issued by eligible States, political subdivisions or Indian tribes.

"(B) guarantee and make commitments to guarantee the payment of taxes imposed on such project by eligible non-Federal taxing authorities which taxes are earmarked by such authorities to support the payment of interest and principal on obligations for such financing, and

"(C) require that the qualified borrower receiving assistance for a project under this section advance sums to eligible States, political subdivisions, and Indian tribes to pay for the financing of such development and planning: *Provided*, That the State, political subdivision, or Indian tribe agrees to provide tax abatement credits over the life of the project for such payments by such applicant.

"(2) No guarantee or commitment to guarantee under paragraph (1) of this subsection shall exceed $1,000,000.

"(3) In the event of any default by the borrower in the payment of taxes guaranteed by the Administrator under this section, the Administrator shall pay out of the fund established by this title such taxes at the time or times they may fall due, and shall have by reason of such payment a claim against the borrower for all sums paid plus interest.

"(4) If after consultation with State, political subdivision or Indian tribe, the Administrator finds that the financial assistance programs of paragraph (1) of this section will not result in sufficient funds to carry out the purposes of this subsection, then the Administrator may—

"(A) make direct loans to the eligible States, political subdivisions, or Indian tribes for such purposes: *Provided*, That such loans shall be made on such reasonable terms and conditions as the Administrator shall prescribe: *Provided further*, That the Administrator may waive repayment of all or part of a loan made under this paragraph, including interest, if the State or political subdivision or Indian tribe involved demonstrates to the satisfaction of the Administrator that due to a change in circumstances there will be net adverse impacts resulting from such project that would probably cause such State, subdivision, or tribe to default on the loan; or

"(B) require that any community development and planning costs which are associated with, or result from, such project, and which are determined by the Administrator to be appropriate for such inclusion, shall be included in the aggregate costs of the project.

"(5) The Administrator is further authorized to make grants to States, political subdivisions, or Indian tribes for studying and planning for the potential economic, environmental, and social consequences of projects and for establishing related management expertise.

"(6) At any time the Administrator may, in consultation with the Secretary of the Treasury, redeem, in whole or in part, out of the fund established by this section, the debt obligations guaranteed or the debt obligations for which tax payments are guaranteed under this subsection.

"(7) When one or more States, political subdivisions, or Indian tribes would be eligible for assistance under this subsection, but for the fact that construction and operation of the project occurs outside its jurisdiction, the Administrator is authorized to provide, to the greatest extent possible, arrangements for equitable sharing of such assistance.

"(8) Such amounts as may be necessary for direct loans and grants pursuant to this subsection shall be available as provided in annual authorization Acts.

"(9) The Administrator, if appropriate, shall provide assistance in the financing of up to 100 per centum of the costs of the required community development and planning pursuant to this section.

"(10) In carrying out the provisions of this section, the Administrator shall provide that title to any facility receiving financial assistance under this section shall vest in the applicable State, political subdivision, or Indian tribe, as appropriate, and in the case of default by the borrower on a loan guarantee made or committed under subsection (b) of this section, such facility shall not be considered a project asset for the purposes of section 202 of this Act.

"(11) The Administrator shall not use his authority under this subsection to provide Federal assistance unless any Federal funds transferred pursuant to section 9(a) of the Mineral Leasing Act Amendments of 1976 (Public Law 94-377) to the State from the lease of Federal land for or associated with the project have been or, with assurance, will be committed, to the maximum extent allowable under Federal statutes, to financing such essential community development or planning directly resulting from, or necessitated by, a project on leased Federal lands.".

TITLE VI—ELECTRIC AND HYBRID VEHICLE RESEARCH DEVELOPMENT, AND DEMONSTRATION PROGRAM

SEC. 601. (a) Section 7(b)(3) of the Electric and Hybrid Vehicle Research, Development, and Demonstration Act of 1976 (15 U.S.C. 2506(b)(3)) is amended by striking out ", except that rules promulgated under paragraph (1) shall be amended not later than 6 months prior to the date for contracts specified in subsection (c)(2).".

(b) Section 7(b)(4) of such Act (15 U.S.C. 2506(b)(4)) is amended to read as follows:

"(4) The Administrator shall transmit to the Speaker of the House of Representatives and the President of the Senate, and to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, the performance standards developed under paragraph (1) and all revised performance standards established in connection with the demonstrations specified in subsection (c)(2).".

(c) Section 7(c) of such Act (15 U.S.C. 2506(c)) is amended to read as follows:

"(c)(1) The Administrator shall, within 6 months after the date of promulgation of performance standards pursuants to subsection (b)(1), institute the first contracts for the purchase or lease of electric or hybrid vehicles which satisfy the performance standards set forth under (b)(1). The delivery of which vehicles shall be completed according to the expedited best effort of the administering agency and the selected manufacturer. To the extent practicable, vehicles purchased or leased under such contracts shall represent a cross section of the available technologies and of actual or potential vehicle use.

"(2) Thereafter, according to a planned schedule, the Administrator shall contract for the purchase or lease of additional electric or hybrid vehicles which satisfy amended performance standards and represent continuing improvements in state-of-the-art. In conducing demonstrations, the Administrator shall consider—

"(A) the need and intent of the Congress to stimuate and encourage private sector production as well as public knowledge, acceptance, and use of electric and hybrid vehicles; and

"(B) demonstration of varying degrees of which operations, management, and control for maximum wide-spread effectiveness and exposure to public use.

"(3) The demonstration period shall extend through the fiscal year 1986, with purchase or leasing continuing through the fiscal year 1984. During the demonstration period the Administrator shall demonstrate 7,500 to 10,000 electric and hybrid vehicles. No more than 400 vehicles may be procured for this purpose during fiscal year 1978. In order to allow industry time for advanced planning, the size and nature of projected electric and hybrid vehicle leasing and procurements will be made public by the administering agency. Publications under the preceding sentence (each covering a period of two years) shall be released annually starting at an appropriate time in the fiscal year 1978.

"(4) If the Administrator determines on the basis of his annual review of the program under this Act that—

"(A) at least 200 vehicles cannot be added to the project during the fiscal year 1978, or

"(B) at least 600 vehicles cannot be added to the project during the fiscal year 1979, or

"(C) at least 1,700 vehicles cannot be added to the project during the fiscal year 1980, or

"(D) at least 7,500 vehicles in the aggregate cannot be added to the project during the fiscal years 1981 through 1984.

he shall immediately forward a detailed explanation thereof to the Speaker of the House of Representatives, the President of the Senate, the Committee on Science and Technology of the House of Representatives, and the Committee on Energy and Natural Resources of the Senate.".

SEC. 602. Section 8 of the Electric and Hybrid Vehicle Research, Development, and Demonstration Act of 1976 (15 U.S.C. 2507) is amended by adding at the end thereof the following new subsections:

"(d) In addition to contracting for the purchase or lease of vehicles when conducting the demonstrations established under section 7, the Administrator may acquire or secure use of such vehicles, or have such vehicles acquired or used by others, by making agreements and utilizing various forms of Federal assistance and participation which is authorized under the Energy Reorganization Act of 1974 (Public Law 93-438) and the Federal Nonnuclear Energy Research and Development Act of 1974 (Public Law 93-577).

"(e) When contracting and otherwise using Federal funds to conduct demonstrations under this Act, the Administrator shall seek cost sharing with others to the maximum extent practical. During the first 2 years of demonstration activities the Administrator may enter into procurement or lease contracts for purposes of carrying out demonstrations under this Act without regard to the provisions of title III of the Act of March 3, 1933 (47 Stat. 1520; 41 U.S.C. 10a-10c).".

SEC. 603. (a)(1) Section 10(e) of the Electric and Hybrid Vehicle Research, Development, and Demonstration Act of 1976 (15 U.S.C. 2509(e)) is amended by adding at the end of the following new paragraph:

"(3)(A) There is established in the Treasury of the United States an Electric and Hybrid Vehicle Development Fund (hereinafter in this paragraph referred to as the 'fund'), which shall be available to the Administrator for carrying out the loan guarantee and principal and interest assistance program authorized by this Act, including the payment of administrative expenses incurred in connection therewith. Moneys in the fund not needed for current operations may, with the approval of the Secretary of the Treasury, be invested in bonds or other obligations of, or guaranteed by, the United States.

"(B) There shall be paid into the fund such part of the amounts appropriated pursuant to section 16 as the Administrator deems necessary to carry out the purposes of this Act and such amounts as may be returned to the United States pursuant to subsection (g) of this section, and the amounts in the fund shall remain available until expended, except that after the expiration of the 7-year period established by subsection (h) of this section such amounts in the fund as are not required to secure outstanding guarantee obligations shall be paid into the general fund of the Treasury.

"(C) If at any time the moneys available in the fund are insufficient to enable the Administrator to discharge his responsibilities under this section, he shall issue to the Secretary of the Treasury notes or other obligations in such forms and denominations bearing such maturities, and subject to such terms and conditions as may be prescribed by the Secretary of the Treasury. This borrowing authority shall be effective only to such extent or in such amounts as are specified in appropriation Acts. Such authority shall be without fiscal year limitation. Redemption of such notes or obligations shall be made by the Administrator from appropriations or other moneys available under this Act. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall not be less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the notes or other obligations. The Secretary of the Treasury shall purchase any notes or other obligations hereunder and for that purpose he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under that Act are extended to include any purchase of such notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States.

"(D) Business-type financial reports covering the operations of the fund shall be submitted to the Congress by the Administrator annually upon the completion of the appropriate accounting period.".

(2) Section 10 of such Act is further amended by adding at the end thereof the following new subsection:

"(j) The full faith and credit of the United States is pledged to the payment of all obligations incurred under this section.".

(b) Section 10(g) of such Act (15 U.S.C. 2509(g)) is amended to read as follows:

"(g)(1) With respect to any loan guaranteed pursuant to this section, the Administrator is authorized to enter into a contract to pay, and to pay, the lender for and on behalf of the borrower the principal and interest charges which become due and payable on the unpaid balance of such loan if the Administrator finds—

"(A) that the borrower is unable to meet principal and interest charges, that it is in the public interest to permit the borrower to continue to pursue the purposes of the project, and that the probable net cost to

the Federal Government in paying such principal will be less than that which would result in the event of a default; and

"(B) that the amount of such principal and interest charges which the Administrator is authorized to pay shall be no greater than the amount of principal and interest which the borrower is obligated to pay under the loan agreement.

"(2) In the event of any default by a qualified borrower on a guaranteed loan, the Administrator is authorized to make payment in accordance with the guarantee, and the Attorney General shall take such action as may be appropriate to recover the amounts of such payments (including any payment of principal and interest under paragraph (1)) from such assets of the defaulting borrower as are associated with the activity with respect to which the loan was made or from any other surety included in the terms of the guarantee."

(c) Section 10(h) of such Act (15 U.S.C. 2509(h) is amended by striking out "the 5-year period" and inserting in lieu thereof "the 7-year period".

EXTENSIONS OF REMARKS

ALTERNATIVES TO DAMS

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. COHEN. Mr. Speaker, on September 7, I rose in this House to announce that, after studying the Army Corps of Engineers' draft environmental impact statement on the proposed Dickey-Lincoln hydroelectric project, I could not support construction of the project, which would be located in my congressional district in northern Maine.

At the time, I stated that I believe that the enivronmental, economic, and social costs of Dickey-Lincoln are simply too severe to justify its construction. In the weeks since then, however, a number of people in Maine have expressed their concern that those of us who oppose the project can offer no alternative solutions to the very real energy problems of our State.

Mr. Speaker, I believe that there are clear alternatives to massive hydroelectric projects, such as Dickey-Lincoln. One is to rechannel the millions of dollars that are proposed for Dickey-Lincoln into the development of wood, solar, and windpower—energy sources with far greater long term potential to Maine and the Nation than any single peaking-power facility. A second alternative would be to devote our full resources to a conservation program emphasizing insulation of homes and businesses—the saving of energy rather than the generation of more power to waste.

An article entitled "In Lieu of Dams" appears in the fall 1977 edition of Water Spectrum, a publication of the Army Corps of Engineers. This article, which was written by Dr. Brent Blackwelder, makes a strong case for alternatives to dam construction. In discussing hydroelectric projects, Dr. Blackwelder specifically cites the Dickey-Lincoln example. He points out that—

> If instead of building Dickey-Lincoln Dam in northern Maine the money were put into insulating attics we would realize the equivalent of 43 times the output of the project.

This is an extremely important issue not just for Maine, but for the entire Nation and its future energy policy. I urge every Member of Congress to take the time to read Dr. Blackwelder's excellent analysis; it will be time well spent.

The article follows:

[From Water Spectrum, Fall 1977]

IN LIEU OF DAMS

(By Brent Blackwelder)

The best way to dispel the suspicion that conservationists want to return the country to the Stone Age by opposing water resource development projects is to consider some of the superb alternatives we have proposed to traditional dam building, canal digging and stream channelization. Water resource projects are designed primarily to achieve one or more of the following objectives: flood control, water supply, recreation, hydropower and navigation. Given the desirability of providing these objectives, if the environmental community wants the Army Corps of Engineers and other agencies to stop altering the rivers and streams of America through water resource construction, what do we have to offer instead?

The alternatives I wish to discuss are nonstructural solutions to flood problems; water pricing, water conservation and proper management for meeting water supply needs; development of scenic rivers or non-water based recreation instead of flat-water reservoir recreation; energy conservation measures taken prior to building more hydropower dams; and finally, refurbishing our country's railroads instead of constructing new barge canals.

FLOOD CONTROL

A wide range of nonstructural options is available to replace structural alterations of rivers and streams in achieving flood control. The term "nonstructural" means that these alternatives do not involve alterations of rivers through damming or channelizing.

The alternative of creating a greenbelt of park land along a stream is very attractive in some areas where stream channelization has been proposed for flood control. The basic idea is that many uses of flood plain lands are compatible with periodic flooding. Devoting a green strip of park land alongside both banks of a river, serves the objective of flood control without destroying the natural beauty of the rivers or its recreational potential.

The Corps of Engineers is currently applying two such green belt concepts at its Indian Bend Wash project in Arizona and along the South Platte River in Colorado, where the Corps has transferred funds intended for channelization to a green belt project. That the designing of such nonstructural projects can pose an engineering challenge is demonstrated by the fact that the Indian Bend Wash project received a distinguished engineering award from the American Society of Civil Engineers.

In Prairie du Chien, Wisconsin the Corps is using two other nonstructural techniques to achieve flood control. It is relocating some residents from an island in the flood plain and is also flood proofing other buildings in the vulnerable area. By combining flood proofing and partial evacuation of the flood plain, the Corps has produced a workable plan where the traditional approaches of changing the river were too costly.

The Charles River Natural Storage Area in Massachusetts offers an example of still another nonstructural flood control technique. Here the Corps of Engineers wants to preserve 17 upstream valleys in their natural condition to prevent an increase in flood damages downstream which could occur if these valleys and their associated wetlands were developed. In 1971 the Corps found that flood losses averaged $158,000 annually. If 40 percent of the upstream wetlands storage areas were developed, however, annual flood damages would jump to a staggering $957,000.

These four nonstructural flood control projects show that the Corps can and will carry out such plans. The problem is that nonstructural projects are the exception, not the rule, as far as flood control is concerned. Despite the provision of section 73 of the Water Resources Development Act of 1974 (it provided authority for Federal agencies to pursue nonstructural alternatives with cost-sharing provisions), progress in starting a large number of nonstructural projects has been very slow. This is especially regrettable since nonstructural projects do not have environmentally damaging impacts and, in the judgment of many, offer the best hope of achieving a reduction in the ever mounting annual flood damages billed to our country.

The trouble is that despite increasing expenditures on flood control structures, and despite the damages such structures have prevented, the country's annual flood damage bill continues to rise. Both the Task Force on Federal Flood Control Policy and the National Water Commission strongly support greater reliance on flood plain management techniques as the way to solve the Nation's flood problems.

Continued paving over of land in metropolitan areas leads to greater runoff and causes periodic flooding of streams. A wide range of tools is available to curtail some of this destructive runoff from suburban shopping centers and parking lots. On-site detention ponds should be required for large-scale developments. Gravel dry wells or recharge pits and porous surfacing material can help solve runoff problems. Controlling erosion by planting ground cover in new housing developments and shopping centers can also curb runoff and prevent siltation and the resultant loss of channel capacity in urban creeks and streams.

One important feature of nonstructural alternatives like flood plain evacuation and flood proofing is that they remove the burden of flood control from individuals not responsible for the problem—those inhabiting the upstream area. A disadvantage of reservoirs from the standpoint of social equity is that farmers and rural residents who are not the cause of the flood problem are forced to give up their land, some of which has been in the same family for generations, for a dam to protect people who have built downstream in the flood plain.

RECREATION

Most conservationists generally feel that enough reservoirs have been built to last far into the next century. In fact, the Corps should not, we argue, continue to cite recreation benefits to justify reservoir projects because demand for other forms of recreation, including non-water activities, is growing much faster than flat-water recreation demands. Second, building lakes in the rural countryside neglects the pressing recreation needs of the inner city where there is an insufficient number of facilities for regular use on a daily basis. Third, reservoirs eliminate some truly unique areas which provide unsurpassed recreational opportunities.

The Meramec Park Dam in Missouri is a good example of a project which will eliminate more recreational opportunities than it provides.

Conservationists discovered that about half of the claimed recreation benefits were com-

ing from "sightseeing"—people coming to the reservoir not to boat, fish, picnic or swim but simply to stare at what the Corps had constructed.

Furthermore, the area already has an abundance of recreational opportunities: fishing and boating on the Meramec River; camping, hiking and picnicking in a State park; a wildlife management area; and, in addition, spelunking in numerous caves, including the beautiful Onondaga. Each year several hundred thousand people visit Onondaga Cave, a truly unique asset to the area and Nation.

The alternative to the Meramec Park Dam would involve establishing a green belt and recreation area in the lower Meramec River and a combination of farm land, wildlife management areas and park land in the upstream reaches.

The point of this example is that the Corps partially justifies some projects by using recreational benefits when there are ample recreational opportunities already in the project area. Given hundreds of large reservoirs now existing all over the country and the growing demands for other types of recreation, it is a serious mistake to irrevocably commit these scarce river valley resources. We essentially deprive future generations of some choice in these matters and, at the same time, neglect the plight of the inner city resident who must face crowded facilities if he chooses to picnic, swim or play tennis. The obvious alternative to more reservoirs is to spend money on inner city recreation facilities and to leave the rural landscape available for other forms of enjoyment.

Only 19 rivers are now included in the national wild and scenic rivers system, but over 50,000 public and private dams have been built. It is time to correct the imbalance, and conservationists propose increasing the national wild and scenic river system by several hundred rivers to preserve both their natural and recreational value.

WATER SUPPLY

A wide range of methods dealing with water supply problems can be tried before building more reservoirs. In a number of cases where reservoirs have been proposed to solve water supply problems, conservationists have found that a water shortage did not exist, that the demand was based on questionable population projections or that benefits would accrue to only a handful of beneficiaries. For instance, we discovered that 79 percent of the water supply benefits of one Corps project, Lukfata Dam, would go to a single catfish farm operation and that the small town of Idabell, Oklahoma, population 6,000, would have to grow to 100,000 over the 50-year life of the project to fully use the projected water supply.

Setting aside such examples, let us suppose that we encounter an area with a legitimate water supply problem. What are the alternatives to building reservoirs? One of the most overlooked choices, particularly east of the Mississippi, is the use of groundwater supplies. The National Waterwell Association argues that groundwater reserves are frequently available on a sustained yield basis for as little as one tenth the cost of surface supplies. In the case of the controversial Oakley Reservoir in Illinois, which the Corps has now placed in the inactive category, a proper examination of the ample groundwater supply was not carried out.

More emphasis should be placed on the supply side of the equation. The National Water Commission, established by Congress in 1968 to do a 5-year in-depth study of all the Nation's water problems, devoted an entire chapter to better use of existing supplies in its final report.

WATER POLICIES FOR THE FUTURE

The Commission found little incentive for proper use of water because most cities assess a flat charge for the first units of water consumed and then assess progressively lower charges per unit as more water is consumed. The inevitable result is that there is little incentive to avoid excessive use.

According to the Commission, for instance, plumbing fixtures for showers and toilets could reduce total water use in the average household by as much as 35 percent and save commercial and business establishments up to 50 percent.

The Commission notes that ". . . if the common pricing policy were reversed there would be a financial penalty for excessive consumption and an incentive for individual conservation. Efficiency would also be improved by pricing policies which charged more at times of peak demand and less at times of slack demand."

To compound the problem, some areas like New York City do not meter their water, nor have they repaired leaks or fixed defective connections and valves. The Commission recommends effective leak control programs, installation of water metering, reform in the pricing structure for water and amendments to plumbing codes requiring the installation of water saving fixtures and appliances. By requiring localities to take these steps prior to receiving any Federal planning money for a water supply reservoir, the Federal Government could easily eliminate much unneeded dam building.

Proper management of already existing reservoirs can go a long way to alleviate the problems of water supply. Dr. Daniel Sheer, planning engineer for the Interstate Commission on the Potomac River Basin, has argued cogently that the Washington metropolitan area already has a sufficient number of reservoirs which, if properly managed, could meet the area's water needs well into the next century.

Dr. Sheer's proposal would require keeping tributary reservoirs full by using the adequate water flow from the Potomac River before a drought ever starts. By this method, Dr. Sheer points out, ". . . the Washington area would come through the worst drought with . . . 5 billion gallons of water to spare. . . ." *

These alternatives to water supply reservoirs do not exhaust the possibilities. In the West, reform of groundwater management codes and the "use-it-or-lose-it" doctrine are essential. Land treatment techniques for sewage disposal and recycling of wastewater, some of which have been pioneered by the Corps, yield good quantities of pure water.

A COST/BENEFIT COMPARISON BASED ON THE DICKEY-LINCOLN HYDRO-POWER PROPOSAL

(By Dr. James MacKenzie, Scientific Staff, Massachusetts Audubon Society, April 1977)

DICKEY-LINCOLN (1976)

Cost, $668 million; energy produced, 1.2 billion kw hrs = 4.1 trillion Btu per year; energy saved, none.

CONSERVATION ALTERNATIVES

Attic insulation (9'' fiberglass, contractor installed @ .30/sq. ft.); cost, $668 million; energy produced, none; energy saved, 177 trillion Btu per year 43 times as much as Dickey-Lincoln.

Wall insulation (foam installed @ .70/sq. ft.); cost, $668 million; energy produced, none; energy saved, 31 trillion Btu per year 7.5 times as much as Dickey-Lincoln.

Storm windows ($30 each, installed); cost, $568 million; energy produced, none; energy saved, 18 trillion Btu per year more than 4 times Dickey-Lincoln.

NAVIGATION

In looking to alternatives to navigation projects, we must define the ultimate goal of public spending for transportation. A reasonable goal would be achieving national transportation efficiency. This would benefit the entire economy—the businessman, the consumer and the environment. Conservationists argue that present navigation policy, which includes canal building, does not contribute to this goal. On the contrary, we are convinced that new canals damage the environment, are inefficient and are not justified economically.

The basic alternative to navigation projects lies in increased and improved railroad service and efficiency. From the environmental standpoint railroads are desirable because canals are generally much more destructive than railroad corridors. Furthermore, all the major railroad corridors have already been built so whatever environmental damage these routes have caused is a *fait accompli*.

In the area of energy efficiency the University of Illinois Center for Advanced Computation looked into prior studies of the fuel efficiencies of barge and rail modes. The Center found that studies which showed an energy advantage to barges had relied on mere ton/mile comparisons of energy consumption and had used average rail data for the entire country. These earlier studies neglected the fact that barges follow meandering rivers, thus traveling more miles to reach a given point than trains. Also, barges and railroads both ship bulk commodities which, if moved in unit trains, help give a slight energy advantage to railroads.

Is placing greater reliance on the railroads a viable alternative? Clearly, such a decision would have environmental advantages and no obvious energy disadvantages. It is a legitimate choice because there is already more track available than we now use. Professors Findley and Hannon of the University of Illinois proposed giving the Corps of Engineers authority to repair the Nation's rail beds to increase use of railroads. In an article published in *National Resources Journal*, they cite the railroads' generally poor record of track maintenance and note that the Corps is experienced in the area of rail repair. Ironically, the Corps has built over 1,500 miles of new rail bed in the past 25 years to replace old rail lines inundated by its reservoirs.

Furthermore, the Federal Government now pays 100 percent of the construction costs of new canals and all the operation and maintenance costs of the inland waterway system. If the beneficiaries of a number of major new canal projects had to pay for them, then the canals would probably not be built.

According to the Department of Transportation, the Federal Government has put some $30 million over the past decade into our national transportation network. Until the passage of the Rail Reorganization Act of 1973, railroads had for many decades gone without receiving even a fraction of this support. As a result, our rail network has declined at the very time when it has such obvious advantages over other modes. Conservationists who oppose barge canal projects are thus not being obstructionists without alternatives. Rather we say that revitalization of our railroads is a more sensible way to spend public transportation dollars.

HYDROPOWER

While most Army Corps of Engineers projects do not produce hydropower (only 28 projects of more than 200 scheduled for some type of construction in the fiscal 1977 budget would generate electricity), conservationists do have much better alternatives to the construction of large hydropower dams. At the outset one might wonder why conservationists object to some hydropower projects. Aren't they a "pollution-free" form of energy which draw upon a renewable resource? It is true that hydropower projects do not have many of the environmental problems associated with fossil fuel or nuclear power plants, but they do have major en-

*Daniel P. Sheer, "Perspective on the Washington Metropolitan Area Water Supply Problem, 1977. Available from the Interstate Commission on the Potomac River Basin.

vironmental drawbacks: inundation of vast amounts of forest and significant wildlife habitat, damage to the native acquatic life through alteration of historic flow patterns, blocking of migratory fish passages, and damage to coastal resources by cutting off the downstream flow of nutrients.

The best alternative to hydropower projects is putting our major national effort into energy conservation together with the development of such alternatives as solar energy and wind power. One example will demonstrate the dramatic difference in results if we go the energy conservation route. If instead of building Dickey-Lincoln Dam in northern Maine the money were put into insulating attics we would realize the equivalent of 43 times the output of the Dickey-Lincoln project. Investing the money in insulation of walls would yield an equivalent savings of 7.5 times the output of the project. Installation of storm windows would yield 4 times the output. Dosen't it make sense to pursue such alternatives first before making irrevocable commitments of river resources?

The Corps is now being assigned the task of evaluating the potential of installing generators in numerous existing small dams throughout the United States. This alternative appears to have important environmental advantages over the construction of new dams.

Many of the alternatives I have discussed—nonstructural flood control projects for instance—could be undertaken by the Corps without further legislation. Others such as the repair of the Nation's rail beds would require new legislative authority. Some of the alternatives would have to be implemented by other Federal agencies like the Bureau of Outdoor Recreation in the case of scenic rivers or by appropriate State or local entities.

Pursuing conservationists' alternatives affords the best way of achieving the legitimate objectives of water projects—flood control, water supply, energy, recreation and transportation efficiency—while at the same time avoiding environmental damages and the loss of areas of scientific educational and historic importance. Furthermore these alternatives do not constitute irreversible commitments of river valleys; they leave open choices of future generations which are precluded by many traditional water development projects.. Finally conservationists' alternatives often have the advantage of being less costly to the taxpayer.

ONE HUNDRED FIFTIETH ANNIVERSARY MARKED BY PENNSYLVANIA HORTICULTURE SOCIETY

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. EILBERG. Mr. Speaker, the citizens of Philadelphia this week are proud to mark the 150th anniversary of a truly outstanding organization, the Pennsylvania Horticulture Society.

The society is the oldest of its kind in the United States, and perhaps is best known for the magnificent Philadelphia Flower Show it stages each year at the Philadelphia Civic Center. During this 1-week show, thousands of people, including horticulturists from across the country, thrill to the society's breathtaking display.

Having attended many of the society's annual shows, I can attest not only to the care and professionalism that the society's members put into their efforts, but to the unique opportunity which the society offers our citizens to learn about the plant world.

Because the Pennsylvania Horticulture Society has provided Philadelphians with so much splendor through the years, I am delighted to call to my colleagues' attention the following tribute to the society from the October 30, 1977, New York Times:

AN ANNIVERSARY

The Pennsylvania Horticultural Society, the oldest of its kind in the United States, will be 150-years-old at the end of next month. From modest beginnings in 1827 when 10 men met in Philadelphia to launch the organization, it has come through some slim times to become a significant force for horticulture.

With a membership of 8,000, the society serves well the Delaware Valley. Its 13,000-volume library is one of the best, staffed by a full-time librarian and assistant. Much of the success of the society can be credited to the stimulating leadership of Ernesta Drinker Ballard, who took over as executive secretary in 1963 and became the first full-time paid president 10 years later.

Under her guidance, the society has sponsored several civic improvements, including a fund drive to plant 10,000 trees in Philadelphia parks plus a meaningful program in community gardens. In addition, teacher-training courses, lectures, tours and exhibits are conducted each year. The most recent undertaking is a bi-monthly magazine, The Green Scene, an attractive and informative full-sized publication mailed to members.

The Society is best known as the sponsor of the Philadelphia Flower Show. Favored by the availability of a commodious exhibit hall, the Philadelphia Civic Center, this annual spring show held in March is considered by many to be the finest on the East Coast. While Boston has struggled to find a compatible exhibit hall and New York has lost its show for want of an economical hall, the Philadelphians have carried on their show with highest standards.

Visitors to Independence National Historic Park in Philadelphia will be able to visit the society's headquarters located in one of the row houses that the National Park Service restored at 325 Walnut Street. In lieu of rent, the society maintains the 18th Century garden next to this building and provides exhibits for park visitors.

A TRIBUTE TO ROBERT F. PECKHAM, CHIEF JUDGE U.S. DISTRICT COURT, NORTHERN DISTRICT OF CALIFORNIA

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. MINETA. Mr. Speaker, it is with great pleasure that I rise today on behalf of myself and my colleague, the Honorable DON EDWARDS, to honor one of our Nation's outstanding district court judges. Congressman EDWARDS and I have known Robert Peckham, chief judge U.S. District Court, Northern District of California, for many years, both as a personal friend and as a jurist worthy of our most unqualified admiration.

On Sunday, December 4, 1977, Judge Peckham will receive the Community Service Award from the Anti-Defamation League, the San Jose area B'nai B'rith. I can think of no individual more deserving of this great honor.

Judge Peckham is a lifelong resident of Santa Clara Valley. He is a Phi Beta Kappa graduate of both Stanford University and Stanford University Law School.

Contributing to the judge's legal experience, he has served as Assistant U.S. Attorney for the Northern District of California and was Chief Assistant U.S. Attorney in charge of the criminal division. After leaving the U.S. Attorney's Office, Judge Peckham went into private practice.

In 1959, he was appointed to the California Superior Court for Santa Clara County and served two terms as the presiding judge of the Superior Court.

Judge Peckham was the first person to be appointed to the U.S. District Court from Santa Clara County; he was appointed by President Lyndon B. Johnson in 1966. He established the U.S. District Court in San Jose and became the first Federal judge to sit on the bench in San Jose. On April 8, 1976, Judge Peckham became chief judge on the U.S. District Court, Northern California.

Although law has been uppermost in the life of Judge Peckham, his interests range from prison reform to improving the educational system. He has served as a member of the Foothill College Board of Trustees, as a member of the Board of Visitors of the Stanford Law School, State chairman of the Advisory Board of California Friends Outside, a trustee of the California Historical Society and vice president of the Society of California Pioneers.

Judge Robert Peckham is being honored by the Anti-Defamation League because throughout his life he has exemplified the league's goals, whether it was on the bench or when participating as a college board member. Judge Peckham is a wise and compassionate man and a man who has worked for better understanding for all peoples within our community.

Mr. Speaker, it is with this in mind that Congressman EDWARDS and I ask you and our colleagues to join us in commending and giving best wishes to Judge Robert Peckham, 1977 recipient of the Anti-Defamation League's Community Service Award.

CONGRESSIONAL PAY INCREASES

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. BAUCUS. Mr. Speaker, earlier this month the House voted overwhelmingly against H.R. 9282—a bill effecting the way congressional salaries are set.

I voted against the measure and am pleased that it failed. This bill purported to serve the noble end of deferring pay increases passed by one Congress until the next Congress. This idea—of not letting Congressmen raise their own pay during the actual term they vote on this pay—is fundamentally sound. In fact, I am a sponsor of several measures to do

just that. I believe that Congressmen should not be allowed to vote for pay increases which will show up in their paychecks before the voters have a chance to render a verdict on this congressional action at the next election.

Unfortunately, while one section of H.R. 9282 would have accomplished this end, another section would have made the whole idea of deferred pay hikes worthless. This other section would have prohibited Congressmen from voting down a congressional pay hike by deleting the pay hike's appropriations or by amending the budget ceiling to disallow such a pay increase.

Thus, under the present system in which the Federal Salary Commission suggests so-called automatic pay increases, Congressmen would have been effectively blocked from ever voting on these increases.

I am against the pay increases which have been allowed to take effect since I was first elected to Congress. In fact, I returned each and every pay increase dollar to Montana constituent services accounts so my "take home pay" continues to be as it was when I was first sworn in as a Congressman 3 years ago.

But more than my opposition to these pay increases, I am adamantly opposed to the idea that Congress should not be held responsible for them.

If these increases are necessary, we should not be cowardly about voting for them. Further, for those of us who disagree with any need for congressional pay increases, it is galling that the process continues to be "fixed" to thwart our attempts to stop them.

I am pleased that the majority of my colleagues agreed with me on this. I hope that the next measure to defer pay increases to the Congress after the one in which a pay increase is taken comes before us without such a counterproductive and self-serving section.

FORT WADSWORTH COMMITTEE TOURS NEW YORK HARBOR

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. WOLFF. Mr. Speaker, I would again like to call to the attention of my colleagues the Fort Wadsworth Committee for a Living National Park Memorial chaired by Mr. Leo Boller. The notable goal of this committee is the establishment of a national park on the site of Fort Wadsworth. Fort Wadsworth is our oldest continuously manned fort—dating back to 1636—and overlooks historic New York Harbor.

On October 17, 1977, this patriotic committee conducted a tour of historic New York Harbor in celebration of New York State's Bicentennial aboard the Circle Line's ship *Miss Freedom*. This day was proclaimed by the States of New York and New Jersey, and the New York City Boroughs of Staten Island, Queens, and the Bronx were represented on the tour.

As a tribute to New York and the New York-New Jersey Harbor, the tour members participated in silent meditation, joined by a harbor fireboat water display.

New York harbor has been the gateway to the United States for over 200 years and Fort Wadsworth, our oldest continuously manned fort, has protected the harbor throughout this time. Students participating on the tour described the harbor's historic places, and representatives of the U.S. Armed Forces spoke of the role each branch of the service played in our Nation's history.

Approximately 350 dignitaries, veterans' groups, local PTA groups, and students from all levels participated in the Bicentennial tour. Patriotic music for the occasion was provided by the 65-piece band from I.S. No. 61, Staten Island, under the direction of Mr. William A. Morris.

The committee and the community are to be congratulated for their fine efforts in organizing this tour and for their dedicated work in behalf of preserving Fort Wadsworth as a living national memorial.

FOREIGN STEELMAKERS HAVE UNFAIR ADVANTAGE

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. ASHBROOK. Mr. Speaker, the American steel industry is having a difficult time competing with foreign steel. One of the major problems is that foreign steelmakers have an unfair advantage. Subsidized by their governments, they can lose billions of dollars at taxpayers expense—then ship their products to the United States at cut-rate prices.

An indication of the extent of these government subsidies was recently provided by Sir Charles Villiers, chairman of the British Steel Corp. Villiers depicts BSC as a "pensioner of the state." According to Villiers, any private business losing money at the rate of the British Steel Corp. would by now be in receivership or liquidation.

A look at the BSC financial picture illustrates the truth of Villiers remarks. Losses for the April-September period are expected to run around $350 million. A 1-year loss totaling $900 million is viewed as a distinct possibility.

How can the American steel industry be expected to compete against such heavy odds? Foreign government subsidies place U.S. firms at a competitive disadvantage.

Following is an article from the November 1 American Metal Market on the British Steel Corp.:

BRITISH STEEL CORP. MUST CEASE BEING 'PENSIONER OF STATE,' VILLIERS WARNS

(By Tom Walsh)

LONDON.—Any private business losing money at the rate of the British Steel Corp. would by now be in receivership or liquidation, said Sir Charles Villiers, BSC chairman in a speech last week.

His remarks came at a time when BSC is engaged in intensive consultations with government ministers on how to curb the massive losses now being rolled up by the state-owned steelmaker.

In its semiannual results due out next month, BSC is expected to report a loss of around $350-million for the April-September six-month period. A full-year loss of $900-million is a distinct possibility, according to steel industry soures here.

BSC is slated to present its own plans for resolving its financial crisis to the government within the next few weeks. The Department of Industry is drawing up its own contingency plans.

BSC and the government are expected to agree that major chunks of the firm's ambitious plan will at least have to be delayed, but the government is expected to oppose any substantial reduction in capacity for employment reasons.

Villiers, on the other hand, maintained last week that steel is a capital intensive industry, and therefore "expensive and unsuitable for job creation."

"British Steel now has to become a business and cease to be an institution," he said. "There is no future for steel as a permanent pensioner of the state."

BSC, he said, must make better steel, not more steel. "There is far too much bulk steelmaking capacity in the world," he added, estimating that one-third of capacity in Europe and 20 percent in Japan is surplus.

MEDICARE ASSIGNMENT PROGRAM

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. AuCOIN. Mr. Speaker, at a time when Congress is grappling with the skyrocketing costs of medicare it is a pleasure to report on a private program which may significantly aid in bringing these costs under control.

In the past few months the Gray Panthers of Portland, Oreg., have teamed up with the Multnomah County Medical Society to enlist physicians willing to take medicare patients on assignment. Thus far some 91 Oregon physicians have agreed to participate in the program which promises to substantially reduce the cost of medicare in Oregon and remove some of the onerous paperwork burdens which medicare has imposed on its elderly beneficiaries.

As I believe my colleagues will find it of interest I would like to include an article describing the program in the RECORD at this point. I believe everyone should read this story with a view toward encouraging similar efforts in their own districts:

OREGON GRAY PANTHERS DEVELOP MEDICARE ASSIGNMENT PROGRAM

NATIONAL SENIOR CITIZENS LAW CENTER,
Los Angeles, Calif., September 2, 1977.

The Gray Panthers of Portland, Oregon have designed and implemented an alternative Medicare payment system which should significantly reduce medical costs and save hours of paperwork older persons in the Portland area now face with the Medicare program. This new payment method, based on an assignment concept, was developed in conjunction with the county medical society attesting the fact that elderly community groups, on the local level, can effectively build coalitions with other organizations to enhance the quality of their lives.

Under the new program, a substantial number of doctors in the Multnomah County Medical Society of Portland have agreed to accept assignments of claims against Medicare from county senior citizens. The participating physician receives the medical insurance payments directly from the carrier and agrees that his or her total charge for covered services be the "reasonable charge" determined by Medicare, rather than the "actual charge" ordinarily designated for particular services. As an assignee, the doctor also agrees to handle the paperwork involved in processing claims, avoiding for senior patients the headaches often created by bureaucratic procedures.

Under current law, without an assignment program, physicians can bill the elderly patient for his or her actual fee, even if it exceeds the Medicare approved "reasonable charge" standard. Medicare, however, pays only 80% of the "approved reasonable fee," allowing the physician to bill the patient for the remainder.

Also, under the present scheme, the patient is responsible for processing the often confusing paperwork himself.

To date some 91 Oregon physicians, including one surgeon, but mostly internists and general practitioners, have agreed to the assignment program and a roster of names of the participating physicians have been compiled by the Medical Society. The Oregon Gray Panthers are now initiating a national campaign, directed at the nation's medical societies, (Federal, State and Local), urging physicians to assist their elderly patients by accepting assignments of Medicare claims. For further information regarding the program contact Ron Wyden, 2169 N.W. Irving St., Apt. 10, Portland, Oregon 97210. Please include a self-addressed stamped envelope.

Mr. Wyden is the Legal Services Developer for the elderly for the state of Oregon and would be glad to help other developers and legal services attorneys construct similar programs in their community.

DR. RUSSELL W. PETERSON SELECTED AS DIRECTOR OF CONGRESSIONAL OFFICE OF TECHNOLOGY ASSESSMENT

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. EVANS of Delaware. Mr. Speaker, I want to take this opportunity to bring to the attention of the House the recent selection of Dr. Russell W. Peterson as director of the Congressional Office of Technology Assessment.

I was privileged to serve as director of development when Governor Peterson was the chief executive of my State. In both that job and as Chairman of the White House Council on Environmental Quality, Russ Peterson brought a farsighted and thoughtful approach to the problems of Government, and I am confident that under his leadership, the Office of Technology Assessment will become a strong and effective arm of Congress.

Dr. Peterson will take office on January 16 and I want to join with his many friends in Congress in wishing him the best of luck in his new and challenging post.

NEW JERSEY TO FCC: EXPERIMENT WITH US ON SIGNAL CARRIAGE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. FLORIO. Mr. Speaker, the State of New Jersey is unique in many ways, however, one uniqueness of which we are not proud is that we have absolutely no commercial television broadcast stations in the State. Cable television is one solution to this problem, but, unfortunately, Federal regulations on how many signals a cable system may carry and which programs it may show work to retard that solution.

The New Jersey Office of Cable Television has recently come up with a creative idea which will help New Jersey consumers to receive expanded choices and variety in television programing. The office has announced it will petition the FCC to lift its repressive signal carriage rules for all systems in the State.

I salute this action by our State's cable television office and so that my colleagues may be more informed ask unanimous consent to insert at this point in the RECORD an article by Brian Lamb in this October 24 issue of Cablevision which discuss how New Jersey citizens could get better television.

The article follows:

NEW JERSEY TO FCC: EXPERIMENT WITH US ON SIGNAL CARRIAGE

(By Brian Lamb)

NEWARK, N.J.—A couple of years ago New Jersey Governor Brendan Byrne on behalf of the citizens of his state, asked the Federal Communications Commission for a little favor. How about giving one of the most densely populated states in the Union at least one VHF commercial television station, he queried. The answer came pretty quickly. Thanks for your interest, New Jersey, can't do it now, maybe next time. You see, those fellows in New York and Philadelphia have been there a long time and it wouldn't be fair to force them to move. You know the costs and all that.

Well, New Jerseyites, long deprived of any significant homegrown commercial television, aren't giving up the battle. But this time they intend to come at the problem in a little different manner. There is a move afoot to foster the rapid growth of cable television. On or about the first day of November, the state will file with the FCC "a petition for waiver" of the signal carriage rules. It would be an experiment. Take the wrap off cable, New Jersey officials will say and let systems carry any or all of the distant signals channel capacity can bear. Someone in the federal government is always suggesting de-regulatory experiments, anyway. It might even help the FCC soothe its conscience. You know, with all that talk about "the public interest" and what-not.

Paul Dezendorf, coordinator of state and local planning for New Jersey's Office of Cable Television, has been spending a lot of time on the preparation of the petition. He obviously thinks the Garden State would be a splendid place for such an experiment. His analysis: "We have a piece of the state that is representative of every part of America. New Jersey is a hell of a lot more representative than Utah. They (the FCC) ought to pick a state they've deprived of local television for the past 20 years. New York and Philly broadcasters have benefited from New Jersey viewers. How much damage will it possibly do them?"

What the FCC will eventually do about the waiver petition is anybody's guess at this point. The new FCC chairman, Charlie Ferris, will have been on the job two weeks and one day when the document is filed. However, in the short run, the action says more about the New Jersey state government's involvement in cable matters than anything else. There are increasing signs of a new activism emanating from the Office of Cable Television. For one thing, in less than a year, the size of the staff has jumped from 8 to 17. The budget is up to $230,000 for 1977. Not all that large when you look at the fact that there are 567 separate municipalities in New Jersey and two and one half million TV households. But not all that small either when you consider that when Dezendorf joined the office three and one half years ago there were only three employees.

New Jersey is one of 11 states which has voted to regulate cable. Three of those, Massachusetts, Minnesota and New York, have independent cable commissions. The states of Alabama, Connecticut, Hawaii, Rhode Island and Vermont have put the cable office under the public utility commissions and given them sole authority to grant franchises. In Delaware, Nevada and New Jersey, the offices are also adjuncts to the PUC's, but the municipalities retain the responsibility to issue franchises. Although the money was slow in coming, the New Jersey legislature laid down two strong goals for the Office of Cable Television in the December 15, 1972 Act. 1) "Promote adequate economical and efficient cable television service to the citizens and residents of the state." 2) "Encourage the optimum development of educational and community service potentials of the cable television medium."

Dezendorf is confident the office is living up to its assigned goals. "The people here are dedicated to seeing cable developed," he says. Two members of the staff, including himself, have worked for a cable system in the past. The office director, John Cleary (see page 26) has spent a lifetime in broadcasting. Cleary's deputy, Dennis Linken (the senior civil service person) as an attorney, knows the Public Utilities Commission, and has "handled rate cases." At present, 10 percent of New Jersey's households are cable customers. There has been 50 percent increase in cable plant in the past 24 months. Over 100 municipalities are in the franchise process right now. The office sees its role as expediter, arbitrator, prodder if you will, between the cities and the cable companies. According to Dezendorf, his colleagues try to adhere to "a rigid time limit—at the outside eight months" from beginning of the franchise process to the start of construction. They provide a standard 22 page form for franchise applications with the hope of saving time for everyone involved. It gives the cable company's information to a town in standard format, says Dezendorf.

Cable operators in New Jersey are cautiously optimistic about the state's new found desire to push the industry. Outsiders are anxiously waiting to see if this enthusiasm will spill over to other states.

CALENDAR

October 11–12: The Alabama Cable Television Association's recent fall workshop, attended by a record 70 people, "was an excellent meeting which generated much optimism for cable," according to Otto Miller, chairman of the association.

. . . Speaker for the Wednesday night dinner was CableVision Magazine's Washington Bureau Chief, Brian Lamb, who gave a lively discussion on what's happening in Washington. Other speakers included John Cole, from the Washington D.C. firm of Cole, Zylstra & Raywid; Frederick Finn, NCTA assistant

counsel; Roy Kirkpatrick, special FBI agent; and Donald Crosby, from the FCC special relief and microwave division. Arthur Smith from Pell City, Alabama explained how to eliminate tax on equipment, as the telephone and utility companies do, in compliance with the "use-tax" in Alabama. And although Bob Schmidt could not attend, due to duties pertaining to the pole attachment legislation in Washington, he did address the luncheon via a two-way telephone hookup which was then transmitted over the P.A. system.

October 14–15: The Maryland/Delaware CATV Association's annual fall banquet, meeting and election of officers started off with the banquet. Two speakers, Gary Hurvitz, an FCC attorney, and Art Harding, assistant general counsel for the NCTA gave presentations.

. . . Saturday morning, the 15th, a business meeting and election of officers was held. New president is Bob Cole of Annapolis CATV, vice president is Jim Oldham of Multi-View Cable, secretary is Tony Girillo of St Charles CATV, and treasurer is Ned Cogswell, CATV consultant. John Cascioli, outgoing president, was presented a plaque commending his outstanding contributions during his term as president.

. . . Gary Hurvitz and Art Harding met again to speak, but this time for a debate on FCC regulations concerning signal carriage, nonduplication and franchise standards. During this debate, members from the audience freely asked questions of both debators. FCC's Hurvitz considered this a learning experience, in that he welcomed the opportunity to hear cable's side.

. . . Two presentations followed, one given by Jerrold's Jim Bailey on the direction of cable's future and the other by Sel Cramer, of Southern Satellite Systems, on the future of satellite.

October 17–18: The New York State Cable Television Association's fall meeting, titled "Cable Television—An Industry Moving Forward in New York," was the largest ever conducted by the association, with 150 cable operators and industry representatives. The meeting began Sunday evening for a board of directors meeting, during which they discussed the recent testimony the association delivered before the Senate assembly administrative regulations review committee.

. . . Monday morning saw the election of a new slate of officers. President is Allen Garry of Cablevision Industries; first vice president is Chris Conely of TPT of Manhattan; second vice president is Peter Jones of Long Island Cablevision; secretary is Kevin Wilder of Manhattan Cable Television; and treasurer is Earl Quam of Brookhaven Cable.

. . . Following the elections, a heated discussion was held with Miss Gail Hatch, director of planning, State Department of Taxation and Finance. The discussion centered on sales tax refunds to cable TV subscribers in the state (since the association recently won its battle with the state regarding sales tax on cable television service.)

. . . The second session on Monday morning focused on a new notice of proposed rulemaking concerning billing practices recently issued by the state. Bill Strange from Sammons of New York, conducted a thorough examination of the six points involved in the proposed rules for standardizing all cable companies' billing practices.

. . . At the Monday luncheon session, Nick Miller, from the president's office of telecommunications policy, addressed the assemblage. Following lunch, Thayer Bigelow from Manhattan Cable conducted a lively session on new FCC franchise standards. A technical session was held at the end of the day which focused on satellites and earth stations. A live earth station demonstration was provided, courtesy of WTCG, Channel 17, Atlanta, Georgia; RF Systems; and Suffolk Cablevision. Workshops on customer relations in basic technical problems rounded out the day.

. . . On Tuesday, a panel with participants Dick Munro of Time-Life Inc., Bob Rosencrans of UA-Columbia, Burt Harris of Harriscope, and Rita Valentino of Auburn Cablevision, discussed the growth of cable before cable operators and representatives from the Cable Commission, the New York City Board of Estimate and the FCC. After their discussion, they focused on cable's regulatory problems, which was a follow up of Monday's session titled "Cable's Regulatory Future—Where we are? Where we are going?," in which industry reps from the FCC, New York state and New York City spoke on new FCC franchise standards.

. . . Monday's banquet featured Dick Monro as toastmaster. Burt Harris made a special Jerry Greene memorial presentation.

. . . Tuesday's workshop focused on equal employment opportunity which featured a specially prepared videotape of EEO progress. A pole attachment discussion was then headed by Mark Lustgarten from Cablevision Systems of Long Island, with FCC reps, PSC and industry participants. The final session of the three-day conference was on pay cable, remarketing and retention. Paul Schonewolf from GE Cablevision led a lively discussion of marketing problems and potential for pay service.

October 16–17: The Kentucky Cable Television Association's fall meeting was educational for all cable operators," reports Joe Gillespie, "especially for the small operators."

. . . Elections were held. New officers include: Harold R. Sagraves, president; George Carr, first vice president; Bob Johnson, second vice president; Joseph Taylor, secretary-treasurer. New directors include: C. B. Rowland, Roy Taylor, Jim Finch, Jim Hays III, Paul Butcher, Jim Ferguson, and Doug Shanks.

Future association meetings include: The Mid-America meeting, in Kansas City, Missouri. Contact Jim Queen, (913) 762–2210. The Minnesota Cable Communications Association's fall general membership meeting, in Bloomington, Minnesota. Contact Mike Reynolds, (507) 288–0712. (For more details, see CableVision, October 10, page 45.) And don't forget the Western Cable Show, sponsored by the California Community Television Association. Call Walter Kaitz for details, (415) 881–0211.

WALTER KANER

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. WOLFF. Mr. Speaker, for the past 25 years New York Daily News Columnist Walter Kaner has sponsored a Thanksgiving party for homeless and needy children. This year's 25th Thanksgiving Day party was held on November 22, and was attended by over 700 children from New York City and Long Island hospitals, orphanages, and health and welfare agencies.

During the past 25 years, Mr. Kaner has entertained more than 57,000 children at his year-round parties including an annual summer outing to Playland Amusement Park in the Rockaways. Mr. Kaner's efforts to bring joy and happiness to these needy children has been cited by countless organizations as well as local, State, and national leaders.

The children, many in wheelchairs and on crutches were treated to a 4-hour party complete with refreshments, gifts, and entertainment.

Mr. Speaker, I am sure that my colleagues join with me in expressing deep thanks and gratitude to Mr. Kaner for his unselfish caring and to the businesses and volunteers who contributed to making Thanksgiving a very special day to these children.

COMMEMORATING THE 184TH ANNIVERSARY OF THE LODGE'S CHARTER

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. HUGHES. Mr. Speaker, it was my privilege to attend the recent meeting of the Federal Lodge No. 1. Many of you are familiar with this unique gathering of Masons. In fact, Federal Lodge No. 1 has been in existence as long as the Capitol Building. I would like to share with you and my colleagues the minutes of the meeting commemorating the 184th anniversary of the lodge's charter. As the same time I would like to commend worshipful master Warren H. Jernigan and his officers for making this historic meeting possible.

The article follows:

COMMEMORATING THE 184TH ANNIVERSARY OF THE LODGE'S CHARTER

Federal Lodge No. 1 was chartered on September 12, 1793, by James M. Hoban and eight brethren who were employed in the construction of the Capitol Building and who desired to participate as Masons in the laying of the cornerstone of the Capitol on September 18, 1793. On September 12, 1977, on the 184th anniversary of the Lodge's charter, Federal No. 1 returned to the Capitol for a special communication. So far as is known by Brother Fred Schwengel, President of the U.S. Capitol Historical Society, this is the first instance of a formal meeting of Masons within the Capitol in this century, and perhaps ever. The special communication was opened in ample form by the Most Worshipful Charles V. Brewer, Grand Master of Masons of the District of Columbia, who together with Worshipful Master Warren H. Jernigan presided over the special communication.

The gavel used by the Grand Master and Worshipful Master was loaned by Potomac Lodge No. 5. Known as the George Washington gavel, it was the same gavel used by our first president at the ceremonies of the laying of the cornerstone of the Capitol. This gavel, one of the most historical jewels of American Masonry, is usually preserved in a vault of the Riggs National Bank and is very rarely used.

Brother William G. Blower, Jr., led the brethren in the Pledge of Allegiance to the United States Flag. The flag used in the Pledge of Allegiance ceremony was flown over the Capitol on the date of the 184th anniversary of the Lodge and was presented by Brother-Congressman Robert F. Sikes, 33°. The flag will be transmitted by the Lodge to the Masonic and Eastern Star Home.

After the history of the gavel was presented by Brother James Dulin of Potomac No. 5, the Grand Master pointed out that the George Washington gavel originally was

the possession of Alexandria-Washington Lodge No. 22 and was presented to the predecessor Lodge of Potomac 5 after the cornerstone laying at the Capitol in appreciation of the latter Lodge's participation in the ceremonies.

Worshipful Master then introduced the visiting brethren, the officers of Federal Lodge, five visiting masters, ten brethren employed on Capitol Hill, and fifty-eight members of Federal Lodge. At this point, the Grand Master introduced Grand Lodge officers, the Deputy Grand Master, Most Worshipful Morris F. Hewitt, who was escorted to the East. Most Worshipful Brother Renah F. Camalier, 33°, Past Grand Master of the District of Columbia, was presented West of the altar and escorted East by the Grand Master. Most Worshipful Brother Camalier spoke briefly but eloquently of his awe on this historical occasion, making special reference to the use of the George Washington gavel and the Bible on the altar. This Bible was printed in 1794 and was carried by members of Federal Lodge at the funeral of President Washington in 1799.

The Most Worshipful Grand Master then recognized a visiting Brother from Australia, Robin Parker, and asked the Brothers to convey brotherly affection to his home Lodge. Brother Bobby G. Thomas, Senior Deacon, then introduced the guest speaker of the evening, Brother Fred Schwengel, 33°, former Member of Congress and President of the U.S. Capitol Historical Society. In a brief but eloquent statement, Brother Schwengel cited instances in Masonic history from the time of the Revolution to the present. He spoke of the close connection between the Masonic Lodges of France and those of the colonies, and particularly the relationship that existed between Brother Masons, George Washington and Marquis de Lafayette. He mentioned that even today numerous Masonic signs are found on stones in the Capitol which were carved by the original builders who were for the most part Masons. These stones turn up during periods of renovation, and the Masonic carvings are visible proof of the Masonic affiliation of the original builders. Brother Schwengel concluded by reminding the brethren that love is the spirit of our fraternity.

The Worshipful Master then presented Brother Singleton and asked him to read the citation for Dr. Raymond W. Miller before the Fidelity Medal was presented. Brother Singleton cited Dr. Miller's long and faithful affiliation with Masonry and his contribution to the fraternity's task of building men. Brother Singleton also recited the lengthy private and political achievements of this learned and good man, including his contributions to scientific agriculture which paid dividends by introducing new methods of crop rotation, eliminating soil erosion, and the Food for Peace program, which has been successful throughout the world.

Brother Singleton's remarks were followed by the Grand Master along with the Worshipful Master assembling West of the altar to present the distinguished Fidelity Medal to Dr. Miller. Accompanying the honoree West of the altar, along with nine other distinguished guests, was Dr. Miller's son, Brother Fred Miller. Brother Raymond Miller's response was a very brief but very heartfelt "Thank You". Whereupon the Worshipful Master presented Brother Manoukian West of the altar to receive the fifty-year medal from the Grand Master. This was another of the many firsts of this wonderful evening. Brother Manoukian, so far as is known, is the first Mason to be presented a fifty-year pin within the Capitol of the United States. The fifty-year pin was attached to the lapel of the honored Brother's suit and sealed by the Deputy Grand Master.

The special communication was concluded when the Most Worshipful Grand Master closed Federal Lodge No. 1 in ample form at 9:00 p.m., following which the brethren adjourned to the Gold Room of the Rayburn House Office Building to rejoin their ladies to enjoy refreshments with them and other distinguished visitors to Federal Lodge No. 1.

IS THE VIETNAM VETERAN GETTING A FAIR BREAK?

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. FORD of Michigan. Mr. Speaker, in recent weeks a number of articles have appeared in newspapers criticizing Congress and the administration for their poor treatment of the Vietnam-era veteran.

Singled out as particular failures were the jobs program for veterans and the veterans education benefits program. On Friday, November 18, the Washington Post carried an article reprinted from the Philadelphia Inquirer and written by Frank Greve entitled "A Legacy of 'Lost' Veterans." The article contains startling statistics concerning the number of jailed and of unemployed Vietnam veterans.

The New York Times—on Veterans Day, November 11—wrote an editorial "Paying a Debt to (Some) Veterans" commenting on the failure of Congress to recognize the discriminatory impact of the payment structure of the education benefits program on the veteran who needs or wishes to attend a higher cost institution.

Finally, on the same day in the New York Times, an article detailing the generation and value gaps between the Vietnam veteran and the veterans of other wars appeared.

I call these articles to the attention of my colleagues with the hope that during the next session of this Congress we might effectively deal with these problems and effectively reassure those who served during the Vietnam war that their country really does care.

I insert the three articles to be printed in the RECORD at this point:

PAYING A DEBT TO (SOME) VETERANS

New York and 46 other states observe Veterans Day today, a fit time to remember that the most recent veterans, of Vietnam, have encountered indifference and even hostility since their return. As one of their spokesmen puts it, "When World War II was over, a veteran would walk into a bar and everybody would buy him a drink. When the Korean War ended, he had to buy his own drink. When the Vietnam War was over, he had to buy everybody else in the house a drink." And even the Government, which sent him to Vietnam and should presumably be grateful, has been surprisingly slow to help him readjust.

The educational benefits provided by the G.I. Bill of Rights offer one example. When the bill was revived in 1966, the typical education benefit of $100 a month fell so far short of actual costs that many veterans had to pass it up; they couldn't afford to pay the difference. Only recently have levels risen quickly. Under legislation just passed by Congress, the benefit would reach a respectable $311 per month. But even this relative generosity will not meet the educational problems of all veterans. A quirk in the payment structure makes it likely that needy veterans in the Northeast and Midwest regions of the country will continue to be deprived of educational opportunity.

This quirk is an unintended result of an early reform of the system. The original G.I. Bill provided tuition payments to schools and subsistence payments to the veterans. A World War II veteran could attend virtually any school in the nation. But because of abuses in the handling of the program, the tuition payments were dropped in 1952 and aid was provided instead through fixed monthly stipends. That curbed some of the abuse. But it also introduced inequities. Veterans from states with low-cost public colleges were able to afford the tuitions while other veterans elsewhere could not afford the college costs.

Veterans in New York have thus lost out in comparison with veterans in the South and West. Less than a third of New York's eligible veterans are enrolled in college; in California, more than half are enrolled. The reason for this disparity is almost certainly cost. Senator Moynihan cites figures showing that an unmarried veteran until recently received $2,628 for an academic year under the G.I. Bill. With that, he could cover almost all of his educational and living expenses at a California state university in San Diego. But he would be far short of the $3,400 needed at the State University of New York's Stony Brook campus.

Senators Javits and Moynihan tried, unsuccessfully, to provide partial equalization payments, based on tuition levels, in the latest bill. But as adopted by Congress, it puts most of its emphasis on an across-the-board increase of 6.6 percent in benefits for all veterans. That just perpetuates the inequities. Some veterans may get more than they need; others still won't get enough. The bill does allow further help for veterans in high-cost schools, but only if their states put up matching funds—which most states will find difficult to do without diverting other scholarship money. Nevertheless, New York, New Jersey, Connecticut and other affected states should search hard for the new funds needed.

The bill will soon reach President Carter for signature. He should not veto it; the increased benefits are needed by many veterans to keep pace with inflation. But, as he signs it into law, he should vow to eliminate the inequities next year. Some contend that equal military service merits equal benefits But the benefit intended here is not a dollar figure. It is an education that can change a life.

A LEGACY OF "LOST" VETERANS

(By Frank Greve)

In Dupont Circle, a dozen ragged men sit nodding in the sun.

They are Vietnam veterans who have found their niche in vagrancy.

One of them flips an empty bottle that once held cheap wine over his shoulder, and it smashes to the sidewalk. Another passes around a shoplifted can of Vienna sausage for lunch.

Mostly, as one of them says, they "play music, smoke reefers, drink wine, talk. Hate one another. Care about one another." Mostly, that is, they do nothing.

There are an estimated 40,000 to 50,000 veterans just like them across the country. They are turning up in parks and flophouses, and, according to surveys by the Bureau of Labor Statistics, they have no desire to work or they have given up looking.

And this is just one of the disturbing trends appearing among the 6.7 million veterans who served between August 1964 and May 1975.

Some of the others:

An estimated 500,000 are in criminal-justice custody—125,000 in jails and prisons

and the remainder on parole, probation or some form of pre-trial release.

Another 511,000 are looking for work and can't find it, as unemployment among Vietnam veterans once again exceeds the rate for nonveterans. This phenomenon, unique to the Vietnam era, seemed to disappear in 1974, but has reappeared in the wake of recession, industry cutbacks and reluctance of companies to expand.

Currently, 7.7 per cent of the veterans are unemployed compared with 7 per cent for those aged 20 to 34 without military service.

Among both the jailed and the unemployed, minorities are markedly overrepresented. "Black veterans have an incarceration rate almost double that of nonvet blacks the same age," says Neal Miller of the American Bar Association (ABA), studying the problem for the Department of Labor. He has also found that "black veterans are incarcerated at seven times the rate of white vets." But white veterans are only half as likely to wind up in jail as white nonveterans, he has found.

In the job market, black veterans appear to suffer both an antiveteran bias and the traditional minority problem: an unemployment rate twice as high as that for whites. Hardest hit of all are young black veterans, aged 20 to 24, whose September unemployment rate was 30.5 per cent, a peak for the postwar era.

New job programs for veterans undertaken by the Carter administration have not done much to offset those numbers. A year ago, 529,000 Vietnam veterans were unemployed. The current 511,000 figure represents a drop of only 18,000 during what was hailed as a recovery period.

The Vietnam veterans are rapidly becoming a lost generation, says Roland Mora, Deputy Assistant Secretary of Labor for veterans' employment. "It's simple: The Vietnam vet got shafted when he went and shafted when he came home."

Mora, a former Marine captain who was disabled in Vietnam, was an advance man in Jimmy Carter's campaign. His post is new, created by Carter to show concern for young veterans.

"My feeling is that we're in a new era of Reconstruction," Mora says. "The hostility and bitterness that's still alive between North and South came from that period, and I'm afraid the post-Vietnam era could have the same long-term residual effects. I see it happening particularly with minorities, where the unemployment is so much worse."

Mora and most other analysts suspect that government figures, as bleak as they are, understate the problem.

"It's just a guess," Mora says, "but I think I know some places where, for every vet they count, there are two they miss who've just chucked the system. In every big city, which is where the problem is biggest because that's where the minorities are, you'll find whole networks, whole undergrounds, of vets who've just dropped out."

He blames discrimination by employers against minorities, compounded by discrimination specifically against veterans. "They see 'em as drug addicts," Mora says, "which is one of the worst raps Vietnam vets got. They [the employers] want to forget the war, so they forget the vet."

Arguing that "the Vietnam vet absorbed the guilt of this country," Mora predicts that "as time goes on, we'll see more and more psychological warfare between the vets and the civilians they fought for."

Miller of the ABA, from his data on prisoners, concludes only that "something is going on out there that we don't understand." His study is "picking up two kinds of people: people on drugs and people starting to explode." About a third of the incarcerations involve offenses linked to drugs, he says, followed in order of frequency by armed robberies, burglaries, murders, manslaughter and aggravated assault.

In addition to general discrimination against blacks, he adds, another explanation for the extraordinary unemployment among minority veterans is that "they were only about 10 per cent of the forces, but they had 50 per cent of the combat roles. These, traditionally, are the worst preparation for civilian jobs."

"I was a paratrooper," says a black man, 30, in Dupont Circle, who answers "Naah" and shakes his head when asked his name. "I went down the employment service with a guy had been a truck driver. They told him: 'Try the bus station.' They told me: 'We ain't got no jobs jumpin' outa planes.'"

Occasionally, the argument is made, as by Veterans Administration spokesman Julian Morrison, that "these guys are no different from other groups of vets at the same stage of time after World War II." Morrison claims that "figures" back him, but VA statistician William Malloy disagrees.

"Nobody has ever compiled that data," Malloy says, "but the World War II veteran certainly didn't have a recession problem when he came back. And employment of vets always ran ahead of nonvets after World War II."

Meanwhile, in Dupont Circle, the vets talk about their fear of a rival park group: "The cons," says a man named Sam. "They'll kill you faster, stick you faster. Try to make a faggot outa you. Tell you you ain't nothin' but a hired killer Tom."

And they talk about their fear of the cold, when they must find and defend "a huddle": a warm sleeping spot in a laundromat, a basement or an apartment hall. "Generally, you drink more in winter," says Sam. "Wild Irish Rose, which is 20 per cent, or Gilbey's vodka. You drink as much as you need to go to sleep."

Vietnam Veterans and Elders Split by Disparity in Values

(By Robert Lindsey)

When Tom Ambrose of Venice, Calif., came home from Vietnam, he joined the American Legion, following a path paved by millions of veterans since World War I. But after a year, he quit.

"Vietnam veterans and the traditional veterans' organizations are a generation apart on policy, philosophy and organizational structure," Mr. Ambrose said. "They're full of formations, salutes and military protocol, all the things young people disliked in Vietnam and want to forget."

His statement exemplifies a problem that is bedeviling the nation's veterans organizations on the traditional Veterans Day, the 59th anniversary of the end of World War I: The men who fought in Vietnam are, for the most part, turning them off.

Despite a pool of 8.3 million veterans from the Vietnam period, membership in the American Legion has remained level at about 2.7 million since 1970.

RECRUITING JUST KEEPS PACE

While the nation's second major veterans organization, the Veterans of Foreign Wars, has been somewhat more successful in enrolling Vietnam veterans, its membership has been stable for more than three years at 1.8 million. And, like the Legion, most of its recent recruiting has done little more than keep up with the deaths of older veterans.

"We have a generation gap," said Peter Tetley, commander of an American Legion post in Colorado Springs. "The older members from World War II say they did more for their country than the Vietnam veterans. They seem to think 'their war' was more important, that their comradeship and patriotism was greater."

Age is not the only gap between the veterans.

Interviews in recent days with veterans and officers of veterans organizations in 15 cities and rural communities around the country indicated that there is also gap of values, perhaps related to the experience in Vietnam, on subjects ranging from the use of drugs to the America-right-or-wrong patriotic fervor that has historically been part of the credo of veterans' organizations.

BITTERNESS OF VETERANS

"The Vietnam vet has been shafted, more so than any other group of veterans," asserted Thomas L. Smith, a veteran of the Korean War who belongs to a V.F.W. post in northern Delaware. "They want no contest whatsoever with any military because of their bitterness."

Samuel Israel, a Vietnam veteran who lives in Miami, summed up what appeared to be the attitude towards traditional organizations that is held by many ex-soldiers of his generation. "They're mostly just a bunch of old men who sit around and talk about the war they were in, and how many people they killed; I don't want to talk about it."

In countless towns across America, the local American Legion Post or V.F.W. clubhouse is a major social center—in some towns, they are the only place to buy a drink or play poker for money.

In turn, officials of veterans' organizations maintain that the Vietnam era veterans will eventually decide to join, don one of the uniform caps that many now make fun of, swap stories, and rediscover the camaraderie of the military—just as World War II veterans eventually forgot about the generation gap with World War I veterans.

WORRIES OF DIFFERENCES

Nevertheless, there appear to be worries among the veterans' organizations that the military men from the Vietnam period are indeed different from earlier veterans and may not make the transition.

"It's very difficult to reach these young fellows," said John Uram, a V.F.W. member in Seattle. "We want them to take over from us eventually with new ideas. But they figure we're a bunch of old fogies who are sitting around telling old war stories and having a good time."

The collision of values is two-sided: some older veterans admit that they, too, are uncomfortable with the younger veterans with their longer hair, beards, drugs and other differences in life-style.

Herman Roth, an enlisted-man veteran of World War II, the Korean War and Vietnam who now helps veterans find jobs in Chicago, said:

"Older veterans can have two martinis for lunch and three martinis when they get home from work and they think that is okay. But if a veteran from Vietnam happens to experiment with one marijuana cigarette, that's bad. It's a case of the pot calling the kettle black."

"The older men at first didn't get along with the long hair, the mustaches, the beards," said James E. Tripp, a Vietnam veteran who is an American Legion official in Louisiana. "They'd say, 'Well you weren't really in the war.'"

"Now from the looks of it," with membership rolls in trouble, he added, "they're begging the young men, 'Come in, Come in.'"

SPECIAL RECRUITING DRIVES

Some veterans' groups have been successful recently in luring Vietnam veterans through special recruiting drives aimed at their generation, and Vietnam veterans have risen to head several state organizations. In Texas, for example, four of five senior V.F.W. executives served in Vietnam.

In many cases, however, efforts to recruit Vietnam veterans have provoked power struggles between generations. James Kissner, the state Legion commander in Illinois, where membership has dropped to 177,400 from a peak of 220,800 in 1957, said, "The biggest debate among older vets and young vets in

the American Legion is who is going to run the post."

Although there have only been a handful of cases so far, some Vietnam-era veterans, contending that their interests are different than their predecessors in uniform, are taking over veterans' clubs.

Among other things, they contend that the established organizations have failed to look out for their interests—causing them, for example, to lose the traditional edge that veterans receive in government jobs to job-preference programs for minorities and women.

HEADS IN THE SAND

"Unfortunately, most Vietnam veterans are like ostriches with their heads in the sand," said Tom Hanson, the commander of the Theodore Koronyi American Legion Post in the Bronx, one of those taken over by the Vietnam veterans.

"They don't want to hear anything about the military," he said. "What they have to realize is that they won't be heard unless they join organizations like we have."

Last year, a militant group of Vietnam-era veterans joined Hollywood American Legion Post 526 in Los Angeles, ousted officers of the World War II era, and then endorsed amnesty for Vietnam draft-evaders and deserters, a position that is anathema to the national Legion leadership.

FIGHT OVER MINORITIES

More recently, a former post officer there was expelled from the Legion after a confrontation with the organization's leadership over what included efforts to induct 32 minority-member Vietnam-era veterans into a Legion post.

"Most of the people who fought in Vietnam were minorities," said Ronald Bitzer, who was intrumental in the takeover of the Hollywood post. "Yet, they're not welcome by the leadership of these organizations, although I think the rank and file is more open than the leadership."

"Most of the leadership is from the Class of '46, the people who served in World War II, they aren't interested in sharing their power with anybody," he continued. "The traditional organizations like the American Legion are ripe for a takeover by Vietnam veterans."

In Lancaster, Pa., a group of Vietnam veterans decided to charter its own V.F.W. post, because, said Dr. Leigh Kendall, the commander, the group was treated at conventional posts with indifference degenerating down to hostility or worse.

OLD VETS SEE LOSERS

"In this country," he added, "we'll support an underdog but not a loser. The old vets see Vietnam as a 'fake war' and anybody who was in it in any way connected with it couldn't be very good either."

The Lancaster post is now all but inactive. The Vietnam veterans who joined it had other things to do, members quit, Dr. Kendall said, "because of disinterest, anti-establishmentarianism and anything smacking of organization."

Robert Spanogle, a 33-year-old Vietnam veteran who is national membership chairman of the American Legion, said that the organization would initiate a membership drive that would be based, in part, on taking a strong stand against ratification of the Panama Canal treaties.

Interviews with many veterans by The New York Times suggested that the Canal issue was not one likely to mobilize a great deal of sentiment. But Mr. Spanogle said that he was optimistic and noted that the Legion would also expand efforts to establish new posts in suburbs.

"We are taking our cue from McDonalds," he said. "If you want to sell more hamburgers, if you want to have more membership, then you have to open up more outlets."

THE MINNEAPOLIS JEWISH FEDERATION HONORS A GREAT AMERICAN

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. FRASER. Mr. Speaker, earlier this year, the Minneapolis Federation for Jewish Service honored HUBERT HUMPHREY for his outstanding record of accomplishment during his 31 years of public life.

In his remarks at the federation's advanced gift dinner, Jay Phillips pointed out that HUBERT HUMPHREY is "one of the world's leaders in attempting to correct man's inhumanity to man. In the United States and within the Halls of Congress, he has worked with might and main in support of civil rights—for human rights—and for the dignity of man, regardless of race, creed, color, or national origin."

I know that all of us in the House share Mr. Phillips sentiments, and I would like to take this opportunity to insert his remarks in the CONGRESSIONAL RECORD:

ADVANCED GIFTS DINNER, 1978 CAMPAIGN, MINNEAPOLIS FEDERATION FOR JEWISH SERVICE

(By Jay Phillips)

Mister Co-Chairman Harold Grossman—Ambassador Dinitz—my very Dear Friends—Ladies and Gentlemen:

I am proud that Mrs. Phillips and I are invited to participate in this Advance Gifts Dinner for the 1978 Campaign of the Minneapolis Federation for Jewish Service.

While we have assembled here this evening ostensibly to promote the aims and objectives of Our Own Special Charity, we have another responsibility of equal importance to discharge—that of honoring a Great American—and may I add that it is a pleasure for me to have been selected as the one to make this presentation in absentia.

This evening the Minneapolis Federation for Jewish Service has chosen to pay tribute to Senator Hubert H. Humphrey—Minnesota's outstanding citizen—one of our Nation's Great Statesmen now Presiding over the United States Senate—a dedicated humanitarian—and a longtime devoted friend and staunch champion of Jews everywhere.

History will record Hubert Humphrey's significant accomplishments in more than 31 years of public life. His rise from Mayor of Minneapolis to the high office of Vice President of the United States, and the impact Hubert Humphrey has had in dealing with world affairs on an international basis are too numerous to mention. I have a few comments which I personally would like to make about our friend Hubert.

Hubert Humphrey's accomplishments and achievements on the political scene in all levels of government, the role he has played in international relations and the extent to which he has supported the cause and expansion of Social Welfare for the underprivileged and downtrodden, are known to all of us.

Senator Humphrey has been, and still is, one of the world's leaders in attempting to correct man's inhumanity to man. In the United States and within the Halls of Congress he has worked with might and main in support of Civil Rights—for Human Rights—and for the dignity of man, regardless of race, creed, color or national origin.

On the International scene he has had the courage to place his political future on the line in trying to protect the Russian Jews from the hardships, degradation and humiliation to which they were, and still are, constantly exposed. Hubert Humphrey has shown sympathy and compassion for the homeless and starving people in many parts of the world.

What this Great American has done for Israel and the cause of its Jewish people—is well known to all of us. With all of the fervor I am capable of, I pray to God he is with us for a long, long time to help us.

Consider these remarks—if you will—a thumbnail sketch of a Great Politician and Humanitarian. But, now, let me speak for just a moment about Hubert Humphrey as the warm and wonderful friend I know him to be.

I have known Hubert before he became Mayor of Minneapolis in 1945. In the course of my long and close association with him—I have found Hubert to be a man of unimpeachable integrity—exceptional ability—and one who has always demonstrated great concern for the well being of his fellow man.

He is a warm and affectionate person. I deem it a privilege to call him my friend—a relationship I value highly and cherish deeply. Hubert is not only a good friend of every person here tonight—but let me assure you he has a host of such friends and admirers in every corner of the world.

There has been adversity in the Humphrey family—and so typical of Muriel and Hubert, they not only have been able to contend with it—but have been able to rise above it for the benefit of others. Tomorrow in Eden Prairie they are going to dedicate the Muriel Humphrey residences—three beautiful structures created to provide independent living for adults who have achieved varying degrees of recovery from mental illness.

This is not the time—nor the place—to dwell on Hubert's personal challenge. We know of the great reservoir of courage from which he draws the strength and the intention to carry on! Even though he is with us in spirit—we regret he has been denied the opportunity to receive our accolades in person.

At this time—on behalf of the Jewish Community of Minneapolis—it gives me great pleasure to present to Senator Hubert H. Humphrey—a vase of Roman Glass discovered in the vicinity of Jerusalem from the First Century A.D. through the Third Century A.D.

The inscription reads—"Presented with deep affection by the Jewish Community of Minneapolis to Senator Hubert H. Humphrey, a true friend of the Jewish people of Minnesota and the State of Israel, September 24, 1977." And if I may be permitted to augment that inscription by saying, "and a true friend of Jewish people throughout the world."

Hubert, dear friend, please take over——

THE SLEPAKS WAIT 8 YEARS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. EILBERG. Mr. Speaker, on November 17 I met with Alexander Slepak, the 25-year-old son of leading Soviet Jewish activist Vladimir Slepak. Alexander just recently received permission to emigrate from the Soviet Union—after an 8-year wait—but, unfortunately, his mother, father, and a younger son did not receive exit visas.

Alexander related to me the struggle that his family has endured. The family has been victimized by constant police searches of their apartment; firing from

their jobs because of their application to emigrate; and round-the-clock KGB surveillance.

But these are courageous people, and the harassment has not deterred them from serving as perhaps the leading figures in the Soviet Jewry movement.

After hearing Alexander Slepak's story, Mr. Speaker, I conveyed to President Carter my deep concern that the United States do everything possible to secure the freedom of this brave family. I offer for the RECORD the text of my letter to the President, along with a Philadelphia Inquirer article of November 16 on the Slepaks and an article from the Jewish Times of November 9:

CONGRESS OF THE UNITED STATES,
Washington, D.C., November 17, 1977.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I write to you only hours after meeting a young man who is engaged in a truly heartbreaking struggle.

Alexander Slepak, Mr. President, just recently left his family in Moscow. After eight years of waiting for the Soviet Union to grant him and his family an exit visa for Israel, Alexander—but only Alexander—was given permission to leave.

His father, Vladimir Slepak, remains in the Soviet Union, recognized as one of the leading Soviet Jewry activists. Also denied exit visas were Alexander's mother, Maria, and his younger brother, Leonid.

Unfortunately, the good news about Alexander's leaving was mixed with sad news that Leonid faces conscription into the Soviet Army—meaning that he could not leave for up to ten years because of security reasons if he does enter the Army.

Mr. President, this action against the Slepak family is but the latest vindictive step in a pattern of harassment against them.

Vladimir Slepak for years has been a thorn in the KGB's side. He was first denied a visa in 1969, for alleged "security" reasons. Since then, the Soviet government has refused to tell him when he will be free to leave.

Instead, authorities have carried out a campaign of harassment against the entire family. Vladimir was dismissed from his job; he was labeled a "parasite"; he has been hauled before the police and several times been imprisoned; his home is bugged; the KGB follows him everywhere; and his apartment is searched for hours on end.

Despite this incredible harassment, the Slepaks refuse to be intimidated. They continue to submit requests for exit visas for Israel. They insist that authorities reexamine the "security" classification with which Vladimir has been burdened. And they serve as spokespeople for other Soviet Jews in Moscow.

Mr. President, eight years is a long time for these brave people to wait, when their only wish is to be free to practice their religion in Israel.

This afternoon, Alexander Slepak described to me the struggle that his family is going through, and he told me that for all these years his father has wanted nothing except to go to the land of his ancestors.

His mother's heart, he told me, is torn apart at the news that her son faces conscription. And he pleaded with me to do anything possible to help the family he reluctantly left behind.

As you can see by the attached news account from the Jewish Times of Northeast Philadelphia, concern for the Slepaks runs deep in Philadelphia. The enclosed describes how, at a recent dinner of the Federation of Jewish Agencies of Greater Philadelphia, noted author Elie Wiesel cited my presence in the audience and implored me to continue to speak out on behalf of Vladimir Slepak and his family.

I hope, Mr. President, that you can use your influence to help these courageous people. Somehow, we must convince the Soviets that however much we desire better relations between our two countries, we have consciences that do not allow us to forget people like the Slepaks.

Sincerely,

JOSHUA EILBERG.

THREE GENERATIONS OF SOVIET FAMILY FEEL EMIGRATION ISSUE

Moscow.—Alexander (Sanya) Slepak had gone to see his grandfather for what almost certainly would be the last time.

The elder Slepak is 85 now, almost blind, and weakened by 20 years of heart trouble, Sanya, 25, left one day recently for Israel—a traitor, in the official view, to his motherland. It is unlikely that he will be allowed back, even if he should some day want to return.

Grandfather Slepak, a high Communist Party official during his younger years and still a staunch believer in the Soviet state, sat stiffly at his table the day his grandson came to say good-bye.

He had made his position clear nearly eight years ago when his son, Vladimir—Sanya's father—had applied to emigrate. To the old Bolshevik, that application opened a chasm between him and his family too wide to be crossed. He had seen them only a handful of times since, even though they all live here in Moscow.

Sanya shook his head sadly as he recalled the final visit at a going-away party recently.

"He wouldn't even look at me," he said of his grandfather. "He said he had never had any use for Zionists and people who desert their homeland."

The visit lasted only five minutes. The senior Slepak finally wished Sanya good luck, but he never did turn around for a last, blurred look at his grandson.

Sanya's departure is only the latest example of the emotional and physical wringer that has characterized the life of his father, Vladimir Slepak, and his family since early 1970. Slepak is believed to be the most senior of Moscow's "refusedniks" and he may be the best-known as well.

In addition to his activism since 1969 on behalf of Jews refused permission to emigrate, he is one of the founding members of the Moscow group set up to monitor Soviet performance under human-rights provisions of the 1975 Helsinki agreements.

Like other refusedniks here, Slepak has been subject to steady harassment ever since he applied to emigrate. The former head of a television laboratory, he has been unable to work since then. The last search of his apartment lasted 18 hours. He is often followed, sometimes by several plainclothes KGB men at a time. Last month, he was kept under house arrest during the week-long meeting of the Supreme Soviet, this nation's rubber-stamp parliament.

Through it all, Vladimir and Mariya Slepak have been particularly concerned about the fate of their two sons. Two years ago they were legally divorced solely in the hope that it might remove mother and sons from the shadow of the father's activism. "We would try anything to save our sons," Slepak said the other day.

Sanya is gone now, but the most desperate battle may still lie ahead. Just a few days after getting the happy news that Sanya would be allowed to emigrate, his younger brother, Leonid, got his draft notice. That means at least a two-year hitch in the service, followed by refusal of permission to emigrate for as much as another 10 years on grounds of having had access to secret information.

Leonid has decided to risk a jail term instead. He refused induction. "I applied (to emigrate) with my family when I was 10 and they kept me here until I was 18," he said afterwards. "So I think that they made the situation themselves."

The news of her son's draft notice hit Mariya Slepak the hardest. An affectionate, soft-spoken, religious woman who has stood quietly beside her husband throughout his activism, Mariya has stepped to the front. Twice in three days she attended dissident news conferences here. At the second, she read a letter that she had written to First Lady Rosalyn Carter appealing, one mother to another, for help.

"God forbid that our children will see and know what my son has known," she wrote. He has seen "all the repressive measures which were taken against our family," she said. Also, "there were days when he, a minor, was himself constantly followed by agents of the KGB . . . He was denied a childhood. Today they want to take away his youth."

Slepak says he doesn't know why he and his family have been refused permission to emigrate for so long. For a while, the authorities said it was because he had had access to "secrets" in his work at the television laboratory. More recently, they say that his departure "would not be critical to dissidents here." On any given day a visitor to his centrally located, eighth-floor apartment on Gorky Street might find an American Jew who wants to help his Soviet counterparts, a refusednik from a remote corner of the Soviet Union, a newsman, or a diplomat.

One friend has described him as the "patient elder."

Although they certainly don't live in luxury, the Slepaks seem to get along on Mariya's 76 ruble-per-month ($103.61) pension as a former doctor, one of the most prominent names in both Jewish activist and dissident circles here. He is not a rabble-rouser. He is usually content to sit back at dissident news conferences and let others take the lead. In fact, he occasionally dozes during unusually long sessions.

But he does have widespread contacts that reach into many groups in the interests of Soviet power.

Some observers have speculated that the Soviet leadership wants to keep a few prominent refusedniks here to discourage more who might otherwise be encouraged to seek exit visas.

There's no question that Slepak is supplemented by "help from friends and relatives abroad." They even took a month's vacation on the Black Sea last August.

Slepak feels that sooner or later the authorities will either have to let him emigrate or put him in jail. He shows no fear of the latter. "A small prison—a big prison. What's the difference?"

But basically he remains a quiet optimist. "Next year in Israel," he said to a departing guest the other night, echoing the standard farewell along refusedniks here.

FJA INSTALL OFFICERS: WIESEL GIVEN HUMANITARIAN AWARD

I. Jerome Stern, prominent attorney and Jewish communal leader, was installed for his third term as president of the Federation of Jewish Agencies of Greater Philadelphia at its 76th Annual Banquet held Sunday.

Former FJA President Philip S. Seltzer formally installed Stern and the other FJA officers for the coming year. They include: William E. McKenna, Esther Polen, Edward H. Rosen, Ronald Rubin and Dr. Edward B. Shils, vice presidents; Fred B. Creamer, treasurer; Robert J. Reichlin, associate treasurer; Bernard Fishman, secretary and Alan H. Molod, associate secretary.

Featured at the gala affair, attended by over 600 communal leaders, was the presentation of Federation's highest honor, the

Humanitarian Award, to author and philosopher Elie Wiesel.

"I've brought, I would like to think, a few surprises to people in the past. But I also am capable of being surprised," said a visibly moved Wiesel, following a taped message especially recorded by leading Soviet refusenik Vladimir Slepak.

"Vladimir Slepak is the man who haunts me, although I've never seen him," said the soft-spoken author, as he accepted the sterling silver Menorah. "This is the man who helps our people to leave the Soviet Union, who escorts them to the airport, but stays behind; who escorts them to the railroad station, but stays behind.

"What puzzles me—what continues to puzzle and haunt me—is that the world pays no attention to Vladimir Slepak. Only the KGB does."

Wiesel noted the presence of Northeast Congressman Joshua Eilberg in the audience. Eilberg currently serves as chairman of the House Judiciary Committee, and has been particularly active in liberalizing U.S. immigration laws and in investigating alleged Nazi war criminals living illegally in the United States.

"Congressman Eilberg, I implore you, I plead with you, with your committee. Do not forget Vladimir Slepak. Please do what you can to intervene directly with President Carter to right this injustice. This may be but one small step, but small things often become great things.

"Our greatest strength is our unity as a people," he added. "We are together in joy and despair. There is something beautiful in this—we have not met Slepak, but the beauty is that we as a people have, and will continue to do so."

The affair also featured tributes to retiring Federation executives Samuel Melnick, Selma I. Spielberger and Abraham Tucker, and to FJA officers completing their terms under the FJA By-Laws. Each was presented with "precious antiquities found in the soil of modern Israel, symbolizing our continuity with our past and our devotion to our future as a people," according to FJA Executive Director Robert P. Forman, who made the presentation.

Bernard Borine, 1978 Federation Allied Jewish Appeal-Israel Emergency Fund general chairman, was honored with the Shofar Award for his "devotion and untiring efforts on behalf of the campaign," and a certificate of appreciation was presented to Joseph C. Ladd.

SOVIET GRAIN STING

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. SYMMS. Mr. Speaker, I wish to call to the attention of my colleagues an article which appears in the current issue of Time magazine entitled "Another Soviet Grain Sting."

Millions of Americans were treated to the movie version of "The Sting" with Robert Redford and Paul Newman in the leading roles. Now, Leonid Brezhnev has pulled a "Sting" operation on the Carter administration.

Shortly after representatives of the U.S. Department of Agriculture and the Russians negotiated an additional 15-million-ton purchase of commodities as an amendment to the United States-U.S.S.R. long range sales arrangement, Soviet President Leonid Brenzhnev announced that the Soviet grain harvest was some 21 million metric tons under that estimated by USDA. Little press coverage appears to have been given to this matter until very recently.

Now we see that USDA under the Carter administration is guilty of poor intelligence of Russian grain production and crop estimates and this has all been at the expense of the farmer and producer. It is generally conceded that at the very time the Carter administration was meeting with representatives of the U.S.S.R. last July through October, the Soviets were buying up the millions of tons of grain which were to come within the terms of the long range sales agreement negotiated with the U.S. representatives.

By the time the information about the Russian shortfall in grain production became public knowledge, it is generally conceded that all the purchases that Russia needed to cover its shortages had been effected. It seems only yesterday that then "candidate" Carter was criticizing the prior administration for being stung, and now President Carter has his own Russian "sting."

[From Time, November 28, 1977]

ANOTHER SOVIET GRAIN STING—HOW THE RUSSIANS AGAIN OUTFOXED THE EXPERTS—AND THE EYE-IN-THE-SKY

To the sharp-trading stereotypes of the Philadelphia lawyer, the Greek shipowner and the Swiss banker must now be added a new model of shrewdness: the Russian grain buyer. In the celebrated "Great Grain Robbery" of 1972, Soviet agricultural agents bought up whole shiploads of U.S. wheat, managing not only to secure it at bargain prices but also to get the U.S. Government to foot part of the bill through a farm subsidy program. Now, much to Washington's embarrassment, the Russians have struck—and stung—again.

The sting came to light when Soviet President Leonid Brezhnev announced that the 1977 Soviet grain harvest would amount to 194 million metric tons—the lowest since 1975. That bland statistic caused tremors of shock through not only the U.S. Department of Agriculture but the Central Intelligence Agency as well. All summer long the Agriculture experts and the CIA operatives who try to keep track of conditions on Soviet farms had forecast a fat 215 million-ton harvest, indicating that Moscow would not need to buy much foreign grain this year. But the bulletin from Brezhnev meant precisely the opposite: the Russians would be buying a lot of grain—some 10 million to 15 million tons more than anyone had expected—and the bulk of it would be coming from the U.S. More embarrassing still, they turned out to have already made most of their purchases—skillfully skirting some provisions of a U.S.-Soviet trade agreement for buying grain—and chartered ships to move it at the lowest possible cost. By the time Brezhnev told all about the poor harvest, the Russians had secretly signed contracts for 18 to 20 million tons of grain from Australia, Canada and India—as well as the U.S.

In the grain deal of 1972, the Russians bought large quantities of U.S. wheat and corn at a time when American farmers were already fairly scraping their silos to meet heavy domestic and foreign demand. Prices of some grains more than doubled as a result, giving a sharp upward kick to inflation. Even more annoying was the fact that, because U.S. officials were not aware of the big Soviet purchases, the grain was sold under a Government subsidy program, which meant that U.S. taxpayers paid for much of the Russian grain bought in the U.S. To avoid a replay of that fiasco, in 1975 Washington got Moscow to agree to a long-range sales arrangement intended to stabilize Russian grain purchases and do away with at least some of the secrecy surrounding them. Under the plan, Moscow is required to buy at least 6 million tons of U.S. grain every year, if its purchases rise above 8 million tons, it is supposed to report the fact to Washington.

So why were U.S. officials caught by surprise? The sting seems to have been the result of a combination of Soviet duplicity and U.S. gullibility.

In mid-July agents acting for the Russians arranged for food deliveries through both European subsidiaries of U.S. grain dealers and European companies with offices in the U.S. The purchases were heavy and—under the letter of the U.S.-Soviet agreement—did not have to be reported to Washington. "Official" purchases are continuing at a modest rate.

During talks at the department only a few weeks ago, a Soviet grain team insisted that it had reported all the purchases it had to. Rasped an Agriculture official: "That was a technically accurate statement. But it also was a god-damn lie. They hornswoggled us."

For months, Soviet farm experts in Moscow had spoken of average and possibly even record harvests. Agriculture Department inspectors visiting the U.S.S.R. were taken out to collectives to see sturdy stands of corn and wheat—fields that they now know to have been exceptions. Even the CIA was taken in. It has been trying to keep tabs on Soviet agriculture with eye-in-the-sky photo satellites, and its findings have been reasonably accurate in the past. But this time the photo interpretations went awry, because of what the agency calls bad "ground truth" data—information from the observers escorted by the Russians.

Actually, there were ample signs this summer of trouble in the Soviet harvest. In Chicago, grain traders heard reports of big Russian purchases eight weeks ago. And in mid-July the Russians were chartering grain-carrying ships. This was done secretly, through Soviet front companies in Paris; bills of lading were rewritten at sea from "Destination Rotterdam" to "Transshipment Rotterdam, Destination U.S.S.R." Not only was the Russian demand for ships an omen that the U.S.S.R. planned to buy more grain than would be necessary with a good harvest but it lifted world freight rates by 15 percent, which should also have produced alarm. Finally, U.S. prices of wheat and corn took a slight upward tick from August through October, a rare happening at harvest time, when prices are almost always depressed. The only explanation: large foreign purchases.

Agriculture Secretary Robert Berkland insists that the poorer than anticipated Soviet harvest was "probably" caused by a late period of bad weather and does not simply reflect poor intelligence. Indeed, Agriculture picture analysts say they were revising their estimates of the Soviet harvest downward before Brezhnev made his announcement.

Bergland says that he intends to "ask the Soviets to be more precise in the future about their grain requirements." He adds: "They don't always tell us exactly what their needs are." Evidently. But no major damage seems to have been done by the latest Soviet caper in the grain markets. This time the Kremlin does not stand to make as big a killing on its U.S. purchases, because they are not subsidized by the Government. The Russians will pay for their grain in cash at prices agreed to at the time of purchase. Yet their savings could be as much as $100 million—the difference between what they will actually pay and the higher price they would have paid had their true needs been known.

Grain belt farmers are pleased with the Russian purchases. Record harvests this year have already depressed prices to the lowest levels since 1972. The Soviet buys should eat into the surpluses and help lift farm incomes.

The Soviet purchases should have little, if any, impact, however, on prices at the supermarket. With grain prices so depressed, it would take a huge jump in the farm cost of wheat, for example, to add even 2¢ or 3¢ to the price of a loaf of bread. Stung most by the Russians' ploy will be the big grain speculators, who were selling grain futures contracts short this spring and summer in the expectation that prices would fall even lower. The Soviet shortfall changed all that and taught the speculators—as well as Washington officials—a little more about the cagey Russian grain buyer.

THE ICE IS BROKEN

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. SIKES. Mr. Speaker, highest praise should be accorded Egyptian President Anwar Sadat upon the occasion of his historic journey to Israel—a mission described by Israeli Prime Minister Menahem Begin as a "great moral achievement for our nations, for the Middle East, indeed for the whole world." These two men, Sadat and Begin, are the key figures in the effort to achieve a peaceable settlement of the problems of the Middle East.

The two leaders have agreed that a new spirit exists as a result of the Sadat visit, and is a clear implication that whatever happens between the two countries in the future should be solved together through talks rather than going to war. One of Sadat's primary motives for going to Israel was to give the peace process new momentum and to help remove the barriers that are largely responsible for the whole conflict. His achievement was a psychological triumph which hopefully can change the entire Arab-Israeli relationship.

While there is no indication at this time that either side has changed its position or that major differences are being resolved, they can now be discussed in a totally different climate and atmosphere.

Perhaps as important as the symbolism of the trip itself is the fact that President Sadat and Prime Minister Begin appear to have established a friendly rapport. These gentlemen have agreed to continue the dialog they have now established which hopefully will pave the way toward successful negotiations leading to the signing of a peace treaty in Geneva with all the neighboring Arab States. Mr. Sadat continued his initiative by calling for preparatory peace talks in Cairo and Israel has endorsed this step. Obviously, moves by Israel to implement the Sadat initiative are now in order. There is criticism in the Arab world of Mr. Sadat's unilateral effort for peace. Unless there is an indication of fruitful results, initiated by Israel, he may find himself in difficulty both at home and in the Arab world.

The initiative and action by President Sadat required enormous courage. He deserves high commendations from both the Arab and the Western World. Likewise, Prime Minister Begin is to be commented for recognizing the opportunity that President Sadat made possible. Let us hope this important initial step will receive worldwide support.

The United States should offer congratulations to the peoples of Egypt and Israel for the progress they have made in the last few days. Positive steps have long been needed. Also, we should urge all the states of the Middle East to follow their example and join in negotiations leading to peace treaties that can establish permanent peace and full normalized relations in the Middle East.

The efforts of the present and past administrations for pursuing avenues of mutual understanding in the Middle East are to be commended. Egypt has been the key factor among the Arab states and the ties that have been established with that nation by the United States are now bearing fruit. The Sadat trip to Israel has truly broken the ice. Prior to the Sadat visit to Israel, the only real common denominator that existed between those two nations was their friendship with the United States. American diplomacy played an important part in bringing these two leaders together.

"IF YOU NEED—ASK TUNNELL"

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. GAYDOS. Mr. Speaker, this past weekend I had the privilege of joining 250 people in paying tribute to a man whose trademark in life has been "a pocketful of pencils and a heartful of love."

The guest of honor at this testimonial was Anthony "Tunnell" Ancosky, accompanied by his gracious wife, Julia. Mr. Ancosky, who turned 73 last July, is a lifelong resident of Blythedale, a small coal mining town in Elizabeth Township, Pa. His appearance, energy and interests, however, belie his age. He knows personally almost every resident of the town—and their family trees.

To the young, "Tunnell" is that big, smiling good-natured man who passes out coins each Christmas—a tradition he has followed for nearly half a century. To the old, he is the friend they turn to for help and assistance. It is said no one from Blythedale is ever officially buried unless "Tunnell" delivered the eulogy.

Now retired, "Tunnell" began his working career at 14 as a member of a road construction crew. Later, he did some coal mining and with the Depression of '29, he traveled the vaudeville circuit, performing as a magician, wire walker, juggler, and so forth.

With his talents, personality and desire to help people, it was inevitable that "Tunnell" would drift into politics and public service. So it was.

In 1942, after a brief stint with the State, "Tunnell" joined the Revenue Department of Allegheny County and remained there until his retirement last year. His entry into politics occurred earlier. He ran for constable in 1935, won, and held that post until 1974, when he declined to seek another term. His political acumen is such that few prospective office seekers test the waters without first going to "Tunnell" for advice and guidance.

"Tunnell's love for people naturally led him into other activities. He became a member of Blythe Lodge 593, F&AM in West Newton; the Consistory and Shrine of Pittsburgh and the Caravan and Tall Cedars of McKeesport. He belongs to four volunteer fire companies, holding life memberships in three of them. He is active in Moose Lodge 142 of Elizabeth, the Owls Club of Industry, and the WMBU of Blythedale. And, if that were not enough for one man, he also served many years as a part-time police officer for Elizabeth Township.

Congenial, gentle, and generous, "Tunnell" became the area's unofficial toastmaster for most public and official functions. It was "Tunnell" who organized the programs, secured the speakers—sometimes taking that task upon himself—or entertained youngsters with his sleight-of-hand wizardry.

That is how he acquired his trademark of "a pocketful of pencils and a heartful of love." He had both in abundance. He sincerely enjoyed helping people and they knew it. One of his old friends put it best:

> Whatever you needed: a clown, a Santa Claus, a favor, a magician, a speaker or your house painted, if you had a need * * * ask Tunnell.

That is why the Elizabeth Township Board of Commissioners singled him out as the municipality's first "Man of the Year" and proclaimed November 26, 1977, as "Tunnell's Day." It is why the Pennsylvania State Legislature presented him a commendation as did the fire companies in the township.

Mr. Speaker, in view of such awards, can the Congress of the United States do less? On behalf of my colleagues, I want to formally recognize the contributions of Anthony "Tunnell" Ancosky, a man of high character, great ability, and unselfish dedication, and wish him a long and healthy retirement.

EASY ELECTION LAWS HAVE NOT AIDED VOTER TURNOUT

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. BADHAM. Mr. Speaker, earlier this year, proponents of election day registration pushed this proposal because it would greatly help increase turnout on election day since preregistration deterred people from voting.

Many of the opponents of this Carter administration ploy were very doubtful of this reasoning. A period of preregistration of 30 days is not an unreasonable requirement to preserve honest elections.

It was reassuring to read that on November 8 the voters of Ohio repealed the Ohio election day registration law by a 62 to 38 percent margin.

Over the past 20 years, voting requirements have been eased but there has been a continuing decline in voter turnout. A recent study by a bipartisan Washington research organization, the Committee for the Study of the American Electorate presents new light on some past theories.

Mr. Curtis Gans, director of the Committee for the Study of the American Electorate noted that the group's extensive research on the topic of voting revealed that easing registration requirements does not bring an increase in people going to the polls. In fact, reforms which create an indirect relationship between preregistration and actual voting may have the effect of decreasing voter turnout.

The important thing we should remember is that election day registration does not automatically increase turnout. There are other factors which influence voter turnout. Easing requirement by eliminating preregistration will certainly make fraud a greater likelihood in our elections.

I urge my colleagues to read the following article by James R. Dickenson entitled "Making Voting Easier Hasn't Stopped Decline in Election Turnouts" from The Washington Star of November 17, 1977:

MAKING VOTING EASIER HASN'T STOPPED DECLINE IN ELECTION TURNOUTS

(By James R. Dickenson)

Reforms making voter registration easier haven't stopped the continuing 20-year decline in voter participation in elections and may actually contribute to the decline, according to a survey of the 1977 elections by the Committee for the Study of the American Electorate, a bipartisan Washington research organization.

"Now it appears that registration is no longer a good indicator of eventual turnout, that easing registration requirements will not necessarily bring more people to the polls and that election reforms that create an easier but more indirect relationship between the act of registration and the act of voting may indeed decrease turnout," says Curtis Gans, director of the CSAE.

This appears particularly true of postcard registration, although election-day registration appears to result in a slight increase in registration and voting.

The CSAE survey of voting in three states and seven major cities showed a substantial decline in participation of registered voters in the New York City and Pittsburgh mayoral elections and the New Jersey gubernatorial election, jurisdictions that had adopted postcard registration.

It showed a slight increase, however, in participation of eligible voters in jurisdictions that had election-day registration, the Cleveland and Minneapolis mayoral elections.

The Virginia gubernatorial and Detroit mayoral elections were the exception to the rule of declining participation. In Virginia 62.6 percent of the registered voters turned out compared with 50.8 percent four years ago. Detroit had a 56 percent turnout of registered voters compared with 54.8 percent in 1973.

Detroit's number and percentage of eligible voters was less than four years ago, 41.3 percent compared with 44.8 percent, because the percentage of registration is down substantially, 73.8 percent compared with 81.7 percent in 1973.

"Virginia may be symptomatic of a gathering trend in the South," said Gans. "Although the region still has the lowest level of participation of any in the nation, the voting percentage in the South has shown a gradual increase . . . coinciding with the passage and application of the voting rights law and the increase in strength and competitiveness of the Republican Party in what was formerly a one-party, one-race region."

THE TOMATO FIGHT

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. IRELAND. Mr. Speaker, I have submitted the following remarks in written form in order to avoid tying up the House's time for oral discussion.

On October 18, 1977, my distinguished colleague from New York (Mr. RICHMOND) introduced the article "Great Forces Gathering to Fight Over the Tomato," by Ms. Goody L. Solomon into the CONGRESSIONAL RECORD. The article concerned itself with the effect of importing Mexican tomatoes on the Florida farmer. At this time, I would like to insert a letter I receive from Mr. Wayne Hawkins of the Florida Tomato Exchange as a rejoinder to Ms. Solomon's article. I feel it is important that we get a balanced view of this problem. The letter follows:

FLORIDA TOMATO EXCHANGE,
Orlando, Fla., November 23, 1977.

Ms. GOODY L. SOLOMON,
Washington Star,
Washington, D.C.

DEAR MS. SOLOMON: I would like to take issue with your article entitled, "Great Forces Gather to Fight Over the Tomato," which appeared in the Washington Star about October 15 and in the Congressional Record on October 18, 1977. Some of the comments you make are simply not true.

Your very first sentence, "A seemingly simple item, a packing carton, etc.," sets the tone of your article. There is no controversy whatsoever about the "packing carton," and the proposed legislation would not control the packing carton. I even testified that imports could be placed in burlap bags if the Mexicans so desired. The legislation would control what is placed in the packing carton not the carton itself.

You state that imports from Mexico represent 30 to 40 percent of the supply in the winter season with the balance from Florida. You are wrong. This was true ten years ago, but during the past five seasons, 1972–73 to 1976–77, imports from Mexico represent 52.4 percent of the volume. The respective percentages of imports from Mexico beginning with 1972–73 and continuing through 1976–77 are 57.3 percent, 52.6 percent, 46.8 percent, 47.3 percent and 57.6 percent. It is obvious to the Florida tomato producer, who has thousands of dollars invested in equipment, that the Mexicans are trying to take his entire market, just like they did with strawberries.

I wish you would reveal the experts who told you, "Gassed tomatoes may get red on the outside but not ripe on the inside." Marketing Bulletin No. 59, "How Fresh Tomatoes Are Marketed," published by the U.S.D.A. states on page 9, "A mature green tomato has a completely green skin but has reached the stage where it will turn red either on or off the vine," It further states, "Once mature green tomatoes or breakers are fully ripe, it is impossible to tell at which stage they were harvested.

You comment that, "The longer the tomato stays on the vine, getting nourishment from the soil, the fuller its store of vitamins C and A as well as sugar, making the vine ripes more nutritious." I have never seen a research report stating this as a fact. There are, however, many that show no nutritional differences in mature green and breakers. The contents of H.R. 744 do not deal with mature green vs. vine ripe. About 15 percent of the Florida production each year are picked at the breaker or turning stage. It would not stop Mexico from shipping so-called vine-ripe tomatoes.

I got a real chuckle out of your term, "so-called market order." For your information, it is Federal Marketing Order No. 966. The regulations are issued by the Secretary of Agriculture of the United States with penalties being assessed on violators of the regulations. The regulations are designed to require handlers to comply with the U.S. Standards for Grades of Fresh Tomatoes and have nothing to do with machine-packing green tomatoes. You are wrong again in stating that Florida is the only state with a marketing order. Texas has a Federal Order and California operates under a State Advisory Board.

As stated earlier, the legislation would not force a change of container or the method of packing. It would stop commingling of sizes and grades within a container. Proper sizes can be place-packed. They might not come out exactly six rows one way and six rows another, but the tomatoes would be tightly packed. About 15 percent of Florida tomatoes are picked at the breaker or riper stage. Some are place-packed and some are volume filled by weight, but they both comply with size and grade standards.

Your statement that 78 percent can be picked immature is ridiculous. An experienced tomato picker can tell a mature green tomato from one that is immature. After picking, they are graded and immature tomatoes, like ones with serious defects, go in the cull chute. All Florida tomatoes are inspected by the Federal-State Inspection Service, and one of the basic requirements is a check for maturity. Even if an inexperienced hand picked a lot of immature tomatoes, they would be graded out at the packinghouse.

You state that "The most important reason for harvesting green tomatoes is that they are firm enough to be machine packed and loosely filled into the required shipping containers." Wrong again. The main reason they are picked green is the cost of harvest labor. Mexico grows the same varieties that we do in Florida. They pick a crop daily and may go over a field 40 or 50 times. We pick every seven to ten days and pick a crop two to four times. The big difference is costs of labor. We pay more per hour in most instances than Mexico pays per day.

You state, "The law would place a special burden on the Mexicans since United States tomato producers outside the state of Florida are not subject to any of the requirements of that state's marketing order." It has already been established that Mexico competes with Florida, not the balance of the United States. Why is it a special burden to require your competition to do the same thing you do, particularly when their actions create deceptive packaging and seriously undermine the

attempt of Florida producers to create orderly marketing?

This legislation will not force Mexican growers to convert to harvesting green tomatoes and gassing them. For your information, 15 percent of the Mexican imports last season were gassed green tomatoes. They are already heading in that direction. It would not create unemployment or cause a loss in purchasing power since this legislation would not limit the import of tomatoes.

You state that last year Mexican tomatoes came to the rescue. They did, at exorbitant prices. Once the Mexicans successfully bury the Florida Tomato Industry, the American consumer will pay this price all of the time. Is that what we want?

You state that, "The bill would impose a non-tariff trade barrier." This is wrong. A non-tariff trade barrier is when you require imports to meet requirements not imposed on domestic producers. This is a "golden-rule" amendment. Treat everyone equally. Mexico, on the other hand, has the non-tariff trade barrier. They simply say no American tomatoes can be shipped to Mexico when they are in production. "Free trade" is not conducted on a one-way street.

You quote Sharon Ahmad as saying in part, "These packaging standards have nothing to do with the quality of tomatoes sold to the American consumer. We support the concept of uniform treatment of domestic and imported commodities with respect to quality requirements. Tomatoes imported from Mexico already meet those quality standards." Florida tomatoes must be labeled U.S. No. 1, 2 or 3. Mexican tomatoes must only be a U.S. No. 3. If Ms. Ahmad doesn't know the difference in U.S. No. 1 and U.S. No. 3, I'll be glad to send her some U.S. No. 3's. They are just slightly better than a cull. Also if the size of the tomato is not a quality factor, why is there such demand for larger sizes? Why will the consumer pay 89¢ or 99¢ a pound at retail for large tomatoes and only 29¢ to 39¢ per pound for small tomatoes? She gets the same number of pounds. It has to be a quality decision.

I think you tried to write a good article. You simply didn't have the facts. I have factual information for the points I have made in this letter. Print this letter in your newspaper and let the consumer see the truth.

It's time for the United States government to start thinking about their own citizens for a change. Our taxes pay their salaries. They derive nothing from the wealthy Mexican exporters unless it is hidden under a table like the recent Korean fiasco.

If you are really interested in learning the facts on Florida production, I'll be glad to give you a guided tour. It might open your eyes to find out what really is involved in producing tomatoes for the American consumer. The one hundred and fifty million dollar Florida tomato industry represents nearly one-third of the total value of vegetable production in the "sunshine state." I don't believe we should let it go down the drain to satisfy a foreign competitor who buys only what is absolutely essential from us.

Sincerely yours,

WAYNE HAWKINS,
Executive Vice President.

JUDGE JAMES R. DURFEE

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. CORRADA. Mr. Speaker, I respectfully request that the eulogy of Judge James R. Durfee of the U.S. Court of Claims be introduced into the RECORD. Judge Durfee was a great American and a great friend of Puerto Rico. His eulogy was delivered by Roderick J. O'Neil of the Office of Puerto Rico in Washington.

The eulogy follows:

JUDGE JAMES R. DURFEE, 1897–1977

Justice is the constant and perpetual disposition to render every man his due. Justice is a virtue by which we give to God and men what we owe them. James Durfee knew this well. He possessed the virtue of justice, he dispensed it as a judge, he defended justice as a district attorney and as Chairman of the Civil Aeronautics Board he was involved with administrative justice. In his lifetime he served justice well. Marquette University recognized this service when they named Judge Durfee a distinguished alumnus in 1972. Friends and colleagues have affirmed his contribution to the cause of justice. Judge Oscar Davis said that Judge Durfee "always zeroed in on the universal principles of justice, not the technical rules of laws unrelated to human values." Chief Judge Wilson Cowen described James Durfee as "a human judge, not just a book judge." Judge Durfee balanced the human against the book. An eminent jurist once wrote: "When ghosts of the past stand in the path of justice clanking their medieval chains the proper course for the judge is to pass through them undeterred." I suspect that Judge Durfee made a few undeterred passages during his tenure on the bench and served both justice and humanity by doing so. The Bible may best describe Jim Durfee's professional and personal credo. The Book of Wisdom opens with this exhortation: "Love justice, you that are the judges of the earth. Think of the Lord in goodness and seek him in simplicity of heart."

Jim Durfee was more than a judge. He was a husband, a father, a grandfather and a dear and trusted friend of many people. His friends admired, respected and loved him. We admired him for the extraordinary courage he exercised in coping with an extremely painful arthritic condition that would have crippled a lesser man. And we loved him. We loved the joy of the man. Jim Durfee was fun to be with. His charisma cut through the generation gap.

Jim Durfee combined the appearance of a boulevardier, in the mold of Maurice Chevalier, whom he loved to imitate, with the heart and mind of the common sense lawyer and judge, which he was.

In one speech, Jim Durfee could delight an audience with true stories about his experiences as district attorney in Antigo with the Kentucks who had settled outside the town. He could edify judges and lawyers with sage comments on the law and engender camaraderie with show business personalities by recounting his experiences on the stage. And after the speech he could bring tears to your eyes with nostalgic renditions of World War I songs which he sang in a rich baritone voice.

Jim Durfee had a remarkable artistic and professional versatility—he was truly a man for all seasons.

And the joy of the man—that's what I remember best. He had the ability to create the marvelous by contagion. To know Jim was to love Jim. He gave pieces of himself away and the supply never ran out. You felt important when you were with him and never knew why. Perhaps William Blake gives us a clue to the secret of Jim's magic. He wrote:

He who binds to himself a joy
Does the winged life destroy
But he who kisses the joy as it flies
Lives in eternity's sunrise.

Jim didn't hoard his joy—he shared it lavishly and no one who has been touched with the joy of Jim Durfee can ever believe that he is any less joyful now than when he was with us, for you see, joy is the most infallible sign of the presence of God in the human heart. For the joy he gave us we are grateful and forevermore—may that joy be his.

RODERICK J. O'NEIL,
A friend.

NOVEMBER 2, 1977.

THE ADMINISTRATION'S BIND OVER SOUTH AFRICA

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. LAGOMARSINO. Mr. Speaker, the following article on South Africa has been written by my constituent, Henry Huglin. Mr. Huglin, a retired Air Force brigadier general, is a syndicated columnist and lecturer on national security and international affairs.

The article follows:

THE ADMINISTRATION'S BIND OVER SOUTH AFRICA

(By Henry Huglin)

The South African government, through its recent repressive crackdown on its dissident press and people, has put the Carter Administration in a bind—because the Administration's over-blown rhetoric and pressure on South Africa created expectations among the blacks in Africa that, prudently, cannot be fulfilled.

The Administration singled out South Africa, along with Rhodesia, for particularly critical attention, over denial of full rights to the majority of black people in those countries. And the rhetoric apparently contributed to the imposition of the stern measures taken a couple of weeks ago in South Africa.

The South African minister of justice, Mr. Krueger—in defending the government's actions, to stop the total disruption of blacks' lives through terror and intimidation, as he expressed it—has charged that President Carter had some responsibility for the crisis, because his "holier than thou" pressures in support of South African blacks encouraged the militants to feel that "the Americans are backing us to the hilt, whether we do it peacefully or by violence."

Now the bind comes from a number of factors.

First, the Administration greatly needs the South African government to work with it effectively to achieve its prime foreign policy goals in southern Africa: early independence for South-West Africa (Namibia) and on the basis of majority rule, and peaceful transition to majority rule in Rhodesia (Zimbabwe).

Further, our trade and industrial links with South Africa are highly important. That country is our prime source of essential chrome, vanadium, platinum, and other raw materials. And last year we sold $1.35 billion in goods to the South Africans.

Also, South Africa is nearly impervious to sanctions and embargoes. She is almost self-sufficient in most things she needs and has fairly sure sources—despite UN resolutions—for those items she must import. Even the much-publicized mandatory arms embargo recently voted by the UN Security Council is more a symbolic gesture than an effective pressure point, because South Africa is also largely self-sufficient in basic armaments.

Then, South Africa has great leverage—if pushed to the wall—in the form of counter actions. She could shut off the exports of her critical raw materials on which the industry of our country and many others are dependent. And she could cut off trade and send home hundreds of thousands of immigrant

workers to four neighboring black-ruled African nations, and thereby deeply hurt their economies.

So, the Carter Administration's well-meaning but too-blatant human rights crusade against South Africa—conducted while generally ignoring the gross human rights violations in much of the rest of Africa—has provoked South African defiance.

And now, in the UN, the Carter Administration has, of prudent necessity, opposed and even vetoed stronger UN action with the relatively ineffectual arms embargo.

Instead of helping moderate apartheid practices, the Administration's open pressure has caused the South African government to clamp down even more. Instead of peaceful evolution being quietly promoted, opposing positions have been hardened.

Further, the militant blacks in South Africa and the black regimes elsewhere in Africa have been disillusioned (maybe fortuitously), because of being led, by the rhetoric of President Carter, Vice President Mondale, and UN Ambassador Young, to expect actions which could not be produced when the crunch came. Hence, there is a loss of Administration credibility which is bad for our country.

How hard it seems to be for the Carter Administration to learn some elementary rules of international affairs and psychology—such as, the value of quiet diplomacy, consistency of policy, not letting rhetoric exceed the possibility of performance, the need to temper idealism with realities, and the potential pitfalls of getting deeply and publicly involved in other nations' internal affairs.

The matter of internal affairs is particularly tricky. The gambit used to get around the long-standing and sensible rule that domestic matters are beyond the purview of other nations and of the UN is to declare that a nation's particular policies and actions constitute a threat to international peace. But many internal actions of many nations could as sensibly, or insensibly, be called threats to international peace as the actions taken by the South African government.

The type of open condemnatory pressure, indulged in by the Carter Administration, wins the plaudits of ivory-tower idealists and zealots, but it plays havoc with effective influence for peaceful, beneficial change.

Hopefully, this experience will be something of a lesson for President Carter and his aides for toning down their outspoken and sometimes damaging do-goodism.

GEORGE MEANY SPEAKS OUT IN OPPOSITION TO RETURNING THE HOLY CROWN OF ST. STEPHEN TO HUNGARY

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Ms. OAKAR. Mr. Speaker, the career of George Meany has always been characterized by a willingness to speak and act in behalf of not only American working men and women, but oppressed people throughout the world. His commitment to human rights at home and abroad has been bold and unflagging.

Thus I believe it was only natural that he would be deeply concerned about the President's proposal to return the Holy Crown of St. Stephen to the present Soviet-dominated Government of Hungary. President Meany wrote to President Carter to express his opposition to return of the crown, and I would now like to insert into the RECORD a copy of his letter, and the announcement of it made by the AFL–CIO:

NEWS RELEASE FROM THE AFL–CIO, NOVEMBER 22, 1977

AFL–CIO President George Meany today asked President Carter to "protect" the Crown of St. Stephen "until such time as the government of Hungary is freely and popularly elected by her people."

Noting press stories and Congressional hearings reporting that the government is anticipating returning the Crown of St. Stephen to the government of Hungary, Meany wrote:

As you know, the Crown of St. Stephen is not merely a trapping of state power, but more a symbol of moral and religious importance to free people and those who seek political democracy the world over.

A return of the Crown of St. Stephen to the Kadar government will cause great sorrow among many millions of people in the world even though it may please and serve the purposes of the small elitist leadership of dictatorships in Eastern Europe. The sharp reaction throughout the world, should the Crown be transferred to the government of Hungary, will cast a doubt on the position of the United States concerning human rights and freedom.

It is my hope, and a wish that I believe is reflected in society both here and abroad, that the Crown of St. Stephen be protected until such time as the government of Hungary is freely and popularly elected bv her people.

AFL–CIO,
Washington, D.C., November 17, 1977.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: From press accounts and Congressional hearings, it is my understanding that the government of the United States anticipates the return of the Crown of St. Stephen to the government of Hungary.

As you know, the Crown of St. Stephen is not merely a trapping of state power, but more a symbol of moral and religious importance to free people and those who seek political democracy the world over.

A return of the Crown of St. Stephen to the Kadar government will cause great sorrow among many millions of people in the world even though it may please and serve the purposes of the small elitist leadership of dictatorships in Eastern Europe. The sharp reaction throughout the world, should the Crown be transferred to the government of Hungary, will cast a doubt on the position of the United States concerning human rights and freedom.

It is my hope, and a wish that I believe is reflected in society both here and abroad, that the Crown of St. Stephen be protected until such time as the government of Hungary is freely and popularly elected by her people.

Sincerely yours,

GEORGE MEANY,
President.

ELECTRIC RATES AND THE ENERGY CONFERENCE

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. DINGELL. Mr. Speaker, it is imperative that those Members of Congress who have not participated in the energy conference have at their disposal reports and commentary on actions taken by the conferees. The Washington Post, in its lead editorial, November 22, 1977, accurately discusses and notes its support for one of the major compromises, electrical utility rates.

I include the editorial at this point:

YOUR NEXT ELECTRICITY BILL

The great grinding conference on the energy legislation has now worked out a compromise—an astonishingly good one—on electric utility rates. It's a hopeful omen for the even more difficult choices on price controls and oil policy that still lie ahead. There seems to be a tendency to portray the electric-rate solution as a defeat for President Carter. Certainly the conference's version differs fundamentally from the original Carter proposal that the House passed, not to mention the nonproposal that the Senate wrote. But, to everybody's surprise, the conference has now produced a bill that is clearly preferable to either.

The target here is a structure of power rates that is still generally designed to encourage people to use more of it. These rates were sealed into law in the decades, not far behind us, when energy seemed endless and utilities took it for granted that they would always make money by selling more of it. For the nation, the result is waste of precious fuel. For the utilities, it has come to mean a pattern of highly irregular demand, low at night but rising to sudden peaks—at sundown on a winter day, for example, or in mid-afternoon during a July heat wave.

Maintaining the capacity to meet that occasional demand is proving very expensive for both the power companies and their customers. The President's energy plan seeks, altogether correctly, to encourage conservation and to change rates to smooth out the surges in the load. The President asked Congress to impose a set of federal rules on the states' regulatory commissions, prohibiting most of the present volume discounts and requiring rates to rise during peak periods of the day and year.

When the House passed the bill, the utilities descended in force on the Senate to protest vehemently that the new requirements would prove unmanageably complex and uncertain. They had a point. Nobody has had much experience with this kind of power rate, and it's difficult to predict how effective it will prove. A number of experiments are now getting under way. Pepco has installed time-of-day meters (they cost $1,000 apiece) on 200 of its largest commercial customers and is now waiting for the Public Service Commission's permission to begin charging higher rates during the peak hours. Vepco is preparing to install similar meters for 9,000 residential customers. It's also planning similar rates for some customers—volunteers—whose water heaters would be cut off during peak hours by a signal automatically transmitted over the power line. But it's not yet clear what will work best.

It's too early to impose uniform federal rules on all rate structures. Here it makes great good sense to use the states as 50 laboratories to test different approaches. The conference was right to leave final decisions to the states—but it was certainly also right to provide a goad. The compromise bill provides that each state's utility regulators must hold hearings to consider specific steps toward rate reform and conservation. The Department of Energy is authorized to attend those state hearings and press the national interest.

The national interest here is beyond dispute. Consumption of electricity this year is more than 5 per cent over last year's. The country can't afford to sustain that rate of increase for long. Of all the fuels used to generate power in this country, the consumption of oil has been rising most rapidly.

The energy conference is not just a game, to be scored in pluses and minuses for the White House. The utility-rate solution takes Mr. Carter where he wanted to go, and that's what counts. It also disencumbers the conference of one more heavily lobbied quarrel, permitting it to proceed now to the even more important issues of the pricing and taxing of gas and oil.

THE ENERGY CHALLENGE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for November 30, 1977 into the CONGRESSIONAL RECORD:

THE ENERGY CHALLENGE

In amazing numbers the American people are acting as if the energy challenge were not real. Many people refuse to acknowledge that there are limits to our resources. They do not really believe that we are running out of gas and oil and that such shortages could interfere with this country's freedom. For them the American frontier is still wide-open and they pretend there is no energy problem.

Perhaps this attitude is understandable as long as homes are heated, automobiles are fueled, and the machines of commerce turn. But the underlying facts are disheartening. In 1974, we imported 37 percent of our oil; today we import half of it. Our annual import bill is $45 billion. Under entirely plausible assumptions our oil import bill in 1985 could be $175 billion. Without question the cost of imported oil hurts. It causes unemployment and deprives us of business investment. Every $5 billion increase in the cost of oil imports results in a loss of 200,000 jobs in this country. Vast amounts of money, instead of being invested here, are sent abroad to pay for the oil. The cost of imported oil also increases the budget deficit, unbalances our trade, and increases inflation. In short, excessive oil imports depress the entire economy.

Despite the crisis our voracious consumption of oil continues. This past summer we used more oil and gasoline than ever before in our history. Two-thirds of all the oil ever used has been consumed in the past 17 years. Virtually all of the world's consumption of natural gas has occurred since 1945. To maintain even the present rate of consumption without using already dwindling reserves, we would need to discover another Texas or Alaska every six months or an Iran every three years. That simply is not going to happen.

A consensus of the best and most recent estimates put probable total recoverable world oil reserves at 2 trillion barrels. Unless demand is curtailed it is likely that 40 percent of that total will be consumed by 1990 and 90 percent of it by the year 2025. But long before that we will face soaring prices and probable panic over a deepening sense of scarcity. Without action now, demand for oil will surge ahead of supply, probably in the early 1980s, bringing a worldwide scramble for oil, a steep rise in price, economic risks, and a threat to the security of the nation.

The heart of the debate over energy in Washington is a struggle between those who believe that increased production is necessary and those who believe that short supplies must be allocated and higher costs cushioned. I have never felt that these views were mutually exclusive. I have always felt that an effort to produce more must be joined with an effort to conserve more.

Although I fully support the development of new fossil fuel supplies, we should be under no illusions that new production of gas and oil will be more than a stopgap measure while we shift to the use of renewable resources. It is urgent that we begin to use fuel in our homes, cars, and industries in a fuel efficient way. The era of abundant cheap energy is over and we must all face the fact that there will be significant changes in the mix of energy we use and that energy is going to cost more. Our policy needs to place equally strong emphasis on promoting increased supplies and on encouraging greater conservation. Conservation, however, is the cheapest and most immediate source of energy.

It may seem strange to say so at this particular moment, given the difficulty the Senate and House Conference Committee is having in developing an energy bill, but I believe that a fairly decent energy bill will eventually emerge from the Congress and be enacted into law. A majority of members in the Congress know that something simply has to be done and, if necessary, they are willing to make adjustments to get an energy bill. The rough outlines of the bill have begun to emerge: a tax on the use of oil and gas by business, substantial deregulation of natural gas prices, and mandatory coal conversion. The domestic crude oil tax, designed to discourage consumption, apparently will also survive. Production of low mileage cars will be restricted, and a variety of loans, credits and grants will be made available to encourage conservation and production. The President will not get all that he wants but enough to enable him to claim some success.

Energy policy presents a formidable challenge to the American people and to the Congress. It takes understanding of a complex problem, action to conserve precious energy, and support for efforts to develop an energy policy. Whatever happens to this year's energy bill, we will need another one soon. We should simply prepare ourselves for a long, difficult effort to conserve energy and to increase production. Failure to develop that policy will only present us with more difficult choices tomorrow.

(The source of the facts referred to in the early paragraphs of this newsletter is Secretary of Defense Harold Brown.)

TV ON THE EVE OF DRASTIC CHANGE

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. WIRTH. Mr. Speaker, as my colleagues know, the Commerce Committee's Subcommittee on Communications is in the midst of revising the Nation's communications laws under the excellent leadership of Mr. VAN DEERLIN. One of the great challenges of this effort is to look into the future of insure that we do not restrict the development of beneficial communications options. A recent article in the New York Times is most instructive in this regard. I commend it to my colleagues:

TV ON THE EVE OF DRASTIC CHANGE

(By John J. O'Connor)

Although ABC–TV has climbed to the top of the prime-time ratings mountain, Leonard H. Goldenson, chairman of ABC Inc., has been delivering speeches that could be accompanied by the caption "Why Is This Man Frowning?" While business and profits have never been better, the industry is beginning to feel the heat of new technologies that will undoubtedly add up to radical changes in the distribution, content and consumption of that contemporary behemoth called "communications."

The system is being confronted by drastic changes, and executives from Mr. Goldenson on down are pleading with various interested parties, especially government lawmakers and regulators, to move cautiously on any decisions affecting the current state of television. Communications systems, Mr. Goldenson warns, are valuable only if there is "a message to be passed through and an audience with some use for the message." In fact, at this stage, the message or messages of the future cannot be pinpointed precisely. But one thing is certain: Commercial television will no longer be able to dictate either what is watched or when it is watched.

On the receiving end, in the viewer's home, the new "video environment" is already being marketed and is chalking up impressive sales. Video cassette machines can record programs off the air. Furthermore, the recordings can be taken from one channel while the viewer is watching another channel or they can even be made, with the help of a pre-set timer, when the viewer isn't home. These cassettes can then be played back any number of times at will, freeing the consumer from rigid programming schedules. In turn, this will seriously affect the various processes for compiling audience ratings. The time spent watching cassettes is likely to be taken from time that would have been spent watching on-air television. How is Nielsen going to determine which cassette is being watched, or how many times it is watched?

The cassette machines are still relatively new and expensive, but the public is obviously intersted. Sony sold almost 30,000 Betamax units, at $1,300 each, in the United States last year. Several domestic manufacturers are now rushing to enter the market, and it is conservatively estimated that a million units will be in use by the end of 1981. On top of this, there is also the current phenomenon of "video games," electronic devices that turn the television screen into a playing field for the equivalents of everything from tic-tac-toe to baseball. On the market for several years, the games have become more sophisticated and versatile, reaching the point where more than a dozen are evaluated in the November issue of "Consumer Reports." The magazine notes that the games market has rapidly become crowded and lively. Once again, the set being used for games cannot be simultaneously consuming the products of on-air broadcasting. The crucial factor of time is being steadily syphoned from commercial television.

Meanwhile, at the other end, at the key point of distribution, there is cable television, snuggled more securely than ever in the huge potentials of satellite transmission and pay-cable. The promise of cable and a "wired nation," capable of an almost unlimited multichannel diversity, has been ballyhooed for years. But high costs, administrative uncertainties, and not least, the intense lobbying efforts of commercial broadcasters have managed to postpone a growth that is all but inevitable. For a number of reasons, the development of cable is once again in a state of significant agitation. Those skeptics requiring conclusive proof need only look to the advertisers, who must specialize in sniffing out prospects for future dollars. There is, for example, a report called "The Emerging Video Environment" compiled by William J. Donnelly, vice president for new electronic media at the large Young & Rubicam agency. It is noted that the current level of more than 12 million subscribers gives cable about a 17 percent "penetration" of United States television homes. Mr. Donnelly

estimates that by the end of 1981, cable will have reached a 30 percent penetration, with the ability to leap to 50 percent immediately simply by signing up customers who already have access to a cable system.

Understandably looking out for its own interests, the report declares: "We say that advertisers will start becoming interested on a broad scale . . . We say 30 percent penetration is the critical mass because that has been the television experience from the days of its competition in radio in 1950 through the development of daytime television on ABC in 1959. . . ." Mr. Donnelly recognizes that these numbers and projections make commercial broadcasters nervous, but he offers few words of comfort: ". . . We do not favor protectionist regulation that would prevent new businesses based on new technologies from affecting the economic or social standing of existing businesses any more than we would have favored protecting horse-drawn carriages from the automotive industry, or print from broadcasting, or radio from television."

The role of domestic satellites in the new age of electronic horseless carriages cannot be understimated. The satellites both increase programming capacities and reduce signal-distribution costs. As Mr. Donnelly notes, "This means that smaller audiences and a greater multiplicity of nationally distributed program will be economically viable."

The impact of satellites on pay cable is already being felt. H. B. O., Inc., part of the Time Inc. complex and currently the only pay serving using satellite transmission to service its widely dispersed audience, recently announced its first quarterly profit in nearly five years of operation. Viacom, another pay operation, will initiate satellite distribution in January. There are now about one million subscribers to pay television nationally. Mr. Donnelly sees that figure jumping to between three and four million in 1981. Just to sweeten matters, the U.S. Supreme Court recently let stand a lower court's decision removing Federal Communication Commission restrictions on pay cable's access to movies and sports.

But ABC's Mr. Goldenson urges the consumer to look at the "message," the content, being passed through these new technologies. And, without getting into a debate about the "lowest common denominator" practices of commercial television, it must be conceded that much cable programming lacks finesse and inspiration. But the "message" in the early days of television was hardly better. As Mr. Donnelly's report reminds us, the first Emmy Awards recipients in 1948 included "Pantomine Quiz Time" as most popular program and Shirley Dinsdale with her puppet Judy Splinters as most outstanding television personality. Success, it would seem, tends to breed better messages. And cable television is slowly beginning to exhibit symptoms of success.

One of the more ambitious projects in the Manhattan area has been undertaken by a transplanted Frenchman named Jean-Claude Baker. Working with his own small staff, Mr. Baker produces a weekly program called "Telefrance U.S.A.," a package of French movies and television programs, news items from France, and interviews that he himself conducts with everyone from French stars passing through town to Marlon Brando to Paul Bocuse, master chef, visiting the Sign of the Dove restaurant. Meanwhile, the indefatigable Mr. Baker has elicited sponsorship support from French businesses dealing in perfumes or champagnes or jewelry or whatever. He is currently showing a 13-episode epic called "Les Gens de Mogodor," which was one of the most successful serials ever presented in France. Meanwhile, on pay cable, H. B. O. is supplementing its theatrical-release films less with sports, which often are only regional in interest, than with its own entertainment specials. A recent "On Location" production featured Neil Sedaka giving an outdoors concert in California.

On top of these and other alternatives, there is the owner of a video cassette system who, instead of being stuck with what the networks may be offering on any given night, can go to his video "library" and select an old film or some favorite episodes of "Upstairs, Downstairs," or a portion of "Roots" (with the commercials deleted). These are no longer "pie in the sky" fantasies. The machines and the capabilities are here and selling well enough to have hard-nosed analysts anticipating a "critical mass" in just three or four years. Mr. Goldenson and his colleagues have every right to frown in public these days.

HUMAN RIGHTS IN MAINLAND CHINA

HON. CHARLES E. GRASSLEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. GRASSLEY. Mr. Speaker, President Carter's defense of human rights has drawn praise from many quarters. All men of good will share the commitment exhibited by the administration. However, I am concerned that this Nation's advocacy of human rights may be turned into a political tool instead of the clear statement of moral principle that it should be. This Congress by resolution, and the American Government through our representatives at the United Nations, have condemned the Republic of South Africa for its unpardonable suppression of human rights. Pressure has similarly been brought to bear on Rhodesia as well as a number of Latin American nations essentially friendly to the United States.

If we are, as a nation, to have a human rights policy, it must be consistent. Our policy must be based on principle rather than simple political expediency. Some Americans would have us sever ties with Taiwan in order to improve relations with the mainland People's Republic of China. I believe that such a policy would fly in the face of the human rights principles by which this administration and this Congress have set such store. The following article, written by a correspondent recently returned from the People's Republic of China, sheds new light on the human rights situation in mainland China today. The harsh realities of life cannot be ignored. We cannot have a double standard. The article follows:

MILLIONS OF "RICH PEASANTS" PENALIZED FOR BACKGROUND

(By Ross H. Munro)

PEKING.—Fu Nung-ren has been a member of China's sub-class ever since the Red Army arrived in his village in 1947 when he was 26 years old.

It was Fu's misfortune to have been born into a family categorized by the Communists as "rich peasants," a label he wears to this day. He is only one of at least 30 million Chinese who are openly discriminated against because of their "bad class background."

Like other members of the sub-class in the Chinese countryside, Fu gets lower wages, is barred from his commune's free medical service, cannot participate in any political activities, is a frequent target for verbal abuse and has few hopes of improving his lot in life.

Families like Fu's were "rich" only in comparison with the masses of poor and landless peasants in the war-torn China of the 1930s and 1940s. The average rich peasant in the 1940s owned somewhere between two and three acres of land. As long as it was a large enough tract that he rented some of it out, or hired even part-time labor to work on it, then he was classified as "rich."

Chen Fu-ching, the leader of the Tung Ku Cheng production brigade where Fu Nung-ren works as a field laborer, described what happened to families like Fu's when the Communists took over this area near the city of Shihkiachwang, south of Peking.

"The poor and lower-middle peasants organized the Poor and Lower-Middle Peasant Association and brought the landlords and rich peasants together and settled accounts with their crimes in the past."

Unlike many and perhaps most villages in China, no one here was executed or beaten to death, according to brigade leader Chen. But "settling accounts," in Chinese Communist parlance, suggests some severe beatings.

Chen says the Communists confiscated the landlords' and rich peasants' lands as well as those possessions that were deemed "surplus to their personal use" and distributed them to everyone in the village. From then on, Chen adds, the landlords and rich peasants "were not permitted to do or speak evil things. And they were deprived of political rights . . ."

Although Chen doesn't reveal the man's real name—Fu Nung-ren is a pseudonym meaning rich peasant—he is quite frank in discussing his case. Fu after all is just one of 11 members of the sub-class in the Tung Ku Chen production brigade who have kept their class enemy status.

Some members of China's sub-class have succeeded in convincing Communist Party officials that their "caps" should be removed from their heads ("To put a cap on" a person in China means to attach a negative political label to him). When Chen is asked why Fu has not succeeded in shedding his sub-class status, the response is rather vague.

"His behavior and manner are not good so he still has the cap on . . . The production team asks him to work honestly in the fields but he just doesn't work and he sometimes says nasty things and some nonsense."

He may have to. Like virtually all members of the sub-class in rural China, Fu Nung-ren receives 10 to 20 percent less pay than others doing the same work. Rural wages are based on the type of job and the skill involved, the effort which the worker is judged to be making and, finally, his political attitudes toward his work and the Communist system. These last two factors each count for about 10 percent of a peasant's wages under this work-point system. And, as Chen points out, "these two things are linked together. If he doesn't like to work, then of course he can't work hard."

Fu Nung-ren must also pay another economic penalty for his background. Chen says Fu cannot get free medical care from the local clinic like other members of the brigade. How common this particular form of discrimination is remains uncertain; many brigades still charge all their members for medical care.

As long as he remains a member of the sub-class, Fu is barred from political meetings and from having any voice in choosing brigade officers. In fact, Chen suggests at one point that Fu really isn't considered a member of the brigade at all. Fu's chances of getting anything except the lowliest job are, of course, nil.

Chen insists that the children of former landlords and rich peasants "get the same treatment as others" in this particular production brigade. But this isn't the general

rule in China. In many communes, children and even grandchildren of rich peasants and landlords inherit their father's class standing and must work hard to have their "cap" removed. Anyone with a "bad class background" in China falls under a political cloud.

"If they are of landlord family origin," a brigade leader in Shansi Province says, "then they may be influenced by that. So they need more tempering and transformation." The brigade leader indicates this means they must prove their worth by doing more ordinary labor than others.

Childen with the wrong class background have only a very slim chance of being selected to attend a school of higher learning even if they have clearly demonstrated their academic ability. After visits to Chinese colleges and universities during the past two years, it's evident that some sort of regulation restricts the number of students with a "bad class background" to a maximum of 5 percent of the student enrollment, but the actual proportion is well below that.

The background records follow Chinese citizens everywhere. Sometimes the class background of someone who has moved away from the rural areas is ignored for years, and then suddenly it becomes relevant again and the person in question suffers.

Two Chinese citizens, for instance, who were idealistic and patriotic teenagers when they joined the Red Army before the Communist victory in 1949 established excellent records in the army and were advancing at a good pace. Then came one of those periodic campaigns during which officials were urged to pay more attention to the class background of those under them. The two suddenly found that roads to further advancement were blocked, and they were being systematically discriminated against because their grandfather was a small landlord.

In addition, they became objects of suspicion because some of their relatives had left China soon after 1949. Today, they hold factory jobs—quite decent by Chinese standards—but they have no hope of advancement and they constantly worry that their children will have little chance of getting any advanced education because of the few acres of land their great-grandfather once owned.

One of the most unpleasant aspects of belonging to China's sub-class is probably the social isolation. Young Chinese children are taught from a very early age that landlords and rich peasants are bad people. They're also told at a very early age the identity of their village's landlords, rich peasants and their offspring.

It seems that every political convulsion in Communist China has been accompanied by attacks on members of the sub-class who provide the easiest if not the most appropriate targets. Sometimes the attacks are more than verbal. Ten years ago, during the Cultural Revolution, peasants in one area in northern China killed all the former landlords and rich peasants—including their wives, children and babies—in one day. According to an official Chinese source, the incident occurred in 10 production brigades, suggesting that hundreds have been killed.

Many outsiders initially find it strange and even rather ludicrous that Chinese officials are still regularly denouncing landlords, rich peasants and bourgeois elements nearly three decades after the wealth and property of these groups were confiscated. A partial explanation for the denunciations is the fear among some Communists that these elements would somehow regain their elite status if the Communists lowered their vigilance.

But Richard Curt Kraus, a U.S. sociologist and Sinologist, has offered a second explanation. He argues that members of China's "new class" of officials have discovered that it's very much in their interests to keep the heart on the former landlords, rich peasants and old bourgeois elements. By focusing attention on these groups, Kraus reasons, Chinese officials divert attention from themselves, the new bourgeoisie that Chairman Mao Tse-tung identified as the new and more dangerous class problem facing China.

BUDGET AND IMPOUNDMENT OVERSIGHT

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. PICKLE. Mr. Speaker, recently the House Budget Committee held oversight hearings on the Budget Reform and Impoundment Control Act of 1974. Few laws have done more to change everything from normal daily operations to constitutional balances of power than this act. Control of the public purse strings makes the difference between a republic in name and a republic in fact. If the Congress does not maintain control of Federal tax moneys and, thereby, the policies they implement, then all else it does is for naught. This has been true throughout history, and it is true today. It is why we must exercise extra care with this law. I praise the Budget Committee for taking the time to make a thorough assessment of this law, which has now been in full force for 2 years.

Although I was not able to appear in person before the committee's hearings, I have submitted a statement for the hearing record, and I would like to share my thoughts with the Congress by including them here as follows:

TESTIMONY OF U.S. REPRESENTATIVE J. J. PICKLE ON THE BUDGET REFORM AND IMPOUNDMENT CONTROL ACT

I am very pleased to have this opportunity to express my views on the progress we have made under the Budget Reform and Impoundment Control Act. We have come far. When I realize it was five short years ago that I was joined by about a dozen colleagues to discuss the problems of budget control and impoundment of funds in a Special Order on the House floor, I am astounded.

With the passage of this act two years after that floor discussion and with its subsequent, and largely successful, implementation, we have done many things. We have raised the level of debate in the House and Senate on economic matters. We have increased Congressional awareness of economic problems and of the tools available to deal with them. We have, most importantly, given ourselves a measure of confidence in our basic duty—the control of the Federal purse strings.

Many times in debate on this bill, Members and commentators noted that control of the national purse was the key to the existence or demise of a republican form of government. This has been the case time and again throughout history. There is no doubt that by 1972 we were losing control of the money raised by taxes, and we were losing confidence in our ability to govern. I think nothing, not even the impeachment process, has had as deep and as long-lasting an effect on the Congress reasserting its proper place in the government as has the Budget Reform and Impoundment Control Act.

All this is by way of saying once again how important it is that we be careful about this law. It is to be guarded and used with more care than anything else we do because without it, and without the powers that it supports, everything else in a republican government is for naught.

The first comment I have is not a proposed change in the law itself. It addresses how we have already begun to abuse the ideal set out in the law. If we are to have power over the budget, we must be responsible. The budget act cannot be used as an adding machine to tally up the sums of the various appropriations bills, tax bills, and other spending and revenue mechanisms. Granted, a simple tally is an improvement over what we had before. But it is not enough.

We have had too many budget resolutions. We must not fall into the trap of passing Third and Fourth budget resolutions. The great beauty of the Congressional Budget Act is that it makes individual Members of Congress look hard at the national economic picture and at the role of government revenues and spending in the national economy. If we do not stick to our original program of two budget resolutions, we will undermine the incentive to do the extra homework, to do the extra thinking, and to make the choices early on to shape a coherent and intelligent budget policy.

I realize that this is a complicated task, involving more than just forcing ourselves to do extra work—a large enough task in itself.

For instance, it is difficult to make accurate economic forecasts even for so much as a year ahead. Some might say that we should always assume the most pessimistic forecast in our budget to be sure we have enough to cover our needs. But since what we do with the Federal budget has an effect throughout the economy, we run the danger here of making a self-fulfilling prophecy. Other approaches may offer similar thorns.

I am very pleased to understand that this Committee will be holding technical hearings in the near future which will include problems of economic forecasting.

I do not have any ready answers to this problem. But I think it is vital that having two budget resolutions a year be a goal of the highest priority. If the Leadership and the Committee will assert to the general membership the importance of making our economic choices in a package deal—rather than stringing them out in several separate resolutions—then I think the power of the Congress over the Federal purse strings not only will be preserved, it will increase. It will, I daresay, make us more effective policy makers than the Executive Branch.

If we do not, then we will only be where we were back in 1972, except we will have an added layer of paperwork and bureaucracy to deal with here in our own domain.

Regarding impoundment, I think our major problems are of a fine-tuning nature.

One of the most visible impoundment problems has been the effective impoundment of rescissions during the forty-five day waiting period for Congressional action.

Quite frankly, I fail to see where the Executive and the Comptroller find the authority (or lack of clarity) which has been used to allow the impoundment of funds during the rescission waiting period. Section 1012(b) of P.L. 93-344 reads:

"Requirement to Make Available for Obligation.—Any amount of budget authority proposed to be rescinded or that is to be reserved as set forth in such special message shall be made available for obligation unless, within the prescribed 45-day period, the Congress has completed action on a rescission bill rescinding all or part of the amount proposed to be rescinded or that is to be reserved."

The law is quite clear to me. The money shall continue to be available until Congress acts.

I am reminded of the statement by Charles Dawes, the first director of the Bureau of the Budget back in 1921. In his book "The First

Year of the Budget of the United States," Dawes says, "Again I say, we have nothing to do with policy. Much as we love the President, if Congress, in its omnipotence over appropriations and in accordance with its authority over policy, passed a law that garbage should be put on the White House steps, it would be our regrettable duty, as a bureau, in an impartial, nonpolitical, and nonpartisan way, to advise the Executive and the Congress as to how the largest amount of garbage could be spread in the most expeditious and economical manner."

This is a bit facetious, but I think it makes the philosophical point.

Of course, in our government, matters are seldom so simple, and the question immediately comes to mind: What if the White House steps had been completely covered with garbage for less money than had been appropriated. Would this not allow a "reserve" to be established first, and then a rescission proposed, as described in Section 1002 of P.L. 93-344?

Yes, it would. But this is not the same type of reserve as one where the Executive wants to stop the spreading of garbage on the White House steps. Section 1002 is clear that reserves may be established prior to Congressional action only when policy is not affected. It states:

". . . reserves may be established solely to provide for contingencies, or to effect savings whenever savings are made possible by or through changes in requirements or greater efficiency of operations . . . whenever . . . any amount so reserved will not be required to carry out the full objectives and scope of the appropriation concerned . . . and no reserves shall be established other than as authorized by this subsection."

I would like to append to this statement a letter I wrote to then-Chairman of the Budget Committee, Brock Adams, on this topic on April 8. 1976.

We may not be able to close the 45-day impoundment loophole entirely, but I think clearly we should allow the Executive to withhold funds during the 45-day rescission period only as a last resort. All other avenues must be exhausted first.

For instance, one avenue would be to require the Executive, whenever possible, to ask for the rescission in advance of the time they want to begin withholding funds, and to require the Executive to show why it could not do so if there were, indeed, some emergency.

On a related matter, there has been a lot of concern focused on the fact that the 45-day rescission period usually turns out to be a lot longer than 45 days because it excludes recesses of three days or more. Bills have been introduced to remedy this problem, and I wholeheartedly support the effort to do so. (These are the so-called Baucus and Muskie bills.) I firmly believe if the money described in a rescission message is being withheld, and Congress disapproves that rescission, the money should be made available that moment.

But in our concern to correct this loophole or potential for abuse, we should not forget the original purposes of the Act. We should not do anything which would legalize what is now an illegal 45-day impoundment except as an emergency measure of last resort. I would, therefore, prefer to come as close as we can to the bill originated by Father Drinan in this regard. In every possible case, money proposed for rescission should continue to be spent unless and until Congress acts to agree with the rescission.

It would be well, too, I think, to change the time limits on a rescission to 60 calendar days, as a further safeguard against extended, illegal impoundments, even on an emergency basis.

We have also apparently run into the problems of de-facto rescissions through chain-deferrals, or monies deferred more than once, or through money deferred for a considerable time or deferred until the spending authority ran out. To prevent this, we may want to require the Executive to place a front and end time on any deferral. We may also want to emphasize the GAO's authority to declare a deferral in fact a rescission and to clarify the definition of rescissions somewhat so that such instances would clearly fall under the rescission category.

In June of this year, the Comptroller General made a report to Congress on the Impoundment Control portion of the Act. In Chapter 4 of the report he listed several suggested revisions in the law, including stating the length of time for a deferral and changing to a 60-day rescission period. I would like to comment briefly on one other recommendation.

Several of the proposals suggest eliminating the requirement that all deferrals, including those authorized under the Antideficiency and other Acts, be reported. I would strongly disagree with these recommendations. Even though these deferrals have not been a cause of contention, it is important, I think, that the Congress and the GAO have a full reporting and a full picture of current Federal spending (and non-spending). It is important that the Congress have the ready information to determine that these are indeed routine and statutory deferrals and not have to depend on scattered information about some deferral labelled "routine" by the Executive which others may deem policy-oriented.

In conclusion, I applaud this Committee for moving forward to strengthen the Budget and Impoundment Act. If I can be of further assistance, I hope the Committee will feel free to let me know.

APRIL 8, 1976.

Hon. BROCK ADAMS,
Committee on Budget,
Washington, D.C.

DEAR CHAIRMAN ADAMS: I read with great interest the letters between Representative Ottinger and Senator Muskie in the April 2 Congressional Record (page 9275) regarding a problem with the impounding of funds which the President has proposed for rescission. The solution proposed in Senator Muskie's letter, however, seems to make legal a practice which is not now legal and which is constitutionally incorrect. Section 1012(b) of the Budget Reform and Impoundment Control Act states clearly to me that until a rescission is approved, the funds should continue to flow. I think that was the intention of the Congress regarding rescissions, which are in reality amended appropriations, as opposed to deferrals, which are to affect no changes in policy but simply to allow for an even flow of funding.

To authorize the use of impoundment resolutions in the case of funds impounded during the 45 day action period on a rescission request, therefore, would be to authorize an impoundment which the law now makes illegal.

I am curious on what basis the Executive Branch is basing its asserted right to impound money during this 45 day period. Is it Section 1002? If so, it seems Section 1012(b) should clearly take precedent since it is the more specific and deals directly with the specific procedure for rescissions. Perhaps Section 1002 could be amended to make that more clear.

If the loophole were closed, however, would practical problems arise where rescissions are requested because all the funding honestly is not needed to carry out the provisions of a law? If this is so, could not the Executive in the bulk of instances request the rescission far enough in advance that the Congress could have time to act—or some provision be made for the money to be made available but unexpended funds returned to the Treasury after a rescission is approved—or some other such solution enacted?

This whole issue is complex and it is most difficult to cover all the contingencies. I have had the utmost admiration for your work in steering the entirety of this important legislation through these early months. But, if possible, I hope that we will not allow the Executive to rule the roost on this and carve out for itself what amounts to a legal forty-five day impoundment without first exhausting any other routes.

I would be very interested to have your thoughts on this matter.

With best regards.

Sincerely,

J. J. PICKLE.

PANAMA CANAL

HON. JOE SKUBITZ

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. SKUBITZ. Mr. Speaker, I would like to share with the body a letter I received sometime ago about the Panama Canal. I am sure my colleagues will appreciate Spud's sage remarks:

DEAR CONGRESSMAN JOE: By golly, Joe, the lights were lighted and the beer flowed the night at Skeeters Cafe when we got the news of what you boys did on the Dent Minimum Wage bill! When ole Skeeter and Ernie from the Skelly station found out you all exempted businesses makin' less than $500,000 a year, I was proclaimed a local hero. Why I tell you, Joe, the boys wanted to name a monument for me. They decided that since there was a Washington Monument and a Coolidge Dam, there ought to be a monument to old Spud.

Joe, they wanted to name the town comfort station in my honor but I objected—it's always short on water and it don't smell so good. They finally settled on the town's Bandstand.

Well, Joe, the boys wanted me to write this letter to you in my capacity as the Treasurer of our town.

As you know, Joe, our town's finances aren't the best. After we floated them revenue bonds to finance the addition of a right turn arrow to the town's stop light, we have been kind of short of funds.

So we had this big town meetin' last Thursday at the library, Joe, and Kermit Winslow—he's the mayor—he asked for suggestions on how to raise funds for our town's physical year 1978 budget. Well, ole Ernie from down to the Skelly station thought we ought to have a car wash but Thelma Snyder was pushin' for a bake sale.

Well, Joe, we was about ready to go with the bake sale when the Robinson kid stood up from way to the back of the meeting room and says we ought to negotiate a treaty with the U.S. Government to accept the Panama Canal.

Kermit, of course, thought young Robinson was nuts and was about to gavel him out of order when our local Civil Rights advocate, Ms. Maud Clunk—who is a cross between Bella Abzug and Gloria Steinem—demanded he be given his right to speak. Ole Kermit reluctantly told him to go ahead but to be brief.

Well anyway, the youngster began readin' this article from the Current Argus about this Torrijas fella who runs Panama. That article said ole Jimmy Carter wants to give the Panama Canal away to Panama, but Torrijas says he won't take it unless Jimmy Carter throws in $5 billion—cash on the barrel-head—plus $200 million a year.

Now—ole Jimmy, he weren't born yesterday, he decides to drive a hard bargin. The fellas down here think he took Torrijas aside and told him he was pushin' his luck. He tells Torrijas he will only give him $295 million a year. Well, Joe, ole Torrijas must of threatened to walk out on the spot cause Jimmy agreed to throw in an additional $10 million a year from Canal revenues. Now I don't know where the editor got his information, but according to the Current Argus, it seems that Torrijas wasn't none too happy but he agreed to the deal after mutterin' something about a pebble in his shoes for 23 years.

Well, Joe, that brings me to the reason for which I am writing this letter. The town council instructed me to write the United States Government and extend the official offer of our town to take the Panama Canal for a flat $100 million—no annual payments involved and no strings attached. We will take $10 million in cash and the balance in sewer grants, a playground for the kids, a recreation house for us old coots, and surplus marching band uniforms and musical instruments.

Joe, we don't know nobody in Washington but you, so we would like for you to present our offer to the President. The town council told me you can accept the Canal on behalf of our town on the terms outlined above—$100 million. If the President really gets tough, you can go as high as $150 million but no higher.

Confidentially, Joe, we are concerned about one thing—we know what to do with the money and the band uniforms and instruments but I'll be gall-darned if we can figure out what to do with the Canal—we sure can't afford to sell it.

We do have one possibility, Joe. Ricky Henson has a brother who runs a big construction company up in Omaha. Ricky said he would ask his brother how much it would cost to fly all his machinery to the Panama Canal and fill it in.

Sincerely,

SPUD.

AMERICAN COMPANIES HELP DEVELOP COMMUNIST CHINESE OIL INDUSTRY

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. ASHBROOK. Mr. Speaker, our Nation is facing a worsening energy crisis. More than 40 percent of our petroleum supplies now come from unreliable foreign sources.

Given this situation, you would think that the United States would be making the fullest efforts to develop its oil and gas reserves. That is not the case, however.

Strangely, U.S. companies are selling millions of dollars of oil-drilling equipment to Communist China. According to a Washington Post article, an estimated $50 million in American drilling equipment has been sold to that country. Deals totaling millions more are in the works.

The Post states:

Sources here and in Houston, Washington and Peking say one Texas-based company has just sold Peking two self-contained drilling rigs for fixed offshore platforms at a total price of $20 million to $30 million. Executives of two other U.S. companies have just arrived in the Chinese capital to compete for the sale of moveable jack-up rigs costing more than $30 million each, Peking and Houston sources say.

This is ridiculous. Why are we building up the oil and gas industry of an adversary when we should be developing our own reserves right here at home? Why should U.S. firms export oil technology to Communist China when we need that technology to produce oil and gas for Americans?

It is a mistake to export our valuable technology to Communist China. The real beneficiary in such deals is Red China, not the United States.

The article follows:

[From the Washington Post, Nov. 27, 1977]

CHINA TURNING TO UNITED STATES FOR EXPENSIVE OIL-DRILLING EQUIPMENT

(By Jay Mathews)

HONG KONG, Nov. 26.—Intense negotiations under way in Peking have produced an estimated $50 million in sales of American drilling equipment to China and revived sluggish trade between the two countries, knowledgeable oil industry sources say.

Sources here and in Houston, Washington and Peking say one Texas-based company has just sold Peking two self-contained drilling rigs for fixed offshore platforms at a total price of $20 million to $30 million. Executives of two other U.S. companies have just arrived in the Chinese capital to compete for the sale of moveable jack-up rigs costing more than $30 million each, Peking and Houston sources say.

The sales, involving several American companies that have been actively courting the Chinese over the last few months, indicate Peking has decided to overlook its diplomatic problems with Washington in its rush to gain advanced U.S. oil technology. The negotiations are the most concrete sign to date that China is determined to become an industrial and trade leader through development of its rich oil resources.

Chinese Communist Party Chairman Hua Kuo-feng has called for creation of 10 more oil fields like China's huge complex at Taching in Manchuria. Peking is softening its earlier insistence on economic self-reliance to get foreign help for the crash program. There are reports of approaches to European firms, including a huge order for West German drilling pipe, in addition to the talks with U.S. suppliers.

Caterpillar Tractor Co. of Peoria, Ill., has sold the Chinese about $10 million worth of engines for running oil-field equipment in the last few months. One Texas firm that sold what an executive describes only as a "few million dollars' worth" of petroleum equipment to China recently has had a representative in the Peking Hotel since summer. He has been asked to return for more talks after his Christmas vacation in Houston.

Oil industry sources seem confident that the initial purchases by Peking are only what one described as "the tip of the iceberg." But some note that the Chinese persist in sticking to penny-pinching practices that in at least one instance have caused them trouble in putting advanced U.S. technology to use.

Since 1975, the Chinese have bought three jack-up rigs from a Singapore supplier, Robin Loh, that have included some sophisticated American equipment. One of the $30 million rigs broke down this year after the Chinese declined to buy the customary training program for their rig crews.

In September, several American technicians, not sure where they were going or why, were whisked out to the drilling site off the South China coast and asked to save the floundering rig, which they apparently managed to do.

In the most significant of the deals completed so far, National Supply Co., a division of Armco Steel based in Houston, has won a contract to provide two self-contained rigs to be installed on Chinese-made platforms, probably in the shallow waters of the Po Hai Gulf.

Sources familiar with the negotiations say the Chinese will only pay "packaging" costs—the price of having American technicians float the rig parts out to the platform and install them—for the first rig. They plan to install the second rig themselves, after watching how the Americans do it.

Industry sources say Livenston Shipyards of Orange, Tex., and Marathon LeTourneau of Vicksburg, Miss., now have representatives in Peking talking about purchases of more jack-up rigs. The jack-ups, which can be moved by pulling up their legs from the sea floor, are used in oil exploration while the fixed platforms are usually set up over proven oil pockets.

There have been persistent rumors that the Chinese have contacted American firms for the purchase of a semi-submersible rig, a huge barge that is kept steady over a drilling site by computer-run engines. None of the American sources reached could confirm negotiations for such a rig, which can cost as much as $50 million.

Earlier this year the Chinese bought their first semi-submersible and fourth foreign, rig—the "Borgny-Dolphin," from Norwegian Fred Olsen.

As part of Washington's semi-official effort to encourage trade with Peking, a 10-member delegation of the National Council for U.S.-China trade has arrived in Peking to conduct technical seminars for Chinese oil industry executives. The council sponsored a major tour of American equipment companies by a Chinese delegation last summer, the first step toward the current negotiations.

The Chinese appear to be following their rule of favoring companies with long-standing relationships, such as National Supply or Houston's Baker Trading Co., whose president, J. Ray Pace, is now in Peking. National Supply had furnished some equipment for the Robin Loh rigs, which gave it an advantage over its Houston competitor, Continental Emsco, in the negotiations over the fixed platform rigs.

The oil executives are reluctant to discuss the negotiations publicly, for fear of alerting competitors or offending the publicity-shy Chinese.

The executives say it is not yet clear how the Chinese plan to finance the equipment purchases. Some bankers expect the Chinese to use the deferred payment schemes they favored in major plant purchases in 1974. Payments on those purchases have now wound down to where the Chinese can afford a new round of buying. Executives do not expect the equipment being purchased now to be deliverable before the middle of 1978.

American oilmen say they have been lectured occasionally about Washington's failure to extend full diplomatic relations and to solve financial and trade disputes left from the Communist takeover of the mainland in 1949. But asked if the Chinese had threatened to take their business elsewhere if normalization did not come, one veteran oil executive said, "They have made a point of not saying that."

VIVIAN V. BAILEY

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. ADDABBO. Mr. Speaker, the New York Daily News on November 20 ran

an article about one of my constituents, Vivian Bailey, whose work and involvement with her fellow human beings would be an inspiration to anyone. She is one of the best examples I can think of for our citizens to emulate, and I would like to share her story with my colleagues.

Accordingly, Mr. Speaker, I include this news article in the RECORD:

IF DEEDS WERE INCHES, SHE'D BE TALL INDEED

(By Mary O'Flaherty)

She's just four feet, 10 inches tall, but those who know Vivian V. Bailey of St. Albans are prone to call her, with obvious admiration, a "dynamo."

She's president of the 105th Precinct Community Council, but this is just one of the many community organizations that Mrs. Bailey, a grandmother and city worker, has been giving her time and efforts to over the years.

She's the immediate past president of the St. Albans Civic Improvement Association and a former vice president, from 1969 to 1973, of the Jamaica branch of the NAACP.

HAS OTHER ACTIVITIES

She's also active with the Queens Society for the Prevention of Cruelty to Children, of which she is secretary as well as a member of its executive committee.

Add to all this her membership in Community Planning Board 12, the Borough President's Committee for Community Affairs, the Citizens Committee for a Medical College in Queens and several other Queens groups, and you'll begin to understand why she's called a dynamo.

Mrs. Bailey herself says simply, "If you really want to participate in community groups, you can. . . . There is one for it if you want to do it.

TV STARING IS OUT

"People spend a great deal of time staring at that little TV box and feel there are many more important things that deal with the real quality of life in your community. Less TV-viewing and more doing things for the community would be better."

Mrs. Bailey, whose dark hair is graying, is the wife of Austin Q. Bailey, an electrician, and mother of a married daughter, Carol Reed, who has four children.

The Baileys moved to Queens, settling in St. Albans, about 24 years ago and Mrs. Bailey soon became interested in community activities. In addition, for 26 years, she has been employed in the city's Human Resources Administration Department of Social Services, where she now holds the administrative job of office manager of Protective Services for Adults.

Traveling back and forth daily between her Queens home and her job in downtown Manhattan means an hour and a half trip each way. Energetic Mrs. Bailey uses the subway ride to think about her community activities.

"I DON'T WASTE TIME"

"I get on at the beginning of the line, both in the morning and in the evening and so I always have a seat," she explained. "Therefore I can concentrate on different things during the subway, make notes and plans.

"I don't waste time in the subway. I try to make every moment count if possible. Sometimes, if I find I'm a little bushed, I let myself drift away for a little while, then wake up and go along with the task."

Finding the time and energy to help other people has earned Mrs. Bailey many awards. However, she hasn't even counted them and so modestly says only that she has "a few."

CITY'S HIGHEST AWARD

To name some of them—there is the national citation she received last April (1977) for her volunteer activities and the city's highest award for volunteer work—the Mayor's Volunteer Service Award—which was presented to her at Gracie Mansion last year for her efforts in developing better relations between the community and the officers of the 105th Precinct in Queens Village.

Back in the '60's when she was involved in the civil rights struggle she was given a community service award by the New Omicron chapter of the Omega Psi-Phi fraternity. This was for her leadership in getting donations of 50,000 cans and boxes of food—22 tons—from the residents of southeast Queens for the people of Selma, Ala. For this undertaking in 1965 she rallied the cooperation of Queens churches, schools, civic and fraternal organizations.

FIRST WOMAN PREXY

Other recognition of the Queens woman's service to her community include awards from the South East Queens Community Corp., Jamaica Chamber of Commerce, the 29th A. D. Regular Democratic Club and the Jamaica Club of the National Association of Negro Business and Professional Women.

She was the first woman president of the St. Albans Civic Improvement Association, serving one one-year term and two two-year terms until last June. She is now a member of the board.

Besides being a member of the Jamaica Branch of the NAACP she also belongs to several other NAACP units, including the Corona branch.

She doesn't count how much time she gives to her various community service activities. "You don't really notice it after a while," she said.

RALLY OPPOSING GIVING THE HOLY CROWN OF SAINT STEPHEN TO THE COMMUNIST GOVERNMENT OF HUNGARY

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Ms. OAKAR. Mr. Speaker, today I will be joining with thousands of Hungarian-Americans and other freedom loving people in a huge rally in Washington to express our opposition to the President's proposal to give the Holy Crown of Saint Stephen to the Communist Government of Hungary. In addition, I will be reintroducing the bill I authored, the Hungarian Crown of Saint Stephen Protection Act, with additional cosponsors. This bill would forbid return of the Crown unless Congress approves by specific legislation.

The support which this effort to save the Holy Crown has gained both in Congress and among the American people generally is very heartening. The Holy Crown is a sacred symbol of Hungarian independence and freedom, and the more people become aware of its significance, the stronger is the opposition to giving it to the Soviet dominated government of Hungary that is now in power.

For the information of my colleagues, I would now like to insert into the RECORD a copy of the statement I will give to the rally today.

STATEMENT OF CONGRESSWOMAN MARY ROSE OAKAR

It is truly an honor for me to join with you here in what is perhaps the most important cause in the world today: the effort to guarantee to all people, everywhere, those human rights which we in this country consider to be inalienable. For in urging that the United States not return the Holy Crown of Saint Stephen to the present Communist government of Hungary, we are saying that Hungary today is not a free land. We are saying that the Soviet domination of Hungary and the other countries of Eastern Europe, denying those people the basic right to self-determination, is wrong. And we are saying that the United States should not place its stamp of approval upon the Kadar government by giving to it the Holy Crown, which for nearly 1000 years has been a sacred symbol of Hungarian independence and freedom.

It is because the issue of the return of the Crown is a basic issue of human rights that those of you of Hungarian ancestry are today being joined by people of many other nationalities in the effort to save the Crown. While the Crown was given to King Stephen of Hungary in 1001 A.D., the ideals of freedom and self-determination for all, and the commitment to religious values that the crown embodies, are very much international in character.

So deep is your commitment to these values symbolized by the Crown that many of you have traveled many miles to Washington, to the seat of our government, to speak out in their behalf. In doing so, you are exercising one of the basic rights guaranteed to us by the Constitution of the United States, the right to assemble peaceably and petition the government for a redress of grievances. I commend you for your dedication to this cause, for in your presence here today, you are acting in the spirit of freedom which guided the founding fathers of this land.

Unfortunately, today there are many individuals who seem to have forgotten this spirit of freedom. For the purpose of expanding international trade—for mere material gain—they would sacrifice America's commitment to human rights abroad. Greater international trade may be desirable, but we should never, never seek expanded trade with a country if the price for it is our being silent about deprivations of human rights.

I see the loss of this spirit of freedom among some public office holders, too, in the recent action of the Los Angeles City Council in refusing to name a street after the great Polish general who was instrumental in the American Revolutionary War, Thaddeus Kosciuszko. These officials complained that the name was "too long" and "too hard to pronounce."

Let me assure these officials that the people of Cleveland have never had any problem in pronouncing the name of Kosciuszko Avenue in Cleveland, and neither have the people of the many other cities of the Midwest who have named a street after this hero of our war for independence. Let me also warn these officials that a nation which fails to honor the great leaders of its past will soon forget the great ideals for which they stood—and for which we are speaking out here today.

Similarly, on the issue of returning the Holy Crown to the Communist government of Hungary, President Carter and others in the State Department appear to have forgotten both the tremendous significance of the Crown, and the proud heritage of our nation on issues of human rights. Thus you, the people, have come to Washington to speak some common sense to your lawmakers, to remind them of our heritage, and of what the crown means to the Hungarian people and to all of us who value human rights—truly the Crown of Saint Stephen is the Crowning Glory of Human Rights for all people.

We must not lose sight of the fact that human rights fought for by generations before us have helped to make our own land

great—have helped to build our industrial strength and our own pride in a land where the freedoms hard fought in other homelands would be respected on our soil. The United States traditionally has been the aggressor in pursuing improved trade relations with many other countries, yet too frequently our concessions in pursuit of this course of action works to the detriment of our own people—as we have most recently seen in our steel industry. We must respect those past and present who toil on our soil because it represents the freedoms we all hold dear. We must stop making concessions under the guise of improved trade relations.

Let us make the message to President Carter and to all the Senators and Representatives of this land very clear—the Holy Crown of Saint Stephen must not be returned to Hungary except on two conditions. First, All of the Soviet Troops which now occupy Hungarian Territory—The Soviet Troops which spilled Hungarian blood in crushing the valiant revolution of 1956—must be withdrawn. Secondly, free elections, resulting in a government which truly reflects the will of the people, must be held in Hungary. Return of the Crown upon any lessor conditions than these cannot and will not be acceptable to us.

I wish Godspeed to all of you, and I look forward to the Day—which I know will come—when all of us can gather in a free Budapest and can, with a full and joyful heart, return the Holy Crown of Saint Stephen to a Hungary that is truly free and independent—a Hungary that is as much a government of the people, by the people and for the people . . . as is our own great United States.

GOV. MILTON J. SHAPP'S ADDRESS AT THE PENNSYLVANIA STEEL CONFERENCE

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. MURTHA. Mr. Speaker, Gov. Milton Shapp of Pennsylvania met with the steel caucus executive committee today and presented his dynamic suggestions to increase the production of steel.

His suggestions regarding steel in relation to railroads would create 100,000 jobs alone.

Governor Shapp has been in the forefront of this issue and I include his presentation to the steel caucus.

GOVERNOR MILTON J. SHAPP'S ADDRESS

PITTSBURGH.—The present steel slump could trigger a major recession in the United States unless effective national and state programs are quickly developed to deal with the core problems.

The purpose of this conference—being held in the nation's steel capital, Pittsburgh—is to analyze the major causes of the present crisis and to develop programs of action to deal effectively with these problems.

This is a crisis which, although years in the making, suddenly has become the focus of national attention. The President has appointed a task force to recommend new policies; foreign trade experts are closely examining the steel imports issue; and more than 100 Congressmen and Senators have formed a steel caucus to coordinate legislative actions.

We in Pennsylvania, and in steel states and communities across the nation, must also respond. We will be the ones most directly affected by policies that the President and Congress develop. We must also respond because there are many states and local programs and policies which have direct impact on the steel industry.

Thus I want to suggest three objectives for this conference and for the activities which will be taken to follow-up today's session:

First is fact-finding. I am hopeful that each of the task forces today will develop a statement of facts and issues which reflects the situation here in Pennsylvania and in states and communities across the nation.

Second, I am hopeful that the conference and succeeding activities will yield a thorough review of state and local policies and program as they affect the steel industry. Six of my cabinet officers will participate in the task force sessions scheduled for today. Their purpose is to expedite recommendations for state action, which may range from retraining programs for laid-off steel workers to investment in public works to aid directly the industry.

Third, I think the conference must focus on national policies and programs. Rather than being the recipient of unforeseen impacts of policies conceived in Washington, we as Pennsylvanians should state our problems and recommend solutions that will benefit all citizens of the commonwealth and of the Nation.

Pennsylvania has much at stake. We are the leading steel-producing state in the Nation. Though the steel problem is national—in fact, international in scope—our state, the home base of the largest American steel companies, accounts for more than 20 percent of all American steel production, and thus, is the state that is hardest hit by the present crisis.

All kinds of reasons are being advanced as the causes of this current situation—foreign imports, obsolete American steel plants, the general slowdown in the American economy, less steel needed by automobile manufacturers, fall-off in highway, bridge and housing construction projects; large capital outlays needed by steel manufacturers to meet environmental standards, high labor costs and the low productivity of our steel plants, etc., etc., etc.

Each of these reasons has some validity, thus the solution for our steel manufacturing problems is not simple.

But effective programs must be developed or there is a grave danger this nation could slip into a depression period of major depth and length.

In Pennsylvania, 10,000 steel workers have been laid off in the past three months alone. Twice that number of jobs has been lost in the steel industry in our state in the past three years and five times that number in the last decade. The ripple effect is even more devastating on our economy.

For example, when Bethlehem laid off 3,500 employees in Johnstown after the flood in August, 1,800 coal miners in the area also lost their jobs. Another 5,000 jobs are being whittled away in wholesale and retail businesses, in transportation and other sectors of the economy. The costs of the Johnstown layoffs include annual income reduction of nearly $150,000,000 and loss in tax revenue to the state and local government of over $5,000,000 a year. These layoffs will also cost at least $18 million just in unemployment compensation.

These same losses have occurred across the commonwealth in recent months: In Philadelphia where the curtailment or closing of the Alan Wood, Midvale and Phoenix steel companies have cost 7,000 jobs . . . in Bethlehem where 1,500 have been laid off . . . in the Mon Valley where several large facilities are struggling to maintain viability . . . in New Castle, Sharon and Farrell where the layoff of 5,000 workers from the nearby Youngstown, Ohio mill has boosted unemployment substantially . . . and in a score of smaller communities.

We are now paying, in the form of lost jobs, lost income, lost tax revenues, and inflated unemployment compensation and social costs, for the failures of past policies to maintain demand for steel and to stimulate, on a continuing basis, modernization investments in the steel industry. These same dollars which are now committed to the nonproductive support of the unemployed, and to the payment of trade adjustment assistance to industries, could be targeted to programs to increase demand for steel and to modernize the productive capacity of the industry.

Many suggestions have been advanced to cure the ailing American steel industry—from imposing import quotas to granting investment credits to steel companies for modernization purposes.

In your panel meetings at this conference, undoubtedly you will be discussing these issues. But I would like to present for your consideration what I consider to be the key program for action to revive the steel industry in America—an issue that unfortunately, has not received as much attention as it deserves.

We should be developing major public sector investment programs in the United States that would directly stimulate significant new demand for steel products and, through such programs, also greatly increase demand for steel in the private sector.

For example, in 1974, I advocated that the Federal government establish a rail trust similar in nature to that of the revolving highway trust fund. We all know the dilapidated condition of our American railroads. There is no way we can possibly fulfill President Carter's national energy objective to increase coal production to a billion tons a year without modern, high-speed rail service in the Appalachian, Mid-West, Mid-Atlantic and New England States.

The rebuilding of our railroads calls for an investment of approximately $20 to $22 billion. This investment could be repaid by adding a small surcharge on the rail freight bills. The concept is not new. The four cent per gallon federal gasoline tax has already brought many billions more dollars back to the United States Treasury than the amount invested in building the interstate highway system.

To rebuild rail roadbeds throughout the Nation will require more than five million tons of steel. New locomotives and freight cars and electrification of main lines in order to cut energy requirements by at least a third, will demand many additional millions of tons of steel.

Congress adopted the principles of the rail trust fund program in the 1976 Rail Act, setting aside $1 billion for rail improvements, including electrification, with the money to be advanced to the railroads and repaid to the Federal Treasury over a period of years.

This is not nearly enough money to do the job, but to date neither the U.S. Transportation Department, nor the railroads has fully implemented even this program. I think it is time to re-examine this plan, for it attacks the triple problem of our energy shortage, deteriorating railroads and the steel crisis.

Mass transit construction is another area that could utilize tremendous quantities of steel simultaneously while reducing this Nation's reliance upon imported oil. The present funding available to urban areas is ridiculously low in view of the massive transportation flight of almost every major city in the Nation. Here again, enormous quantities of steel could be put into constructive use.

In another public works area, it is estimated that a staggering number of more than 100,000 bridges in the Nation (3,000 in Pennsylvania alone) are unsafe and badly in need of major repair or replacement. The tonnage of structural steel needed to make our bridges safe in America could be a major

additional source of demand. By undertaking a sincere effort to repair these bridges, we would not only be aiding the steel industry, but also helping protect the lives of countless motorists. Highway construction and maintenance is also in the doldrums in Pennsylvania and many other States because of lack of funds.

In Pennsylvania this problem is acute because of the dire fiscal condition of our state motor license fund which finances all highway construction and maintenance. Right now, new construction of state highways and bridges is at a standstill, and maintenance has been curtailed because inflation and more efficient automobiles have reduced to a critical point the funds available for highway and bridge programs.

If the Pennsylvania general assembly accepts my recommendations for increasing the revenues to the motor license fund, and if this were coupled with essential new federal programs to support maintenance of the interstate highways in Pennsylvania and the other states, this would stimulate demand for steel to make vitally needed highway improvements which in turn would help the national economy.

In another area, the slump in building construction has cut steel shipments in this sector by more than 40 percent over the past three years. Yet major cities continue to decay and millions of our people are ill-housed.

There are many programs needed to stimulate the construction industry, but one simple one would be to allow builders a fast tax write-off on new construction. For example, if a builder could recapture his investment through depreciation in five or ten years, this would give great impetus to the construction and steel industries. Safeguards would have to be written into the law or regulations to prevent such depreciation from being used more than once, but this would not be difficult.

Such a tax program would be more effective to stimulate the steel industry than granting direct investment credits to the steel industry itself at the present time, with demand for steel so weak, it is not likely that such tax credits would serve as leverage to attract capital for new construction investments.

In a number of other areas, targeted public investments could have the same effects. Water and sewer construction, reconstruction of dams, and construction of energy research facilities are just some examples of investment projects which not only would stimulate demand for steel, but also would yield large social benefits.

Stimulating demand is a far more positive solution than one that calls for the erection of trade barriers. I know that industry, labor and members of our Congressional delegation have called for stronger import restrictions on foreign steel. The three-year import restriction on specialty steel seems to have revived this industry somewhat, and I can sympathize with current efforts to extend those restrictions.

I certainly agree that dumping—that is, the selling of foreign steel in this country below cost—is a practice that should and can be stopped by enforcement of our international trade agreements.

However, we are gravely mistaken if we believe that an end or even a major curtailment of dumping will completely solve the current steel crisis. Foreign steel has made inroads into our domestic market through production in modernized and more efficient plants.

American labor has been unfairly maligned as a costly factor in American steel production. But, steel workers in Japan and the major European steel-producing countries have steadily narrowed the percentage gap between what they and American workers earn. These nations have absorbed rising labor costs through increased production and sales. We can do the same.

On the other hand, we cannot expect industry to invest in new production capacity unless there is increased demand for steel. As I said, much of that demand can be created by targeting public funds for long-neglected public works programs.

There are those who complain that our national and state anti-pollution laws have siphoned-off much of the steel industry's investment capital. There is some validity to this claim. However, it is clear that if we fail to cleanse our air and water and to protect our land, the social costs to this nation will far outweigh the minimum capital that might be freed for the industry.

Unfortunately, the nation's pollution problems were ignored for too many years and recent efforts to control pollution have proven a sudden, heavy expense. Therefore, we should explore methods of financing pollution programs that do not severely penalize our manufacturers, particularly those with older facilities. This can be done through tax incentives including more rapid write-offs—perhaps even immediate write-offs—on investments for anti-pollution equipment.

In this statement, I have merely skimmed the surface of the range of problems facing our steel industry and outlined what I believe are some basic programs that offer the greatest hope for recovery.

You will delve into these problems in greater detail at your sessions today. As you do I would remind you that time is running against America and that a comprehensive agenda for positive action is needed now.

We will make our recommendations to Washington. But there is much we can do at the state level too. You, the representatives of industry and labor have direct access to me, to my cabinet and to other key officials in our state government. Let us work together on a swift and effective course of action, for none of us can afford to let the problems of our steel industry remain unresolved.

Thank you.

EDUCATION CHIEF PRAISES CHINESE COMMUNIST SYSTEM

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. ASHBROOK. Mr. Speaker, it seems that apologists for totalitarian systems always will be with us. On the basis of a November 20, 1977, Washington Post article one of these apologists is Mary Berry, Assistant Secretary for Education of the Department of Health, Education, and Welfare.

According to the Post article Mary Berry has returned from an 8-day visit to Communist China. She finds that we have much to learn from the Communists.

Assistant Secretary Berry sees the Communist system "moving rationally and realistically" by using university admissions quotas for students from different areas and various ethnic groups "in a field that has led to confusion and near-hysteria here." A little later she is quoted as saying another goal is to guarantee that a majority of students "have worker and peasant backgrounds."

Here we see the Carter administration's top education official praising an educational system that allows no individual choice and little advancement on merit. The Red Chinese educational system rests on coercion. Neither students nor their families have any choice in what they can do or where they will go to school. They simply follow orders.

Not only do the masses have no choices but they also have very little opportunity to obtain higher education. If your parents or grandparents were "petty bourgeoisie" or "bourgeousie" the odds that you can get any higher education are slim indeed. To fit in these categories you do not have to come from a family of wealth. If before "liberation" your family owned an acre or two of land or ran a small shop that would probably be enough to exclude you from any chance for higher education or even for a job with any upward mobility.

Also, it is interesting to note that while Berry applauds the Chinese Communist system of goals, quotas and various coercive affirmative action programs the American people reject these overwhelmingly. In matter of fact, the same day's Washington Post that carried the Berry article also ran a story saying the Gallup poll shows that 80 percent of the American people oppose preferential treatment and believe that ability should be the prime determinant in selecting people for jobs or for college admissions. At the end of my remarks I am including the text of this article.

Assistant Secretary Berry continues with the same lines:

> The direction of their overall policy—in terms of access to education as something inextricably linked to the other aspects of human life—should, I believe, represent our basic direction also.

In the 1930's you could find apologists for Hitler praising the Nazi's school systems and their emphasis on racial purity. In the 1970's we find their equivalents praising the Chinese Communist system and their emphasis on class purity. Times change but the willingness of some Americans to applaud mass murderers apparently does not.

According to the Post article, Berry also related how elementary schoolchildren assembled voice boxes for dolls and high school students labored in automobile part factories. To quote the Post, " 'Obviously we have no intention of putting 6-year-olds to work here,' she said in her speech. But Berry added in the interview: 'There's nothing wrong in having school children making something useful and selling it. They could use the money for extra things in the schools.' " Look at the opportunities. We can do away with the child labor laws. Students can spend part of their days in physical labor with the proceeds not going to themselves or their families but to their schools.

Again according to the article, Berry spoke in glowing terms about the Communists requiring students to work on farms and factories often hundreds or thousands of miles from their homes and families. Is this what the Assistant Secretary is urging for the United States?

Of course, the Communist Chinese force students to do these things for several reasons. One is that they have con-

sistently attempted to weaken the Chinese family—one of the strongest institutions in the country. Children are told it is their duty to inform on their parents for any antistate attitude. Another is that mainland China's economy is not one of the greatest in the world and it relies on just such serf or slave labor as this to continue.

But the Assistant Secretary did not agree with her Communist hosts on everything. It seems she thinks that they are starting to put too much reliance on tests in the schools. Same old liberal, socialistic garbage from top to bottom. It should offend all decent Americans who are not brainwashed by their Communist hosts.

At this point I include the text of the article entitled "Education Chief Lauds Chinese System" from the Washington Post of November 20, 1977. If this article is substantially accurate and I have seen no disclaimers, President Carter and Secretary Califano have a responsibility to the American people to make a change in the position of Assistant Secretary for Education.

[From the Washington Post, Nov. 20, 1977]

EDUCATION CHIEF LAUDS CHINESE SYSTEM

(By Lawrence Feinberg)

After an eight-day visit to China, Mary Berry, the Carter administration's top education official, said Americans have much to learn from Chinese schools and colleges.

Berry, who is assistant secretary for education in the Department of Health, Education, and Welfare, said the Chinese are "moving rationally and realistically" by having university admissions quotas for students from different regions and minority ethnic groups "in a field that has led to confusion and near-hysteria here."

She said the Chinese "have set the pattern for the world to follow" by opening up universities to older workers and other adults and by tying education closely to work by requiring students to spend part of their time on farms and in factories.

The Chinese experience, Berry said "may not, in every instance, be directly applicable here. But the direction of their overall policy—in terms of access to education as well as of redefinition of education as something inextricably linked to the other aspects of human life—should, I believe, represent our basic direction also."

Berry toured schools in China—from nurseries to colleges—between Oct. 28 and Nov. 4, as part of a delegation of 14 prominent American educators. She met with China's minister of education, Liu Chai Yao.

She described her trip and expressed her views on Chinese education in a speech delivered in Chicago Thursday at the University of Illinois at Chicago Circle. A text of the speech was distributed by her office here.

In an interview here yesterday, Berry said American press reports about a reversal of Chinese education policies following the death of Mao Tse-tung were "premature" and "misleading."

Even though college entrance exams are planned for December for the first time in a decade, Berry said, "I don't see the Chinese giving up any of their [egalitarian] principles. . . . They said they don't want to face another cultural revolution in five years and create another kind of elite."

She said recommendations by local party and factory groups still play an important part in university admissions. In major national universities, such as the one in Peking, she said, quotas are being continued for different regions of the country and minority ethnic groups. Another goal is to insure that a majority of students "have worker and peasant backgrounds." Test results, she said, will only be used to help pick those to be admitted from within each quota group.

"The Chinese talk about this in a much more straightforward way than we do," she said. "They don't talk about 'affirmative action' and 'reverse discrimination.' . . . I tried to explain the difference to them between quotas and goals, but they couldn't follow all that.

"They have a healthy attitude toward disadvantagement," she continued. "It's 'Let's have quotas to make sure we have a percentage of different groups (in universities).' They're not concerned about the subtleties like we have to be."

Berry said the Chinese system of requiring students to work on farms or in factories was much different from the "career education" being promoted in American schools because it means "doing actual useful productive work."

During her visit, she said, she saw elementary school children assembling voice boxes for dolls and high school students working in factories that make automobile parts.

"Obviously, we have no intention of putting 6-year-olds to work here," she said in her speech. But Berry added in the interview: "There's nothing wrong in having school children making something useful and selling it. They could use the money for extra things in the schools."

On one point, Berry said, she disagreed with her Chinese hosts. "For some reason the leaders believe in tests now and claim that Mao always did as well. In fact, they have more faith in examinations than I do," she said. "I tried to warn them of the pitfalls, but to no avail."

[From The Washington Post, Nov. 20, 1977]

THE GALLUP POLL: 80% MAJORITY FAVORS ABILITY AS CRITERIA FOR ADMISSIONS

(By George Gallup)

PRINCETON, N.J.—The U.S. public continues to believe that ability, as determined by examination, and not preferential treatment to correct past discrimination, should be the main consideration in selecting applicants for jobs or students for college admission.

An overwhelming proportion of the public—eight in 10—oppose preferential treatment. Even nonwhites and women, who have most to gain by affirmative action, vote for making ability, as determined by tests, the main consideration in filling places in industry and college.

At the same time, however, a majority of Americans, 53 per cent, would favor preferential treatment in the form of a federal government program offering free educational or vocational courses that would enable members of minority groups to do better in tests.

The issue of "affirmative action"—described by its critics as reverse discrimination—is now before the Supreme Court.

Most in favor of offering free courses to help minorities compete for educational and occupational opportunities are women, nonwhites, persons with a college background and younger adults (18–29 years old). Even among those opposed to preferential treatment, opinion is 5-to-4 in favor of free courses being provided.

The results reported today are based on interviews with 1,517 adults, 18 and older, conducted in more than 300 scientifically selected localities during the period Oct. 21–24.

MINIMUM COMPETENCY TESTING

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. MOTTL. Mr. Speaker, I would like to offer for the RECORD two recent editorials in the Tampa Tribune and the Kansas City Times, respectively, concerning my proposed minimum competency legislation:

[November 7, 1977]

AN OFFER SCHOOLS CAN SCARCELY REFUSE

What began as an extremely heavy-handed attempted intrusion of the Federal government into the battle for the basics in the nation's public schools may emerge as a constructive piece of legislation.

U.S. Representative Ronald M. Mottl, an Ohio Democrat, originally showed his concern for declining college entrance test scores and other evidence of the ineffectiveness of education by proposing a national competence test.

It would have been administered at various grade levels in the schools of all 50 states. Students would have had to pass it to get their high school diplomas, and school systems would have had to use it to qualify for any Federal education money.

This brought a hue and cry from educators who charged Mottl sought to usurp the traditional prerogative of states to run their schools without Federal interference.

Properly chastened, Mottl has revised the bill to make the tests voluntary—sweetening the pot for school systems using it by providing Federal funds for remedial education for those pupils who could not pass the test.

There's little doubt that such money is needed from somewhere. Most funds now allocated from Washington for remedial schooling are earmarked for the financially underprivileged. Unfortunately, they are not the only pupils who need remedial education.

The recent study of reasons for the 14-year decline in college entrance test scores noted that for the past five to seven years only 20 to 30 percent of the slippage can be attributed to more poor and minority students taking the test. The other 70 to 80 percent is blamed on broken homes, poor motivation, too much television, and declining school standards, which afflict all types of pupils, rich or poor, black or white, Anglo or Spanish-speaking.

Mottl says arguments that national standards can't be met are ridiculous; it can't be said, "In the East we read this way and in the West we read that way."

He's right. And the nation owes it to its miseducated youths to help them achieve competency, wherever the blame for their inability to fill out job applications or figure costs of credit be put.

If Representative Mottl makes the testing program voluntary and provides remedial education funding, we don't see why advocates of state and local school autonomy can object. Indeed, considering the present poor competency of so many pupils, his new bill is virtually an offer no school system can afford to refuse.

[November 4, 1977]

TESTING BY NATIONAL STANDARD

Reports continue to filter into educational institutions telling a woeful story of failure to learn among the present generation of school children. With this continuing assault of bad news it is small wonder that a back-

to-basics movement in education has grown to the bandwagon proportion of back-to-nature efforts in consumer goods.

Twenty-seven states, by last count, have adopted plans for basic skills competency testing and all but one (Montana) of the remaining states are considering some form of basic skills testing.

Rep. Ron Mottl, D-Ohio, has proposed a national test to monitor basic skills. As one might imagine, Mottl's bill has met with extreme opposition from some quarters. An earlier bill proposed by Mottl included a mandatory testing requirement, threatening an end to federal funds for noncompliance. This time around Mottl makes the test voluntary. The word "mandatory" has a ring to it that frightens away even the most seasoned members of Congress, and Mottl still has had trouble finding cosponsors for the bill.

Stripped of all arguments pertaining to the subjectivity of tests, what with cultural and other biases considered, there is a bottom line to what Mottl is talking about—achievement. And while we do not endorse yet another federal agency or function to take care of what states ought to be doing in the first place, we do support statewide testing with comparisons to national standards.

Argue if you will that teachers can "teach" to a test. That is a far cry better than the illiteracy that is being perpetuated in school systems today. It is a national horror when a high school valedictorian, from any school district, turns out to be functionally illiterate.

The potential that tests have of diagnosing learning deficiencies at several intervals through a child's elementary and secondary school years is vastly preferred to presuming that things are fine—and then finding that a child has learned none of the basic skills in 12 years of school.

CONGRESSIONAL ART BANK

HON. LARRY PRESSLER

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. PRESSLER. Mr. Speaker, since coming to Congress, I have decorated my office here in Washington and in my field offices in South Dakota with art of South Dakota on a rotating basis. Each year I invite young South Dakotans to contribute drawings and art objects to brighten up my offices and to equip me better to tell South Dakota's story in Washington. The program has been an overwhelming success and it has caused me to introduce legislation to broaden such a program to a national scale. The following article describes my proposal:

THE CONGRESSIONAL ART BANK—OR BRIGHTENING THE HALLS OF CONGRESS

(By Congressman LARRY PRESSLER of South Dakota)

Just imagine the long, grey tunnels which connect the House and Senate Office Buildings and the U.S. Capitol filled with colorful paintings by contemporary American artists. That would be part of the effect of a Congressional Art Bank Bill which I have introduced in the House, and will soon reintroduce with changes and additional cosponsors.

The bill, which would authorize Congress to select recent American artworks for display in Congressional offices, tunnels and halls, would be an important first step towards using federal buildings for cultural purposes. If enacted, the bill would give critical exposure to contemporary American artists, and help beautify the often drab halls of Congress.

The Congressional Art Bank would resemble the five-year-old Canadian Art Bank in purpose but not structure. The Canadian model, part of the government's Canada Council which supports the nation's cultural life, buys contemporary Canadian art and leases it to government offices for 12 per cent of the cost of the work annually. For about $1 million a year, Canadian citizens can view as many as 3,800 paintings and sculptures in federal buildings and public places across the country. An additional 3,500 works are stored in the Bank's giant Ottawa warehouse to which only dealers are admitted. If a dealer or individual wishes to buy a work, the government may sell it back to the artist at the original cost plus a handling charge, but is not obliged to do so. The Bank thus has the potential ability to affect the Canadian art market by withholding works.

The Congressional Art Bank would provide the same exposure to American artists as its Canadian counterpart provided Canadian artists. Since the Congressional version would only borrow American works for a six-month period, it could not significantly influence the U.S. art market. The Congressional program would be directed by a five-member board—two appointed by the Speaker of the House, one by the President of the Senate and one each by the House and Senate Minority leaders. This would provide a more diverse directorate than one which is appointed solely by the administration in power. The program, which would be directed on a daily basis by an executive director and staff, could be extended after the first year if successful.

In re-introducing the Congressional Art Bank Bill, I am looking for suggestions from artists, art lawyers and those who buy or simply appreciate contemporary American art. A recent Louis Harris survey shows that 64 per cent of the American people would be willing to pay an additional $5 a year in taxes if the money were used for cultural purposes; 47 per cent would be willing to spend an extra $25. The American business community likewise donated $221 million to the arts in 1976, nearly $100 million more than in 1967, and more than double the government's 1976–77 budget for the National Endowment for the Arts. This growing public commitment to the arts convinces me of the potential support for a Congressional Art Bank, and I look forward to public comment on it.

In considering the project, however, it is worth reviewing the success of a similar program in New York City. Within the past year, the New York Organization of Independent Artists (OIA) sponsored and financed a 100-piece exhibit of works by 44 contemporary American artists in the U.S. District Courthouse in Foley Square. The exhibit was authorized under a recent, though little-known bill, the Public Buildings Cooperative Use Act, which encourages the use of public buildings for cultural purposes. The OIA footed a $400 bill for the exhibit, but won widespread media and public attention for the artists.

The OIA project put private interests to work to encourage the flourishing of American artistic life; the Congressional Art Bank would put government to work in the same way. Such projects are more suited to the United States than the Canadian Art Bank because they place government in the role of a promoter, not a determinant of cultural life. The American people, as art buyers and gallery-goers, set the nation's artistic standards and tastes. By bringing artists and their admirers together, yet leaving the choice up to the people, government insures the nation's artistic freedom and vitality. And by bringing American art into the halls of Congress, it will bring life and warmth to an often somber place.

IS NO ONE RESPONSIBLE?

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. ASHBROOK. Mr. Speaker, an alarming trend in our Nation is the failure to accept individual responsibility. More and more frequently we hear the argument that a person is not responsible for his actions because of some external influence.

"It's not my fault," an offender proclaims. "It's my environment, my social background, my poor upbringing, et cetera, et cetera, et cetera." Actions freely taken are later explained away as being the result of something or someone else.

A Washington Star editorial describes this trend as "a modern proneness to try to account for savage behavior by facile reference to some kind of conditioning, social or literary or theatrical. If it is not hunger or poverty or poor housing that is blamed, it is the sinister influence of books or television plays or movies."

This type of defense hit new heights of absurdity in a recent trial in Miami. There a boy who murdered an elderly woman who lived next door to him based his defense on the grounds that he was suffering from involuntary television intoxication. The crime and violence presented on television, the argument went, are to blame for the boy's brutal murder.

Such bleeding heart rhetoric is pure hogwash. Individuals have a free will and they are responsible for their actions. We must not condone savage behavior under the guise that it is somebody else's fault. Individuals are and should be held accountable for what they do.

As the Washington Star concluded in its editorial:

Madness takes many forms. Our modern madness may be the unreflective dismissal of the inescapable—and natural—need for moral judgment.

Following is the complete text of the October 7 Washington Star editorial:

THE NEED FOR JUDGMENT

Perhaps it was to be expected. If the Wirtz panel on educational testing could arraign television (with some justice, in our view) as a party to the decline of literacy among the young, the Miami defense attorneys of a 15 year-old named Zamora could—and would—offer the bizarre theory that he suffered from "involuntary television intoxication" when he shot and killed an elderly woman while robbing her apartment.

There are, to be sure, worlds of difference between the two attempts to make a culprit of television. The trial judge in Miami has sensibly disallowed a full-blown "television defense." But he is admitting psychiatric testimony on the influence of television and at least one "expert" witness tried the other day to connect the Zamora youth's inordinate fascination with televised crime and violence to the standard plea of "insanity." Florida law recognizes the older of two standard theories of criminal insanity, turning on the ability to draw moral distinctions rather than rational control over the impulses at the time of the criminal act.

The attempt to link crime with saturation in cops-and-robbers television shows is a novelty only in that it is television, not books or movies or plays, that is in a sense on trial. Otherwise, the trial pickup on an old debate over the effects of representational forms on human behavior—a debate that has, over the years, generated more passions than conclusions.

The most interesting treatment of the problem was by Mrs. Pamela Hansford Johnson (Lady Snow) in her book *On Iniquity*, about a decade ago. She took up the issue when the "moors" murderers, accused of torturing and killing children, were found to possess an extensive paperback library of sadistic and pornographic literature. Lady Snow insisted that if this obsessive reading taste possibly caused the murder or torture of children that would constitute a case for its control or suppression: as indeed it would.

The difficulty invariably lies in demonstrating a causal relationship, as to either sadistic books or violent television programs. Obviously, millions of people watch "Kojak," the program frequently cited at the Zamora trial, and others like it, and at least thousands familarize themselves with the diseased imagination of the Marquis de Sade and his imitators, without experiencing a rush of murderous or cruel impulses, let alone acting on them.

Is it more plausible to suppose that a morbid fascination with sadistic literature or violent trash-drama is a parallel symptom of some mental or spiritual disorder of which another symptom is insensitivity to suffering or death? No one knows; this hypothesized relationship, however stated, is one of the great imponderables.

What is less uncertain, in our view, is a modern proneness to try to account for savage behavior by facile reference to some kind of conditioning, social or literary or theatrical. If it is not hunger or poverty or poor housing that is blamed, it is the sinister influence of books or television plays or movies.

Again, it is clear that for most of us no such conditioning "causes" hostile or cruel acts. Significantly, Lady Snow, at the risk of seeming utterly out of date, turned to the old-fashioned term "iniquity": evil. Indeed, the missing element in our busy search for explanations of antisocial acts and attitudes is the hypothesis of evil, of proneness to what long ago was called sin. But we have become as prudish about diseases of the spirit as the Victorians were about diseases of the body and it is embarrassing to an enlightened age to speak or even think of such primitive matters. Secularism thus levies a heavy tribute upon our understanding; and the cost is that we thrash about for novel accounts of what to an earlier age was perfectly intelligible.

It was once commonly assumed that people not only lacked moral perfection but lacked even the capacity for it. That assumption is unfashionable today "The devil is dead and what a pity," as Gerald Johnson once put it. So in a courtroom in Miami we soberly entertain the trendy argument that a youth can be driven to the terrible crime of shooting an elderly woman because he has seen too many episodes of "Kojak." Madness takes many forms. Our modern madness may be the unreflective dismissal of the inescapable—and natural—need for moral judgment.

"A NEW CAPITAL OF THE INTELLECT?," AN ESSAY BY S. FREDERICK STARR

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. BRADEMAS. Mr. Speaker, I believe that Members of Congress will read with considerable interest an excellent essay by S. Frederick Starr published in the November 21, 1977, issue of The Chronicle of Higher Education.

The article, entitled "A New Capital of the Intellect?" makes the point that the vast scholarly resources of Washington, D.C., need to be made more accessible.

Dr. Starr is secretary of the Kennan Institute for Advanced Russian Studies at the Woodrow Wilson International Center for Scholars here in Washington.

Dr. Starr's essay follows:

A NEW CAPITAL OF THE INTELLECT?

(By S. Frederick Starr)

As Henry Adams liked to point out, Washington has always been regarded as a political city, indifferent if not actually hostile to the life of the mind. Indeed, from the Jacksonian era to the present, Americans have been accustomed to the notion that literature, the arts, and sciences are conducted at places remote from the seats of political and economic power.

But through a gradual process, little noticed and still less understood, Washington has recently emerged as a major intellectual center. That development has implications that will eventually touch nearly every American scholar.

A chief cause of Washington's new intellectual prominence is the increasing concentration in the capital of books necessary for scholarly research. According to the Association of Research Libraries the prices of academic books has risen by 167 per cent since 1967. The impact of inflation has been so great that even those major research libraries that have increased their budgets are falling behind in acquisitions. The library budget at the University of California at Berkeley has almost doubled in the last decade, but Berkeley's acquisitions are down by 13.6 per cent, while the University of Chicago's actual purchasing power for monographs is down to 50 per cent of the 1970 level, despite a 39-per-cent increase in the university's library budget. These figures parallel the data from 78 members of the Association of Research Libraries, which report a 36.5-per-cent budgetary increase since 1970 but a 12.6-per-cent decline in the gross number of volumes added per year.

THE LIBRARY OF CONGRESS

The Library of Congress is virtually alone in keeping fully abreast of inflated book prices. Having long ago become the world's pre-eminent research library, it is now steadily pulling away from all rivals. Its Russsian collection, for example, is over twice the size of any other in the West; its Japanese collection is of comparable distinction, as are collections in numerous other fields. And the Library of Congress is but the centerpiece of a large, little-known, and underused network of federal agency and departmental libraries in Washington.

To be sure, modern electronics could be used to bring these resources directly to every campus in the country. The Medlars program, in fact, has precisely this purpose in the medical area, while similar steps toward "networking" our major libraries are being taken elsewhere. But the cost of fully developing such systems would be staggering. Meanwhile, for better or worse, researchers increasingly have to come to Washington.

A second factor contributing to Washington's new position in American intellectual life is the decentralization of research scholars in every field. A generation ago, the faculties of a dozen universities could claim a disproportionate share of authors whose books were being reviewed in scholarly journals. Thanks to the explosion of graduate study in the 1950's and 1960's, however, tens of thousands of Ph.D.'s from these and other schools have fanned out across the land, bringing the highest scholarly expectations to institutions and departments that previously had viewed themselves exclusively in terms of their teaching. More often than not, the most promising younger researchers today are to be found in what were once thought to be the intellectual boondocks. If these younger scholars are to do the work for which they were trained, and at the same time continue to teach where they are most needed, they must have access to major libraries. Hence they, too, must look to Washington.

The two basic factors affecting the structure of the social sciences and humanities in America today, then, are the growing centralization of bibliographic resources and the increasing decentralization of research personnel. If the bibliographic mountain cannot be brought to America's scholarly Mohammeds, then Mohammed must come to the mountain.

This is in fact occurring. The number of readers using the Library of Congress's Reference Service in Washington has grown by approximately 45 per cent during the 1970's. The National Archives, the Smithsonian Institution, the National Gallery, and other such facilities have all experienced a similar soaring demand for their resources. The presence in Washington of this large, well-trained, and constantly shifting group of scholars has already made the city a meeting place that figures centrally in the intellectual circuitry of the country.

Until recently, the federal city lacked many of the accoutrements of a national capital. The grandomania of the 1960's changed this, by creating a demand for cultural institutions worthy of a cosmopolitan center. Washington saw, in rapid succession, the establishment of the Kennedy Center and the Hirshhorn Museum and a re-invigoration of a number of older museums and cultural foundations. Drum-thumping boosterism was rampant. Whatever the cause, the result was that in the 1960's and early 1970's Washington became a cultural center, a place more hospitable to scholars than ever before.

But the city was not yet an intellectual center. Notwithstanding the presence of a number of worthy academic institutions and research centers, Washington did not, and does not yet, possess a single university of the very first rank. And, yet, to have such an institution in the national capital has been a constant objective of many prominent Americans from the 18th century to the present. Benjamin Rush proposed at the Constitutional Convention in 1787 that the creation of a national university be mandated in the Constitution. President Washington, in his first message to Congress in 1790, reiterated the proposal, as did Presi-

dents Jefferson, Madison, and John Quincy Adams. From 1872 to 1933 some 60 bills were introduced in Congress to bring about Washington's and Rush's dream.

The intellectual enrichment of Washington that a century and a half of wishful thinking failed to accomplish is now rapidly coming to pass, thanks in good measure to the crisis of American higher education. Thousands of recent Ph.D.'s have been fortunate enough to find employment at academic institutions, but thousands of others have been beating the pavements in search of jobs. An impressive number of Ph.D.'s have already established themselves in Washington's bureaucratic agencies.

Thus, the percentage of entering Foreign Service officers with advanced degrees has risen from 50 to 60 in a decade. An estimated 60 to 70 per cent of the 524 members of the research staff at the Congressional Research Service hold advanced degrees, an impressive figure but one that is matched at numerous other specialized Washington organizations.

THE WOODROW WILSON CENTER

However, neither the constant influx of academic scholars nor the permanent residence of thousands of Ph.D.'s assures Washington's future as an intellectual center. What is lacking are meeting places—intellectual centers connected with the major cultural institutions where visiting scholars can interact with resident scholars, scholar-bureaucrats, journalists, and elected officials.

One of the boldest attempts to meet this need to date is the Woodrow Wilson International Center for Scholars, established by Congress as the nation's memorial to its 28th President. In the seven years since its foundation, the Wilson Center has provided hospitality to some 240 fellows from nearly every state in this country and from abroad, and it has sponsored numerous colloquia, seminars, and the like. The Kennan Institute, a division of the Wilson Center, sponsors similar programs in the area of Russian and Soviet studies.

Applications to the Wilson Center, to the Kennan Institute, and to numerous other Washington-based institutions and programs are running as high as 10 for every place available. That fact shows that the need for access to the city's resources has yet to be met. The specific need is for fellowship money that could be granted directly to the most deserving scholars, wherever they are working, rather than be channeled through select universities and colleges. Recipients could then work at whatever institution they wished, and they could take the necessary overhead support with them. Since many of these scholars would choose Washington, it would not be a bad idea for the National Endowments, the National Science Foundation, and other Washington-based cultural organizations to lay claim to a floor of rooms in the centrally situated but now defunct Willard Hotel, to make short-term housing available to scholars at reduced prices.

Suppose all this is accomplished and that Washington's unparalleled resources become more accessible to America's scholars and thinkers. Would the results be desirable? Would so close an interaction between power and intellect really be in the nation's interest? It cannot be denied that there are grave dangers. Some scholars might well be seduced by the heady world of political intrigue. They might abandon their critical independence and become court eggheads of the sort that adorned Frederick II's Potsdam or Catherine the Great's Petersburg. In realizing George Washington's dream, such scholars could well prove the inappropriateness of that dream in the modern world.

On the other hand, the benefits to the country of a greater degree of interaction between the world of ideas and the world of affairs are not to be lightly disregarded. The Congressman who encounters a scholar raising questions that transcend the narrow temporal bounds of present-minded Washington is the better for it. So is the scholar. Yet many of America's best and most independent writers and intellectuals are quite unknown in political Washington. Lacking direct contact with such persons, Congressional staff members turn again and again for testimony to the same handful of politically *engage* academics whose phone numbers happen to be in their files. Neither the range nor the quality of academic thinking on many subjects is tapped to the extent that it could be. The informal contact that would grow out of a scholar's short-term residence in Washington would do much to improve this situation.

THE SCHOLAR

And what about the scholar? Those whose interest is American history or politics would obviously benefit from first-hand exposure to the peculiar institutional and psychological climate in which our national lawmaking takes place. Beyond this, the researcher or writer who spends a few months by the Potomac encounters colleagues from many disciplines besides his own. Because the emerging intellectual environment of Washington knows no departmental boundaries, his interaction with such persons is bound to be more constant than on many campuses. And the increasingly international character of Washington's intellectual world will further broaden the scholar's horizons.

Whether a given scholar's contact with Washington is fruitful or frustrating, one thing is certain: It will be unique to each individual. The hallmark of Washington as an intellectual center is its everchanging composition. With no tenure except at the local universities and with the constant arrival and departure of scholars from all parts of the globe, Washington is a kind of encampment for intellectual gypsies. In this suitcase city, today's fixed points, cliques, and schools will have vanished by tomorrow, to be replaced by new ones.

This is as it should be. Washington is above all a national resource. Its exploitation by scholars from around the country has already changed its character, and much for the better. The challenge now is to make the means available to enable anyone having a particular need for Washington's libraries and archives to use them, and in a way that enhances the responsibility and independence of the American scholar, rather than transforming him into an intellectual courtier.

DEBATE ON HEW APPROPRIATIONS

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. GOODLING. Mr. Speaker, it has recently been called to my attention that Federal funds are being spent for abortion under programs other than medicaid. Abortions are performed in military hospitals both for female members of the armed services and for dependents of military personnel, for the latter on a space available basis. Abortions are also performed under the CHAMPUS program, a health care program whereby dependents of the military can use private facilities and then be reimbursed for 80 percent of the costs if on active duty.

In addition, abortions are available under the Federal employee health plans—plans whose premiums are also paid for from public funds.

It seems to me inconsistent to, on the one hand, expend public moneys for abortions if the clients are military personnel or dependents, or Federal employees, while at the same time we are arguing that medicaid funds cannot be used for this purpose. In the next session of Congress I intend to do everything possible to see that the same language applies to military and Federal employee health care programs. The principle is the same and should be applied equally to all.

LEGISLATION TO SIMPLIFY AND IMPROVE TRUTH-IN-LENDING LAW

HON. GARRY BROWN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. BROWN of Michigan. Mr. Speaker, in 1968 Congress enacted the truth-in-lending law, a major piece of consumer legislation based on the idea that credit cost disclosure would enable consumers to comparison shop, thereby fostering competition and help to lower interest rates. Many recent studies of the effectiveness of the TIL Act found that it is not having the desired effect. The disclosure statements have become complex legal documents on which suits for hypertechnical violations of the act are based, instead of simple and useful sources of information for consumers.

The Commerce, Consumer and Monetary Affairs Subcommittee, on which I am the ranking minority member, found that the agencies responsible for enforcing TIL were unable to fully implement the act primarily because of its immense complexity. The problem is then compounded because without full implementation by Federal agencies, the self-enforcement provisions of the act cannot operate as intended.

Many of my colleagues in this body and in the other body have recognized the need to simplify and improve the TIL Act. Indeed, the Senate Banking Committee has already held hearings on this issue. The bill which I introduce today, with TOM CORCORAN of Illinois as a cosponsor, pulls together some of the best features of the Proxmire, Garn, and Rosenthal bills and the FRB proposals, with some additional amendments to TIL which I believe will substantially improve the law.

The highlights of this bill are:

First. Substantial simplification of the disclosures required on a TIL form, limiting the provisions to those that actually affect comparative credit shopping.

Second. Limit on creditors' civil liability to only major substantive violations of the TIL Act.

Third. Enhanced administrative enforcement through civil penalties and cease and desist orders by agencies including clarification of the authority to require restitution.

These provisions will benefit consumers by disclosing only the necessary information in a meaningful way, assist creditors to comply with the law, enhance administrative enforcement at less cost and relieve overcrowded court dockets.

Mr. Speaker, I commend this bill to the Members of the House and urge quick action by the Banking Committee on this important legislation.

CUTS NEEDED IN TAXES AND SPENDING

HON. CHARLES THONE

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. THONE. Mr. Speaker, across-the-board tax cuts and a lid on Federal spending would combine for the best prescription for a U.S. economy that has the blahs.

The administration seemed completely opposed to this remedy when other Members of Congress and I began advocating it some weeks ago. Now, many in the Carter Cabinet are espousing the tax-cutting "honey" half of the proposal, but none has accepted the ceiling on Federal spending "vinegar" that ought to go with it.

U.S. economic ailments are easy to diagnose. Unemployment is still at 7 percent. If production continues for a year at the rate it has been in the past 3 months, it will show an increase of only 1.2 percent—a rate that would cause unemployment to increase.

Not all are agreed on a tax cut remedy. Lane Kirkland, chief AFL–CIO lobbyist still advocates "vast public works programs," and has said of tax cut proposals, "We think that is the least effective way." House Banking Committee Chairman HENRY S. REUSS' latest statement, "What this country needs is a massive attack on unemployment, not a massive tax cut" shows he too is still holding out for the WPA approach of more jobs through the Federal sector.

When President Kennedy proposed—and Congress passed—tax cuts for all individuals and corporations in 1963, the economic stimulus caused the U.S. Treasury to collect more revenue than expected before the tax cut. Arthur Okun, then Chairman of the Council of Economic Advisers, said:

> By the second quarter of 1965, consumption expenditures had registered a remarkable rise of $45 billion from the rate of the last quarter of 1963—the quarter immediately preceding the tax cut. The Revenue Act of 1964 lived up to the intentions and expectations of its advocates, and . . . delivered a powerful stimulus to economic expansion.

The Kennedy-proposed tax cuts did coincide with a drop in the unemployment rate. Prof. Steven Sheffrin, of the University of California, has said that if the unemployment rate in 1976 had been at the 4.1-percent rate of 20 years earlier, instead of the existing 7 percent, Federal tax revenues would have been more than $100 billion higher.

The tax cut is needed. But for stimulation of economy without rampant inflation, we also need for Congress to agree that it will spend no more next year than in the current budget. Eliminating billions of dollars in ineffective public service jobs programs would make it easy to give modest increases for worthwhile programs while holding the line on total spending. America can know its greatest prosperity ever, if we put money in the hands of the taxpayers instead of in the hands of the tax spenders.

NUCLEAR POWER IN CALIFORNIA

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. BOB WILSON. Mr. Speaker, as we wait on a report from the energy conferees as to what direction we will be taking with regards to a national energy policy, it is painfully clear to most of us that this country is in desperate need of alternate sources of energy to replace foreign oil supplies and boost us toward the 21st century.

Atomic energy has long been such an alternate source, but atomic energy always seem to bring about a strong adverse reaction. Nevertheless, right now, it is one alternate source that will work for us and provide electricity.

I strongly believe that we must use all available sources of energy to keep us going and growing, but roadblocks are continually set in our way. An editorial from the November 27 issue of the Washington Post delineates the problem and I commend it to my colleagues:

NUCLEAR POWER IN CALIFORNIA

Eighteen months ago, the voters of California rejected a proposal that would have had the effect of shutting down the development of nuclear power plants in the state. Now the state government seems to be moving toward doing by administrative action what the voters refused to do. The immediate decision before the state relates only to a proposal by a group of utilities to build a nuclear plant in the desert some 200 miles east of San Diego—but its repercussions could be far wider than that. For this particular plant is so sound—technically and with respect to its remote location—that, if it is turned down by the state's energy-development commission, or if its approval is delayed for a long period of time, the utilities are unlikely to propose another nuclear plant in California any time in the foreseeable future.

So far, the reception to the proposed plant has not even been what you might call lukewarm. The commission has under consideration proposals that it approve the plant only if the utilities can demonstrate that alternative sources of electricity are impractical. Among the sources some commissioners want considered are a geothermal plant and an oil-fired plant that could be converted to coal gasification by 1990.

The trouble with these alternatives—and with the policy of Gov. Edmund G. Brown Jr., which favors solar and geothermal power to the exclusion of nuclear power—is that no one really knows whether they are feasible. Sooner or later, Californians, like people in the rest of the country, are going to have to face nuclear power squarely instead of playing games with its proponents. If the decision is not to have any more nuclear plants, then the reality of where electricity is going to come from in the future must be faced. It should be obvious, even in California, that oil is not an alternative. Neither are geothermal hot spots in the ground and energy from the sun unless there are major technological breakthroughs or a huge reduction in the use of electricity. Even coal, which provides the most likely alternative, has shortcomings in its destuction of land and its risks to human life that must be weighed carefully against the shortcomings of atomic energy.

We can understand the disenchantment with nuclear power. It does present substantial problems, particularly in the disposal of wastes and in the need for tight security. But it is hard to understand why so many opponents of nuclear power regard these problems as insolvable while they are prepared to stake so much on the ability of scientists and engineers to solve equally difficult problems involving the safe and cheap production of electricity from coal or solar or geothermal sources. It would be of enormous help, of course, if the federal government would produce a more plausible plan for the long-term disposal of nuclear wastes than it now has. At present, however, it seems to us that the burden on those who want to close out nuclear power is to tell us how they expect future needs for electricity to be met. Otherwise, the next generation is likely to be sitting around in the dark blaming the utilities for not doing something this generation's officials wouldn't let them do.

UNJUST TAX TREATMENT TO DISABLED VETERANS

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. PICKLE. Mr. Speaker, I would like to call to the attention of the Members of the House a tax treatment by the Internal Revenue Service that I think is unjust to our disabled veterans. The gist of the problem is this—regular military retired pay is taxable. Service-connected disability pay is not taxable. One of my constituents, Mr. Alejandro Guerrero, retired from the Air Force and started drawing regular retired pay—which is taxable. Then a few years later he got sick. He filed for VA disability pay, and was awarded such pay back to the day when he retired. My constituent then filed income tax returns excluding from income the amount of the retirement pay that was equal to the VA disability pay he would have received, and which the VA said he was eligible to receive. The IRS has ruled they will tax based on who paid the money originally even though courts have ruled otherwise. I have introduced a bill that would correct this problem, H.R. 8696, to amend the Internal Revenue Code with respect to

the tax treatment of an individual who receives a retroactive determination of eligibility for disability compensation from the Veteran's Administration. The following story appeared in the New York Times on November 7, 1977 that tells how another veteran won his case in tax court:

VETERAN FIGHTS IN TAX WARS FOR RETIREES

(By Jo Thomas)

WASHINGTON, Nov. 6.—Col. Zebulon L. Strickland Jr., a retired Army artillery officer, won his personal battle with the Internal Revenue Service in 1976 but is still losing the war. At issue are the disability payments he and hundreds of other retired veterans have been awarded by the Veterans Administration.

Col. Strickland's case, which is typical of a group of veterans, began in January 1967, when the V.A. gave him a 100 percent disability rating and increased the payments he had been receiving by $208 a month. Col. Strickland had applied for these benefits in March 1966, and the V.A. said that his eligibility began at that time.

Disability pay is tax-exempt, so when Col. Strickland filed his 1966 tax return, he excluded $208 a month from his income for the first nine months of the year. The I.R.S. objected, arguing that the source of Col. Stricklasd's income was actually Army retirement pay and, therefore, taxable. The I.R.S. wanted an extra $381 in taxes.

Col. Strickland argued his own case in the tax court and lost. He then took it to the United States Court of Appeals for the Fourth Circuit. In March 1976, he won. The court held that Col. Strickland was entitled to treat the extra $208 as disability income "despite the fact it may have technically been paid to him by the Department of the Army."

"I felt good because I thought I had licked 'em," said Col. Strickland.

A month later, however. the I.R.S. decided it disagreed with the court. "The opinion of that court is erroneous and should not be followed," an internal document concluded. Col. Strickland would get his $381, but other veterans in other court jurisdictions would not get theirs.

"The I.R.S. is forcing every little veteran who gets ripped on this to make a decision," said Col. Strickland. "You either pay, boy, or take 'em to court. Disabled veterans, almost by definition, are tired, sick, old men. We are not wealthy as a class. The number of dollars is small. Very few find the time or the money to fight this."

Col. Strickland directed a barrage of letters to public officials and learned, to his delight, that a bill to override the I.R.S. decision had already been introduced in Congress by Representative J. J. Pickle, Democrat of Texas, who heads the House Ways and Means subcommittee that oversees the I.R.S. The bill was prompted by the plight of a Texas veteran with the same problem.

At the moment, the I.R.S. is staying with its original decision to insist on taxes from the retroactive disability payments. A spokesman said, however, that "in view of the controversy and the interest on the Hill" the issue was being studied again.

EUBANK HONORED

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. ARCHER. Mr. Speaker, I am extremely pleased to take a few minutes to let my colleagues in the Congress know about an outstanding individual from Texas, James F. Eubank II. He is president of Forest Park Memorial, Inc., and was recently honored as 1978 Boss of the Year by the Houston Chapter of the National Secretaries Association. I am delighted that he has been so appropriately recognized.

CLEANING UP FEDERAL POLLUTION

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. WIRTH. Mr. Speaker, all of us are rightfully angered when policies established by the Congress are frustrated by executive agencies which believe that they are above the law, and by administrations which fail to give cohesive, meaningful direction to implementation efforts.

I refer in this instance to the widespread violation by Federal facilities of the Nation's air and water pollution laws.

The Federal Government has been actively pursuing private violators of the air and water laws for several years. At the same time, the Government has been lax in enforcing the same laws against its own facilities. Only about 10 percent of all private industries have not yet met the current deadlines for the Federal Water Pollution Control Act. In striking contrast, 38 percent of the largest Federal facilities are violating the water requirements and 24 percent are illegally polluting the air. The Federal Government should be setting an example for the rest of the country. Instead it is the worst polluter. I want this hypocrisy to end.

I have called on my colleagues to join me in urging President Carter to take immediate action to insure speedy compliance by Federal agencies. I have proposed that the President make pollution control a priority for every Federal agency, establish a firm deadline for meeting the laws' requirements, and delegate to a person or group within his office the authority to forcc agency compliance. Presidential leadership can and should solve this problem.

Mr. Speaker, the Clean Air Act and the Federal Water Pollution Control Act—which Congress enacted to curb the increasingly acute air and water pollution problems—were always intended to apply equally to Federal agencies and non-Federal entities. At first, Federal facilities were encouraged to comply voluntarily with all State and Federal requirements. Not surprisingly, that proved to be an ineffective way of insuring compliance, and Congress responded with amendments in the Clean Air Act of 1970 and the Federal Water Pollution Control Act Amendments of 1972, making all substantive pollution requirements expressly and equally applicable to Federal facilities.

While the substantive requirements have been clear, enforcement has been a serious problem. Congress generally envisioned a sharing of enforcement responsibilities between Federal, State, and local governments. But until just recently EPA has thought that it lacked the authority to sue another Federal agency. This, together with the narrow reading which the Supreme Court gave to sections in the laws dealing with Federal facilities (holding that Federal facilities were, indeed, subject to State and Federal substantive standards, but that States lacked the power to enforce the necessary procedures to guarantee compliance, for example, permit requirements) resulted in an ineffective and disjointed enforcement effort. The only possible avenue of court enforcement, therefore, was citizens' suits. But these suits are unwieldly tools for administrative enforcement which, in any case, should be unnecessary.

There has always been a far better alternative. The President controls all Federal agencies and departments. The allocation of resources to various priorities by agencies depends on executive decisions. Procedural mechanisms within the executive branch, such as OMB's budgetary review, have always been available to carry on the Federal pollution enforcement effort and reach noncomplying Federal agencies. Unfortunately, they have not been effectively or seriously used.

Although some of the delay in Federal compliance may be attributed to factors beyond the control of individual Federal facilities, the real problem in the past has been a lack of commitment at the top administrative levels.

There are some indications that this is changing. The Environmental Protection Agency announced recently that it will no longer tolerate such mass noncompliance by Federal facilities, implying possible legal action should administrative enforcement methods fail to bring violators into line. Similarly, the Council of Environmental Quality is moving to resolve disputes between EPA and polluting agencies.

But this is not enough. Without strong Presidential leadership, these efforts will probably come to naught because pollution control simply is not high on many agencies' priority lists. Moreover, even if EPA wants to sue a violating department, it may be unable to do so without the active concurrence of the Justice Department, which has shown no inclination to bring such proceedings. In any case, interagency suits should be unnecessary; the prospect of one agency suing another is absurd. The courts should not be referees between Federal agencies—that is the President's role. Just as EPA does not have the practical power to force a recalcitrant Federal agency to comply, the President does not have the time to mediate every interagency dispute. The answer seems to lie in investing in a panel or person within the Executive Office of the President the power to order and enforce the details of compliance, including the reprograming of funds.

Time and again I have told private industry in Colorado that it must sacrifice for the common good, that it must expend large amounts of funds to comply with the pollution laws. It is difficult to do this, Mr. Speaker, when the Federal

Government, with far more resources, refuses to comply. Instead of being the worst polluter in the Nation, the Federal Government should be setting an example.

The magnitude of the pollution problem demands a comprehensive and cooperative effort at all levels of government. A lax enforcement policy cannot be tolerated, least of all by the Federal Government. I urge the President to act quickly and forcefully to resolve this embarrassing and unnecessary situation.

The proposed letter and newspaper articles to the President follow:

HOUSE OF REPRESENTATIVES,
Washington, D.C.

DEAR MR. PRESIDENT: We are concerned about the failure of the Federal Government to set an exemplary standard in the area of water and air pollution.

In percentage terms, the Federal Government is a far worse polluter than private industry. The Environmental Protection Agency has vigorously pursued private violators of the pollution laws, but the Federal Government has been less zealous in cleaning up its own backyard. While Congress has consistently expressed its resolve that federal facilities meet the same high standards that are required of the private sector, executive action has not always met those goals. In short, the federal anti-pollution effort needs a strong boost.

Some important steps have already been taken. In the recent amendments to the Clean Air Act, Congress reaffirmed its intent that Federal Facilities should comply with the law. We applaud the recent announcement by EPA that it may crack down on federal violators. We are pleased that the Council on Environmental Quality is developing guidelines for resolving inter-agency disputes. But stronger action, in the form of Presidential leadership, is needed to force compliance by agencies which heretofore have not placed a high priority on pollution control. We urge you to consider the following measures.

First, issue a Presidential directive ordering all agencies to comply with the pollution laws within the immediate future.

Second, EPA should be ordered to place a priority on pollution control for federal facilities. Other agencies will quickly understand your support for EPA's efforts.

Third, a person or panel within the Executive Office of the President should be assigned the purpose of compelling compliance following a determination by EPA or an authorized state agency that a federal facility is in violation of the air or water statutes. This group should be delegated all necessary Presidential authority, including the power to order the reprogramming of funds. The law, of course, allows you the authority to grant certain exemptions in cases of "paramount interest" of the United States. We would hope that you would use this power with great descretion, and only in extreme cases. The Council on Environmental Quality is a logical choice for this panel.

Mr. President, it has been difficult to explain to our constituents why they must make large expenditures to comply with the pollution laws when the Federal Government, with far more resources, will not. It is time for this government to set an example. We hope you will act. We pledge our cooperation.

[From the Washington Post, Oct. 21, 1977]

THE FEDERAL CLEAN-UP CAMPAIGN

The Environmental Protection Agency is finally cracking down on one of the nation's most prominent polluters: the federal government itself. EPA Deputy Administrator Barbara Blum has just warned 11 agencies, including the military, that they may be taken to court unless they act immediately to bring all their installations into compliance with the water-and air-pollution laws.

It's about time. Although the government has spent over $3.3 billion to curb its own pollution since 1968, too many facilities still lag behind. Last month the U.S. Chamber of Commerce embarrassed the administration, and rightly so, by publicizing the fact that about 90 percent of all industries had met the July 1 deadlines of the clean-waters law, but at least one-fourth of all federal facilities had not. As of Oct. 7, according to EPA, fully 38 percent of the largest federal operations were not complying with the water law: 24 percent were polluting the air too much.

Some of the tardiness is understandable. Forts Belvoir and Lee in Virginia, for instance, are waiting to hook up with public waste-treatment plants that are still being built. In many cases, though, agencies have simply dragged their feet or are still wrestling with the kinds of technical and budgetary problems that industries and municipalities have already been required to solve. EPA field officials and local authorities have been complaining about some polluters, such as GSA's local heating plants, for years. But until now there has been no real, high-level push to make such laggards meet the deadlines and standards that apply to everyone else.

EPA now has both more resolve and more authority. This summer's clean-air-act amendment clarified the agency's power to take federal violators to court. Congressional conferees seem likely to include similar provisions in pending amendments to the water act. EPA has already joined with states and citizens in suing the Tennessee Valley Authority over air pollution at 10 TVA power plants. The new EPA "hit list" names 77 "major" federal water polluters and 72 "major" air polluters, including 19 military bases and two power plants cited on both counts.

Of course litigation should not be required. It won't be—if all agencies face up to their responsibilities, and if the Office of Management and Budget and Congress come up with the necessary funds. OMB does seem to be more strongly committed to effective action now than in the past. That is encouraging. The nation's overall anti-pollution program is moving into a new, difficult and very expensive stage. Federal demands on industries and local governments will be much more credible and acceptable once the federal establishment itself comes clean.

EPA BEGINS BATTLE TO CUT POLLUTION BY U.S. AGENCIES

(By Stephen J. Lynton)

The Environmental Protection Agency began a broad and unusual cleanup campaign yesterday against one of the nation's largest and most persistent polluters—the federal government.

In an announcement yesterday, EPA warned 77 federal installations to stop polluting the nation's waterways. It told 72 federal facilities to halt violations of federal air pollution regulations. In a novel move, EPA threatened to take court action against federal agencies that do not mend their dirty ways.

Among the federal polluters were a dozen or more facilities in the District, Maryland and Virginia—including Maryland's Aberdeen Proving Grounds, the federal government's central heating plant in Southwest Washington, and Virginia's Ft. Belvoir. Aberdeen Proving Grounds was cited as one of the nation's 18 worst federal offenders of anti-pollution laws.

In a series of letters yesterday to federal polluters, EPA Deputy Administrator Barbara Blum raised the prospect of court suits against the federal government itself by urging a "prompt resolution" of pollution violations in order to "avoid judicial action."

An EPA spokesman said that the agency, if necessary, would file civil suits against federal installations that refused to stop polluting. Such a suit, the spokesman said, could lead to a court order in which a military base commander or the head of some other federal agency might be held personally responsible for pollution violations. An agency chief, the spokesman added, might face court-imposed penalties, including jail, if he failed to comply with a court order.

In a similar action, EPA recently joined in a federal court suit against the quasi-governmental Tennessee Valley Authority in which the states of Alabama and Kentucky and citizens' groups contend that TVA is dragging its feet in cleaning up its sulfur dioxide emissions into the air.

The federal government's effort to crack down on its own air and water pollution violations followed a move last June to curb water pollution caused by industrial plants and municipal government installations. EPA announced plans to bring suits against more than 100 cities and 300 major industrial plants that, it said, failed to meet the nation's July 1 water cleanup deadline.

The threat by EPA sparked protests from business groups. They asserted that the government was blaming industry for pollution malpractice while ignoring its own widespread violations of the same cleanup deadline and laws.

During the Nixon and Ford administration, the federal government sought several times to persuade federal agencies to comply voluntarily with antipollution laws but, according to federal officials, these attempts were at best only partly successful.

Two recent developments, an EPA spokesman said yesterday, gave EPA the authority to begin yesterday's tougher crackdown. One was a recent change in federal antipollution laws designed to let EPA sue federal agencies for pollution violations. The other, the spokesman said, was a new willingness by the Office of Management and Budget to support federal agencies' requests for money to install antipollution equipment.

Among other federal facilities ranked by EPA as major polluters were military bases in Alabama, Arkansas, North and South Carolina, Georgia, Illinois, Michigan, Oklahoma and Tennessee.

In addition to military installations, EPA's list of 18 major offenders included an Interior Department mine draining tunnel in Leadville, Colo., cited for discharging inadequately treated mine drainage into the Arkansas River. The Energy Department's Savannah River (S.C.) plant was accused of operating 16 faulty coal-fired boilers.

EPA's federal cleanup campaign is aimed at getting federal installations to comply with the Clean Air Act of 1970 and the Federal Water Pollution Control Act of 1972. Under these laws, polluters are required to meet air quality standards designed to meet air quality standards designed to protect the public's health and comply with a federal goal of making the nation's waterways clean enough for swimming and fishing by 1963.

While warning of possible court action against federal installations that fail to comply with these standards. EPA made it clear that it will rely mainly on exhortations, formal violation notices and negotiations before carrying out its legal threat. EPA officials noted that some agencies may not be able to obtain money to pay for antipollution equipment until next October, the start of fiscal year 1979.

AMERICA'S BIOLOGICAL AGE

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. BOB WILSON. Mr. Speaker, Mr. Frank Gard Jameson, chairman of the board of Glenair, Inc., of Glendale, Calif., is one of our State's and our Nation's most distinguished citizens. He has served as president of Teledyne Ryan Aeronautical, vice president of Douglas Aircraft and senior corporate vice president of Rockwell, International, and has been closely associated with our space programs over the last 20 years.

In a speech before the 10th anniversary annual Collector Symposium, this last October, Mr. Jameson points out that just as proper nutrition and care is important for our own physical well-being, proper care and feeding is also essential to our national lives. He goes on, however, to say that we are not taking care of our country, and warns that if we do not start, and soon, we will be in the same shape as the man whose doctor tells him he is a candidate for a heart attack, then ignores the advice.

AMERICA'S BIOLOGICAL AGE

(Address by Frank Gard Jameson)

"YOU ARE REALLY IN LOUSY SHAPE"

For the past several years, I have increasingly known that I was getting out of shape—smoking too much—drinking too much—eating too much—not exercising enough—just enjoying the good life. Although I have a lighted tennis court at home and belong to several golf clubs, I was neither playing tennis or golf. Good friends would comment about the "rubber tire" beginning to form around my middle and I would worry a little about shortness of breath and tired leg muscles, even when I walked upstairs fast.

I had been raised on good, healthy food by my mother who was a "health nut" before her time. I was raised in a small Southern California town with plenty of fresh air and exercise. I had participated in high school and college varsity sports and had a strong, healthy family background with Scotch-Irish on my father's side and French on my mother's side. About three months ago my doctor gave me a stress E.K.G. test and said, "You are really in lousy shape."

Often I would say to myself, "One of these days I'm going to have to change my ways, exercise, eat right and get healthy." I tried three or four of the best 'no-smoking' programs and went on the 'high protein' diet for a week. But I continued to procrastinate and say, "Tomorrow I'll start."

Dr. Anne-Marie Bennstrom Prescott recently asked me to come to her new health spa and take a ride on a bicycle that is wired up to read out a person's true biological age when you ride it. No matter how old you are, this machine measures how old your body is healthwise.

I got a little tired and out of breath as I pedaled for five minutes and was relieved when the test was over. After she and her assistant made several calculations from the machine, I saw the answer before they told me, because my business background has taught me to read upside down as someone is writing or figuring on the other side of a desk.

I, who am 53 years old and lived a good and healthy life, was 69 years old biologically. She explained sympathetically that if I kept on as I was going, I probably had only four or five more years of active life before I broke down in some way.

That was the bad news! The good news was that if I changed my ways—ate properly—did the right exercises—and did a very few other things—I could reverse the whole process and regain health and the prospect of a long and healthy life. The body, she explained, has amazing and wonderful and regenerative powers. *Believe me, I started the new life that day* and it seems to be working. Now, you may be wondering why is he telling us all this? Is he giving a health or no-smoking lecture.

We all would like to be in good physical shape, but few of us are willing to develop the discipline needed to get us there. And without discipline you just can't get in shape.

THE SAME IS TRUE OF OUR COUNTRY

I think that my experience is much like that of our wonderful country. It is young in the world of nations and from good, mixed stock from around the world. We have had good food and economic and political freedom, such as no nation has ever known. In recent years, however, we have gotten sloppy and lazy and haven't taken care of ourselves. We have even allowed our government to be taken over by socialistic bureaucrats, who are throwing away all that economic health that our forefathers fought so hard for. Our forefathers gave up security to come across the seas to America for liberty and freedom and yet we and our children are now allowing that freedom and liberty to be taken away from us in place of a government promised false security that we can see by example is not working.

Who is going to give the country the biological test on a bicycle to see how near to the end we really are. How long will it be before we break down? How long will it be before we have ruined everything beyond repair? I think that every citizen who has "viewed with alarm" the increasing number of danger signals on all sides of us but has continued to procrastinate and put off their own action had better start now to awaken the silent majority *who can be awakened.*

Our country like our bodies has amazing recuperative powers as we proved at the start of WW II and as England proved in the Battle of Britain. We do, however, have only a few years left before we break down and cannot get well. Twenty-two nations in history have held and lost the leadership mostly because of internal decay.

Let's look at some of the signs that show we are in serious "biological age" trouble and hope that they are enough to cause us to start back on a program of health and prosperity.

The first duty of our Government is to protect the people from attack—to prevent war. It is elementary that to do this we must be strong enough so that no enemy will attack us. In my opinion, our government is not doing this and both statistics and our military commanders seem to bear this out. Ten years ago we had 1300 intercontinental ballistic missiles and the Russians had 300. Now they have increased five hundred percent to 1500, while we have reduced to 1100. They have 45,000 tanks; we have 7,500. They have 170 army divisions, while we have 14. They have 253 submarines, while we have 75. They have a new supersonic swept-wing bomber, the Backfire, and we have canceled our B–1, when each bomber costs less than a package of cigarettes for every American. Eighty percent of their warships are under ten years old and 90 percent of ours are over twenty years old, which is the useful life of a ship.

Our young Air Force pilots are flying airplanes that are older than they are. Many 1950-designed B-52's, which carry over half of our nuclear arsenal, are being flown by pilots whose fathers flew the same aircraft. Today you and I can fly across the Atlantic in foreign-built supersonic transports, sipping cocktails and eating steaks thousands of feet above our U.S. Air Force B-52's, rapidly passing these subsonic, aging airplanes.

I trained in the ROTC at Stanford in 1941, two years after the war in Europe had started—a war we were sure to get into—and my training was in horse drawn artillery from World War I. *We are repeating this mistake;* however, this time we will not have time to change auto plants to airplane factories and typewriter factories to rifle factories.

REACT OR SIT BY?

We are a nation of re-act, not initiate. We waited for the Russians to launch a satellite—Sputnik—then we started. But are we reacting now to the threat we see on all sides, both military and economically, or are we just comfortably sitting by saying, "Someday we had better do something to get organized?"

The all-volunteer, paid, no draft Army is expensive and not working. We should have universal military training, where every young person serves his time—rich, poor, handicapped, students—all of them. They don't have to be in the military—they can work in the Peace Corps or inner city.

After the war, we built up the German and Japanese steel industries so that they are better, more modern and more cost efficient than ours. This, coupled with the fact that because of inflation, organized labor has forced wages up, making domestic steel uncompetitive with foreign steel. Now *our* steel industry is in real trouble and are laying off thousands of workers, who are protest marching on Washington. The president of Ford Motor Company just announced that he is going to import foreign steel at $50 a ton cheaper than U.S. made steel. The Japanese and Germans would never have built plants for us if they had won the war.

Foreign auto sales are reaching all-time highs every month because they provide good little and big cars at a better price than many American-built cars. Ford is importing German-built "Fiestas" to compete instead of making a better little car here.

Zenith and other television manufacturers have been laying off thousands of workers (5,600 the other day) because of foreign imports of television sets.

The computer market here is lost to the Japanese. They are taking it over along with other component markets.

Now, we have decided to break up big business—the S.E.C. says many corporations are crooked.

Now that we can't export our products in an amount to offset our imports we have decided to sell our latest technology to our competitors, which is all we have left to possibly compete with foreign manufacturers. When that is gone, what will we have left to sell to continue our phony "good life" with . . . something free for everyone?

54 PERCENT—AND DECLINING . . .

Ten years ago, the United States represented 78 percent of technology advancement in the world. Now it is down to 54 percent—and declining. German had great advanced technology when she started WW II. If she had continued development on all fronts and got the atomic bomb first, as she did the jet engine, where would we be?

What is the reaction of our elected officials that we and the unions have put in office and who have promoted all these utopian plans.

They say bigger government is the answer, and more federal handouts. Although even they know that federal aid is like giving yourself a blood transfusion from one arm to the other with a leaky tube.

The post office is a national scandal with postage rates going up every day and service getting worse. Postage rates have increased from three cents to thirteen cents while at the same time private telephone companies have cut their rates and improved service.

On October 1st Mr. Carter, who campaigned on a pledge of smaller government with less employees, put into being the newly formed, biggest new government department in the history of the world—the Energy Department. Its first year cost of operation is $10.6 billion, several hundred million more than all the oil companies made in profits in the whole year of 1977. It is $400 million more than will be spent on all oil drilling and exploration in 1977. It is equivalent to an over $3.60 per barrel tax on all oil produced here in 1977 (which is more than oil cost just a few years ago). What is this new bureaucracy going to do except manufacture more and more paperwork for you and me. Think how much your children will be paying those 20,000 people in retirement benefits when they finish working at the Energy Department.

We now pay more to our retired military than we do to the active U.S. Army. Social security which was designed to supplement older people's retirement savings is fast approaching bankruptcy. Many people are being forced to depend on it as their principal retirement benefit and either social security taxes will have to be raised again or the money taken from the general fund. Successful people who work after 65 or have money income won't benefit at all from it.

I certainly believe in equal opportunity, but we must insist that with this comes equal responsibility. We must give the disadvantaged, helpless and hopeless both help and hope, but we must do it with dignity and in an economically sound manner that does not perpetuate their problem and bankrupt the country.

$2.8 BILLION A MONTH DEFICIT . . .

We are importing half the oil we use in this country. This is causing us to have a $2.8 billion a month trade deficit, which cannot continue if our dollar is to be worth anything against foreign currencies. We must cut down on fuel use, yet in Los Angeles alone we are going to spend $70 million this year busing students from one side of town to the other, using this precious imported fuel. Multiply this by all cities in America and you can see that this utopian experiment is helping us to bleed to death.

Wouldn't it be better to spend the $70 million in Los Angeles on better schools and better housing which would directly help the children and through this expenditure provide jobs for more people?

In addition to the over $300 billion that we have given in foreign aid, our banks are now taking our money that we have given them for safekeeping and are loaning it to underdeveloped nations that already have a debt of $253 billion and have no way of paying back the loans. We will be expected to forgive it but, how will we then get your savings back when we go down to draw it out?

The one remaining hope we have to keep the balance of payment in line is agriculture. We ship over $25 billion worth of grain and produce overseas each year to help pay for the $48 billion worth of oil that we import. The media keeps harping that there is no energy shortage and for the moment they are right. But how are we going to continue to pay for this oil? We see the dollar going down in value against foreign currencies every day, as this trade deficit increases to the highest levels ever.

We have less farmers in numbers than we have ever had, but since 1970, the Agriculture Department budget has doubled and the Department has quadrupled in size. More bureaucrats for less farmers. The budget is now $16.7 billion, up 30 percent over 1976.

In direct reversal of a promise made earlier to many farmers, the Department of Interior has decided to break up big, economical farms and stated that no one who receives water from dams can farm over a quarter section—160 acres. What do you think that will do to our farm exports?

Food stamps were started to give away farm surpluses of about $600 million a year in order to help both the farmers and the poor. It has now become a $22 billion a year program with 20 million people receiving stamps—almost 10 percent of the population. Our bureaucrats have hidden this welfare cost by keeping it away from the H.E.W. Department, which handles welfare. It accounts for over half of the Agriculture Department budget. The big city congressmen trade their congressional votes for a bigger Agriculture Department in return for farm state votes for a continuing and enlarging food stamp program, which naturally guarantees more big city votes.

As each year goes by, we can see more and more that our politicians are using federal and state income taxes as a means of redistributing the wealth, not as a revenue measure. To buy votes they take any tax measure making sure that they miss most of the voters and then, right or wrong, they put it through. Real estate mortgages on homes and property taxes will only be deductible up to a certain level. Business lunches are next and then convention travel. They don't seem to realize that all this will kill the incentive to build and grow and hire more people. Socrates said four hundred years before the time of Christ, *"When in a democracy the people learn that they can vote themselves largess, the democracy will cease to exist."*

We tell South Africa, Rhodesia and others how to run their countries which have good economies, when we are running our own country about as poorly as a country could be run.

I could go on and on but I am sure you have seen for yourselves more examples of our downward trend than I could ever talk about today. We are doing it to ourselves and saying, "Pretty soon we should do something about it." Now is the time because the country is resilient and can get going again as the dream of the world and the most compassionate and successful nation ever conceived.

We truly have a silent majority in America today who wait and wait for "them" in Washington, the state capitol or in local city government to come to their senses. They need you to speak to, and for, them. And if you do speak they will respond and America will not go over the precipice of totalitarian socialism, where personal freedom does not exist any longer.

I hope that I can count on you to go out of here today and take a more active interest in politics. Find young men who would be interested in being in government. Encourage them. Finance them through civic groups. The trend can be reversed.

President Kennedy said, "Every American mother would like her son to be president, but none of them would want him to be a politician"—but to be president, you must first be a politician.

Yes, Anne-Marie got my attention by putting me on a bicycle and telling me the truth about my health. Hopefully you and I can awaken our fellow Americans in time to reverse the trend. There is no education in the second kick of a mule.

RELIGIOUS LIBERTY

HON. GENE TAYLOR

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. TAYLOR. Mr. Speaker, in the ongoing struggle for religious liberty throughout the world, we Americans have historically been blessed with a keen awareness of the need to keep government and its bureaucracy from unconstitutionally interfering with religious freedom.

I was particularly impressed with the following article in the October 1977 issue of Moody Monthly, perhaps the most widely read and influential Christian magazine in America today.

It was written by our former colleague in the Congress, the Honorable John B. Conlan, now in private law practice in Washington and Phoenix. Mr. Conlan ably points out the subtleties and dangers to religious liberty of a well-meaning but totally erroneous bill, H.R. 41, now in the Congress. I commend this article to you and thoughtful believers in separation of church and state everywhere:

IT SEEMS TO ME

(By John B. Conlan)

A bill now in the United States House of Representatives to "regulate the solicitation of charitable contributions" by mail, TV, and radio, is both a bureaucratic nightmare and a direct attack on the constitutional requirement that church and state be separate.

The United States Supreme Court has long held that freedom of religious belief is absolute and that governmental regulations of religious practices must be based on a state interest which is clearly demonstrated and which is highly compelling. The bill, H.R. 41, falls woefully short on both these counts and would pave the way for eventual suppression of tax-deductible giving to nonprofit religious ministries. It is an immediate threat to Christian schools, colleges, mission and evangelistic societies, publishers, broadcasters, hospitals, every local church, and all religious TV and radio stations.

H.R. 41, sponsored by Congressman Charles Wilson (D–CA), is officially titled "A bill to require the furnishing of certain information in connection with the solicitation of charitable contributions by mail, and for other purposes."

It requires that all charitable organizations, including all religious organizations, that receive contributions by mail, must include in their solicitation specific information on (1) the organization, (2) the purpose of the solicitation and the intended use of the contribution solicited, and (3) "the percentage of all contributions received which remained for direct application to its charitable purpose after deducting all fund-raising and management and general costs during the last fiscal year."

This percentage must be boldly and clearly stated on all stationery and printed material, and in the midst of all TV and radio broadcasts. In the case of TV it must be boldly and "legibly" shown for a "sufficient" period (as determined by postal regulations yet to be devised).

Furthermore, the Postal Service is authorized to require each organization to furnish all "audit reports, accounts, or other information" as the Postal Service may require to "verify" the percentage figure each church or organization is publicizing.

In other words, under the guise of "exposing" an occasional Elmer Gantry and "pro-

tecting" the giver, each organization can be required to furnish to the Postal Service all financial records, including contributions and expenses. Under the Freedom of Information Act, those now confidential contributor lists would become public information . . . and available to unscrupulous persons.

Furthermore, if the Postal Service deems any organization not to be in compliance with or submissive to the provisions of the act, postal authorities will be able to obtain a mail stop against the organization.

H.R. 41 seeks to accomplish a desirable purpose. The intent of the bill seems to be to assure the recipient of a fund-raising solicitation that his contribution will be spent for the charitable purposes described, and that the cost of raising funds is within a reasonable range.

No reputable charitable agency could quarrel with the right of the donor to know how his money is being spent and the proportion of his contribution which goes for fund-raising expense.

All legitimate charitable organizations publish financial statements providing much, if not all, of the information contained in the proposed bill.

Most religious groups provide such information voluntarily. This leaves a tiny group of other organizations which might or might not provide full disclosure. Of this tiny group there are possibly fifteen or twenty charities which could be termed questionable, and these organizations are well known to postal authorities responsible for detecting mail fraud.

In fact, it is remarkable that 25 billion dollars could be raised for philanthropic purposes each year with such a tiny proportion of funds misused by shady operators.

Yet, this bill and many others at the state and Federal level seek to impose on all charitable organizations a burden which belongs only to a few.

According to statistics, 88 percent of all American families now contribute to charity—and 75 percent of all American families contribute through the mails at one time or another.

Yet, except for an occasional scandal blown out of proportion to the total charitable effort, the public seems willing to maintain its level of giving and to increase it at least 10 percent per year.

Few people truly believe that their church, missionary society, Scout troop, college, local museum, or community hospital is involved in fraud by mail. And this is where the bulk of charitable funds go—right to the community level where every citizen is a watchdog of his money.

The imposition of the provisions of H.R. 41 would penalize all of these local as well as national Christian groups, yet would not catch the real crooks, the five or six men in this country who occasionally promote a dubious cause and abscond with the funds.

Actually, the shady operators who solicit legally but unethically will not be disturbed by the provisions of this bill. These people own their lists, mail under the privacy privileges of first class mail, and operate much the same as pornographers. They mail from blind "drops," collect their money and skip to the next post office box.

Each Christian and other charitable organizations and institutions may not operate exactly as efficiently as some outside observer might like, but these dedicated, earnest and honest individuals who collect 25 billion dollars for philanthropic purposes each year are reliable stewards of our charitable contributions.

The first two requirements of the bill—a statement of the purpose of the solicitation and the need—are a standard part of every mailing piece. It is on this part of the presentation that the public decides whether or not to support a charitable group.

The remaining three portions of the bill deal with expenses and income, the costs of fund-raising, and the expenditure of charitable funds.

It is in this area that serious problems arise.

I am sure that all religious and charitable fund-raisers wish there were a simplistic way of measuring the efficiency of any fund-raising effort. And, if there were a magic figure, say 25 percent, then all charities raising funds over 25 percent would be automatically evil and those under 25 percent would be automatically pure.

The economics of charitable solicitation are not that simple. Every charity has a different cost of raising funds—and that cost has nothing to do with salaries or postage or the cost of envelopes and paper.

If not what is cost? Costs of fund-raising are best stated as a percentage—the number of pennies deducted from each charitable dollar for fund-raising. The cost of a mailing piece has nothing to do with fund-raising costs, except in terms of pulling power.

The cost of an envelope, letterhead, folder and postage stamp is the same for all organizations operating in a competitive environment. Yet, that same expense for materials will return more money for one charity than another, thus resulting in a higher percentage cost of fund-raising for one organization over another.

Does this mean that one organization is less reputable or efficient, or that the need for funds is less urgent? No. One organization's fund-raising cost is higher than another because of the priority the public places on its cause.

Not all mailing pieces are mailed for the same purpose. Charitable mailing can be divided into two categories, both with totally divergent purposes and costs of fund-raising.

One category of mailing is called "prospecting"—the seeking of new friends and contributors who have never given before.

The return from such a mass mailing to prospects would be considered good if it makes a small amount of money or breaks even. A return of 1 percent or 2 percent is common.

If 1,000 pieces are mailed to people who have never contributed before, it might receive a 2 percent response—twenty gifts at an average of perhaps ten dollars per gift. Two hundred dollars would be raised in this mailing. The cost of 1,000 mailing pieces might be $100, a typical figure for nonprofit direct mail. Thus the "cost" of this fund-raising is fifty cents on the dollar. Wouldn't this cost, if published in the mailing piece, inhibit the effort to build a list of long-term friends and donors?

On the other hand, there is a second type of mailing piece which re-solicits a previous contributor—a long-term friend who was discovered by the relatively expensive mass screening process that cost fifty cents on the dollar.

In the example cited, the twenty donors who were obtained at a "cost" of fifty cents on the dollar would be resolicited in the second year. This time, instead of 1,000 mailing pieces sent out, only twenty would be sent—with perhaps another twenty or forty sent as follow-ups to those who did not respond to the original request for a second gift.

Thus, perhaps sixty pieces would be mailed, at a cost of ten cents per piece, or a total of six dollars in this simplified example.

If all the donors repeated their first gifts of $10, the income would be two hundred dollars and the cost only six dollars, or a cost of fund-raising ratio of only three percent.

If this figure were presented to the public via the disclosure provisions of this bill, then this mailing would be white and pure, as against the mailing which cost fifty cents on the dollar to get these loyal friends.

The only hitch here is that unless the fifty cents money were spent first, there would be no long-term friends to provide funds at a cost ratio of three cents.

Neither the general public nor the Christian public has yet begun to understand these economics—the same economics which prevail in all of the major direct mail causes.

While the President and Congressmen in their recent campaigns pledged a reduction in paperwork and bureaucracy, this bill will do just the opposite. Consider these points:

H.R. 41 will increase the paperwork on every Christian organization by providing each potential donor with financial statements with each appeal, creating additional costs and inevitably lessening the funds each charity can use for its stated purpose.

H.R. 41 requires each charitable organization to first "self-incriminate" itself by publishing in each mail piece a percentage figure for its costs when post office auditors will undoubtedly come up with a different percentage allocation of the costs. What does that make the Christian organization . . . a liar . . . a deceiver . . . a cheat? How does an agnostic oriented newsman in the community, or a humanist wire service reporter report the discrepancy? Headlines proclaiming "falsification" by Christian organizations? And what does the Postal Service do? Well, this bill says the post office is authorized to put a "mail stop" against the church or non-profit organization when they find it not in compliance with any provision of this Act.

H.R. 41 requires that whenever a radio or TV broadcast makes mention of the need for gifts to support the ministry, there must be a lengthy audio and visual explanation setting forth—(1) the legal name and the principal business address of the charitable organization making the solicitation, (2) the purpose of the solicitation and the intended use of the contribution solicited, (3) the promise that the charitable organization will send a complete financial statement to anyone requesting it, and (4) the percentage of all contributions in the last fiscal year of the organization which remained for direct application after deducting all fund-raising, management and general costs.

Now, if that isn't enough to effectively suppress giving, the bill further requires that the above information be presented in a "clearly audible" way, "remain in view for a sufficient period of time", and "be shown against a background which does not impair the legibility" of (1) through (4) of the above paragraph.

Since charitable fund-raising costs are a mixture of the high costs of acquiring a new donor and the low costs of renewing him for a subsequent contribution, H.R. 41 would penalize new charities and greatly inhibit the possibility of new Christian ministeries getting off the ground. The disclosure provisions of this bill penalize old-line established ministries, but it could suffocate new evangelists, new schools, churches, growing colleges, missionary and broadcast outreaches.

H.R. 41, in section 3012 paragraph (a), indicates that if a local minister on a Sunday morning encourages the congregation, which usually contains non-members, to give to church operations or causes and if the offering envelopes have the church address on them, the solicitation would be subject to the regulations and sanctions of H.R. 41. And if any funds raised locally from a local church, crusade, or rally are sent on to a state, or national or international convention, conference or evangelistic association, both the local and national causes would come under the reporting requirements for disclosure of each others statistics.

H.R. 41's requirement and sanctions would inhibit the exclusively religious activities of churches by putting burdens on the collecton and disbursement of funds used in the religious mission of the churches.

The United States Supreme Court has consistently held that government, in its dealings with religion, must not inhibit religion,

must not become excessively entangled with religion, and must not violate the First Amendment's Free Speech and Free Exercise rights.

The attempt through this bill to regulate the activities of religious organizations and churches and to compel disclosure of church financial information would infringe both the Establishment and the Free Exchange Clauses of the First Amendment. The sanctions allowed for government to take, including putting a mail stop on those organizations refusing to publicly disclose their sources of income and contributors lists, would have a profoundly chilling effect on solicitations of funds by churches.

This bill would place a burdensome paperwork requirement on all churches, both large and small, if they received any charitable contributions through the mail. By forcing them to open their books and records for review and examination by the U.S. Postal Service and, under the Free of Information Act, revelation thereby to the press and public, religious contributors would no longer have confidentiality and protection from disclosure, harassment, and possible persecution or discrimination.

To have the Postal Service or any Federal Agency looking down the necks of this nation's churches and charitable organizations in this manner is really quite unconstitutional. But as one Senator was overheard to say a few years back, "If I've got enough votes to pass a bill, it is constitutional!" What he meant was the following: if you don't like a proposed law, you'd better defeat it in Congress because you can never be sure what five out of nine men on the Supreme Court will conclude is "constitutional."

Quite frankly, there has been little need shown for this type of pervasive legislation. There are more than sufficient forces at work to expose and remedy any "charity rip-offs" and to protect the interests of both the public and legitimate charities.

First, we have the vigilance of the press. Second, we already have in the law the nonprofit authentication process and audits of Internal Revenue Service. Third, we have the false representation statute, a consumer protection law covering non-profit and religious organizations, and Fourth, we have the existing statutes dealing with postal fraud.

Perhaps the greatest protection offered the public against rare abuses is the peer pressures and various codes of ethics of religious and other groups of fundraisers, plus the overwhelming availability to contributors of financial summaries, if the contributor specifically requests it.

Even without all the existing legal protections, the bill fails to take into account one all important fact: donations to charity are, by definition, made of one's own free will. There is no force compelling people to give. Every individual has the right to ask for whatever information or financial report he or she desires from that charity, before making a decision to contribute.

Charitable giving is not motivated entirely by intellectual analysis. It comes mostly from the heart .. . . through the ministry of the Holy Spirit. No matter how informative statistical figures on the cost-effectiveness of a mail, radio or TV ministry may be, the psychological impact of bureaucratic intervention will detract from the effectiveness of the appeal.

Having to further justify arithmetical acrobatics would not only cost more in printing the appeals, but would have a negative effect on donors and deny the appeal of its real content—the need to give!

If the Christian community wants to keep its economic freedom, and thereby much of its theological freedom, each congregation, organization, and thinking Christian needs to write his Congressmen immediately . . . and politely but strenuously object to passage of H.R. 41.

THE LEGISLATIVE RECORD OF THE 95TH CONGRESS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. HAMILTON. Mr. Speaker, the 95th Congress has considered a number of bills to expand and improve existing agricultural programs as well as to provide much-needed relief to the Nation's farmers. Some of these bills have already become law. They include:

AGRICULTURAL LEGISLATION

First, 4-year farm and food law that adjusts price supports, increases the limitation on payments to individual farmers, establishes an on-farm grain reserve program, extends the Food and Peace program, makes major revisions in the food stamp program and authorizes a variety of farm and rural conservation programs.

Second, a law that defers a 1977 wheat marketing quota referendum.

Third, a law that increases the authorized capital stock of the Federal Crop Insurance Corporation.

Fourth, a law that extends the Disaster Relief Act and authorizes the Corps of Engineers to provide certain drought assistance.

Fifth, a law that exempts natural disaster payments from the individual payment limitation for the 1977 crop of wheat. feed grains, upland cotton and rice.

Finally. five related laws that authorize and appropriate funds for drought assistance.

Other bills are pending in Congress. They include:

First, a bill that would reduce by 40 percent farmers' paperwork in the 1979 agricultural census and would expand the census to smaller farms.

Finally, a bill that would make major revisions in the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) to give the Department of Agriculture a stronger role in dealing with pesticides.

Although there is much more to be done, those bills enacted into law and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for American farmers. I am hopeful that this concern will be demonstrated again in the next session of Congress.

COMMUNITY DEVELOPMENT AND PUBLIC WORKS LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of community development and public works bills. Some of these bills have already become law They include:

First, a law that creates 600,000 jobs in construction and related industries by tripling Federal grants for local public works from $2 billion to $6 billion.

Second, a law that extends existing programs under the Comprehensive Employment and Training Act (CETA).

Third, a law that creates about 203,000 jobs and training positions for young persons by establishing a Young Adult Conservation Corps and authorizing a variety of youth employment and training projects.

Fourth, a law that authorizes funds for antirecession assistance to 20,000 State and local governments.

Fifth, a law that authorizes funds over 3 years for the community development block grant program and assisted housing programs, with special assistance for declining communities in urban areas.

Sixth, a law that authorizes additional funds for some 400,000 assisted housing units, extends Federal crime and riot insurance programs, creates a National Commission on Neighborhoods and authorizes additional funds for home heating in housing projects.

Finally, a law that makes economic stimulus appropriations of $20 billion, with $7.9 billion for CETA public service jobs, $59 million for employment of older persons, $4.9 billion for revenue sharing and $100 million for railroad rehabilitation.

Other bills are pending in Congress. They include:

First, a bill that would authorize funds over 5 years for the sewage treatment grant program of the Environmental Protection Agency.

Second, a bill that would provide for the regular public distribution of current information on Federal domestic assistance programs.

Finally a bill that would authorize funds through 1990 to repair and replace unsafe bridges.

Although there is much more to be done, those bills enacted into law and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for community development and public works. I am hopeful that this concern will be demonstrated again in the next session of Congress.

ENVIRONMENTAL LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills to preserve and protect the environment. Some of these bills have already become law. They include:

First, a law that authorizes funds over 3 years for the Clean Air Act, extends pollution compliance deadlines for automobiles, plants, and other sources of emissions, and increases State authority to prevent pollution in clean air areas and to allow industrial growth in areas where clean air standards have not been met.

Second, a law that provides for a Federal-State program to regulate the surface mining of coal and the surface impact of underground coal mining, to reclaim abandoned mines, and to establish mining and mineral institutes, coal research laboratories, and graduate research fellowships.

Third, a law that authorizes funds to study saline water conversion.

Fourth, a law that authorizes funds for the national sea grant program.

Fifth, a law that authorizes funds for the Marine Protection, Research and Sanctuaries Act and prohibits the ocean dumping of municipal sewage after 1981.

Finally, a law that authorizes funds for various marine mammal protection programs.

Other bills are pending in Congress. They include:

First, a bill that would provide for a comprehensive study of conservation, protection, and enhancement of the Nation's land, water, and related resources.

Second, a bill that would authorize funds over 2 years for the Safe Drinking Water Act.

Third, a bill that would authorize funds over 4 years for cooperative agreements with the States under the Endangered Species Act.

Fourth, a bill that would authorize additional funds for the purchase of portions of the Appalachian National Scenic Trail.

Fifth, a bill that would designate 1.1 million acres in nine Western States for preservation in the national wilderness system.

Finally, a bill that would establish a $200 million fund to pay for oil spill damages and would make the owner or operator of the source of pollution liable for the damages.

Although there is much more to be done, those bills enacted into law and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for the environment. I am hopeful that this concern will be demonstrated again in the next session of Congress.

FEDERAL EMPLOYEES LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills of interest to Federal employees. They include:

First, a bill that would reduce from 12 to 5 years the length of service required to retain Federal employee group life insurance and health benefits during retirement.

Second, a bill that would restore survivor annuities to certain surviving spouses of Federal employees if those survivors annuities were terminated because of the remarriage of the spouse before July 18, 1966.

Third, a bill that would provide for the preemption of any State or local law in conflict with a contract under the Federal employees health benefits program.

Fourth, a bill that would repeal prohibitions on the candidacy and participation of most Federal employees in partisan political elections.

Fifth, a bill that would raise to 70 years the age for mandatory retirement in the private sector and would eliminate the mandatory retirement age for most Federal employees.

Finally, a bill that would block the extension of mandatory social security coverage to Federal, State, and local government workers.

Although there is much more to be done, these bills form a package which clearly demonstrates the concern of Congress for Federal employees. I am hopeful that this concern will be demonstrated again in the next session of Congress.

GOVERNMENT OPERATIONS AND ETHICS LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills and resolutions to improve Government operations and to preserve the integrity of public officials. Some of the bills have become law and some of the resolutions have been adopted. They include:

First, a law that gives the President the authority to submit executive branch reorganization plans to Congress and provides that such plans take effect after 60 days unless either the House or the Senate adopts a resolution of disapproval.

Second, a law that requires that future pay raises for Members of Congress be recommended by the Quadrennial Commission on Executive, Legislative, and Judicial Salaries and be approved by a recorded vote in both the House and the Senate.

Third, a House resolution that provides for financial disclosure by Representatives and key staff members, a limit on outside earned income, a limit on gifts, restrictons on personal use of campaign funds, abolition of unofficial office accounts, restrictions on the use of the frank and curbs on lame-duck travel.

Fourth, a House resolution that establishes a Select Committee on Ethics to issue ethics regulations, to render advisory opinions and to work with the Senate to draft ethics legislation.

Fifth, a House resolution that authorizes the Committee on Standards of Official Conduct to determine whether any Representatives accepted gifts from agents of the South Korean Government.

Sixth, a House resolution that establishes a Select Committee on Intelligence to oversee intelligence and related activities in the Federal Government.

Finally, a House resolution that authorizes closed-circuit televising of floor action and establishes a public radio and television broadcasting system in the Office of the Speaker.

Other bills are pending in Congress. They include:

First, a bill that would set guidelines for Federal Reserve monetary policy, would require the Federal Reserve to consult with Congress, would broaden representation on Federal Reserve bank boards, would require Senate confirmation of the Chairman and Vice Chairman of the Federal Reserve and would prohibit conflicts of interest.

Finally, a bill that would limit the use of the frank.

Although there is much more to be done, these laws, resolutions, and bills form a package which clearly demonstrates the concern of Congress for efficient Government operations and a high standard of ethics for public officials. I am hopeful that this concern will be demonstrated again in the next session of Congress.

HEALTH LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills having to do with public health. Some of these bills have already become law. They include:

First, a law that authorizes funds for Federal health programs in 1978, including health services research, health statistics, comprehensive public health services, hypertension programs, migrant health, community health centers, medical libraries, the National Cancer Institute, the National Heart, Lung, and Blood Institute, National Research Services Awards, population research and voluntary family planning programs, sudden infant death syndrome, hemophilia, national health planning and development, health resources development and community mental health centers.

Second, a law that improves the safety and health of miners and transfers mine safety enforcement to the Department of Labor.

Finally, a law that strengthens the capability of the Government to detect, prosecute, and punish fraudulent activities under the medicare and medicaid programs.

Other bills are pending in Congress. They include:

First, a bill that would encourage dialysis in the home as an alternative to dialysis in an institution for patients suffering from kidney diseases.

Second, a bill that would create an industry trust fund to pay benefits to coal miners disabled by black lung diseases.

Third, a bill that would provide medicare and medicaid eligibility for rural health clinics and would authorize demonstration projects for clinics and mental health centers in medically underserved urban areas.

Fourth, a bill that would authorize a review of information on food additives, would prohibit certain restrictions on saccharin for 18 months and would require that stores warn customers of the potential health hazards of saccharin.

Finally, a bill that would authorize additional funds over 2 years for public health traineeships, would expand traineeship eligibility and would make technical amendments to the health professions guaranteed student loan program.

Although there is much more to be done, those bills enacted into law and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for public health. I am hopeful that this concern will be demonstrated again in the next session of Congress.

LABOR LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills of interest to working people. Some of these bills have already become law. They include:

First, a law that creates 600,000 jobs in construction and related industries by tripling Federal grants for local public works from $2 billion to $6 billion.

Second, a law that extends existing programs under the Comprehensive Employment and Training Act (CETA).

Third, a law that creates about 203,000 jobs and training positions for young persons by establishing a Young Adult Conservation Corps and authorizing for a variety of youth employment and training projects.

Fourth, a law that makes economic stimulus appropriations of $20 billion, with $7.9 billion for CETA public service jobs and $59 million for employment of older persons.

Fifth, a law that extends unemployment compensation under the Federal

supplemental benefits program for an additional 7 months and results in a total of 52 weeks of unemployment compensation for eligible persons.

Sixth, a law that improves the safety and health of miners and transfers mine safety enforcement to the Department of Labor.

Finally, a law that raises the minimum wage in stages from the present $2.30 per hour to $2.65 per hour in 1978, $2.90 per hour in 1979, $3.10 per hour in 1980 and $3.35 per hour in 1981.

Other bills are pending in Congress. They include:

First, a bill that would enlarge and strengthen the National Labor Relations Board and would expedite union representation elections under the National Labor Relations Act.

Finally, a bill that would raise to 70 years the age for mandatory retirement in the private sector and would eliminate the mandatory retirement age for most Federal workers.

Although there is much more to be done, those bills enacted into law and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for working people. I am hopeful that this concern will be demonstrated again in the next session of Congress.

LAW ENFORCEMENT AND CRIMINAL JUSTICE LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills in the areas of law enforcement and criminal justice. Some of these bills have already become law. They include:

First, a law that appropriates $647 million for the existing programs of the Law Enforcement Assistance Administration.

Second, a law that authorizes funds over 3 years for drug enforcement under the Controlled Substances Act.

Third, a law that extends the Juvenile Justice and Delinquency Prevention Act, authorizes funds over 4 years for Federal juvenile justice programs and authorizes funds over 3 years for the Runaway Youth Act.

Finally, a law that extends Federal crime and riot insurance programs.

Other bills are pending in Congress. They include:

First, a bill that would authorize funds over 2 years for the Legal Services Corporation and would eliminate certain restrictions on legal aid to the poor.

Second, a bill that would protect children from sexual exploitation by providing severe criminal penalties for persons involved in juvenile prostitution and child pornography.

Third, a bill that would extend the Child Abuse Prevention and Treatment Act for 5 years and would prohibit the sexual exploitation of minors.

Finally, a bill that would authorize funds over 3 years to assist States in the compensation of innocent victims of crime.

Although there is much more to be done, those bills enacted into law and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for strong law enforcement and criminal justice. I am hopeful that this concern will be demonstrated again in the next session of Congress.

NATIONAL DEFENSE LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills to provide for a strong and efficient national defense. Some of these bills have already become law. They include:

First, a law that appropriates $109.8 billion for national defense.

Second, a law that authorizes the Department of Defense to maintain military forces totaling 2.9 million persons and civilian forces totaling 1 million persons.

Third, a law that extends until September 30, 1978, the authority to pay enlistment bonuses up to $3,000 and reenlistment bonuses up to $15,000 for military personnel.

Fourth, a law that authorizes funds for the national security programs of the Energy Research and Development Administration, including the neutron bomb program.

Finally, a law that extends for 2 years the Defense Production Act.

Other bills are pending in Congress. They include:

First, a bill that would amend the Strategic and Critical Materials Stock Piling Act to establish a program for the acquisition of strategic and critical materials from foreign countries through barter goods owned by the United States.

Second, a bill that would authorize funds for military procurement of missiles and aircraft, including the cruise missile.

Finally, a bill that would make improvements in the Retired Serviceman's Family Protection Plan and the Survivor Benefit Plan.

Although there is much more to be done, those bills enacted into law and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for a strong and efficient national defense. I am hopeful that this concern will be demonstrated again in the next session of Congress.

OLDER PERSONS LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills to assist older persons. Some of these bills have already become law. They include:

First, a law that provides an additional tax credit of $35 per year for the elderly and permits business deductions for day care of the elderly in the home.

Second, a law that authorizes funds for home health demonstration and training projects for the elderly.

Third, a law that strengthens the capability of the Government to detect, prosecute, and punish fraudulent activities under the medicare and medicaid programs.

Fourth, a law that appropriates $59 million for employment of older persons.

Finally, a law that makes major revisions in the food stamp program by eliminating the purchase requirement and simplifying program administration.

Other bills are pending in Congress. They include:

First, a bill that would raise to 70 years the age for mandatory retirement in the private sector and would eliminate the mandatory retirement age for most Federal workers.

Second, a bill that would assure the solvency of the social security system and would assist social security recipients by increasing payroll tax revenues and phasing out the earnings limitation.

Third, a bill that would authorize reduced air travel fares for retirees over age 60 and all persons over age 65.

Fourth, a bill that would require the Department of Health, Education, and Welfare to assure that the elderly have access to buses and other mass transit systems.

Finally, a bill that would establish a national meals-on-wheels program.

Although there is much more to be done, those bills enacted into law and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for older persons. I am hopeful that this concern will be demonstrated again in the next session of Congress.

POSTAL SERVICE LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills to improve the U.S. Postal Service. They include:

First, a law that appropriates $1.6 billion for the Postal Service, $920 million of which may be used for operations.

Second, a bill that would repeal prohibitions on the candidacy and participation of most Federal workers in partisan political elections.

Third, a bill that would provide for the arbitration of disputes between the Postal Service and recognized organizations of Postal Service managers.

Fourth, a bill that would provide for congressional review of decisions of the Postal Rate Commission, would establish precise methods for setting postal rates, would increase Federal support for the Postal Service, would authorize funds for 6-day delivery, the operation of rural post offices and a modern research and development program, would abolish the Postal Service Board of Governors and would provide for congressional review of proposed changes in levels or kinds of nationwide service.

Finally, a bill that would require a charitable organization using the mails to provide potential donors with information about the organization.

Although there is much more to be done, this legislative package clearly demonstrates the concern of Congress for the Postal Service. I am hopeful that this concern will be demonstrated again in the next session of Congress.

SCHOOL LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills in the area of education. Some of these bills have already become law. They include:

First, a law that extends advance funding for disadvantaged aid and library programs under the Elementary and Secondary Education Act and the Adult Education Act.

Second, a law that authorizes funds over 5 years for programs under the Education of the Handicapped Act.

Third, a law that authorizes funds over 2 years for foreign area study and

language development programs under the National Defense Education Act.

Fourth, a law that extends the summer feeding program for 3 years, makes improvements in the food service equipment and free breakfast programs in extremely needy schools and authorizes Federal grants of 50 cents per child for a national nutrition education program.

Finally, a law that makes several technical amendments to the Vocational Education Act, including amendments relating to the use of Federal funds for State and local administrative support.

Other bills are pending in Congress. They include:

First, a bill that would authorize funds over 5 years for career education programs in elementary and secondary schools.

Finally, a bill that would designate the libraries of accredited law schools as depositories for Government documents.

Although there is much more to be done, those bills enacted and those bills awaiting further action from a package which clearly demonstrates the concern of Congress for the Nation's schools. I am hopeful that this concern will be demonstrated again in the next session of Congress.

SMALL BUSINESS LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills of interest to small business. Some of these bills have already become law. They include:

First, a law that increases the Small Business Administration (SBA) authorization for surety bond guarantees, business and investment loans, economic opportunity loans and small business investment companies and revises and expands the SBA disaster loan program.

Second, a law that cuts taxes by $34 billion over 3 years and gives businesses tax credits for new employees hired in 1978 and 1979.

Third, a law that extends the Council on Wage and Price Stability for 2 years.

Fourth, a law that exempts farms employing 10 or fewer workers from Occupational Safety and Health Act (OSHA) regulations and forbids OSHA officials to issue citations during the first inspection of a workplace unless 10 or more violations are found there.

Finally, a law that raises the small business minimum wage exemption in three stages from the present $250,000 in gross annual sales to $362,500 in gross annual sales by 1982.

Other bills are pending in Congress. They include:

First, a bill that would amend the Employee Retirement Income Security Act (ERISA) to simply pension fund management.

Second, a bill that would authorize the SBA to offer reinsurance against excessive losses resulting from product liability claims.

Third, a bill that would authorize the SBA to assist small businesses in purchasing energy conservation equipment.

Fourth, a bill that would authorize Federal grants to universities to establish and operate small business development centers.

Finally, a bill that would protect service station operators from arbitrary or discriminatory termination of their franchises.

Although there is much more to be done, those bills enacted and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for small business. I am hopeful that this concern will be demonstrated again in the next session of Congress.

SOCIAL SERVICES LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills to improve the delivery of social services to deserving Americans. Some of these bills have already become law. They include:

First, a law that authorizes funds over 3 years for the community development block grant program and assisted housing programs, with special assistance for declining communities in urban areas.

Second, a law that makes major revisions in the food stamp program by eliminating the purchase requirement and simplifying program administration.

Third, a law that authorizes funds over 5 years for programs under the Education of the Handicapped Act.

Fourth, a law that extends for one year Federal matching funds for child support collection and paternity establishment services.

Fifth, a law that extends the summer feeding program for 3 years, makes improvements in the food service equipment and free breakfast programs in extremely needy schools and authorizes Federal grants of 50 cents per child for a national nutrition education program.

Sixth, a law that extends for one year a $200 million increase in expenditures for title XX social services and delays the imposition of Federal day care standards.

Other bills are pending in Congress. They include:

First, a bill that would authorize funds over two years for the Legal Services Corporation and would eliminate certain restrictions on legal aid to the poor.

Second, a bill that would establish a national meals-on-wheels program.

Finally, a bill that would provide medicare and medicaid eligibility for rural health clinics and would authorize demonstration projects for clinics and mental health centers in medically underserved urban areas.

Although there is much more to be done, those bills enacted and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for adequate social services. I am hopeful that this concern will be demonstrated again in the next session of Congress.

VETERANS LEGISLATION

Mr. Speaker, the 95th Congress has considered a number of bills of interest to veterans. Some of these bills have already become law. They include:

First, a law that increases by 6.6 percent service-connected disability compensation and dependency and indemnity compensation for veterans and their survivors.

Second, a law that authorizes funds over 2 years to improve the program of grants to States for construction, remodeling, and renovation of State-run home facilities for veterans.

Third, a law that provides an automobile assistance allowance and special automotive equipment to certain disabled World War I veterans.

Finally, a law that denies veterans benefiits to certain Vietnam war veterans with upgraded discharges unless a discharge review board makes a separate recommendation.

Other bills are pending in Congress. They include:

First, a bill that would increase by 6.5 percent veterans and survivors pensions, would provide a 25 percent differential to World War I surviving spouses aged 78 years or more and would increase the outside income which beneficiaries may receive and still be eligible for a pension.

Second, a bill that would revise procedures relating to the construction, alteration and acquisition of Veterans Administration medical facilities.

Third, a bill that would provide increased service-connected compensation to certain veterans who have suffered the loss or loss of use of paired extremities.

Fourth, a bill that would provide specially adapted housing assistance to permanently and totally disabled veterans who have suffered the loss of use of one upper and one lower extremity.

Finally, a bill that would increase veterans education benefits by 6.6 percent.

Although there is much more to be done, those bills enacted and those bills awaiting further action form a package which clearly demonstrates the concern of Congress for veterans. I am hopeful that this concern will be demonstrated again in the next session of Congress.

MAYFIELD, KY., HIGH SCHOOL

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. HUBBARD. Mr. Speaker, earlier today I paid tribute to and congratulated the 1977 Mayfield High School football team upon their winning the class AA State championship in Kentucky.

In my earlier remarks I listed the coaches and the 27 Mayfield Cardinals who played in the championship game at Richmond, Ky., last Friday.

At this time, in all fairness to the other players and cheerleaders who were instrumental in Mayfield's 12–1 season record and winning the State championship, I list the other players: Greg Puckett, Greg Kerr, Chris Biggers, Louis Kemp, Greg Vincent, Steve Bradford, Jeff Mason, Tommy Seavers, Jim Webb, Mark Glover, Bubba Ford, Gary Saxton, and Jerry Washburn.

The cheerleaders for Mayfield High School are: Lisa Lewis, Beth Burnette, Mary Caroline Copeland, Lisa Sanderson, Melissa Berry, Cathy Dublin, Johanna Moses, and Kim Sanert. Their sponsor is Mrs. Donna Lamkin Owen.

REV. HENRY L. PINCKNEY: PILLAR OF COMMUNITY

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. STOKES. Mr. Speaker, I rise on this occasion to bring to your attention and to the attention of colleagues in the House an article which recently appeared in the Cleveland Press newspaper on the Reverend Henry L. Pinckney of Cleveland, Ohio.

Reverend Pinckney is the pastor of the Glenville United Presbyterian Church and one of the most respected community leaders in our city. Because of his outstanding service to Cleveland, he was recently featured in a column in the Cleveland Press newspaper. Mr. Speaker, I was particularly pleased to read Mr. Bob Seltzer's inspirational column on my friend the distinguished Reverend Pinckney.

Therefore, Mr. Speaker, I respectfully submit to the House this column entitled "Pastor Is Community Pillar" which appeared in the November 8, 1977, edition of the Cleveland Press:

PASTOR IS COMMUNITY PILLAR

(By Bob Seltzer)

The warp and woof of which the life of the Rev. Henry L. Pinckney is wrought is manifested in his many acts of kindness as pastor of the Glenville United Presbyterian Church, U.S.A., and Community Center at 10504 Helena Ave., near St. Clair Ave.

One of 10 children of a construction worker, farmer and logger near Walterboro, S.C., Pinckney was endowed with empathy and an understanding heart in helping his fellow man along life's road as he worked his way for an education.

He organized the Glenville Task Force on Education, and established in 1970 an after-school hot supper program at his church, where 50 children receive free meals Monday through Friday all year. It started with church funds, and a year later became a U.S. Department of Agriculture project.

In 1974, he established a sandwich, fruit and milk program, which enabled 450 children in Glenville social service agencies to receive free lunches Monday through Friday during the summer.

Pinckney negotiated with the Council on Economic Opportunity for creation in 1975 of the first senior citizen program in Glenville. Foundation funds were granted the Youth Planning Development Commission. He was one of the organizers of the Glenville Concerned Parents Organization, and in 1973 received the Council on Economic Opportunity's award for outstanding service in Glenville.

Pinckney, a widower, who became 42 Oct. 15, is a short, vibrant leader. He was an organizer of the Black Action Training Program for equipping black clergymen without college or seminary experience with understanding of the resources of their community. He served as chairman.

In 1974, he was president of the Greater Cleveland Interchurch Council, and served as moderator of Presbytery of the Western Reserve, comprised of 61 United Presbyterian churches in Greater Cleveland, with a total membership of 33,000.

He is active in the Kathryn Tyler Neighborhood Center, on the board of Neighbors Organized for Action in Housing, chairman of Glenville Community Center, and serves as a volunteer chaplain at Forest City Hospital. He took a clergy counseling program at Case Western Reserve University.

His church is fiscal agent for a juvenile action program, counsels youths, and provides them with programs. He is host of a WJMO-Radio program, "The Open Door," and a member of the Kiwanis Club of Cleveland.

Pinckney worked in department stores for a year after graduation from high school, and then served in the Navy in Oregon, Guam and the Military Sea Transportation Service in the Pacific.

He received a B.S. degree cum laude in elementary education from South Carolina State College under the GI Bill, and held several summer jobs. He earned his bachelor of divinity degree from John C. Smith University and won a two-year national Presbyterian scholarship and three awards.

"A church is the only institution that relates to personal and spiritual being and makes people concerned citizens who have to love themselves and their neighbors," Pinckney said. "It is an experience of people working together and sharing responsibility."

Pinckney's wife Kathryn died in January. Their sons, Henry Jr., 10, and Glen, 9, attend St. Henry School. The Pinckneys live at 4222 E. 187th St.

AFRICA: THE REALITIES

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. SYMMS. Mr. Speaker, I want to take this opportunity to share with my colleagues an article which appeared in the Johannesburg Citizen on Wednesday, October 26, 1977.

The article follows and speaks for itself:

AFRICA: THE REALITIES

The African group in the United Nations has asked Security Council members to support their draft resolution calling for a mandatory arms embargo and economic sanctions against South Africa.

Mr. Mahmoud Mestiri, of Tunisia, making the call, said that support for the African drafts was the least the Western Powers could do to help the "oppressed" South African people.

Who are these African States which have placed South Africa in the dock?

Nice, sweet, lovable, democratic countries, modelled along the lines of the mighty USA, land of the free and the token Black, Watergate and Bert Lance, Andy (I can live with Marxists) Young and Carter's Little Liverish Pills, to be taken when you have had too rich a diet of the President's Human Rights Platitudes?

Dedicated to the proposition, as Abraham Lincoln put it, that all men are created equal and that government of the people, by the people, and for the people shall not perish from the earth?

Committed to President Roosevelt's four freedoms—of speech and expression and of worship, and freedom from want and fear?

Super-duper countries with super-duper social and political systems guaranteeing a super-duper life for all?

If you were to accept Carter and Company's evaluation, you would really think that Africa is God's own continent except for the White South of it.

But the realities are quite different.

Let's spell them out for Mr. Carter, since he doesn't have the faintest idea of what Darkest Africa is all about.

There are:

20 one-party States.

13 dictatorships.

7 military dictatorships.

11 multi-party states, including Transkei, South Africa, Rhodesia and Botswana.

Other interesting facts are:

Of all the Black States north of the Limpopo, only three have constitutions which protect minority rights.

An independent judiciary exists in only seven Black African States.

In August last year, the London Time reported that by the "simple standard of news freely printed and of articles critical of the Government freely written and published", only South Africa in Africa would pass the test of having a free Press—"and even then with limitations" (the banning of the World and Weekend World does not mean that the remainder of the South Africa Press would not pass the test).

In 35 African countries the Press is government-controlled.

As we have already reported, more than a quarter of Black Africa's governments ban foreign correspondents entirely, or admit them so infrequently and under such controlled conditions that news, in effect, is managed or blacked out.

A Washington Post correspondent reported after working in Africa for three years: "African governments exercise so much control over Western news agencies and correspondents that it is becoming increasingly difficult to tell the reader what really is happening."

Which reminds us of a recent discussion which the Editor of The Citizen had with two top American journalists.

Why, he asked, did the U.S. apply double standards to South Africa, placing on it pressures which it did not exert on other countries in Africa which were one-party dictatorships or out-and-out Marxist States?

Ah, the Americans replied, because you are a Western land, or claim to be one, and we expect you to observe Western standards.

In that case said the Editor, perhaps South Africa should stop being part of the West and adopt African standards instead.

Which is a thought for this much-maligned and beleaguered country.

A HISTORIC EVENT IN THE MIDEAST

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mrs. MEYNER. Mr. Speaker, everyone who has worked and prayed for peace in the Mideast should have been enormously gratified by the dramatic trip to Jerusalem of President Anwar Sadat of Egypt. This courageous act of statesmanship has transformed the peace process in the Mideast in a very positive way. It vindicates the assertion of the Israelis that face-to-face negotiations are essential for a real peace settlement in the Mideast.

A recent article by Mr. Abba Eban, a former Foreign Minister of Israel, in the New York Times shows an impressive sensitivity to the psychological aspects of this breakthrough for both sides in the Arab-Israeli dispute. I recommend it to all of my colleagues who have been fascinated by the recent important developments in the Mideast.

The article follows:

[From the New York Times, Nov. 22, 1977]

ISRAEL'S HOUR OF DECISION

(By Abba Eban)

JERUSALEM.—The time has come for sharp transition—from rhetoric to diplomacy; from the public exchange of arguments to the private exchange of proposals; from the useless question, "Whose fault is it?" to the essential question, "How do we find remedy?"

Whatever Arabs and Israelis have to say to each other to illustrate their own exclusive virtue and each other's unlimited guilt has been said over and over again. The aim today is not to score debating points but to attain a higher level of mutual understanding. One of the greatest obstacles has been the absence of direct human discourse. This has never been a mere procedural defect capable of remedy by mediation. It has been both the cause and the result of deeper irrationalities with long roots in history.

It is a common attribute of Arabs and Israelis that they give unusual reverence to the past. But history is the enemy of Arab-Israeli reconciliation. The past is the adversary of the future. The vision that Arabs deduce from their history has never included the idea of a Jewish sovereignty in the heart of the Middle East: a society impregnated with Jewish memories, saturated with Hebrew ideas, and inspired by a legacy outside the Arab experience.

In the Arab historical drama, Jews appear always as the objects of tolerance or intolerance, never as the bearers of an autonomous political identity or as the heirs of a specific territorial heritage. In order to accommodate the idea of Israel's statehood, Arabs must make an effort of innovation, not merely of memory. Their intellectual torment is authentic, and should not be taken lightly.

Similarly, the Jewish past, by virtue of its deeply tragic character, compels a spontaneously traumatic reaction to every situation. Many things in Jewish history are too terrible to be believed, but nothing in that history is too terrible to have actually happened.

Israelis, as the products of Jewish history, are more prone to see the dangers than the opportunities inherent in every set of circumstances. When the cold, stark refusal of contact is added to these historical burdens, reconciliation becomes objectively unfeasible. That is why Anwar el-Sadat's presence has a significance in its own right, irrespective of whether it has any operative results in the short term.

Even if the historic current were to stop where it is, we should have to conclude that something of importance has happened and that the Middle East will never be quite the same again. There are territorial, strategic and human components in the Arab-Israeli conflict, but these have never been its root cause. It is essentially a collision between two contradictory visions of the Middle East in history.

In the Arab imagination, Israel is a symptom of discontinuity, a violation of the natural regional harmony. In the Israeli consciousness, Israel is a resumption of a primary current in the history of mankind.

The Middle East is not a monolith of a single Arab color. It is a tapestry of many colors, of which the central thread was woven by Jewish experience centuries ago. It is hard to see how peace can be born in this world of contrasting visions, especially if its prospective parents never meet.

When the President of Egypt initiates an encounter with a sovereign Israel in its capital, the literature of denial becomes obsolete overnight. The alarm of the Arab hard-liners is understandable, and even logical, within their own terms. A Middle East without Israel is a revolt against history and the law of nations. With President Sadat's decision, the revolt comes to an end with incisive dignity, and the Arab world comes face-to-face with a reality that it would have preferred to ignore.

For Egypt is not just one of 22 Arab states. It is nearly half of the Arab world in population, the only recognized center of its policy and culture. It is only because of Egypt's strength—and of Anwar Sadat's daring in 1973—that the Arab world has a credible military option. Without Egypt it is doubtful whether the Arab world can make either war or peace.

A single visit does not replace the need for patient, weary negotiation. But if it reduces the exclusive pretentions of mediation, no harm is done. Even at its best, external mediation suffers from inherent limitations. It involves the Middle Eastern states in the predicaments of the mediators—in global tensions, in strategic rivalries, in the cold war or detente, in parliamentary maneuvers of international agencies, in the energy problem, or in the American-Soviet dialogue.

If external mediation were effective, these difficulties would be irrelevant. Nothing matters here as much as success. But modern diplomatic history contains no successes in the settlement of long-term political conflicts by mediation that seeks to replace direct discourse. Mediation that supplements and accompanies direct encounter is quite a different matter, and there will be acute need of this.

Israelis should not let their contentment obscure the fact that Anwar Sadat did not come here to make things easier for them. On the contrary, he accelerated the moment of painful truth. A discussion that has been rhetorical, semantic, procedural—a 10-year exercise in prenegotiation—will soon be focused not on words and gestures, but on concrete things.

The present Israeli Government, pampered by what it inherited, especially by the serenity created in the disengagement agreements, has not yet been involved in a single decision involving risk. But very soon the working papers will have to be specific: What exactly are the Arabs prepared to do about peace? What precisely can Israel do or not do about withdrawal? What will the Palestinian condition be within the peace context?

The Israeli Government can prosper to the extent that it translates the slogan "Everything is negotiable" into credible attitudes and terms.

NAVY CITES L. EDGAR PRINA

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. BOB WILSON. Mr. Speaker, in retiring from the Navy after 35 years of service, the deputy bureau chief of the Copley News Service, L. Edgar Prina, may have ceased his active participation in naval affairs, but his interest in and dedication to the Navy will most certainly continue.

I have known Ed Prina for years. His views, through his writings and conversations have helped me many times to understand the military—its activities, interests, people, and equipment. I am most fortunate, as are many others to have worked with Ed, and am glad that I will still be able to call on him for advice and counsel.

Ed is a man of many parts and the November issue of Sea Power magazine, in noting Ed's retirement, sets forth his accomplishments far more eloquently than I am able.

NAVY CITES PRINA FOR CAREER OF "YEOMAN SERVICE"

Sea Power Editor Emeritus L. Edgar Prina, now serving as deputy bureau chief of the Copley News Service, has been given a formal letter of appreciation by the Navy in recognition of his "experience and scholarship in naval matters" and his long and still-continuing efforts in developing a greater "public awareness and understanding of seapower."

Rear Admiral David M. Cooney, the Navy's Chief of Information, who presented the letter on the occasion of Prina's retirement (in the rank of captain) from the Naval Reserve, pointed out to an audience which included former Secretary of the Navy J. William Middendorf II that in his various naval and journalistic assignments Prina has "played an important part in each of three major conflicts, and the Cold War," and has throughout maintained "the highest standards of professionalism, dedication to duty, and devotion to the Navy."

Navy Secretary W. Graham Claytor, Jr., who was unable to attend the ceremonies in Cooney's office, offered his own congratulations in a personal letter to Prina, telling him that "As correspondent, editor, bureau chief, and just a frank, concerned military affairs observer you have done yeoman service with the pen in areas where others have faltered with the sword.

"I look forward to your continuing candid yet honest reporting of activities regarding the naval service," Claytor said. "The Navy as well as the entire defense establishment needs your enlightened interest."

TROUBLING VOTER APATHY

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. WYLIE. Mr. Speaker, on November 8 the people of Ohio voted against instant voter registration by more than 738,000. I am convinced the election result in Ohio on this issue was in the best interests of our country. Backers of instant voter registration argued it would increase public participation in elections. An examination of the records indicate otherwise. The assumption that instant voter registration will increase voting is wrong and the people of Ohio knew it. Somehow, we do need to convince every American of the need to participate in our election process. Overcoming apathy will require thorough and thoughtful solutions. The survival of our democracy is dependent on participation by the governed.

Just today, an editorial which appeared in the St. Louis Globe-Democrat on November 24 and entitled, "Troubling Voter Apathy" came to my attention. I thought the editorial was particularly well written and deserved public dissemination through the RECORD.

The editorial follows:

TROUBLING VOTER APATHY

"There seems to be no quick and easy way to reverse the declining turnout of voters on election days—a trend that has continued unchecked for nearly two decades.

"The latest evidence underscoring that situation comes from a study of the Nov. 8

elections conducted by a bipartisan group called the Committee for the Study of the American Electorate.

"A substantial drop in eligible voters was noted in the study, which covered three statewide elections and mayoral races in seven cities. Furthermore, even gimmickery such as postcard registration couldn't reverse the trend.

"Actually, states that in recent years have turned to postcard registration suffered the biggest declines. New York, Pennsylvania and New Jersey have adopted the postcard procedure in the last four years, and all three have seen voter turnout decline from 15 to 30 per cent in the last decade, the study pointed out.

"The situation is going from bad to worse. In the past registration rolls were a guide to the number likely to vote, but that 'no longer is a good indicator of eventual turnout,' according to Curtis B. Gans, director of the study committee. Now 70 or more per cent of the registered voters cannot be counted on to cast a ballot as had been the case in the past.

"The problem is basic. Too many elected officials from the White House down refuse to admit that new registration procedures and new election laws will not correct the present dilemma.

"In an attempt to reverse the election day trend, the motivations and explanations of the electorate and politicians should be studied. Citizens blame their apathy on the growing shenanigans that are continually cropping up in Congress and elsewhere on other governmental levels.

"Nonvoters are offering a hollow-sounding alibi. Whatever happened to the cries of former days that the scoundrels must be driven out of office? If changes for the better are to become a reality in government, they will have to be brought about by an outpouring of voters demanding high standards. Otherwise, some public officials will stray just as far as the electorate will permit.

"Postcard and election-day registration won't accomplish that end. Instead, gimmickery of this sort will open the floodgates to greater potential election fraud.

"Apathy is unknown in a number of controversial issues, including the Panama Canal treaties, abortion and the Equal Rights Amendment, to mention a few. Still the trend of declining voter interest and turnout has not been reversed.

"Perhaps, supporters and foes in the controversial areas hold the answer to the ultimate demise of election day apathy. What may be needed to spark citizens into recognizing their duty and obligation as voters is a stimulating grass roots campaign that can capture their imaginations year in and year out.

"If the diminishing trend continues unchecked, a day may come when election judges and other workers at the polls will almost outnumber the voting citizenry."

PHILLY SLUDGE

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. EVANS of Delaware. Mr. Speaker, recently the Congress, by an overwhelming margin, passed H.R. 4297, the Marine Protection, Research and Sanctuaries Act of 1977. This legislation was signed into law by President Carter on November 4. Under provisions of that legislation, the harmful dumping in the ocean of sewage sludge is prohibited as soon as possible, but not later than December 31, 1981. This provision was extremely controversial in committee and opponents of the language, such as city officials from Philadelphia and New York, repeatedly questioned the contention of many of us on the committee that ocean dumping poses an extreme and immediate hazard to the natural resources off our coastline.

Recently, the Maryland Department of Natural Resources published a report which found that the dumping by Philadelphia of sewage off Ocean City, Md., has ruined clam beds valued at $5.6 million. This is just another example of the harmful effects on our ocean environment which ocean dumping presents and I insert this article from the Delaware State News from November 25, 1977, which discusses the report, in the RECORD:

CLAM BEDS RUINED BY SLUDGE

OCEAN CITY, MD.—Philadelphia sewage dumping off Ocean City, Md. has ruined clam beds valued at $5.6 million, according to a report from the Maryland Department of Natural Resources.

Sludge dumping at the "Philadelphia site", a zone approximately 10 miles in diameter located 35 miles off the Maryland coast, jeopardizes surf clam and quahog resources valued at $232.4 million, the report claims.

While the figures are on the high side, they are an accurate reflection of the "potential value" of the fisheries just south of Delaware, John C. Bryson, director of the Middle Atlantic Fisheries Management Council, said today.

What the figures also show is that Philadelphia dumping is having a longterm significant impact on aquatic life, Bryson said.

Heavy metals in the sludge probably kill the clams, and a high bacteria count makes them unharvestable Bryson said.

The clam beds knocked out by pollutants can rebuild, but "it may take 10, 15 or 20 years in this particular area," Bryson said.

The dumpsite was closed Dec. 10, 1976 to shellfish harvesting because of sludge contamination.

Philadelphia has disposed of around 90 million pounds of sludge per year at the site.

Clam beds as far as 11 miles from the dumpsite may also be affected by pollutants, the Maryland report said.

"The possibility (of extended contamination) was raised by discovery of fecal coliform contamination in specimens sampled at an Environmental Protection Agency monitoring station 11 miles south of the dumpsite," the report said.

The presence of fecal coliform is considered by many scientists as an indication of the presence of other more harmful pollutants in water.

If the extended area was ordered closed, around three million bushels of quahogs, or an annual harvest of 600,000 bushels worth $1.8 million dockside, would be lost, the report claims.

The report indicates sludge contamination via a "sludge plume" could spread several miles in a southwesterly direction over the years. If that happened, Maryland scientists estimate in the report contamination could "cover 500,000 bushels of ocean quahogs."

The Maryland report focuses on surf clams and quahogs, sea clams used for fried clams, commercially packaged chowders and other frozen or canned products. However, sludge dumping could also affect other fish and wildlife, the report noted.

ROBERT BAUMAN: EVERY CONGRESS NEEDS ONE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. MICHEL. Mr. Speaker, I recently came across an article in the Miami Herald dealing with the accomplishments, exploits, and parliamentary adventures of an admired and distinguished colleague, Mr. BAUMAN of Maryland. The article quoted the Speaker as saying: "Sometimes he can be a pain—but every Congress needs a Bauman." Although the Speaker did not specify precisely what kind of "pain" Mr. BAUMAN might be, or where this pain attacked the Speaker, I can only say that for my part I have found the distinguished gentleman from Maryland to be more of an analgesic than a pain. Perhaps that is because what is often painful to the Speaker has a soothing effect on those of us in the other party.

Be that as it may, I want to place in the RECORD this article on Mr. BAUMAN since it demonstrates beyond any doubt that gentleman's unique parliamentary and oratorical gifts and his deep love for the procedures, the traditions, and the spirit of the House of Representatives.

At this point I would like to place in the RECORD, " 'Every Congress Needs a Bauman' House Speaker O'Neill says," as it appeared in the Miami Herald, November 1977:

"EVERY CONGRESS NEEDS A BAUMAN," HOUSE SPEAKER O'NEILL SAYS

(By Joseph Albright)

WASHINGTON.—"Sometimes he can be a pain," says House Speaker Thomas O'Neill (D-Mass.) "but every Congress needs a Bauman."

When the dour-faced Rep. H. R. Gross (R-Iowa) retired in 1974 after 26 years of lonely obstructionism, he left a vacuum—but not for long.

Recently elected Rep. Robert Bauman (R-Md.) a one-time chairman of the right-wing Young Americans for Freedom, soon began to occupy Gross' familiar seat, at the end of the Republican leadership table, next to one of the few microphones on the floor.

Now, whenever the leadership brings up something like a technical amendment to a vocational rehabilitation bill, the 40-year-old Bauman is on his feet, demanding an explanation. Nine times out of ten, Bauman finds nothing to howl about and sits down. But, when he sees a chance to goad the Democratic majority, expose a congressional perquisite or lambaste a bureaucrat, Bauman unleashes parliamentary objections and demands roll calls.

His most celebrated score happened late one afternoon last year when he noticed the leadership bringing up a resolution to send 25 members of Congress and their wives and aides to England to pick up the Magna Carta.

It was a "noble gesture" to Anglo-American friendship, insisted O'Neill. But to Bauman, it was nothing but a "grand tour of London" financed by the taxpayers. With all the other congressional junketing going on, there surely would be 25 congressmen in London at any one time who could collect the British document, Bauman told the House.

As often happens, Bauman managed to infuriate both Democratic and Republican leaders by demanding a roll call. (O'Neill once

attacked Bauman's technique as "a cheap, sneaky, sly way to operate.") A few days later, he was soundly beaten, and a slimmed down Magna Carta delegation thoroughly chastised by home-town editorialists took off for London.

His lasting achievements are frustratingly few. He did block a bill last year that would have upped the federal contribution to life insurance programs for government employes. He inserted an amendment that would have allowed congress to stop National Science Foundation research grants with seemingly ridiculous titles.

But the amendment was killed by the House-Senate conference committee. This year, he temporarily blocked a $13 million appropriation for the assassination investigation, which he viewed as a waste of money.

Last month, Bauman took aim at a highly touted package of House administrative changes, prepared by Rep. David Obey (D-Wis.) at the request of the Democratic leadership. To Bauman, the "reforms" were defective, because they gave Speaker O'Neill the same grip on payrolls and other housekeeping details that ex-Rep. Wayne Hays (D-Ohio) gained through his chairmanship of the House Administration Committee.

Instead of attacking the Obey commission directly, Bauman managed just before the vote to force the clerk of the House to issue a delayed report listing members' expenses from their $2,000 a year district office account. The predictable headlines about expenditures for a tuxedo rental, bar association dues and liquor for an inaugural party were credited by House leaders as a factor in the unexpected refusal of the House to consider the Obey report.

"I just heard through the grapevine there were some real goodies in it," says Bauman, a Capitol insider who served for 15 years as a House and Senate page and as a member of the House doorkeeper's staff before plunging into Maryland politics.

As a bedrock conservative, Bauman is almost as much of a pain for House Minority Leader John Rhodes (R-Ariz.) as he is for the Democrats. It was Bauman along with half a dozen other conservatives, who forced Rhodes to reverse himself after endorsing a Democratic proposal for postcard voter registration.

This summer when former President Gerald Ford asked Rhodes to sponsor a routine bill for a few extra staff members to help Ford with his correspondence, it was Bauman who objected.

"It was just as if Ford was back in the House. Good old Jerry, give him a Cadillac," he said. As often happens, Bauman made his point, embarrassed the leaders and then let the measure go through.

Rep. John Wydler (R-N.Y.) a mainstream Republican, says Bauman has become a "third party" on the floor. "When a subcommittee chairman brings up a bill, he will check it with the Democratic and Republican leaders, and then clear it with Bauman so he won't attack it," said Wydler.

Bauman has made much of his spiritual kinship to Gross, but sometimes the parallel weighs heavy. "It kind of boxes you in," he says.

Like Gross, Bauman takes a grim view of the present and the future. Every time Congress is in session, the American people are in danger, says Bauman. "As for the Republican party, it might not survive the next election; liberal Republicans ought to be evicted because they are only 'Democrats in drag.' The trouble with conservatives is that their leaders are either over the hill or have been known to sell out."

Oddly, Bauman says what gave him the most satisfaction this year was the time he helped O'Neill out of precedural bind on a cargo preference bill. Afterwards, O'Neill came up to him and thanked him.

"When you fight with someone all the time, it is nice once in a while to be able to help the guy," says Bauman.

ALASKA NATIONAL INTEREST LANDS

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. KOSTMAYER. Mr. Speaker, I rise to share with my colleagues today a letter I received recently from Joseph P. Williams, a constituent from Hatboro, Pa.

The Oversight and Alaska Lands Subcommittee has held hearings in Washington, throughout the "lower forty-eight", and in Alaska itself on H.R. 39 and the issue of "d–2" national interest designations in that State. As the subcommittee of which I am a member completes its hearings phase, and begins markup of a new draft of H.R. 39, I commend to my colleagues the words of Mr. Williams:

HATBORO, PA.,
October 23, 1977.

Hon. PETER KOSTMAYER,

I am writing to you to express my views concerning the Alaska National Interest Lands issue.

The number of places on our earth that are not molded and controlled by man are dwindling rapidly. The question that I ask myself is this: Does mankind have the right to determine the destiny of all other life forms on this planet? Will our ancestors look back upon this time and long for the diversity and wonder of nature that once existed?

I am not so hypocritical that I think I would sacrifice my life for a Polar Bear, but I don't believe that we or our ancestors will have to make such a decision if we act now.

It is my belief that we can prevent further destruction of our natural world without drastically changing our lifestyles. Concentrating our efforts on projects such as recycling natural resources, population control, and harnessing the sun for energy will enable us to overcome our growing energy shortages.

More attention should be given to the problem of wasteful business and governmental systems of operation. I have personally witnessed the incredible amount of waste that accompanies the daily operations of many businesses and governmental agencies. By streamlining their methods of operation a great deal of this waste can be prevented.

Though I cannot personally testify to the truth of this accusation; It is believed by many that certain industries practice the art of building short term life expectancies into their products in order to insure a higher turnover of merchandise. Such accusations should surely be investigated by our government, for this is the kind of wastefulness that we can surely do without.

I am in favor of preserving as much wilderness as is possible. I value these areas not only for their fulfulling beauty, but also for the invaluable storehouse of potential knowledge that they provide. Wilderness land provide areas to study so that we may come to better understand how our fragile ecological system functions. These studies may very well provide us with the knowledge that will help us to survive the coming centuries.

There are many people (especially the poor), who do not have the means to travel to these places to experience the wonders of nature. Many of these people (perhaps justifiably), feel that since they will not directly benefit from these wilderness areas, they should not be expected to take an interest. For this reason and for reasons of conservation (gasoline consumption related to traveling), I feel that the government might do well to provide more local recreation areas of the wildland type. The many nature centers springing up around the country are an indication of the people's desire for preserving and experiencing such natural areas.

Please consider when making your decision that a virgin land is not a renewable resource. One it is gone, it is lost for all time. Thank you for your attention.

Sincerely,

JOSEPH P. WILLIAMS.

The Congress has an enormous responsibility to Alaska and the Nation on the Alaska lands issue. When the Congress returns in January, I hope my colleagues will meet this responsibility, study the issues, and I hope, preserve for future generations the natural wonders of Alaska.

AIChE ENERGY PROPOSALS

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. ARCHER. Mr. Speaker, the American Institute of Chemical Engineers has developed some positive energy proposals which I think are worthy of consideration. I commend the following statement to the attention of my colleagues in the Congress:

The Council of the American Institute of Chemical Engineers, representing 40,000 engineers participating in all aspects of energy-related and environmental technology, believes, with regard to the energy policy of the United States, that the problem is to provide an adequate supply of energy without compromising the environment and national security. This requires attention to both short range and long range considerations with a balanced, multifaceted attack on these problems.

The foremost energy problem facing the people and the government of the United States is the significant stress on the United States economy arising from the rapid escalation of energy prices for both imported and domestic supplies. The current unstable situation is seriously effecting all present energy dependent activities, is distorting the economy of the United States, and is undermining the ability of the United States to help all the peoples of the world. The short- and long-term effects, ranging from additional inflation and unemployment to possible international conflict are severe. This serious and primary problem must be solved with diligence and skill to assure the long-term viability of our democracy and to permit dealing in strength with the principle concerns of our future—health, food, productivity, and opportunity for gainful employment.

The second critical energy problem effecting the U.S. and the world is the continual depletion of conventional energy resources. Thus, the major issue for the long range energy needs of the world will be the timely development of new energy resources. A sense of history and of responsibility to future generations obligate the people of the United States now to develop these needed new sources and bring them to economic commercial fruition as rapidly as possible.

A significant related issue involves the efficient utilization of available, but diminishing, hydrocarbon resources for uses where there are no viable substitutes. When compared with their use for manufacture of medicines, aids to agriculture, clothing, and

many hundreds of other products which contribute to the well being of peoples throughout the world, the utilization of hydrocarbons to provide heat when other sources could be used is a poor alternative. The long-term wisdom of conservation of hydrocarbons in recognition of this principle needs to be adequately recognized and appropriate actions implemented.

RECOMMENDED ACTIONS

Constructive guides in the solution of these critical problems are presented below as eight specific action areas.

(1) Greatly accelerated utilization of coal and nuclear energy for electric power generation, releasing natural gas and oil for home heating, motor fuels, and such key industrial uses as chemical feedstocks.

(2) Streamlining of power plant licensing procedures and establishment of stable regulations for pollution control and surface mining. Strict but reasonable environmental standards must be set and maintained without constant change. Arbitrary criteria such as "best available control technology" must be reconsidered in favor of regulations which balance health and environmental requirements against cost, limited recourses, and timing. This must be done if the goal of accelerated use of coal and nuclear energy is to be met.

(3) Resolute development of additional U.S. liquid fossil fuel resources, including petroleum on the outer continental shelf, petroleum available from older reservoirs by the application of secondary and tertiary recovery methods, and oil from shale and tar sands. While the long-range national interest calls for the continued importation of energy in the form of crude oil, LNG, etc., the further development of internal supplies is also necessary to gain time for the development of new, substitute sources and to exercise leverage on the international market.

(4) Unencumbered development of both the breeder reactor and nuclear fuel reprocessing. These technologies can increase the effective supply of energy, and reprocessing will reduce the quantity of radioactive wastes to be handled. Turning our back on these important energy sources is not an effective way to deal with the world's concern about terrorism and the proliferation of nuclear weapons. For example, it is clear that nations that do not have alternate sources of fossil fuels will not join the U.S. in renouncing the breeder or the reprocessing of spent nuclear fuel. Therefore, leadership must be taken in creating reliable means for regulating and controlling these two technologies, particularly for ensuring safe, effective, long-term means for disposing of radioactive wastes. The basic information for accomplishing these ends is available.

(5) Accelerated development of technologies to permit switching from one energy source to another. Examples include substitution of coal for gas and oil in the generation of electric power, the direct production of gas and oil from coal, the production of liquid fuels from shale, more-efficient methods for heating buildings with electricity, and the use of electricity for transportation. Government support can contribute to the development of technology that would eventually provide the basis for economically sound industrial development, as well as providing alternative sources of critical fuels in case of a national emergency.

(6) Stronger emphasis on conservation, including more-efficient energy use. Belt-tightening conservation can have an immediate impact but may have adverse economic effects and, once attained, leaves little slack for emergencies. Of far greater long-range importance is the reduction in energy consumption resulting from energy-efficient design. Since present systems were developed in the days of low energy cost, major capital expenditures will be needed before a significant effect is felt. In addition, the total energy system must be examined to see which conservation efforts will be effective. Economic incentives for insulation and solar energy systems should be instituted along with adequate efficiency standards for new buildings, cars, and machinery.

(7) Increased reliance on the free enterprise system. Much of the present imbalance in energy supply and demand results from the imposition of unrealistic and artificial price controls and allocations. These should be phased out with deliberate speed. The AIChE also urges that all Government controls be reduced to that minimum which is essential to needed new U.S. energy technology and to provide a stimulus for energy conservation. Government intervention to adjust for gross economic imbalance is always possible, but should be used with discretion.

(8) Prompt investigation and funding of the more promising longer range alternative energy sources ranked in order of energy reserve potential, environment impact, development cost, technical and economic viability, and the time needed to achieve a useful impact. However, there must not be delays on other programs while waiting for these new sources to resolve disputes over safety and emission controls, since all forms of energy use, including the new ones, involve some public hazard, and even the so-called "clean" energy sources can result in some environmental changes.

The Council of AIChE is greatly encouraged by the growing number of public leaders that have openly recognized the seriousness of our national energy problem. It is concerned, however, about the very large number of citizens and groups of citizens that still fail to accept the reality of the dangers inherent in the present situation. In order to adopt and execute national programs that can resolve the energy dilemma, broad popular acceptance of the need for sacrifice and a consensus on the many necessary actions are required. We in the AIChE know that we can pledge the efforts of chemical engineers to continue to look for solution, to explain the issues, and to work for an effective, nonpartisan, national energy policy for the United States. It is recognized that the above strategies are general in scope, and it is intended that the AIChE will work to develop more specific recommendations and actions in each of these areas.

VIETNAM TODAY

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mrs. MEYNER. Mr. Speaker, in many ways, our country is still at war with the Socialist Republic of Vietnam. Many Americans still feel a great deal of hostility toward Vietnam and toward those Americans who refused to participate in the war effort. Congress has sought to obstruct the delivery of any food or development assistance to Vietnam, in spite of the severe food shortages and massive reconstruction problems that Vietnam faces.

I believe that much of the hostility toward Vietnam stems from misinformation or lack of information about the situation there. Several Americans have recently visited Vietnam and published their observations. Two of the most interesting articles have been by Mr. Paul F. McCleary, the executive director of Church World Service, and Mr. Edward G. Harshfield, vice president and senior officer of Citibank N.A., Hong Kong. I recommend them to my colleagues as thoughtful first-person accounts of current conditions in Vietnam:

[From the Los Angeles Times, Oct. 2, 1977]

U.S. STILL FIGHTING THE WAR

(By Paul F. McCleary)

"Healing the wounds of war" was the expression I heard most frequently during my 11-day visit to Vietnam this past summer as a representative of Church World Service. Vietnam is indeed a wounded country. Its hillsides still bear the residue of phosphorus bombs. Fields which once made the country a food exporter are now chemically poisoned and fallow, pockmarked with bomb craters and harboring unexploded ordnance. Vietnam's people carry the physical and psychological scars of 30 years of war.

But Vietnam is also healing its wounds. I was impressed by the care given to insure that each individual be enabled to participate in the new society. This was evident in the Schools for the Restoration of Human Dignity for former prostitutes in Saigon, in job training centers and even in a reeducation camp for South Vietnamese army officers—a camp I was among the first Americans to visit.

I was struck by the contrast between Vietnam, a nation moving to overcome enormous obstacles to healing the war's wounds, and our own nation, which in many ways is still fighting the war. If the war itself was tragic, the tragedy lives on in the contrast between Vietnam's efforts to incorporate all its people into its society and our own reluctance to do right by the Vietnam veteran and to grant the deserter and draft resister full rights of American citizenship.

I traveled freely in Vietnam, moving as far north as Hanoi and as far south as the Mekong Delta. I spoke with officials, church leaders, community workers and their families. I went to church. Throughout Vietnam I sensed a spirit of energy, of hopefulness.

On my return home, I was disturbed and angered to find the U.S. Congress passing still another series of barriers to prevent critically needed food supplies and reconstruction aid from reaching the Vietnamese people. Congress was making clear that the United States will not, as pledged in Paris, make available assistance of any sort to Vietnam. This coming week, however, Congress still has a chance of rejecting the House's ban on aiding Vietnam through international agencies.

It seems that concern for human rights has replaced the MIA issue as the congressional rationale for punitive action. I question that rationale, simply from my experience of free access to Vietnamese society. I also question it on moral grounds. I saw some of the 484 churches gutted by U.S. bombs—churches now in process of being rebuilt by the Vietnamese government. How can the United States speak credibly about a concern for human rights in Vietnam? Is a welcome U.S. concern for human rights in other countries advanced by a denial of U.S. aid for meeting basic human needs in Vietnam?

The real issue, in my view, is whether the U.S. government, like the government of Vietnam, is ready to move decisively to heal the wounds of war. There have, to be sure, been signs of change. Since early 1975, more than 130,000 Vietnamese refugees have been resettled here, many of them now integrated into local community life. Noting that the war's devastation was "mutual," President Carter has moved to resolve the MIA issue, acquiesced to (rather than opposed) Vietnam's admission to the United Nations and pardoned U.S. draft resisters.

Many of the war's wounds continue to fester, however. The U.S. government still provides no reconstruction aid to Vietnam, though 66% of those Americans recently polled favored making available U.S. food and medical aid. Our only contributions are through private channels, complicated though they be by U.S. restrictions. Fifteen thousand additional refugees, 7,000 of them the celebrated "boat cases," continue to await admission to countries, such as the United States, for resettlement.

On the home front, unemployment among Vietnam veterans remains staggeringly high. Vietnam veterans have not received the same real educational benefits as their predecessors, nor have adequate comprehensive rehabilitation programs been developed for them. Only about 10,000 of the more than 430,000 less-than-honorable discharges have been reviewed and upgraded by the President's Special Discharge Review Program. There are still about 1,000 deserters overseas, many of them apparently unaware of the soon-to-expire Presidential program which could speedily resolve their legal problems. Congress has moved to make admission to the United States more difficult for draft resisters with newly acquired foreign citizenship. The nation has clearly not sought to facilitate the re-entry of veterans and would-have-been veterans into American society.

With the impressions of Vietnam fresh in my mind and the unfinished business at home a painful fact of life, I urge Congress, the President, public officials and fellow citizens to join together to accelerate the reversal of our past Vietnam policy, to open the way for food and reconstruction aid, to fully normalize relations between our two countries, and to insure a place in our land for the veteran, the draft resister and the Vietnamese refugee alike. We must move to commit this country to a course of reconciliation—for the sake of our own as well as the Vietnamese people. A failure to act more decisively in the months ahead to heal the wounds of war will surely return to haunt us one day.

[From the New York Times, Nov. 4, 1977]

AN AMERICAN BANKER'S FINDINGS IN VIETNAM

(By Edward G. Harshfield)

HONG KONG.—For an industrialist-turned-banker and the first American businessman to visit North Vietnam in more than two decades, a visit to Hanoi and Haiphong could not help but create high expectations and the formulation of many questions about the past, the war and the future.

Hanoi presents a relaxed, peaceful, orderly and frugal picture, while Haiphong remains a primitive port, and is, understandably in the context of 30 years of war, undeveloped. Poor infrastructural and port facilities, in addition to the overly centralized decision-making process and apparent absence of coordination, are already preventing industrial projects from meeting their completion schedules. Vietnamese officials and the Hanoi diplomatic community continually reminded me to keep the 30 years of war in mind when evaluating conditions in Vietnam.

Vietnam is implementing its second five-year plan, contemplates the investment of approximately $7.5 billion. In real terms, the plan calls, among other goals, for the raising of rice output from 14 million tons in 1976 to 21 million tons in 1980. However, harvests for the last three successive seasons have fallen short of expectations, forcing large-scale unplanned imports of grains and a major deviation from planned import levels.

Another problem is the assimilation of the South and socialization of its traditional private sector. A high priority has been given to relocating the "surplus population" in and around Ho Chi Minh City to new economic zones. Each zone, of about 5,000 families, forms a self-contained village, with each family being allotted 10,764 square feet of land, some rations and implements, and a requirement to raise agricultural produce for their own, as well as open market, consumption.

Since the Mekong Delta is fertile, the zones are already transforming the farm belt into a productive area. The 600,000-member army is building the infrastructure, a job it does not enjoy. The 1977 state plan specifically calls for the army's participation in economic redevelopment, with assigned tasks in agriculture, transportation and engineering-based industries.

In foreign affairs, while Laos has cemented its ties with Vietnam, Cambodia has moved closer to China, much to the chagrin of the Vietnamese, and the relationship with the Soviet Union continues to be warm, although there are signs that Vietnam would prefer less dependence.

Government leaders have openly welcomed Western participation in economic development. "Our country is like any other country in Southeast Asia," the Foreign Trade Minister, Dang Viet Chau, said in our meeting. "After the 1954 Geneva conference, Vietnam sought inclusion in the French union and the development of ties with Western governments, but U.S. policy prevented this from happening."

Vietnam seems to be concentrating on strengthening ties with Western Europe. Relations with France are at their best. Swedes are actively constructing a paper mill, a hospital for coal miners and a pediatric hospital. The Japanese have not made any fresh grants beyond the $13.5 million grant of 1975–76, and Japanese firms are waiting patiently for the offshore oil potential to be developed. A British firm is trying to arrange the construction of a jute textile mill, Australians are sponsoring a beef farm, and Indians are assisting in organizing a rice-research institute and a cattle-breeding farm. The Russians, East Europeans and Cubans continue to play a dominant economic role.

The country has established diplomatic ties with over 80 countries. All countries of industrialized Europe, with the exception of Denmark, Norway and Austria, have opened embassies in Hanoi, despite the acute shortage of office and housing facilities.

Vietnam's pragmatism has been displayed on both the diplomatic and economic fronts by adoption of the most unconventional foreign-investment regulations promulgated by any socialist government.

In foreign affairs, the major goal is to have the United States trade ban lifted so that American technology, particularly energy-related, can be imported. A United States presence in Vietnam could also help maintain equilibrium between the Soviet Union and in China, in the opinion of most Western diplomatic observers.

Such ambition to develop energy- and export-oriented industries is yet to be matched by official actions in disseminating data on economic potential, provision of travel facilities, less-complex visa issuance, and reduction of governmental formalities so that the prevailing world interest in Vietnam can be exploited to attract investment capital and technology.

While the willingness to develop relations with the West is obviously moving in a positive direction, this has been dictated by Vietnam's geo-political situation. Given the policy direction of key decision-makers in the Government, which favors a gradual process of assimilation of the South and closer ties with Western business, especially United States business and industry, it is likely that the internal and external problems, though difficult, may not remain insurmountable for long.

ANOTHER GRAIN ROBBERY

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. SYMMS. Mr. Speaker, I wish to insert in the RECORD at this point an article reprinted from the U.S. News & World Report of November 21, 1977, entitled "It Looks Like Another 'Grain Robbery' for Russia." The article in essence charges that the recent negotiations between Russia and the Carter administration "raise doubts about the U.S. Government's ability to avoid being outmaneuvered by the Russians in grain trading."

I wonder if a variation on an old quotation might not apply here to the Carter administration:

If the Russian Bear robs me once, that is his fault; if the Russian Bear robs me a second time, that is my fault.

I commend Senator ROBERT DOLE of Kansas for asking for an investigation of faulty CIA and Agriculture Department forecasts of a bumper Soviet grain crop.

The article follows:

IT LOOKS LIKE ANOTHER "GRAIN ROBBERY" FOR RUSSIA

Fears are growing among farmers and Government officials that the Soviet Union once again has outsmarted the U.S. by secretly purchasing millions of tons of U.S. grain at depressed prices.

If reports of covert Soviet grain dealing prove true, they could have widespread political repercussions, intensify criticism of the embattled Central Intelligence Agency and deal another blow to President Carter's sagging popularity among farmers.

Suspicions that Moscow might have bought up large amounts of American grain to offset another Soviet agricultural failure brought to mind the "great grain robbery" of 1972. That is the popular reference to the deal in which the Russians took advantage of a bountiful U.S. harvest to buy secretly 18 million tons of grain at low prices on easy credit granted by the Nixon administration.

Disclosure of the 1972 purchase triggered wild speculation that drove wheat and corn prices to record highs and sent consumer food prices soaring. But many farmers felt cheated. They had already sold their grain at low prices before the Soviet purchases were revealed.

OUTBURST OF IRE

Now, the possibility of another Russian raid on low-priced U.S. grain supplies is causing new waves of indignation among farmers and farm State Congressmen.

Senator Robert Dole (Rep.), of Kansas, has asked for investigation of faulty CIA and Agriculture Department forecasts of a bumper Soviet grain crop. A Senate subcommittee is expected to begin delving into the controversy late in November.

The U.S. Government was taken totally by surprise when Soviet President Leonid Brezhnev announced on November 2 that the Russian harvest would amount to only 194 million metric tons, 10 percent less than the 215 million tons forecast by the CIA and the Agriculture Department and 19 million tons below the official Russian goal.

"We were caught completely off base," one bureaucrat admits. Both American agencies had stuck by their estimates right up to the time of the Brezhnev announcement.

Since Moscow has been one of the best customers of American farmers, official pre-

dictions of a big Soviet harvest kept prices of U.S. grains, already in heavy surplus, depressed this year, bringing continuing economic hardship to farm communities in the Midwest.

Such surprises are not supposed to happen. After the 1972 controversy, the U.S. and the Soviet Union signed an agreement designed to prevent secret purchases of American grain. Under the pact, the Soviets agreed to buy a minimum of 6 but no more than 8 million tons of grain each year. If they want more, they are obligated to notify the U.S. Government, rather than place orders with private American firms.

The agreement also calls for on-the-scene inspection of the major Soviet grain-growing regions by Agriculture Department experts. The CIA monitors the Soviet crop via satellites. Both procedures were devised to keep the U.S. abreast of Russian crop prospects.

Agriculture Secretary Bob S. Bergland admits that the Government has no sure way to tell how much grain the Soviet Union may have arranged to buy through complicated secret foreign deals.

THEY ARE CANNY

Senator Dole expresses a view held by many private grain experts and Government officials: "I don't think the Russians would tell us about their crop shortfall unless they had already covered themselves by buying enough grain to offset their losses. They are canny enough businessmen to know that grain prices would go up after their announcement. Since the grain market is not responding, somebody must know something."

Government sources speculate that the Soviets probably circumvented U.S. safeguards this way: As early as last August, Moscow began buying U.S. grain from European subsidiaries of American companies and other traders who are not required to report the origin of their sales of grain futures. By not specifying that they were buying American corn and wheat, the Soviets were able to take advantage of the depressed prices.

After accumulating large amounts in this manner, a Soviet trade delegation traveled to the U.S. in early October. Because the U.S. thought Russia had no need for extra grain and American farmers were burdened by huge surpluses, the Soviets were offered the right to buy up to 15 million tons. As it turns out, that could bring Russian purchases this marketing year to a level—coincidentally or not—just enough to cover the shortfall in the Soviet crop.

While on a lesser scale than in 1972, these manipulations raise doubts once again about the U.S. Government's ability to avoid being outmaneuvered by the Russians in grain trading.

OCEAN MAMMALS

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. WHITEHURST. Mr. Speaker, the following information on seals, which appeared on pages 797 to 804 of "Environmental Affairs," volume 1, No. 4, published by the Boston College Environmental Law Center, was written by Ms. Alice Herrington and Mr. Lewis Regenstein.

This material was sent to me by Mr. Richard W. Firth of Mechanicsville, Va., with the request that I insert it in the CONGRESSIONAL RECORD for the benefit of all of my colleagues, and I am pleased to do so at this time. This further reinforces the need, also, for legislation such as my own House Concurrent Resolution 109, which calls for a regional conservation treaty to protect Northern Hemisphere Pinnipeds, and I hope that my fellow Members will see fit to act favorably and expeditiously on such legislation.

Thank you, Mr. Speaker.

The material follows:

SEALS

The slaughter of harp and Alaskan seals has been widely publicized because these highly organized massacres lend themselves most readily to documentary films and public exposure. The world is outraged over the slaughter of seals both in the Atlantic and on the Pribilofs . . . and demands a halt to both. The baby seal, one of nature's most appealing creatures, is the object of a gruesome massacre each spring in the Gulf of St. Lawrence and the Northwest Atlantic. The below incident, to which the author Herrington was witness, is recounted by a reporter for The New York Times:

"A mother seal threw herself protectively across the body of her pup. When the man who had clubbed it returned to skin the pup, the mother stood fast. A second hunter, then a third, came up to within a foot or two of the mother. It maintained its protective position, resting on its front flippers, its head thrust up and forward, facing the danger. Finally, a man approached from the side. With a quick, darting motion, he waved his club within inches of the mother's head, then jerked it back. The seal turned on the man. He backed away. The seal, using its flippers in a pull-push motion, moved slowly and awkwardly over the ice in pursuit. Meanwhile, two hunters had dragged the pup away. The mother turned and tried to give chase but again could not catch up. It stopped and watched the lost pup for a moment. Then it turned, crept to the edge of the ice, and dived into the water."

The mother seals that are driven off bounce up and down in the water holes as in a macabre ballet, watching helplessly the murder of their nursing babies. At the end of the day as the killers disappear from the scene, the mothers crawl back on the ice, each to nuzzle the bloody, lifeless carcass of her own pup. In 1971, in Canada's Gulf of St. Lawrence, some 45,000 baby seals were killed in this manner by Canadian landsmen and another 37,000 by the men from the commercial sealing ships.

Nor do the adults escape the fury of the hunters in the Northwest Atlantic where both the Norwegian and Canadian icebreakers roam. There they are clubbed, speared, and shot. In 1971, a gentlemen's agreement fixed the total number to be killed at 245,000 harp seals. But, to obtain this number many more are wounded or killed and lost under the ice. In pelagic sealing, sometimes as few as one in five shot is recovered.

The United States engages in its own pelagic sealing, done in the name of "research." In the Pacific in 1968, employees of our Department of the Interior shot and captured 824 seals, primarily female, ostensibly for the purpose of finding out what seals eat and verifying pregnancy rates. And to obtain those 824 seals about 100 more seals were shot, killed or wounded—and lost. There can be no doubt that our own country shares a great deal of blame for the senseless killing done by other nations. By providing a major market for sealskin coats and the suede leather obtained from baby seals, we have made the seal kill economically worthwhile and have encouraged this carnage.

Arguments that the harp seals are killed to prevent overcrowding are nonsense. The press releases from the Canadian Department of Fisheries and Forestry which announced the opening of the slaughter last March admitted that there had been an "overkill" in the North Atlantic in recent years, and that the herd that arrived off Labrador was "seriously depleted." Canada's own figures indicate that the size of the herd has been reduced within the last 20 years from 5 million to 1.5 million—a depletion of about 70%.

The South Africans also carry on a baby seal kill for the benefit of the U.S. fur industry. A recent news article described how some 80,000 baby seals are "harvested." They are beaten on the head with clubs, stabbed with stilettoes, and then skinned, presumably while their terrified mothers look on in helpless agony. According to the article, the baby seals are killed because their pelts bring some $1.4 million on the U.S. market, where they are later processed and sold as sealskin coats.

Not only does our country encourage other nations to kill seals, but our Government has its very own official seal killing operation. Each July and August, on the Pribilof Islands in the Bering Sea off Alaska, tens of thousands of Alaskan fur seals are driven inland until their lungs are bursting and are then clubbed to death by employees of the U.S. Government (formerly the Department of Interior, now the Department of Commerce). The official "purposes" of this activity are multiple: (1) it is described as a "model conservation program" which saves the seals from extinction; (2) it creates employment for the Aleuts on the Pribilofs; (3) it saves the seals from starvation and disease; and (4) it provides funds for the U.S. and Alaskan Treasuries (even though it has operated at a deficit in recent years).

In the summer of 1970, the author Herrington spent ten days on the Island of St. Paul, one of the Pribilofs. From notes written while on the Island, these are some of the author's observations:

"By our time of arrival at the hauling grounds (5:20 a.m.) virtually all of the seals—about 1,000 animals—had been driven off over the rocks in pods of about 90 to a flat stretch of green—the killing field. Half the heard was being driven up a steep hill to another field to await their turn. By 8:30, 366 seals had been clubbed, struck, and skinned. Sixteen teenage children removed the penis and testicles from the carcasses, for sale to a firm which peddles them for cocktail stirrers and aphrodisacs.

"The kill: five to nine seals would be separated from the herd by a man rattling a can to frighten them into moving into front of the clubbers. In almost all cases the seals received two blows. Whether this was necessary or just to show that they make certain, I could not know—except in the instances where the first blow fell on the body. About every fourth seal received a severe blow on the back before it was felled with a second or third blow to the head.

"I stood about five feet from one seal which was permitted to escape after receiving a glancing blow and it waddled past me toward the water with blood streaming from the socket where an eye had been knocked loose. This same seal had fish net embedded in its coat, which I was told was the reason for not chasing it. The fur is not valuable commercially when it has been mangled with fishnet.

"The terror of the seals during the long hours of waiting and watching the murder of their friends and relatives was pathetic, the ultimate in sadistic treatment. Mr. Hurd gave as the reason for driving the seals from the hauling grounds all at one time, the cost of employing more men to stand guard to prevent escape into the sea."

The Commerce Department does attempt to defend its "sealing operations." It claims, first of all, that clubbing the seals to death is the most "humane" way of killing them.

To use the word "humane" in this context is a perversion of language and reality. There is no justification for killing these intelligent, highly evolved creatures: sealskin coats are hardly a necessity to our society. The Commerce Department, moreover, continually emphasizes that the size of the Pribilof seal herd has risen from 200,000 seals in 1911 to approximately 1.3 million today. But to compare 1971 with 1911 is an entirely spurious, misleading comparison. A vital fact is the natural size of the herd, and this is given in an official account as exceeding five million. An estimate for 1948, the period following the Second World War moratorium on killing, is given as about four million. Hence, if the herd today is 1.3 million, as Commerce claims, then the size of the Alaskan herd has decreased—not increased—by about 75 percent. It should be noted that the Russians have stated publicly that there is a "serious depletion in the once huge herd." And since there is great intermingling, according to Interior's reports, between the seals which breed on the Russian Islands and those which breed on the Pribilofs, it is clear that the Pribilof herd is also seriously depleted.

But the bureaucrats employed in the Pribilof operation will be the last to admit this. Their tactics with the public—and the Congress—bring to mind the old cliche "lies, damn lies, and statistics." For example, the manager of the program, William Peck, on returning to the States after last year's kill, states that "births on the Islands show no downward trend." He said this despite his own Department's official statistics, which give a staggering 52% decrease in births over the past ten years.

The *Seattle Times* reports that 1971's "take of fur seals in the Pribilofs totaled 31,847 skins, compared with 42,179 in 1970." The number to be killed in 1971, announced by Commerce in early June of 1971, was 40,000. This stimulated the Friends of the Animals to prepare a table, based on government data, to show that if 40,000 seals were to be killed in the summer of 1971, 9,000 would again have to be female. We credit the circulation of this table with having spared the lives of females with pups in the breeding rookeries.

In its publicity, Commerce has until very recently, repeatedly assured the public that baby and mother seals are not killed, that only killed are "surplus bachelor males." But in this once vast herd, now reduced to a pitiful remnant of its former size, there are, of course, no "surplus" seals. Moreover, mother and baby seals are killed by the tens of thousands. Victor Scheffer, the Interior Department biologist who used to supervise the kill, states in his book: "In a recent decade, 250,000 females of breeding age were killed on the Pribilofs." He refers to this euphemistically as "intensive fur seal management" and also notes that their pups inevitably die a death of slow starvation. In 1968, in the face of a rapidly declining birth rate, the bureaucrats again sent the Aleuts into the breeding rookeries to kill 11,594 females, all of whom had pups, all of whom were pregnant. And then they have the audacity to tell the public that their purpose is to spare seals the suffering of disease and starvation. The purpose, patently, was to obtain more skins. Figures for females killed in other years are as follows:

1957	47,000
1958	31,000
1959	28,000
1960	40,000
1961	43,849
1962	43,750
1963	43,952
1964	16,452
1965	10,432
1967	10,096

And, given the fact that 42 bureaucrats are employed year-round in Seattle and another 50 or so full or part time in Washington, D.C., whose salaries are supposed to be paid from the sale of sealskins, such a sacrifice of the animals for their own welfare should be anticipated. The Bureau of the Budget's detailed report showed that Pribilof expenditures exceeded income by over $2 million in 1970. Bureaucrats grow desperate over such a deficit.

In any responsible compilation of population of ocean mammals, the number of seals of breeding age is vital. The inclusion of pups to pad a herd total is a deceptive practice since, again to quote government data, the survival of pups is often as low as 15%. Therefore, to achieve a realistic estimate of herd size, the Friends of the Animals took government data on the headcount of adult males in 1968 and published it in *The New York Times* as follows: 7,924 harem bulls; 4,383 idle males; 316,960 females of breeding age (an average of 40 per harem bull). Total 329,960. This prompted Senator Kennedy of Massachusetts to make an inquiry of the Department of Commerce, which responded that our advertisement "contain many misstatements and distortions regarding the condition of the Pribilof Islands' seal herd," but simultaneously admitted that the breeding population is about one-quarter of their estimated 1.3 million herd total. One-quarter of 1.3 million is 325,000 seals of breeding age. Our published figure then, was deceptive only in being high by about 5,000 seals. However, that was based upon 1968 data, and it is likely that the number of mature seals has decreased significantly since that time, consistent with the trend described in the 1968 report:

"The total number of adult males counted on the Pribilof Islands in July, 1968 has decreased annually since 1961.

". . . The number of harem and idle males counted in 1968 represents 63% and 37%, respectively, of the number counted in 1962."

Another ploy by which these bureaucrats attempt to support their positions as "scientific managers" is "managed pup production." Since it is done by slaughtering breeding females, it is also termed a "manipulation of the population." Its expressed purpose, to quote from Commerce's letter to Senator Kennedy, is to "achieve the level of abundance that will provide the maximum sustainable yield"—the yield being skins. This is gross prevarication of the most despicable sort. The bureaucrats have been aware for a long time that the herd is in trouble. Their slaughter of breeding females was solely to obtain more skins. For a time their reports gave this now embarrassing information:

"By the time the U.S. purchased Alaska, the Pribilof herd had recovered to the point it sustained an annual harvest of 100,000 males for many years."

That this statistic is embarrassing to them is found in a report to Congressman John D. Dingell where the figure is expressed only as "several thousand." It is many, many years since their "managed pup production" produced a "maximum sustainable yield" of 100,000 male sealskins. In 1971 their proven abilities produced 31,847 skins, some of which were certainly from females.

It should be recognized, moreover that in our Government's seal massacre, which the Commerce Department describes as a "model of conservation," it is not the old and the diseased seals that are killed, as nature provides for in its law of survival of the fittest. Rather, the healthiest seals are killed, those whose pelts will make the most attractive, unblemished sealskin coats.

Commerce also defends the seal kill on the basis of employment for the Aleuts. The Harris-Pryor Bill, however, would develop the Pribilofs as a tourist attraction and give the natives the dignity of a worthwhile (and non-violent) occupation as managers of the proposed wildlife refuge. No less an authority than Lars-Eric Lindblad, organizer of extraordinary tours to places like the Arctic, the Amazons, Darwin's Galapagos and many others, attests to the reality of this proposal.

"Wildlife everywhere in the world is increasingly becoming a big money earner—not as furs nor as meat, but as a target for photographers and nature-lovers, of which there are millions. The Aleut natives would benefit to a much greater extent than they would from being butchers of these beautiful fur seals. How many women will buy coats and other garment made of the skins of wild animals in years to come? It is definitely becoming unfashionable to wear furs. It is time for the Department of the Interior to switch the economy of the Pribilofs from killing the seals to making them a fabulous tourist attraction. It is not difficult to do and within a few years the Government could stop or reduce their subsidies to the Aleuts."

Mr. Lindblad's point that now is the time to examine other employment for the Aleuts, tourism or otherwise, is one which should be transmitted to the appropriate agencies. Certainly, these people originally sent as slaves to the Pribilofs by the Russians should no longer be forced to do their demeaning work.

Another simplistic justification for the slaughter, subscribed to by many fishermen and the United States Department of State, is that seals eat fish, fish which are wanted for the profit of fishermen—even though the fish may be discarded as was the case, by the ton, in the summer of 1971, in Alaska. It is conceded that seals do eat fish, but again we point to the lack of knowledge of the interrelationship of living creatures and cite again the fact that the salmon follow the seals to their breeding grounds. This strongly suggests that upon the disappearance of the ocean mammals, there may well be no more fish. Even the Department of the Interior is willing to reveal a certain humility in this regard:

"Considering the volume and frequency of occurrence of commercially important fishes found in fur seal stomachs and our limited knowledge of the ocean environment and its ecology, we believe the effects of predation on food species with economic value are impossible to assess with any degree of confidence."

The fact of this limited knowledge of the interrelationships of seals and fish should be the subject of a massive educational campaign with fishermen, particularly those in Alaska, where the hair seal, which has a limited economic value, is the object of a sustained effort to eliminate it through such methods as dynamiting and shooting. Harbor seals around the coasts of our mainland are accorded similar treatment. This brutality and lack of respect for nature and her creatures must be brought to an end and only the Harris-Pryor Bill will do it.

PASSING OF A. W. BRAMWELL, PUBLISHER OF THE CHICO ENTERPRISE-RECORD

HON. HAROLD T. JOHNSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. JOHNSON of California. Mr. Speaker, northern California lost one of its most influential newspapermen when A. W. Bramwell, publisher of the Chico Enterprise-Record, died last week. His absence will be noted throughout the area and his contributions to the news media and to his community will be sincerely missed.

A. W. Bramwell was a first-rate newspaperman. His mind was inquisitive and

incisive. He was always objective and fair. He was a professional and his colleagues recognized his talents. The Enterprise-Record has won many State and national awards under his leadership and Bramwell, himself, served in many positions of leadership within the newspaper business.

Because of his varied background, Bramwell had much to contribute. He made good use of his skills and his experience by combining them in a manner which allowed him to make the most of any situation. He was honest, sincere, and hard working. His type is rare today, and we can all learn from his shining example.

So that my colleagues here in the Congress can better understand the importance of this leader to northern California, I am pleased to place in the RECORD at the end of my remarks a copy of the very fine editorial and eulogy to A. W. Bramwell which appeared in the November 23, 1977, edition of the Enterprise-Record.

We shall not see another man like him in the near future and we are grateful for having had the benefit of his wisdom, experience, and friendship.

The editorial follows:

A. W. BRAMWELL

"If you can live a vigorous and productive life, and then can die a quick death while doing something you like, that is the way to go."

Those were the words of A. W. Bramwell, editor and publisher of The Enterprise-Record for more than 30 years. They were spoken last month in respectful comment on the way Bing Crosby died on a golf course in Spain after a highly satisfactory round.

On Monday of this week, death came in somewhat the same fashion to A. W. Bramwell. He died at the wheel of his tractor after hand-cranking it into action, and was en route to jerk his stuck pickup from deep mud near the duck blinds on his ranch southwest of Chico.

It was raining hard Monday, and Bramwell had welcomed the much-needed downpour. He had planned an hour or so of duck hunting, a sport he deeply enjoyed. The stuck truck was nothing new to him—it had happened before. And he had just achieved victory over the cold and balky tractor engine—a feat that always brought him satisfaction—when he died. He would have seen it as "the way to go."

Thus did quick death end the vigorous and productive life of A. W. Bramwell. A vigorous and productive life indeed!

A man of boundless energy and rare versatility, Bramwell had done many things during his 73 years. He had been a farm boy in his native Idaho, a messenger boy at 16, a bank employee just beyond his teens, a pharmacist and merchant, a home vegetable gardener (a hobby he energetically pursued even in recent years), an orchardist, a rice ranch partner, and an avid horseman, hunter and fisherman.

But most of all, Bramwell was a newspaperman. For the entire second half of his life, dating back to 1944, his newspaper career was the main driving force of his time and energies. Into newspapering he poured all the knowledge and experience of his varied earlier careers. He read, he studied, he picked the brains of his staffers from novices up through journeymen and department heads in his eagerness to master all segments of the complex newspaper business.

The extent to which he succeeded in this quest is attested to by the honors accorded him by leading colleagues in the newspaper profession—presidency of the California Newspaper Publishers Association (CNPA), membership in the prestigious American Society of Newspaper Editors (ASNE), hosts of top awards won by his newspaper in statewide competition in the realms of farm news, education coverage, sports, photography and editorial achievement.

Bramwell also worked hard on his own reporting and writing. Over the past score of years he traveled with his wife, Marian, on frequent study missions to dozens of nations around the world, sending back articles for publication in the E–R. With heads of state and top foreign officials—as with public servants here at home from councilmen up through the U.S. Senate and White House level in the Kennedy years—Bramwell gained the reputation of an incisive and knowledgeable questioner.

But it was in the realm of E–R leadership that Bramwell made his most significant contribution. He insisted on complete local coverage to an extent—both in quality and quantity—far beyond that of the average community newspaper. At the same time he required the fullest possible treatment of state, national and world news to round out the E–R as a "complete newspaper." Thus, The Enterprise-Record consistently runs with higher "news hole" percentages than most newspapers.

Bramwell insisted on total objectivity on the part of reporters and desk personnel. E–R staffers are granted rare freedom—never are they instructed to "slant" or "lean" a story in accordance with E–R editorial policy or any particular political or philosophical position. In exchange, the newsmen recognize and accept the counter obligation to also keep their reports free of any personal slants or leanings they might have. Bramwell's practice in this regard works well—readers benefit from honest coverage, and first-class newsmen appreciate the respect and freedom accorded them. Many top staffers have returned to the E–R after forays elsewhere, chiefly because of these freedoms.

Bramwell also earned a wide reputation for backing his staffers in times of challenge or attempts at intimidation. The factor of truth was his sole yardstick; and the staffer dealing in facts had a fearless ally in A. W. Bramwell.

But while he held fast to the rule of objectivity in the news columns, Bramwell fully utilized the subjective nature of the editorial page. A man of strong philosophical and political leanings, he never hesitated to emphasize E–R viewpoints on matters of public interest. In this regard, he had a great concern for the voiceless, unorganized and unaffiliated segments of the citizenry; and in keeping with age-old journalistic dogma, he saw it as the E–R's purpose to "afflict the comfortable and comfort the afflicted."

A Republican by registration and a conservative by nature, Bramwell nevertheless manifested flexibility and tolerance that often handed E–R endorsements to Democratic candidates and editorial support to liberal causes. It is significant that the battles which won the E–R's three first-place CNPA editorial awards—a record for California newspapers—were waged on behalf of liberal causes (the Chico freeway fight, backing of Short-Doyle mental health programs in Butte County against conservative opposition, and defense of State College Chancellor Buell Gallagher against false charges of communist affiliations).

A realist with a faultless knack for detecting fraud, sham or a snow-job, Bramwell nevertheless was an eternal optimist on public affairs. He truly believed that an example of good government on the local scene can have the ripple effect of a pebble in a stream, ultimately leading to better government elsewhere along the line. And he fostered this optimism with the same unquenchable zest as he applied to his vigorous and productive life in general—and to his newspapering in particular.

In sad summary, the loss of A. W. Bramwell is a painful blow to The Enterprise-Record, to the newspaper profession as a whole, and to the people. Yet in the spirit of this Thanksgiving season, it must be granted that we were all fortunate and are better off for having had him. The world today is too lacking in strong men of his kind.

NATIONAL PATRIOTISM WEEK

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. RUDD. Mr. Speaker, I am most pleased to be a cosponsor of House Joint Resolution 135, which would set aside the third week of February as National Patriotism Week. This splendid idea for a national commemoration of our individual freedom in the United States, and our determination as Americans to make our great country even greater in the future, was the brainchild of Miss Lori Cox, an 18-year-old student at Arizona State University.

The resolution was introduced jointly by our colleagues Congressman JOHN RHODES, the distinguished minority leader, and GLENN ANDERSON, in a bipartisan effort which has now gained more than 160 cosponsors for National Patriotism Week.

Arizona Governor Wesley Bolin will declare next February 20–26 as National Patriotism Week, and I hope that President Carter will likewise issue his own proclamation for the entire Nation.

Mr. Speaker, an excellent column about the National Patriotism Week resolution and the outstanding work of Lori Cox was recently written by Bernie Wynn, political editor of the Arizona Republic, and published on November 18. I include this tribute at this point in the RECORD:

PATRIOTISM WEEK WINS MANY BACKERS

(By Bernie Wynn)

GOV. Wesley Bolin soon will declare Feb. 20–26 National Patriotism Week in Arizona and the occasion will be capped with a youth seminar for the state's high school leaders.

More than 600 youths from 80 high schools will be guests of honor at the seminar Feb. 24 at the Scottsdale Center for the Arts.

Sparkplug of this day-long observance is Miss Lori Cox, 18-year-old student at Arizona State University and unofficial "Miss Patriot" of the entire state.

She now has more than 160 sponsors in the U.S. House of Representatives backing House Joint Resolution 135 which would set aside the third Monday in February each year for serious citizens to commemorate freedom and renew determination to make the nation even better in the future.

Now if that is cornball, outdated and mawkishly sentimental, then Lori Cox has a lot of company. Me, for example.

Then there's Bolin, who will welcome the kids, Mark Dioguardi of the Arizona State University College of Law, and U.S. Navy Cmdr. Stephen Harris, security officer of the USS Pueblo who spent several months in a North Korean prison camp.

Dioguardi will talk about the American political system and two speakers yet to be

named will discuss "What is a Democrat?" and "What is a Republican?"

Films entitled "Faith in Ourselves" and "Price of Peace and Freedom" will be shown and the finale will be the really super Yuma High Choralairs.

I recite all this information so the public has plenty of time to make plans to attend. For patriotism is taking a beating in this country from people who mostly don't understand the alternatives.

Lori used to be singled out for rude remarks when she was in high school because of her patriotic sentiments. She stuck it out despite the sneers and today she's getting cheers instead of jeers. (It's called courage.)

In my book patriotism isn't jingoism, an attitude that America deserves to rule the world because all other nations are a bunch of bums. It's not arrogance or belligerence.

Nor is patriotism the rattling of the saber, the beating of war drums and the marching off to do battle with your fellowman from some other country.

Patriotism is the quiet, deep appreciation for citizenship in a nation which is able to nourish and protect its members in an atmosphere of maximum freedom.

We are grateful because each of us has equal status under a constitution and each is cherished as an individual rather than simply a unit serving the state.

If you of the younger generation don't believe this, I suggest you read "The Man Without A Country," written by Edward Everett Hale.

It's about a young man, Philip Nolan, whose American citizenship was revoked after he damned his country and was sentenced to become a world loner.

Nolan found himself isolated aboard ship moving from port to port trying to find some country that would let him come ashore. None would and he died at sea, as I recall.

If you've ever been abroad, you realize how important a nation's passport and visa are. Returning from Israel last year, I had a stopover in Paris and thought I'd sneak out of the airport on to French soil for just a moment.

Implacable armed guards shooed me back to the airport's no-man's-land area where I was forced to remain until my plane departed for New York.

That's why I stand up and sing—albeit loudly and off-key—the national anthem and pledge of allegiance. Because I am grateful to belong to a mighty nation where my family can be secure.

RETURN OF THE CROWN OF ST. STEPHEN

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. DERWINSKI. Mr. Speaker, one of the most controversial and contradictory policy decisions of the administration has been the one to return the Crown of St. Stephen to the Communist Government of Hungary.

This would seem to be in direct contrast to the administration's alleged commitment to human rights; and would, in effect, turn its back on the history of the present Government in Hungary which was imposed on the Hungarian people by military forces of the Soviet Union. Presenting the Crown of St. Stephen to the current government would confer a legitimacy upon it, which history and the great traditions of the Hungarian people have properly denied.

Columnist Allan C. Brownfeld, in the Manchester, N.H., Union Leader of November 18, takes issue with the President's proposal to return this national treasure to the Communist regime now ruling in Hungary. I wish to insert his article as I believe it deserves special attention by the Members:

[From the Manchester (N.H.) Union Leader, Nov. 18, 1977]

UNITED STATES SHOULD HOLD CROWN OF ST. STEPHEN

(By Allan C. Brownfeld)

For reasons which remain unclear, President Carter has decided to return to Hungary the symbol of its nationhood—the golden crown of St. Stephen.

In 1945, the crown, which according to tradition was given to Hungary's first king, Stephen, for his coronation in the year 1000 by Pope Sylvester II, was turned over to American military forces in Austria for safe-keeping. It was kept in U.S. custody in West Germany until the early 1950s, when it was shipped to Ft. Knox, Ky., where it has remained ever since.

Why has President Carter decided to return the crown to the Communist rulers of Hungary? He argues that such a move "would support the American foreign policy objectives by responding to the individual national aspirations of the Hungarian people, by fostering the spirit of Helsinki and improving relations with Hungary."

This formulation ignores the fact that the Russian army still occupies Hungary and that the Hungarian government was never elected by the people of Hungary but was, instead, imposed upon them by the Soviet Union. For the President to say, on the one hand, that he is concerned with "human rights," and on the other to confer legitimacy upon the Soviet-installed leadership in Budapest is, to say the least, somewhat contradictory.

If President Carter thought that he could quietly return the crown without stirring up political turmoil in Washington, he was sadly mistaken. He seems surprised at the outrage being expressed in the Congress—a further indication of how far removed he seems to be from the political sensibilities of the American people.

Rep. Mary Rose Oakar (D-Ohio), whose Cleveland district has the largest Hungarian-American population in the country, has introduced a bill, with 30 cosponsors, which would bar return of the crown without congressional approval.

Rep. Oakar states that the present Hungarian regime "is not a government worthy of receiving this sacred crown . . . the President appears to be repudiating his own human rights policy insofar as the Eastern Europeans are concerned."

In the Senate, opposition to the return of the crown has been led by Sens. Robert Dole (R-Kansas) and S. I. Hayakawa (R-California). Sen. Dole said that return of the crown "confers legitimacy on a Communist dominated state." He added that he failed to understand why the U.S. government should approve the status of a regime that came to power as a result of Soviet military might, and he noted the irony of the fact that President Carter's decision came 21 years to the week after Soviet tanks quelled the Hungarian uprising in 1956.

Hungarian-Americans charge that the President has gone back on a campaign promise not to make any decision about the crown without first discussing it with them. Andras H. Pogany, a spokesman for the Coordinating Committee of Hungarian Organizations in North America, and president of the World Federation of Hungarian Freedom Fighters, said that, "We had a presidential promise, but it's just in the air."

Originally, there are said to have been definite plans for a ceremony to return the crown in Budapest. Now, the President says that he has not decided how or when the crown should be given back.

One reason for his seeming vacillation is that the opposition is highly emotional, while those who support the crown's return often do so only grudgingly. Rep. Frank Horton (R-N.Y.), expressing his opposition, declared that the crown's return would be "a political gift from our President to Mr. Kadar . . . How would the world have reacted if, in 1941, the chief rabbi of Warsaw had presented a sacred Torah to Adolph Hitler in recognition of his 'fine' treatment of the Jewish people?"

With opposition like this, the President, not seeking more political trouble than he already has, may quietly decide to make a final decision about the crown of St. Stephen at a later time. On the other hand, he may push ahead—despite the opposition.

Regardless of what the President does, the apparent hypocrisy of his action remains clear.

He urges a mandatory arms embargo against South Africa, in part, because the government of that country arbitrarily closed two newspapers. Yet, Hungary has not had anything like the free press which South Africa has since the Communists first came to power in that country—by force of arms.

The only thing which will be accomplished by returning the crown of St. Stephen to Hungary will be bolstering the Communist regime of that country and conferring legitimacy upon it.

Such an action will make a further mockery of the Administration's concern for human rights—and will indicate that this concern stops at the Communist borders of Eastern Europe. The Congress would do well to intervene and prevent the President from advancing in this decidedly wrong direction.

TRIBUTE TO PAN AMERICAN WORLD AIRWAYS' 50TH YEAR OF CONTINUOUS SERVICE

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. ANDERSON of California. Mr. Speaker, over 50 years ago, on October 28, 1927, a Fokker F7 lifted off a dirt runway at Key West, Fla., and flew 90 miles to Havana, Cuba, starting scheduled airmail services and launching an airline destined to carry the American flag around the world. That airline, Pan American World Airways, recently celebrated its golden anniversary, a birthday which many thought just a few years ago the company would not live to see because of its precarious financial health.

Pan Am has recorded record profits for the first three quarters of 1977 amounting to $67.5 million. It would seem certain then, that Pan Am will give itself a 50th anniversary present of its first profits in 8 years. The road to recovery has not been easy, but with a dedicated corps of employees who have expended every effort possible, the future of the company appears brighter than it has in years.

Mr. Speaker, Pan Am has had an outstanding record of dedication and service to this country. During World War II,

Pan Am's fleet of aircraft was stripped to wartime austerity, with priority cargo packed into the planes. The company's resources and knowledge of overseas communications provided valuable links in this Nation's defense efforts.

Mr. Speaker, Pan Am as a private enterprise competes around the world with foreign subsidized airlines, a job which it does well and in the best interests of the American consumer. Its leadership in developing international aviation for America is something of which we can all be proud. I know the House joins me in extending best wishes to Pan Am on its first 50 years.

CONTRIBUTIONS TO THE UNITED NATIONS FUND FOR DRUG ABUSE

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. GILMAN. Mr. Speaker, last February the House Select Committee on Narcotics Abuse and Control, of which I am a member and which is chaired by the distinguished colleague from New York (Mr. WOLFF), issued a report on the 27th session of the United Nations Commission on Narcotic Drugs—a report that was based on the meetings in Geneva that the distinguished gentleman form New York (Mr. Scheuer) and I had attended earlier this year.

In addressing the U.N. Narcotics Commission, I underscored congressional concern over the imbalance with regard to our Nation's annual contribution of $4 million to the United Nations Fund for Drug Abuse Control (UNFDAC) or 80 percent of the Fund's budget, noting that there is a "need for a broader, more equitable assumption of the fiscal responsibilities of the world's narcotic problems."

Members of our Select Committee on Narcotics have consistently urged other nations to support the work of UNFDAC and to increase their contributions to the Fund. We have also urged our own Nation's top narcotics administrators to impress upon their colleagues the urgent need for the international community to support the U.N. Fund. Many of our colleagues have joined us in focusing the attention of the international community on the critical needs for waging an intensive global war on the sordid narcotics trafficking and the illicit opium production that is affecting the socio-economic fabric of the international community, corrupting governments and inflicting vast physicial and emotional damage upon citizens from all walks of life, from all religious, racial, and economic backgrounds. The drug problem knows no political ideology and knows no geographic boundaries; it does not distinguish between heroin producer and user nations, and it does not distinguish between developed and less developed nations.

Mr. Speaker, I recently received a report from Ambassador J. G. de Beuss, Executive Director of UNFDAC, stating that since January 1 of this year, 35 nations have contributed a total of $7,554,202, which as a result of the increased contributions from Norway, Sweden, and The Netherlands has reduced the percentage of our Nation's 1977 contribution to the Fund from 80 percent down to 53 percent. Included in these funds is a contribution by the Japanese Shipbuilding Industry Foundation in the sum of $160,000, which to my knowledge, is the first major contribution by a private foundation.

Unfortunately, country contributions to the Fund remain pathetically small. As of September 30, 1977, 31 nations contributed only $938,202, or an average of $30,265 per nation, with many governments contributing less than a few thousand dollars and many nations not even contributing a single penny to the Fund.

Mr. Speaker, in the interest of keeping the Congress informed of the current fiscal status of UNFDAC, I am inserting at this point in the RECORD the complete report of contributions submitted by Ambassador de Beuss and I urge my colleagues to remain steadfast in their support of international efforts to control illegal narcotics trafficking.

UNITED NATIONS FUND FOR DRUG ABUSE CONTROL—STATUS OF CASH CONTRIBUTIONS PLEDGED OR RECEIVED AS OF SEPT. 30, 1977

Country	Contribution in U.S. dollars 1971-76	1977
Algeria	4,995

Total contribution and interest	35,201,026	

[1] Pledged for the Burma program 1977-81, U.S. $5,451,127 of which U.S. $1,448,000 considered as a 1977 contribution.
[2] Including U.S. $160,000 contributed by the Japan Shipbuilding Industry Foundation.
[3] On Dec. 31, 1976.

SPECIAL CONTRIBUTION TO UNDP

Netherlands: To finance a project of treatment and rehabilitation in the Badakhshan province of Northern Afghanistan, US-$500,000.

CONTRIBUTIONS IN KIND

Netherlands: Publication of a Monthly Journal (Drug Dependence) by EXCERPTA MEDICA FOUNDATION of Amsterdam (1972–1976), US$209,440.

Poland: Agricultural machinery and implements for crop substitution projects (3.2.75), US$50,000.

Switzerland: Medicaments for addiction treatment project in the Badakhshan province in Northern Afghanistan up to a maximum of US$40,000.

GOVERNMENT CONTRIBUTIONS[1] TO UNFDAC-SUPPORTED PROJECTS AND ASSOCIATED DRUG CONTROL PROGRAMMES

Country, duration of project, and contribution in US$

Afghanistan, January 74 to December 78, 697,882.

Argentina, December 76, to November 80, 200,000.

Bolivia, December 75 to March 78, 2,500,000.

Burma, May 76 to April 81, 6,985,016.

Egypt, August 77 to December 78, 28,571.

Lebanon, June 73 to December 76, 260,000.

Pakistan, May 76 to April 79, 2,447,774.

Peru, January 76 to December 78, 1,547,159.

Thailand, December 71 to December 77, 5,553,200.[2]

Turkey, March 75 to April 77, 20,000,000.

STATUS OF CASH CONTRIBUTIONS PLEDGED OR RECEIVED IN 1977, 1ST JANUARY–30 SEPTEMBER

Since 1st January 1977, 35 Governments have contributed a total amount of US$-7,554,202.

[1] These are estimates made by the governments concerned and included in project agreements. They include the cost of personnel, transport, equipment, buildings, operating and other costs related to the drug abuse control programme in each country. Amounts when given in local currency have been converted to US dollars at the rate of exchange on the date of the signature of the project agreement.

[2] Of the total contribution, the equivalent of 390,000 dollars was in cash.

Non-U.S. contributions (47%):	
Norway	$1,448,000
Sweden	508,000
The Netherlands*	500,000

A "NO-BULL" FARM PLAN

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. HANSEN. Mr. Speaker, Idaho State Farm Bureau Vice President Tom Geary has sent me a letter which shows interesting and innovative thinking regarding a self-help way for farmers to peacefully overcome their twin plagues of overproduction and low prices. I submit excerpts of Mr. Geary's letter and the context of his plan for the interest of my colleagues and all who read the RECORD:

BURLEY, IDAHO,
November 21, 1977.

DEAR CONGRESSMAN: This past summer I have been thinking there must be some kind of a farm plan that could help agriculture out of some of its problems. I don't think the Farm Strike is the answer to our problems. Enclosed is a plan I have been thinking about and I thought I would send it to you for your examination or entertainment. I have talked to some of the people here in the Burley area about it and they think it has some merit. Oscar Field, our Farm Bureau State President, asked me to write it up and send him a copy so I thought I would send you a copy also.

A SIMPLE FREE-ENTERPRISE FARM PLAN

(Let's Go Fishing All Summer)

This program was derived from the thinking that there must be a more simple way to solve the economic dilemma and depression that agriculture is suffering from today. With the great efficiency in agriculture today we have created our own problem of over supply of agricultural commodities, or at least we have failed in the development of such aspects of distribution by not developing marketing programs sufficient to keep up with our production capabilities.

This program is designed to keep government control out of agriculture as much as possible, and for farmers and ranchers to own and control their own production.

The program operates as follows. Eighteen percent of the farmers would participate by taking their entire farms out of production for the year 1978. They would then invest the money they normally would spend for operating costs, seed, fertilizer, water, electric power, gas, oil, parts, and repairs to purchase the products already produced, which in most cases can be bought cheaper than the cost of producing them. For instance, if a farmer normally borrows $100,000 for his yearly operating expenses he would borrow that amount, or if he is fortunate enough to own his operating capital he would take that amount normally spent on operating the farm, and invest it in either commodities already in the warehouse or on the futures market. As a result, the farmer would own the same amount of commodities without getting involved in the production process. These investments need to be in commodities so that as the prices increase the farmer reaps the benefits. This immediately pulls 18% of 1977 production out of the market place, either grain, soy beans, cotton, cattle futures, potato futures, or whatever is normally produced. An example for cattlemen would be to keep their bulls in separate pastures for the year and then to buy cattle futures instead of producing calves. Then a year or so later he would sell his futures contracts at a substantial profit. The idea is to sit back and hang on to these commodities until next year's production would normally be sold. The best part of this idea is getting to go fishing all summer, pausing only to disk the fields for weed control, trim the hedge around the house, and other domestic jobs your wife deemed important.

By pulling 18% of 1977 production out of the market there would be a tremendous boost to agricultural commodity prices. Even the psychology of this reduced supply would have a tendency to increase prices all across the nation. This program would tie up or pull off the market 18% of 1977 production and then reduce 1978 production by 18%. With this immediate reduction of supply, farm prices would move back into a profitable situation again. The banks should like this program because the commodities they issued loans on would be secure and already produced with no danger of hail, frost, drought, or flood damage, and there would be the security of a warehouse receipt in hand.

There would be very little operating expense to the government in such a program. Farmers would go to the ASCS office to sign up for the program. The ASCS office would act as a referee to determine when the designated amount of 18% of the producing acres of farming and ranching were signed up. The remaining farmers and ranchers would then continue to work all year to produce their commodities while the rest would go fishing.

Some government officials might think this would not be a good program because of their desire to maintain a cheap food policy, but this really insures reasonable food prices now and in the future by keeping the family farm in existence and operating at a profit instead of allowing family-sized farms to go broke and the land to be taken over by corporate farms causing tremendous jumps in the price of farm commodities. When on the other hand, a two or three percent increase now in spendable income for consumers for food would insure the production of food in an efficient and dependable manner now and for the future.

ADVANTAGES OF THIS FARM PLAN

1. Continued efficient production of family farms at a profit.
2. Reasonable consumer prices now and in the future.
3. Very little expense to the government for farm program.
4. Greater income to Internal Revenue Service from farmers and ranchers.
5. No government controls on farms or farm commodities.
6. Commodities owned and held by farmers.
7. Save energy, gas, oil, fertilizer, electric power on 18% of farms.
8. Greater buying power for farmers.
9. An adequate food supply in the future as well as now.
10. A chance for some of us to go fishing and make a profit at the same time.

IN SUPPORT OF A BALANCED BUDGET

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. DERWINSKI. Mr. Speaker, as cosponsor of the Kemp-Roth bill and supporter of the Rousselot substitute resolution for the second budget resolution calling for a balanced budget for fiscal year 1978, I address the House in support of these measures during the legislative lull we are going through at the present time. There is a tendency to be preoccupied with the energy bill, whereas its relationship to the overall economy must be kept in mind. An issue that we should face in the next session is the question of cutting taxes while maintaining a balanced budget. The combination of these two positive ideas would be a way of addressing the Nation's economic ills.

The administration was opposed to this remedy when many Members of Congress began advocating it sometime ago. Now, many in the Carter administration are spousing the tax-cutting half of the package, but do not accept the ceiling on Federal spending that ought to go with it.

U.S. economic ailments are easy to analyze. Unemployment is still at 7 percent. If production continues for a year at the rate it has been in the past 3 months, it will show an increase of only 1.2 percent—a rate that could cause unemployment to increase.

Advocates of the "Uncle Sam knows best" philosophy are calling for vast public works programs of the WPA type. They believe that the Government can cure all economic ailments, while I contend the Government is the cause of most economic ailments.

When Congress passed tax cuts for all individuals and corporations in 1963, the economic stimulus caused the U.S. Treasury to collect more revenue than expected before the tax cut. By the second quarter of 1965, consumption expenditures had registered a remarkable rise of $45 billion from the rate of the last quarter of 1963, and the economy expanded as a result of the powerful stimulus of the tax cut.

A tax cut is needed. But for stimulation of the economy without inflation, we need to agree that the Governor will spend no more next year than in the current budget. Eliminating billions of dollars in bloated bureaucracy and duplicating programs would make it possible to give modest increases for workable undertakings while holding the line on total spending. America can enjoy its greatest prosperity if we leave money in the hands of the tax-spending bureaucracy.

Another argument for a tax cut, but with the spending discipline which I advocate, is that the social security bill which will emerge from conference will be a major tax increase, and thus an income tax reduction is necessary or else

the public will find its net income after taxes reduced. This obviously would slow down economic growth.

TWENTY-SEVEN MEN AND ABORTION

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mrs. SCHROEDER. Mr. Speaker, this week, for the seventh time, Congress will take up the issue of federally funded abortions. When we do, I hope that each Member is haunted by the vision of 27 middle-aged men sitting in a room for 5 months determining what poor women may do with their bodies. The following article by Linda Wertheimer which appeared in the November 25 Washington Post describes the irony of such a tragicomedy.

TWENTY-SEVEN MEN AND ABORTION

(By Linda Wertheimer)

Since June, 27 members of the House and Senate—all men, average age 61—have been talking about abortion in the House-Senate conference on the appropriations bill for the Departments of Labor and Health, Education, and Welfare.

The $61-billion bill carries a rider, added in the House, that bans federal funding for abortion, with certain exceptions. The exceptions have been the basis for prolonged discussion over the summer and fall. The conferees agreed to permit abortion in cases where the pregnancy endangers the life of the mother. But beyond that, they and the houses they represent have not been able to agree.

They disagree on the question of permitting abortion in cases where the mother's health might be damaged.

They are at odds on permitting abortion in cases where the baby, if it were born, would have a genetic disorder like Tay Sachs disease or mongolism.

They disagree on whether federal funding could be used for abortions in cases of rape or incest.

For five months, 27 men have met and argued about what to do. The discussion has been a difficult one for all the participants, those who oppose abortion and those who do not. Every day's debate has demonstrated the difficulty of settling, through legislation, a socially sensitive and medically technical question.

It is apparent that the men who make the decisions have, in some cases, an imperfect understanding of female sexuality and physiology. During one session a male staffer whispered to a female colleague, "is ovulation the same as orgasm?"

A House conferee complained that the measure currently on the table went too far in permitting federally funded abortions. Gesturing toward a table of male colleagues, he observed: "Under this bill anyone in this room could get an abortion."

The long discussions appear to have brutalized the members who have sat for weeks exchanging painful examples of defective children slowly dying of incurable genetic diseases, of bungled abortions and arguments over the right to life.

The conferees have made harsh jokes. Should the rape exception include teenagers not forcibly raped but victims of statutory rape by virtue of their age? One member cracked: "It's not a question of consent; the question is whether she enjoyed it."

Does medical treatment for victims of rape or incest include abortion procedures like dilation and curettage? A congressman told his colleagues that it would permit "a quick scrape." Talking of abortions in cases where the mother's health might be damaged a member told his colleagues that the language before them was too liberal. "We don't want a woman who wakes up with a hangnail to be able to get an abortion," he said.

The discussions have often been too much for the members who take part in them. One congressman proposed that federally funded abortions should be available to pregnant teenagers. To guarantee that, he proposed permitting abortions for girls aged 16 and younger. When that was rejected, he tried 15, then 14, then 13. At that point, his colleagues rebelled. "You are trying to make us look bad," one shouted. "Are you going to take it down to age one?"

The arguments in conference and the six floor debates on abortion have been more than some of the civilians who watch the Congress can bear. I am thinking of a staff member who logs debates in the House. When abortion is discussed, she arranges for another person to take her place.

Sen. Edward Brooke (R. Mass.) has led the fight in conference to permit certain kinds of federally funded abortions. He told reporters that the irony of middle-aged men sitting in a room and determining what poor women may do with their bodies has not escaped the 27 conferees. But the majority of members in the House are willing to make that decision, while an equally solid majority in the Senate feels that a flat ban on abortions other than life-saving ones is wrong.

Continuing resolutions, like the one passed by the Congress at the beginning of November, do not change anything. They merely delay for another 30 days the time when this debate begins again.

EDWARD F. HUBBARD

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. EILBERG. Mr. Speaker, it is with considerable sadness that I report that Edward F. Hubbard, general manager of the Philadelphia Gas Works since 1970 and a lifelong employee of that city-owned utility, died recently of a heart attack.

It was my privilege to have known Ed Hubbard. I considered him one of those rarest of human beings, the perfect gentleman.

Edward was born and raised in Philadelphia, graduated from West Philadelphia High School and attended the University of Pennsylvania. He went to work for the gas company in 1939 as a personnel clerk, and rose through the ranks to become general manager.

He was formerly president of the Pennsylvania Gas Association, and was vice president of the Philadelphia Facilities Management Corp., which is the nonprofit agency which operates the Philadelphia Gas Works. He was a member of the National Gas Advisory Committee of the Federal Energy Agency, and a member of the Facilities Task Force Committee of the Federal Power Commission's natural gas survey. Only recently, he was elected to the board of trustees of the Institute of Gas Technology.

Ed Hubbard served on a number of committees of the American Gas Association and was on the advisory council of the National Association of Businessmen. In addition, he was a director of the Greater Philadelphia Chamber of Commerce; a trustee of the United Way; a director of the Better Business Bureau; and was a member of the Union League, Philadelphia Urban League, Franklin Institute, Air Pollution Control Association, and the Philadelphia Crime Commission.

Mr. Speaker, Ed Hubbard made a genuine contribution to the city of Philadelphia and its people. He will be deeply missed.

WHY THE NORTHEAST NEEDS THE CRUDE OIL EQUALIZATION TAX

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. DOWNEY. Mr. Speaker, many of us who represent the Northeastern States have been deeply concerned with the recent economic trends in that region. While areas in the South and West have enjoyed healthy economic growth, the Northeast has seen only steady decline. In the Atlantic States, for example, manufacturing jobs have declined almost 14 percent in the last 15 years while they have increased by almost 70 percent in the Sunbelt.

Clearly, there are many reasons for the economic ills of the Northeast, but one factor which cannot be ignored is the high price this region has had to pay for industrial energy. It cannot be disputed that the price of energy in the Northeast is sharply higher than in other regions, and this in part explains the reasons for differing growth rates.

One of the most important goals for the Northeast, then, is to achieve parity with the rest of the Nation vis-a-vis energy prices. The President's energy proposal, and the crude oil equalization tax would provide a measure of parity so desperately needed.

A recent article by Michael McManus, published in Newsday explores this issue in some depth, and presents a compelling argument for the President's plan. I commend it to the attention of the energy conferees and to my colleagues in the House of Representatives. The article follows:

THE NORTHEAST NEEDS CARTER'S OIL TAX

(By Michael J. McManus)

Though taxes in the Northeast are higher than anywhere else, it is in the region's interest to support yet another tax, the "crude oil equalization tax," that is the centerpiece of the Carter Administration's energy plan.

Often called the "wellhead tax," since it would be paid by producers based on the quantity of oil produced at their wells, the tax is designed to close the gap between the government-controlled price of $5.25 a barrel for domestically produced oil and the world

price of $14. The tax would be passed on from producer to refiner and eventually to the consumer in the form of higher prices—such as a seven cent increase in the cost of a gallon of gasoline.

The administration says the proposal, which has been passed by the House, is essential to spurring greater energy conservation. The House bill would rebate the $12 billion collected annually from the tax to consumers, to lessen its inflationary impact. The Senate, on the other hand, rejected the idea of any kind of tax, with or without rebate. It preferred to deal with oil supply problems with a variety of tax credits, which would cost the Treasury money without producing any new revenues.

What difference does it make to the Northeast how the Senate-House conference committee resolves the conflicting bills?

"The Northeast's most immediate and pressing need is to achieve energy price and supply parity between consuming regions of the nation," says Rep. Stewart B. McKinney (R-Conn.).

Why? The cost of industrial fuel in New England is three times higher than its price in the Southwest. This is a major reason why manufacturing jobs increased by 67 percent from 1960–1975 in the Southwest, while they declined by 9 percent in New England and 13.7 percent in New York, New Jersey and Pennsylvania. Of course, other factors were involved, such as climate and taxes. But no industry that needs abundant and cheap fuel will locate in the Northeast today. The crude oil equalization tax would go a long way toward equalizing the costs of energy between different parts of the country.

If all forms of energy are converted into a common cost per million BTU's of heat, in 1975 it cost industry only $1.39 in the Southwest to get the same amount of heat that cost $4.17 in New England. But if the wellhead tax is passed by Congress, energy costs in the Southwest will triple by 1985, to $3.50 per million BTU's, compared to only a 34 percent increase in New England, to $5.59. New York and New Jersey's cost of $3.20 would also rise only moderately, to $4.36.

The wellhead tax would not be the only reason why the Sunbelt would begin to pay about the same as the Northeast for energy. There is also an oil and gas users tax to be paid by industry in the House bill, and higher natural gas prices. But what is under dispute is the wellhead tax.

Thus, what the House version of the energy bill would do is raise the cost of energy in the rest of the nation to the point that it would be close to what the Northeast has long been paying, because of its dependence on costly Mideast oil. That would make it more possible for the Northeast to stop its disastrous hemorrhage of jobs and to compete with the Sunbelt for new jobs. These economics explain why Louisiana and Texas have joined the oil industry in their implacable opposition to Carter's House-approved energy program.

It should be added that Louisiana consumes four times as much energy per capita as is consumed in Connecticut or Vermont, and Texas gobbles up three times as much as New York State, Rhode Island, New Jersey, New Hampshire or Massachusetts, on a per capita basis. The reasons are worth noting. Since energy is cheap in the Southwest, it attracts more manufacturing dependent on energy. And the more compact Northeast residential areas promote greater energy savings—both in homes and cars. New Yorkers consume less gasoline per capita than do residents of any other state (330 gallons) and Massachusetts is next, with 397 gallons per person. By contrast, Texas uses 610 and Arizona 536.

Put differently, there is a greater potential for reducing energy consumption in the Sunbelt than in the Frostbelt. Therefore, there is a national interest in boosting oil and gas costs dramatically where they are very low. That would provide an incentive for southern manufacturers to switch from using precious natural gas as a boiler fuel, to using coal.

President Carter has said that, since the 1973 oil price increase, virtually every major western nation—Britain, France, Italy, Germany—and Japan as well has reduced its consumption of imported oil. "Meanwhile, although we have large petroleum supplies of our own, and most of them don't, we in the United States have increased our imports of oil more than 40 percent," Carter said. Our imports will cost $45 billion this year, or $700 per family. "Every $5 billion increase in oil imports costs us 200,000 jobs," he said.

Now it has become clear, as a result of developments this week, that the Senate conferees were willing to acecpt the oil equalization tax—provided the House is willing to accept some of the Senate's tax credits. From a Northeast perspective, is that a reasonable compromise?

Not necessarily. The Senate bill irresponsibly includes $40 billion of tax credits, and no new tax to cover the cost. Even if the Senate accepts the $12 billion wellhead tax, it would be more than consumed by the Senate Christmas tree of tax credits. The House version is very careful to rebate all of the wellhead tax to consumers in its first year. The price of all oil products will thus rise, but the inflationary impact of the new tax is eliminated. That is important, with an $8.3 billion increase in Social Security taxes looming ahead.

Furthermore, the 50 million people who live in the states from Maine to Pennsylvania stand to gain in two ways from the House version of the bill. First, there is a home heating oil rebate worth $1 billion to the Northeast, offsetting the entire price rise for these consumers.

Second, every citizen would get an energy rebate ranging up to $50 per person. In aggregate that would be worth more to the Northeastern states, since we use less oil per capita; the result would be a net bonus of $300 million to the Northeast.

However, some of the Senate tax credits are seductively attractive. Sens. John Durkin (D-N.H.) and William Hathaway (D-Maine) proposed a tax credit for home heating oil customers that would provide between $347 million and $1.3 billion more than the House version (depending on how much Mideast oil prices rise). However, none of Durkin's benefits would go to schools or nonprofit or public institutions, since they pay no taxes. The House measure therefore remains better.

Sen. Abraham Ribicoff (D-Conn.) has suggested that an energy tax trust fund be used to finance the research on alternativve energy sources and subsidize mass transit. These are both valid Northeastern needs. However, the bill is not clear how to divide the money. More important, it would not offset rising oil prices with a rebate.

Finally, Sen. Russell B. Long (D-La.), chairman of the committee that created the Senate version of the energy package, proposes various costly credits to oil companies for exploration, and more to industries that must convert to coal. These measures are getting increasing support in the Congress and the administration.

However, the House conferees ought to hold as firmly as possible to their version of the bill. It provides incentives for conservation, has minimal inflationary impact and provides reliefs for the Northeast. Some concessions might be made to industry, as long as the bulk of the oil equalization tax is returned to consumers.

NEW HOPE FOR AMERICANS IMPRISONED IN BOLIVIA

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. HANSEN. Mr. Speaker, Americans imprisoned in Bolivia have made great progress in getting their cases resolved during the past few months after a long and frustrating delay. There is still much work to do to secure justice, provide relief, and end unreasonable delays, but I am much encouraged that the wheels are finally in motion and proper leadership is stepping forward to accomplish this.

To illustrate the progress to date and compliment the initiative of our new Ambassador to Bolivia I submit the following press release and letter for the RECORD:

PRESS RELEASE

WASHINGTON, D.C.—Congressman George Hansen verified with the U.S. State Department and Bolivian Embassy today that a decision is expected from a lower court within a week regarding Tom McGinnis of Idaho Falls.

Hansen Monday evening attended a reception at the Bolivian Embassy where he discussed the prisoner matter with Ambassador Crespo regarding McGinnis who has been in a Bolivian prison for 18 months and who has been recommended for absolution (no prosecution) but must await court action on the matter.

The Idaho lawmaker pointed out that a lower court decision whether of innocence or guilt must then be reviewed by the Superior Court. "It is a tedious process but hopefully the major hurdle will soon be behind us."

Hansen said, "McGinnis is one of six Americans currently being held for completion of judicial review after government prosecutors have acknowledged that there is insufficient evidence for prosecution."

"Even though the release of Tom McGinnis was my main reason for traveling to Bolivia during the Labor Day period of September, I also went as an emissary for other concerned Members of Congress to assist any and all Americans held there," Hansen stated." The visit has paid off very well with eleven Americans now having been released during recent weeks."

"Hopefully the six not considered guilty by the prosecutors and three others due for conditional liberty (parole) will soon be free, bringing the total to 20 of the 41 known to be held in mid-summer," Hansen continued.

Hansen noted that three Americans have also escaped in recent weeks and not been apprehended.

The Idaho Congressman said he has also learned that a negotiating team left for Bolivia last Saturday comprising a Deputy Asst. Secretary of State and an Asst. Legal Advisor who will work with Embassy officials to effect a possible prisoner exchange treaty agreement similar to a law recently passed by Congress regarding Mexico and Canada. "Bolivian officials had expressed an interest in this possibility during my visit and the new law makes possible further negotiations in this regard," Hansen said.

"One encouraging note is that Bolivians are no longer picking up small offenders and those who may be technically but unknowingly involved as in the case of Tom McGinnis. This should close the doors to many

future injustices such as the Idaho Falls youth is now suffering," Hansen concluded.

EMBASSY OF THE
UNITED STATES OF AMERICA,
La Paz, Bolivia, November 22, 1977.

Hon. GEORGE HANSEN,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN HANSEN: While we have not met, I know that you share one of my major concerns, the plight of American prisoners in Bolivia. I wanted, therefore, to write you to give you my private and personal impressions after one month as U.S. Ambassador to Bolivia and to report to you on what has been accomplished so far.

During my first month here I have visited all American prisoners, met with the prison governors, talked to many judges, prosecutors and defense lawyers. I have also had two long meetings with President Banzer on the prisoner issue, three with the Minister of Interior, and numerous ones with other officials. What is clear to me from this experience so far is two main conclusions.

1. While I and my staff have to continue to press acceleration of the judicial process in individual cases, this alone is not enough; new avenues of relief have to be opened up.

2. This can be done, given the conviction of several key Bolivians that the system should be changed, if we go about it carefully.

What has happened in the last month is the following:

Foreigners receiving parole (8 Americans are up for parole) will be allowed to leave Bolivia, despite previous practice. Our first test case was paroled last Friday and should be on the plane this week.

The Bolivian Cabinet has appointed a commission of distinguished jurists and officials to recommend reform of the narcotics law. This offers great hope for enhancing due process, the concern you have correctly highlighted.

The U.S. and Bolivian Governments have agreed to negotiate a prisoner exchange treaty, such as we have with Mexico. We will begin negotiations next week and hope to have the treaty before the Senate by January.

Pursuit of these initiatives, plus continued effort to accelerate individual cases, offers new avenues of relief for virtually every U.S. prisoner in Bolivia. I am moving very quickly on all of this.

The climate in which we are operating here, however, requires great care. President Banzer has called for elections in July and the usual teapot tempests and dèbates of a pre-electoral period already dominate Bolivian political life. On the prisoner issue, the main fact is that there is absolutely no sympathy among the Bolivian public and press for American prisoners on narcotics charges. Obviously in this environment a public, high-pressure push on the prisoner issue is going to generate a lot of counter-pressure on the government not to budge. Nevertheless, the required good will is there if we can move quickly and carefully now. You can be assured that I will do this.

I had a good long chat with Tom McGinnis, who is in reasonable spirits and rather optimistic on the basis of the prosecution's recommendation of absolution. I am optimistic as well although, as you know, under the Bolivian system of justice, it is the lower and superior court judges who make the finding on the facts and on whether absolution is warranted. I expect the lower court decision any day now and believe the superior court review should come shortly thereafter. I'll try to keep you informed.

If you have any suggestions or concerns regarding my efforts here please let me know. You can be assured that I and my staff will give this problem all we have.

Sincerely yours,

PAUL H. BOEKER,
Ambassador.

SOLDIER'S PHILOSOPHY

HON. W. R. POAGE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 29, 1977

Mr. POAGE. Mr. Speaker, recently I came across a statement of a soldier's philosophy by my good friend, Gen. Bruce C. Clarke. I think this is so well put that I wanted my colleagues to have the opportunity to read it.

The statement follows:

THE PHILOSOPHY FOR A SOLDIER

(By Gen. Bruce C. Clarke, U.S.A., Ret.)

After being a war-time Army Private and a peace-time Corporal in the National Guard, I competed for an appointment and entered West Point. Upon graduation, I served from 2nd Lieutenant to General over 37 years; during two wars and three periods of peace.

During these periods there were times of poor pay and allowances, separations from family, slow and rapid promotions, and times of great fluctuations in the prestige of a soldier, among our own relatives and the American public. There were times of excitement of battle—victories and disappointments—good and poor assignments, etc. In spite of these, the responsibilities to my country, the Army and to my men constantly increased—as they did to my family. My family understood such things well and were mentally adjusted to them and gracefully accepted them.

Early in my soldier career I ran across and memorized this verse directed to the British soldier and the British people:

"In times of danger, not before,
God and the soldier we adore,
The danger gone, and all things righted
God is forgotten, and the soldier slighted."
(Author Forgotten)

This could well be said to apply also in the United States.

The periodic variations in the attitudes of the public between adoration and slighting of God and the soldier are very great.

In our Nation we have made four soldier war heroes Presidents—Washington, Grant, Theodore Roosevelt, and Eisenhower. Our great Commander in World War I might well have been President had he so aspired.

The Korean and the Vietnamese Wars produced no soldier President. These wars were not allowed to be won by our people.
